

How to update Windows 10 to Windows 10 May 2019 (1903)

When updating to the latest Windows 10 versions, users will experience many new features, especially fixing some bugs that remain in the old version.

Microsoft has released Windows 10 May 2019 update (version 1903) on May 21, 2019. This is the 7th feature update for compatible devices, offering a range of enhancements and a number of new features to enhance the overall experience.

Although this version doesn't change much in the way you use Windows 10, it introduces some new changes and features such as light theme and **Reserved Storage** dedicated storage for updates.

Windows 10 May 2019 update also introduces Windows Sandbox feature to run untrusted applications safely without harming the device. The **Recommended Troubleshooting** feature helps the system run smoother by automatically fixing common problems. Finally Windows 10 Home users can also pause the update. The search feature has also been changed to a standalone feature that can search the entire device. Now you can let the system automatically adjust operating hours and get more features from this update.

1. Video "on hand" Windows 10 May 2019

Similar to previous versions, Windows 10 (1903) will be released gradually, starting from newer devices and then expanding to other devices. Typically, most devices will receive automatic updates within the first few weeks after Microsoft releases, but it is expected to take several months before updating features to all users. However, if you want to receive this update immediately, you can manually upgrade it in the ways in this article.

Instructions for updating Windows 10 to Windows 10 May 2019 (1903)

1. How to download Windows 10 May 2019 update using Windows Update
2. How to download Windows 10 May 2019 update from Microsoft website
3. How to download Windows 10 May 2019 update using Update Assistant
4. How to download updates Windows 10 May 2019 use Media Creation Tool

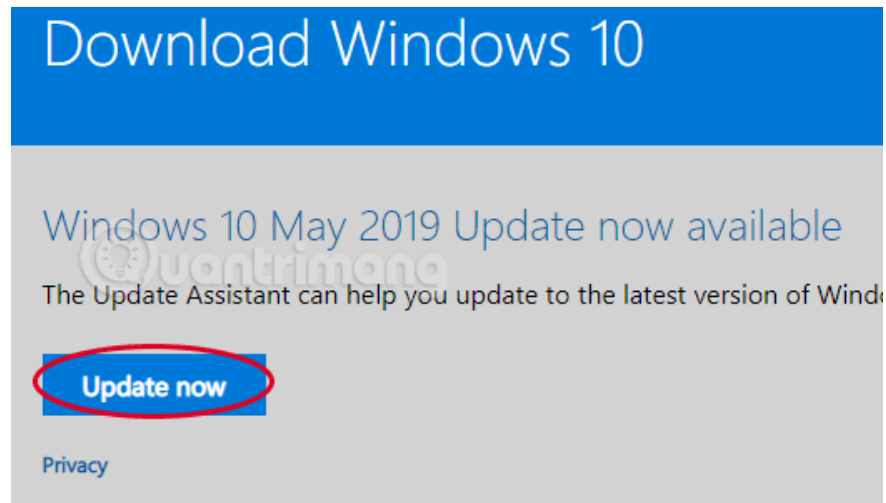

1. How to update Windows 10 May 2019 with Update Assistant

This way is not convenient by checking Windows Update, but many users rated it as more stable, less prone to errors. Especially, it can be updated to jump, from version 1803 to 1903 straight (I tried on 1 machine to test this

case).

