As you know Windows 10 is currently the latest version of Windows at the moment of Microsoft. Windows 10 is heavily upgraded in both features and interface, in addition to a lot of new features never before available. Because of that, many people using Windows 7 want to upgrade to Windows 10, especially if your Windows 7 is copyrighted, so when you upgrade to Windows 10 will retain the previous copyright. In this article, TipsMake.com will guide you how to upgrade from Windows 7 to Windows 10 standard and most accurate, please refer.

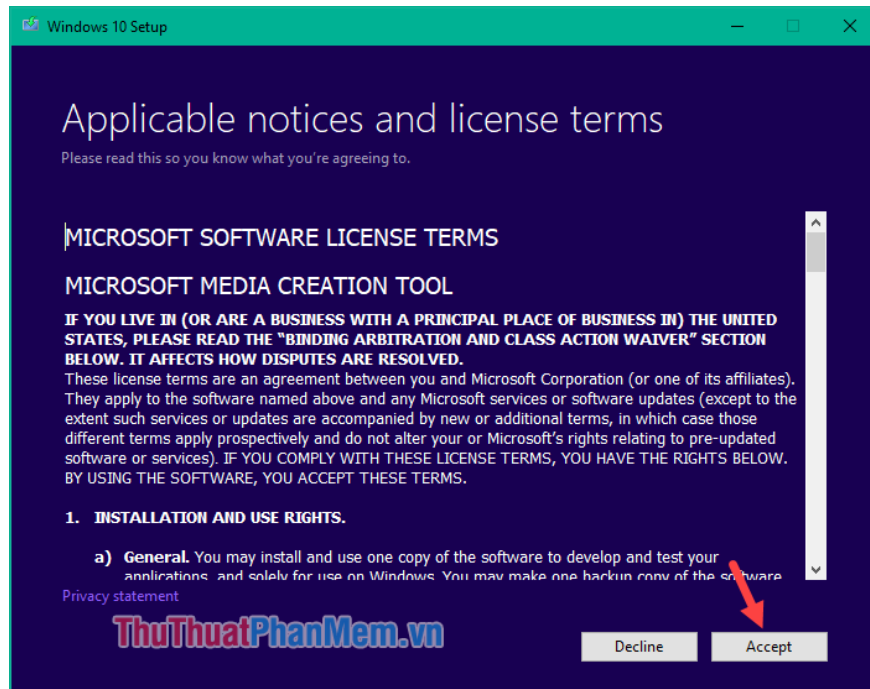

To update to Windows 10, we will use a tool called **Windows 10 installation media** . You can download this tool right at the Microsoft homepage link below:

<https://www.microsoft.com/en-gb/software-download/windows10>

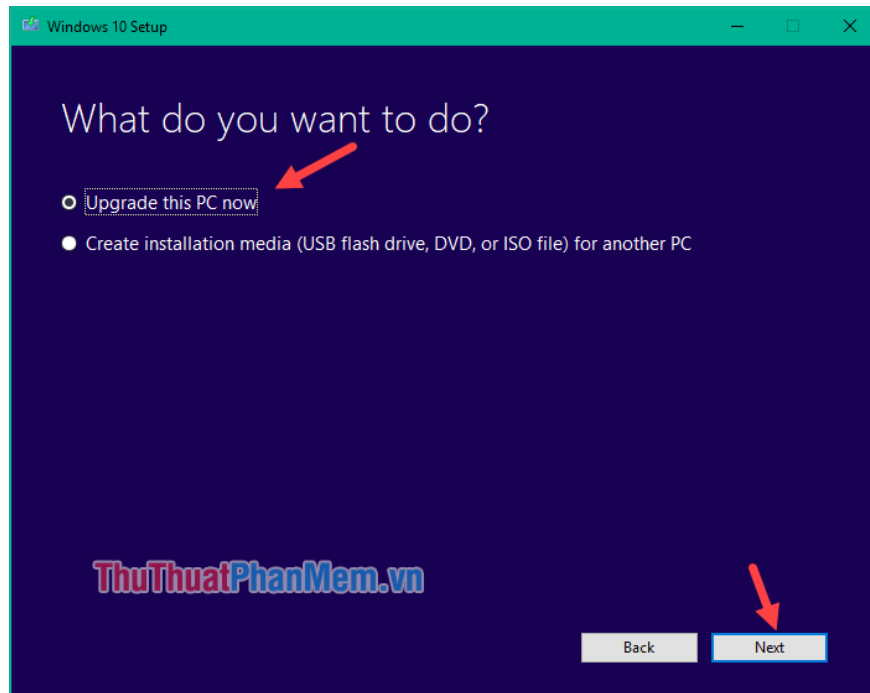

Step 1 : After accessing the link, select Download tool now as shown below:

