

How to update CCleaner to the latest version

Updating CCleaner to the latest version after a period of use allows users to access new features. Updating CCleaner to the latest version also enhances software and computer security, ensuring the cleaning process runs smoothly.

CCleaner is considered one of the best computer system cleaning and optimization software programs currently available. Using CCleaner helps users clean their computers , delete junk files, and perform deep cleaning, thereby freeing up hard drive space and allowing the computer to operate at its best performance. You should proactively **update CCleaner to the latest version** to access new features. Besides cleaning as mentioned, the software also helps you delete old browsing history , allowing your browser to start up faster and load pages more efficiently.

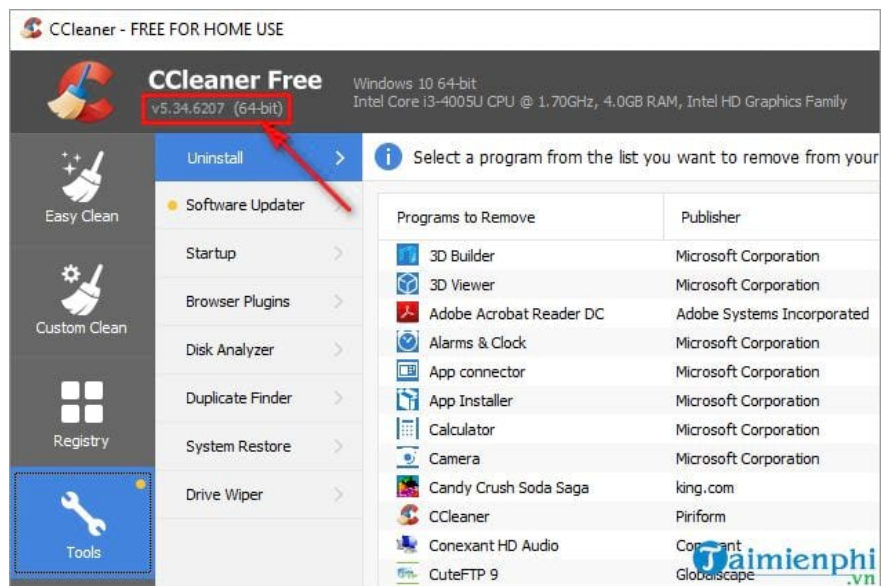

Update to the latest CCleaner version for your computer or laptop.

Instructions on updating CCleaner to the latest version.

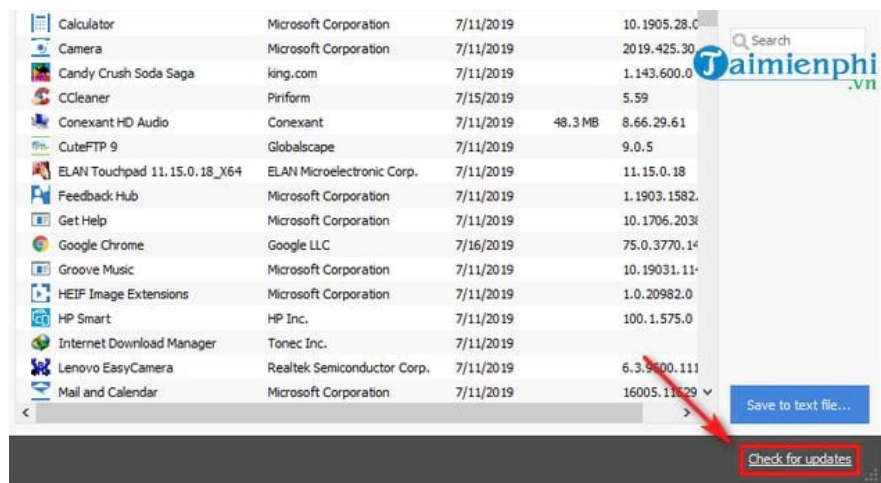

To check the version of CCleaner you are using and to **update to** the latest version for your computer or laptop, follow these steps:

Step 1: CCleaner updates will be performed after you **have installed** and used CCleaner for a while.

