

How to upgrade Skype without participating in the Insider Program

New Skype application version on Windows 10 with many features has been updated, but through the Preview Programs program.

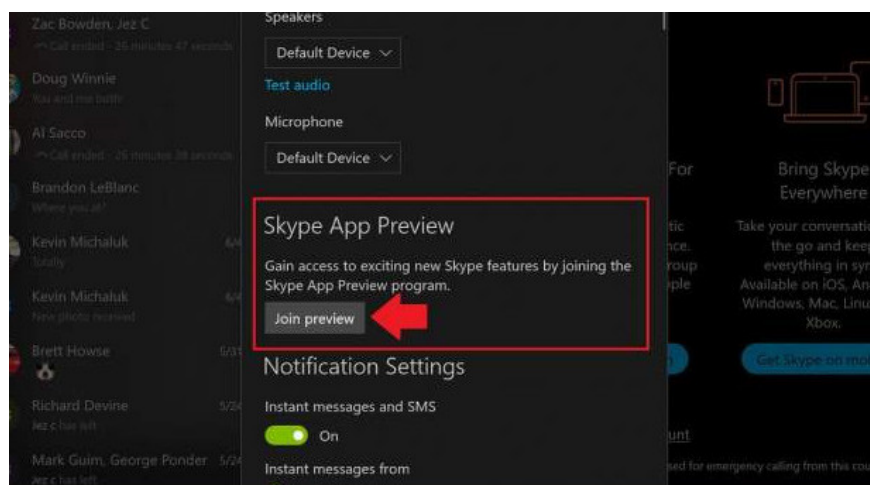

The Microsoft Preview Programs program will provide new features on the application so that participants can experience the application first. However, if you don't want to install new Windows builds for Fast Ring, Skip Ahead, but still want to try new versions of the application, just do a few simple things. This means we don't need to join the Insider Program to experience these applications. The following article will show you how to use the Skype version of the beta application.

1. How to uninstall Windows Insider Program Windows 10
2. How to join Windows Insider to download and experience the latest Builds?
3. How to install Paint 3D Windows 10 without the Windows Insider Program

Guide to experience Skype beta

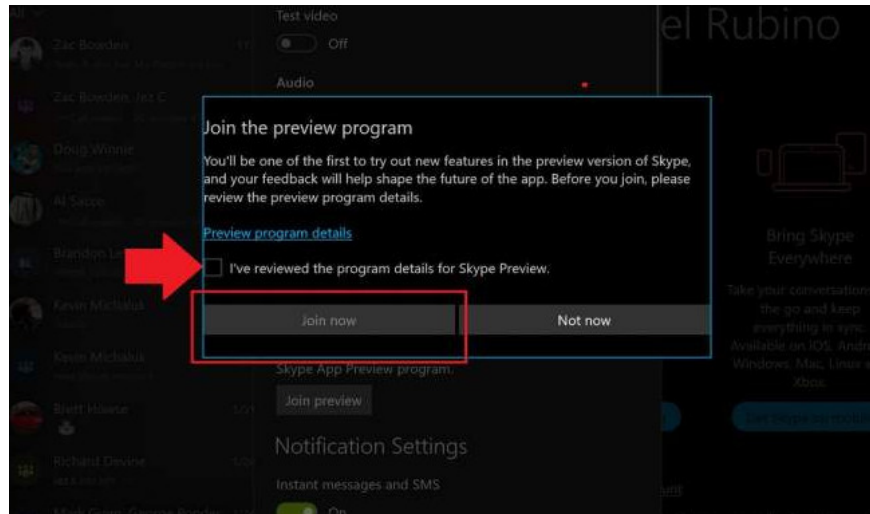

Step 1:

Open the Skype UWP application on your computer and then go to **Settings**, select **Skype App Preview** and then click **Join preview**.

Step 2:

You select the terms of participation then click **Join now** button and click OK.

Step 3:

Finally, we just need to access Microsoft Store to find the Skype application and you will see the app is up to the new version. The current new version is Skype 14.25.22.0 with many new features.

So, if you do not need to join Microsoft's Preview Programs, you can still experience upgrade beta applications with many features, like how to do with the Skype application above. We can apply this approach to other applications on Windows 10.