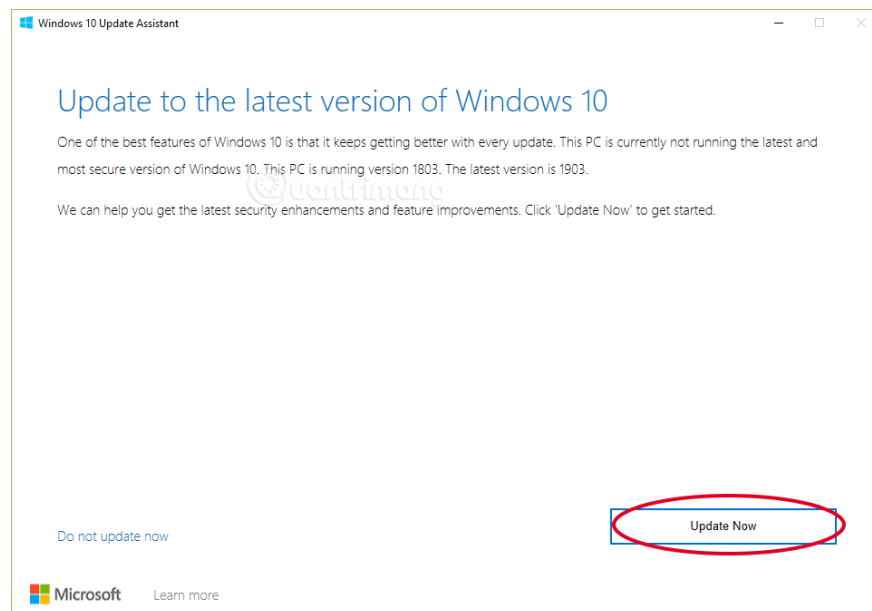

To update Windows 10 May 2019 with Windows 10 Update Assistant you do the following:

Step 1: Visit the Microsoft support website and click **Update Now** , the file save window opens, you select the folder to save the file (about 6MB).

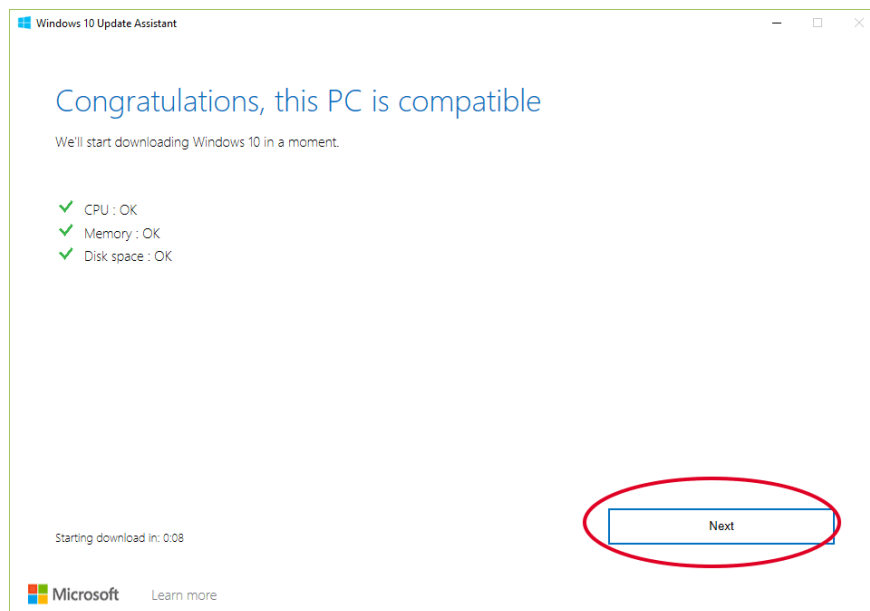

Step 2: Download and run the **Windows10Upgrade9252.exe** file.

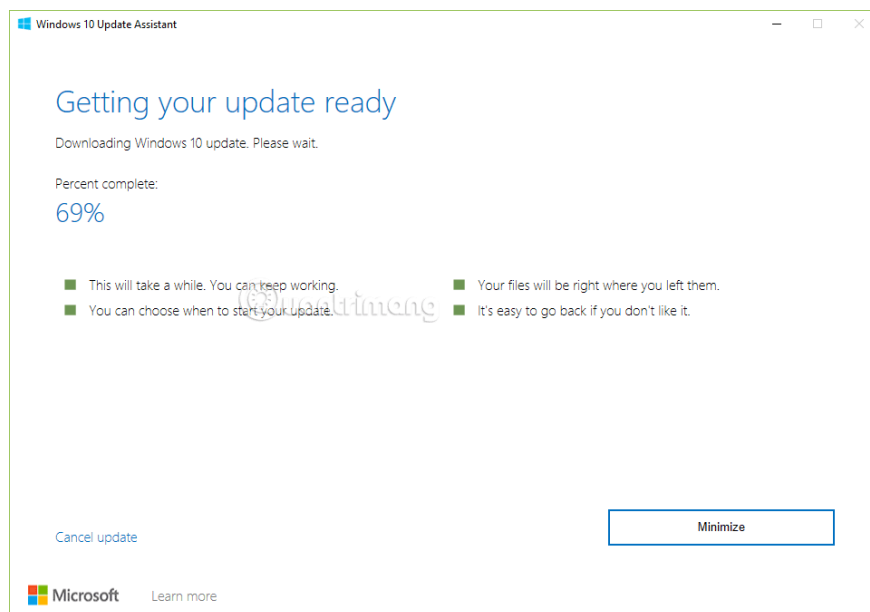

Step 3: In the Windows 10 Update Assistant window just opened, click **Update Now** .