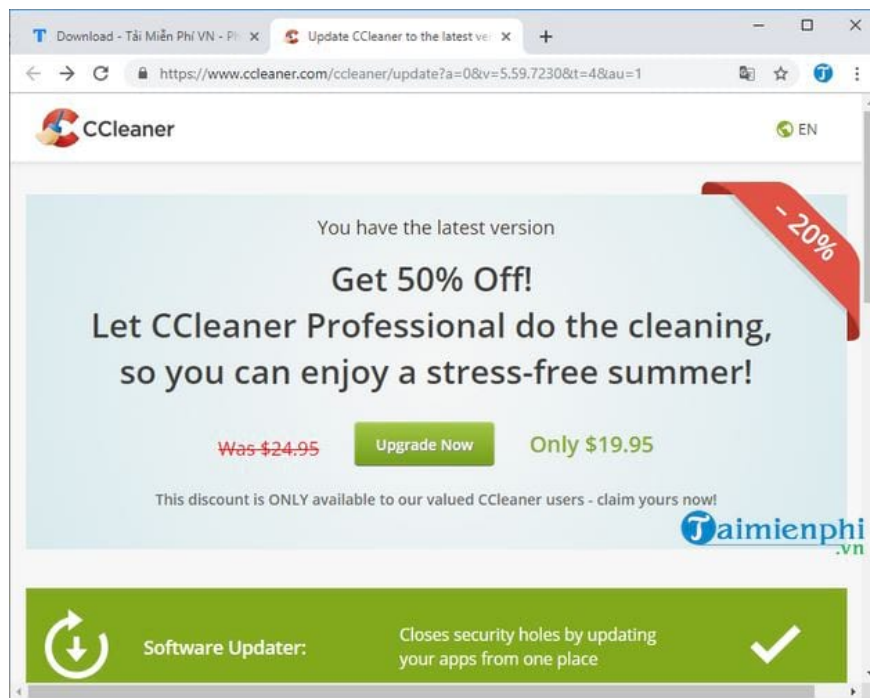

Open **the CCleaner app** you're using. Look at the top left corner near the CCleaner icon; you'll see a line of text. As shown in the image below, it says **v5.34.6207 (64-bit)** -> This is the current version of CCleaner you're using.

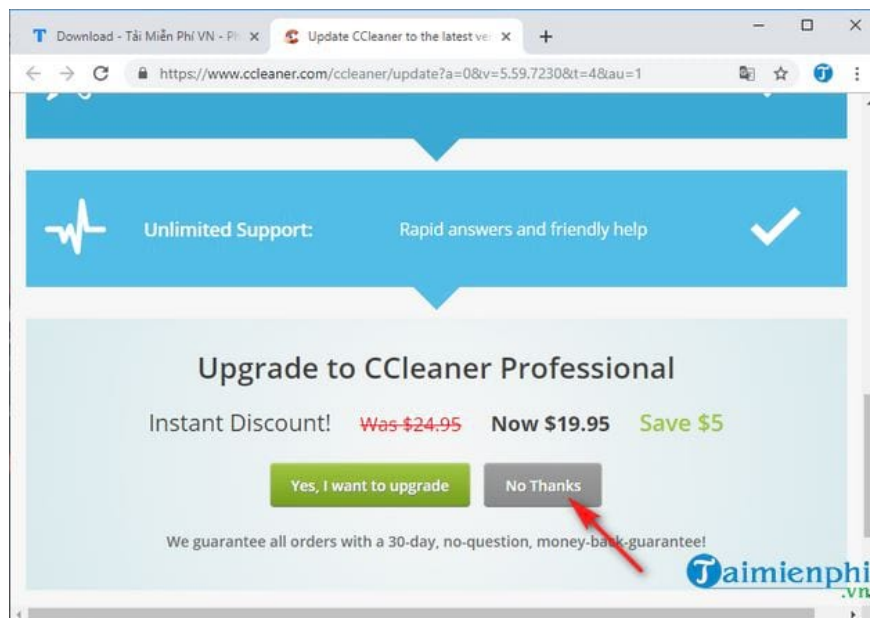

Step 2: To update **CCleaner** to the latest version, click on "**Check for update**" in the bottom right corner of the software interface to check for and download the latest **version of CCleaner** to your computer.