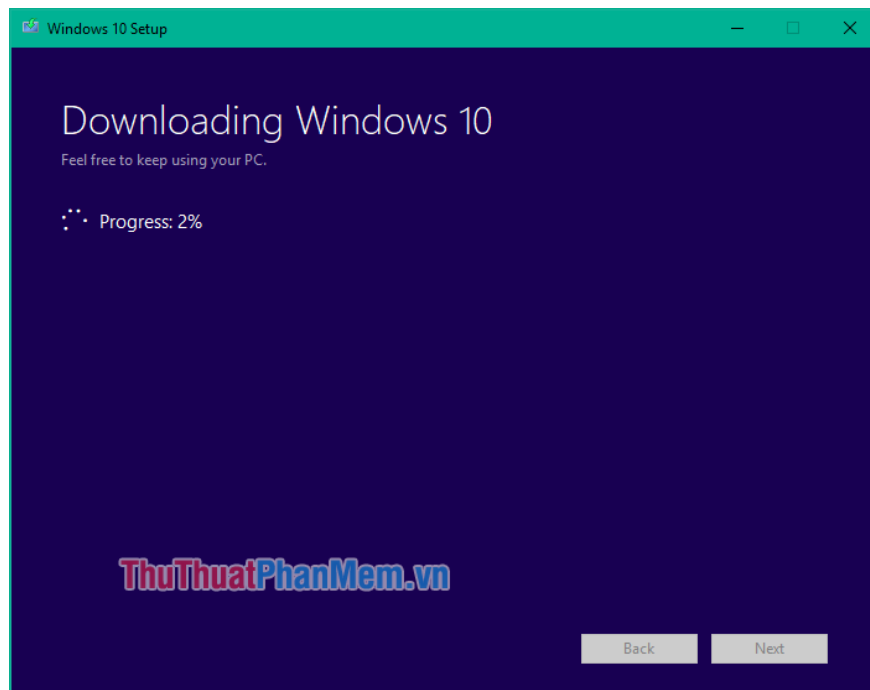

Step 2 : After downloading, double-click the file to open Windows 10 installation media tool. In the main interface, click **Accept** to agree with the terms.

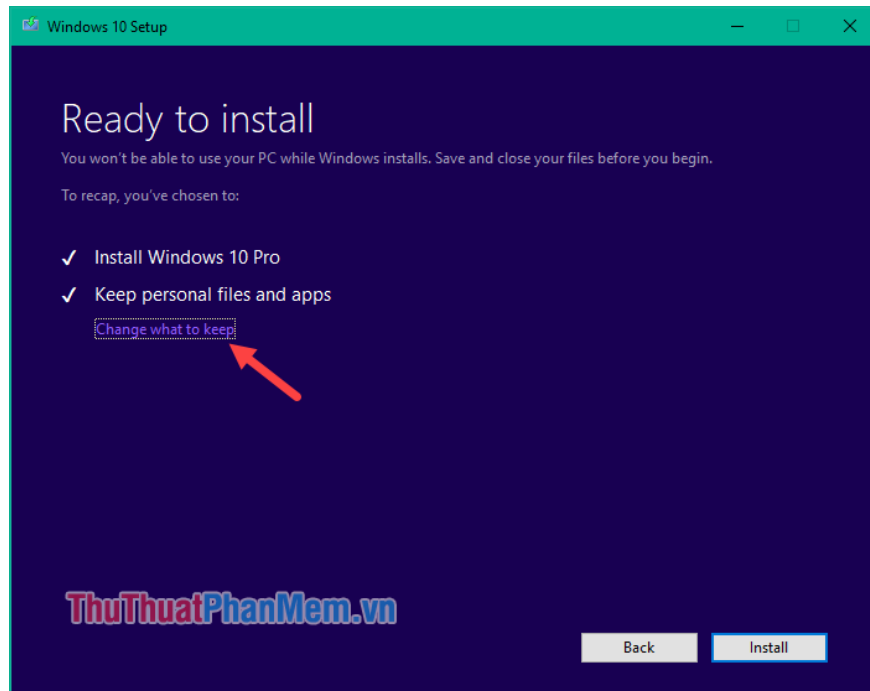

Step 3 : Choose **Upgrade this PC now** and then click **Next** .

Step 4 : The tool will now download Windows 10 to install, please wait patiently. The speed of trimming is fast or slow depending on the speed of your home network.