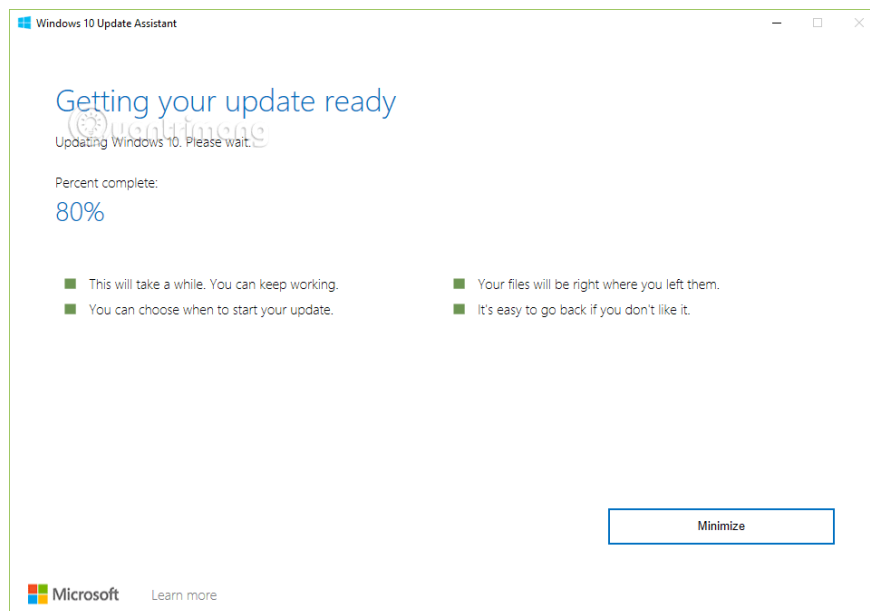

Step 4: Windows 10 Update Assistant will check if the device is compatible with the update. If the conditions are met, you will see 3 green check buttons, click **Next** to continue.

Step 5: The update assistant will download the files needed for the computer update process. Depending on the network speed, this step is fast or slow. It took me nearly 1 hour.

Step 6: Assistant to update the computer to Windows 10 May 2019. This step will be deviant to 80%, then start slowly like slugs, about 2 hours to finish.

Step 7: Restart the computer and wait for it to configure the new update, about 1 hour away.

During the run, the first 6 steps, you still work on the normal computer. When step 6 ends, the computer will need to reboot to configure the update, during which time you will only see a blue screen, display% and do nothing. You can restart always or schedule to restart later. Restarting the computer is complete and you have already updated it.