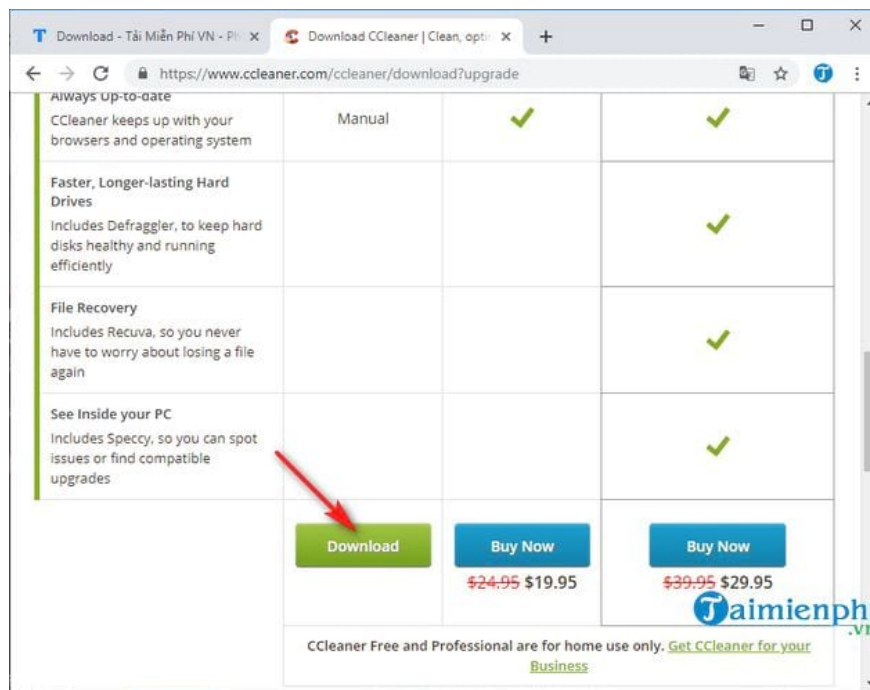

Step 3: Immediately, you will be taken to the **CCleaner** homepage -> here you will find out how much **the CCleaner Pro version costs**. If you want the paid **Pro version**, click on **Upgrade Now** to upgrade, and of course you will have to purchase a **licensed version of CCleaner**. The current price displayed on the homepage is \$19.95.

If you don't want to upgrade to the Pro version right away and prefer to update to the new version for free, scroll down the webpage and select "**No Thanks**".

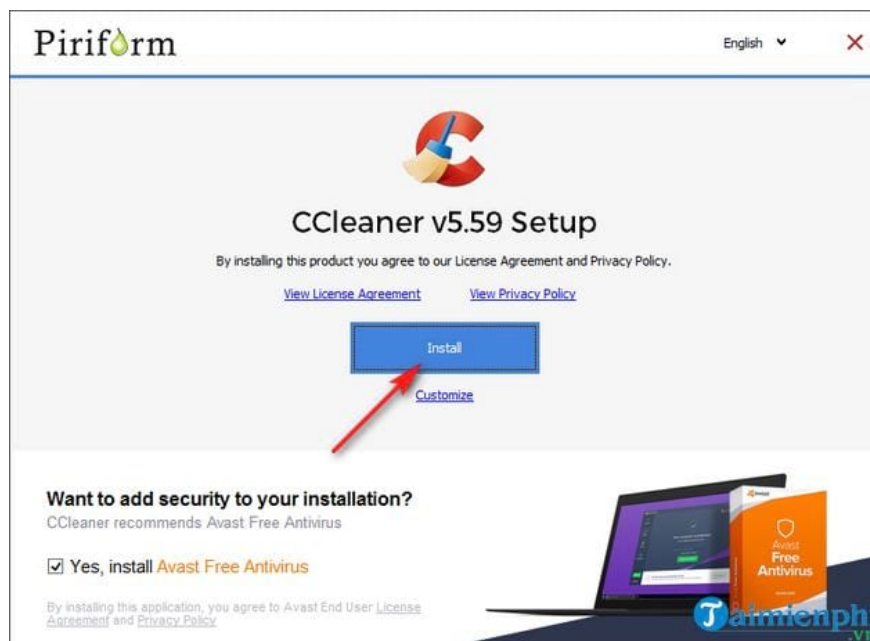

Continue scrolling down -> then click **Download** to download the latest version of CCleaner to your computer -> then install and update to the latest version of CCleaner.