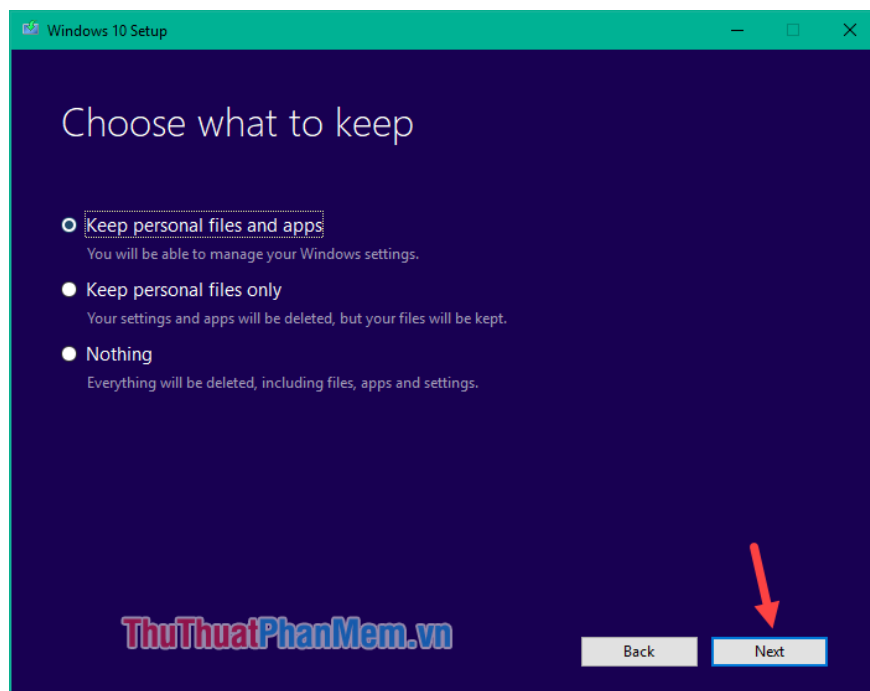

Step 5 : After the download is complete, there will be several automatic preparation steps to update the windows.

When the screen below appears, click **Change what to keep** to adjust what you want to keep.

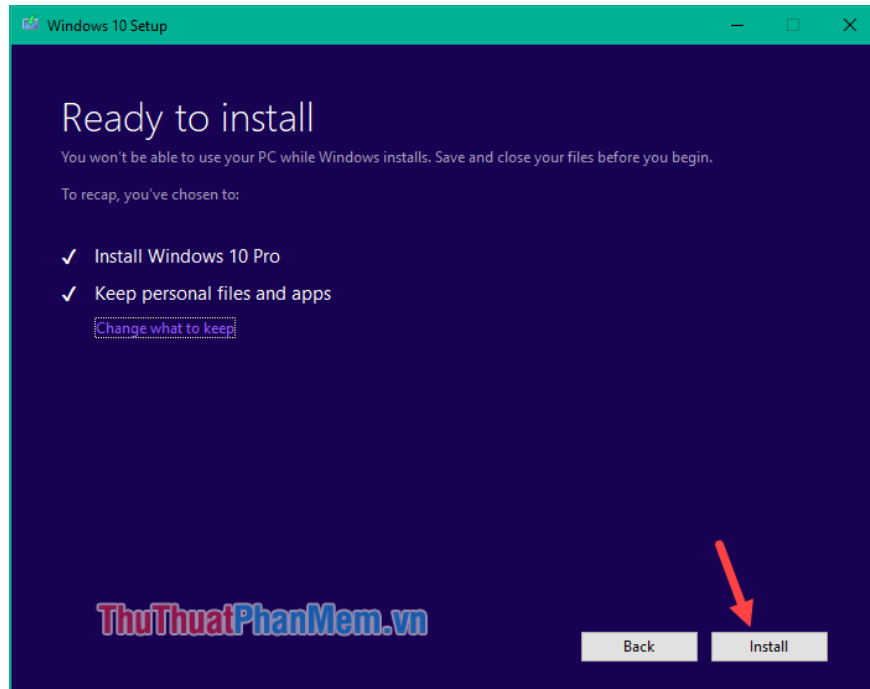

Here we have 3 options as follows:

1. **Keep personal files and apps** : Save everything like applications, settings and personal files.
2. **Keep personal files only** : **Keep only personal** data file, delete all applications and settings.
3. **Nothing** : Delete everything, your windows will look like new.

You choose one of three options then click **Next** .

Step 6 : Return to the previous window, click **Install** to start the installation process of Windows 10.

During the installation of Windows the computer will reboot a few times, you just follow the instructions.

Above is a tutorial on how to upgrade from Windows 7 to Windows 10 standard and most accurate. Good luck!