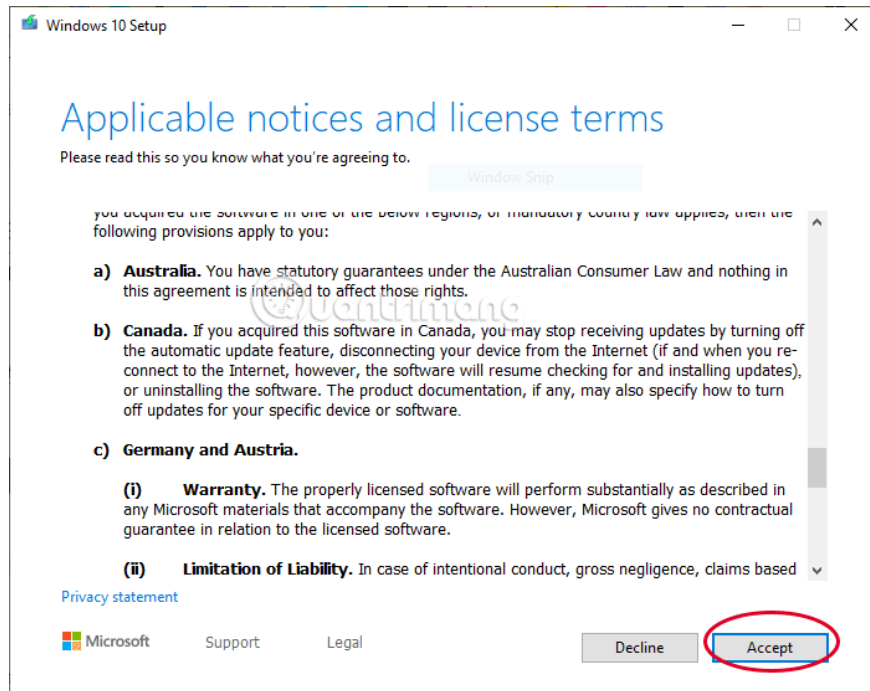

Since it is just an update, all data, applications and most of your settings will remain the same.

2. How to update Windows 10 May 2019 by Media Creation Tool

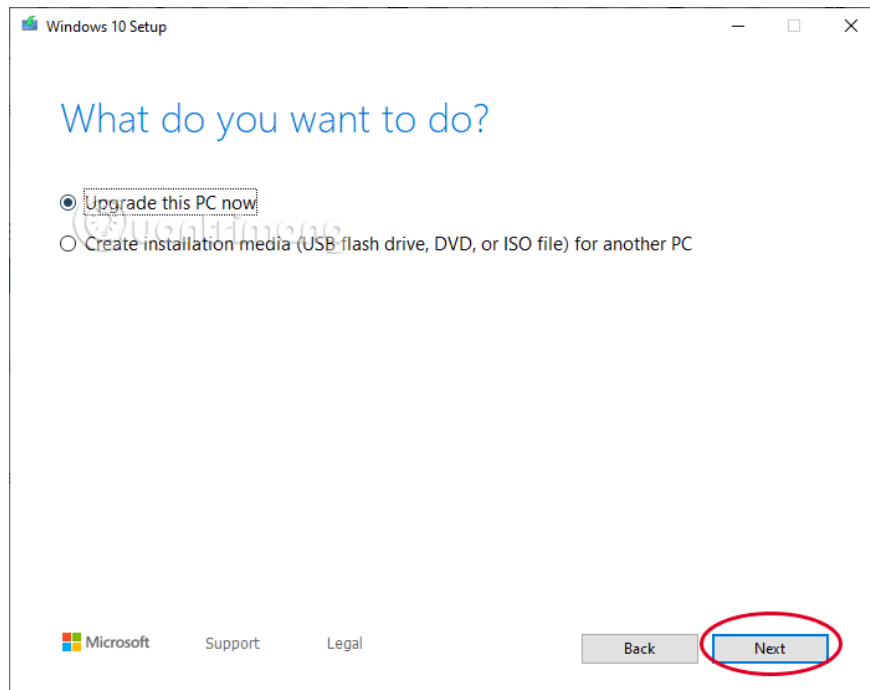

If your device is compatible with a new feature update, but has problems with Windows Update, you can use the Media Creation Tool update tool to install Windows 10 May 2019 updates on your computer.

To install a new version of Windows 10 using the Media Creation Tool, follow the steps below:

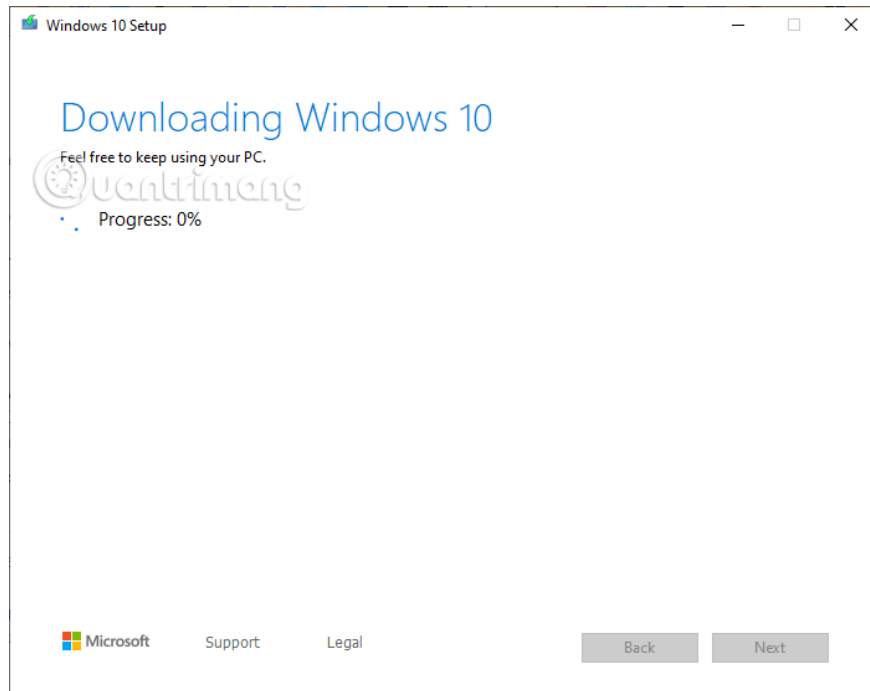

1. Open Microsoft support website, link in item 1.
2. Click the **Download tool now** button.
3. Double-click the **MediaCreationTool1903.exe** file to run the support tool.
4. Accept the terms of use, click **Accept** .

1. Here you click **Upgrade this PC now** to update your current computer or select Create installation media (USB flash drive, DVD, or ISO file) for another PC to create USB boot or download Windows 10 ISO file to install for another computer . Then click Next.

1. Next the tool will download the Windows 10 update file to your computer and proceed with the update. You follow the instructions on the screen.

Media Creation Tool will install Windows 10 version 1903 on desktop, laptop or tablet without losing your personal files, settings and applications.

3. How to download Windows 10 May 2019 update using Windows Update

The safest way to receive the May 2019 update is to wait until you receive the update message on the device. However, you can wait for a while and still haven't received the update. So if you want to get quick updates, users can force the computer to update using Windows Update when an update is available.

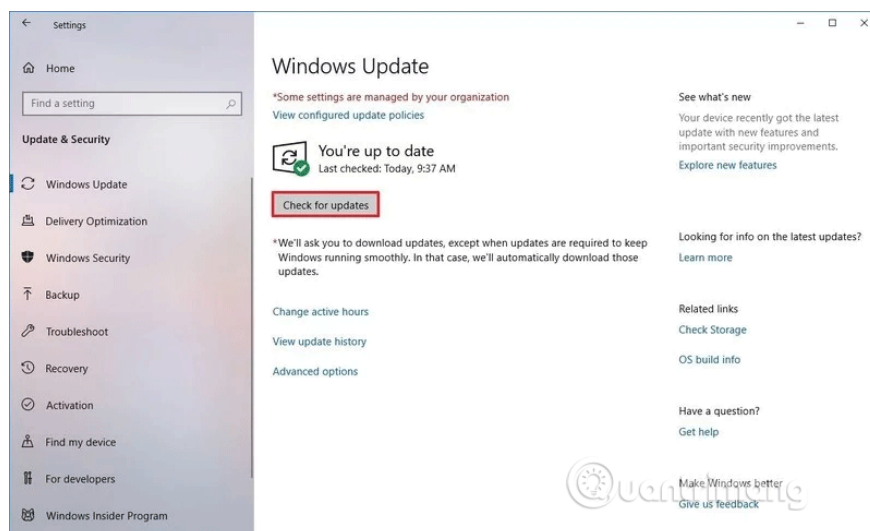

To update to version 1903 using Windows Update, follow these steps:

Step 1 . Open **Settings** .

Step 2 . Click **Update & Security** .

Step 3 . Click **Windows Update** .

Step 4 . Click the **Check for updates** button.

Step 5. Click the **Download and install now** button in the **Feature Update to Windows 10, version 1903** .

Step 6. Click the **Restart Now** button after downloading the device update.

When you have completed the above steps, the new version will be downloaded and installed automatically, just like installing a quality update, only with a longer update time.

If you use Windows Update and your device does not see an update, it may be because Microsoft blocked it because the new version is still not compatible with your hardware or software configuration.

If the above methods don't work, you can use the Media Creation Tool to create a bootable USB drive, perform a new installation of Windows 10 with the latest features and changes.