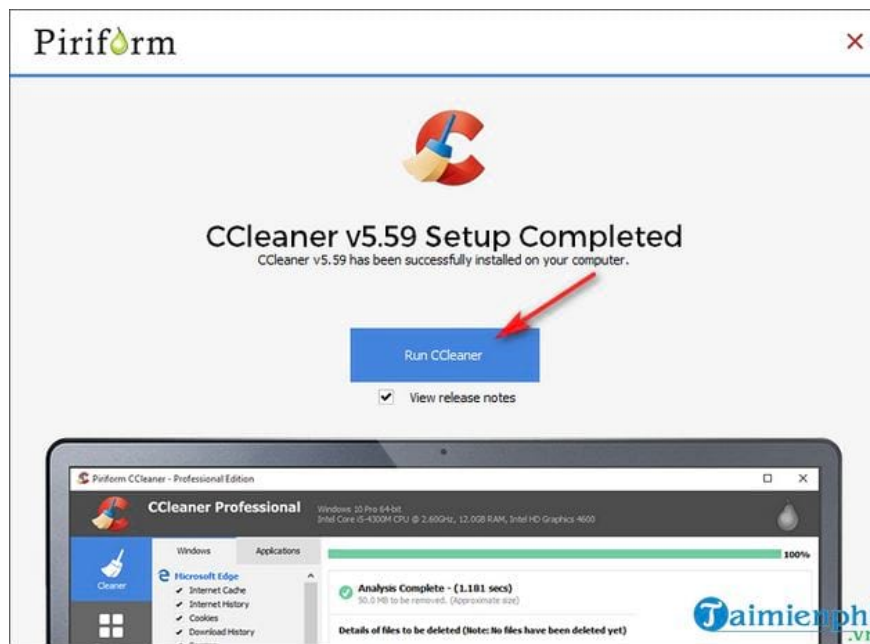

Alternatively: Update to the latest version on the TipsMake website.

You can download **the latest version of CCleaner** from TipsMake here: [Download CCleaner](#) -> This website always updates the software with the newest, fastest, and safest versions for internet users.

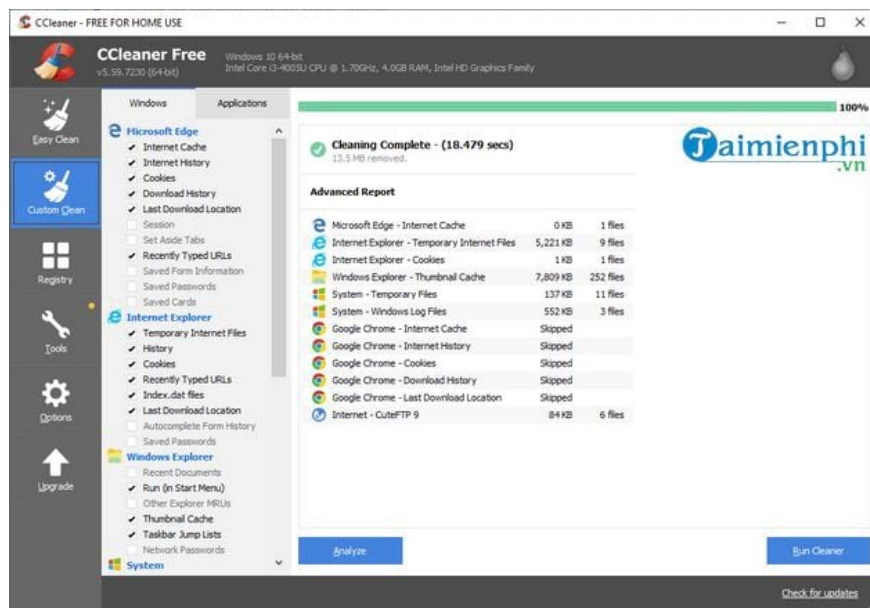

Step 4: After downloading **the latest version of CCleaner**, double-click the software to install it. The installation process is quite simple, with the software interface displayed as shown in the image below. Click "**Install**" to begin the installation.

Just wait a few minutes for the installation process to complete -> then, click on **Run CCleaner** to open and use the software.

The image below shows the CCleaner v5.59.7230 interface after you have just completed the **Analyze** command .

The above is a guide on **updating CCleaner to the latest version**, giving you an overview of how to use this software when you need to upgrade to a new version. Additionally, you should proactively enable or **disable automatic updates in CCleaner** so that the software can quickly access new technologies and features, allowing you to be more proactive in updating to the latest CCleaner versions for your computer.
