Step 7: Click the video in the camera roll below the **Record** and **Live options** . Click **Record** if you want to record your video in the YouTube app too.

Select an existing video or record a new video to upload to Youtube

Step 8: When you select the desired video, the application will bring you to the interface **More details** . Here you click on the video to review. Add a **Title** and **Description** to your video.

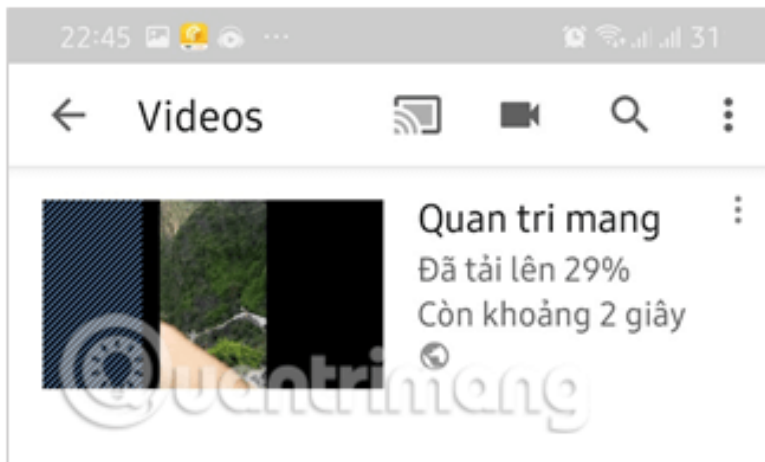

Add a Title and Description for the video that will be uploaded to YouTube from an Android device

Step 9: After you have completed the steps you just need to touch the **Upload** icon (the arrow icon to the right) in the right hand corner to upload the video.

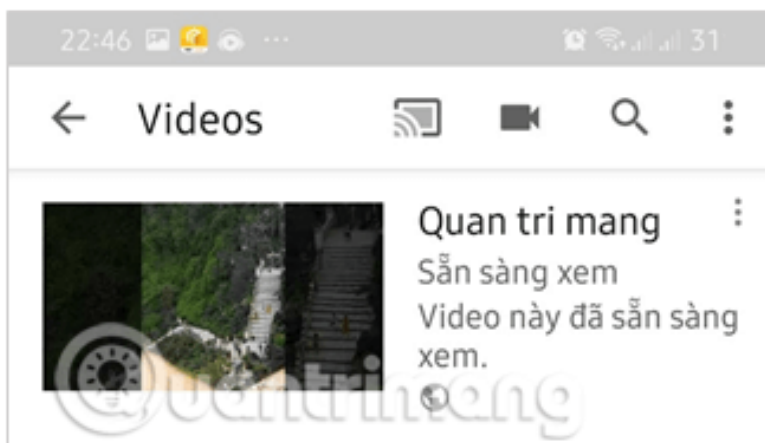

Select the upload icon to upload videos

Step 10: Wait for YouTube to upload your videos to the channel, the time will depend on the video size and your internet speed.

Wait for YouTube to upload your video to the channel

When it is completed, it will appear that this **Video is ready to watch** .

Notice This video is ready to watch

Method 2: Download, Upload videos from Android devices to YouTube quickly from the photo library

Step 1: Go to the **Photo Library** and select the video you want to upload.

Step 2: Touch the **Share** icon at the bottom left corner.

Step 3: After touching the Share icon (share) will appear options for sharing videos you like on YouTube, Facebook, Zalo, Messenger . Tap YouTube.

After this operation, you continue to perform the steps from step 8 as above on way 1.

The option to upload videos to YouTube

The most important thing when you want to upload a video to YouTube is a satisfactory video and don't forget to fill the title. However, there are a few other settings and options you should be aware of when using this functionality on the Android YouTube app.

1. **Description:** This is the text that will display on your video interface, below the playback window. Here, you should make notes about the video, about the content of the video, provide links to your other websites or social networking sites.
2. **Account:** If you have multiple YouTube accounts on the device, tap Account name to open the list and change the account that will upload the video.

công khai.

1. **Privacy:** Video display mode:
 1. **Public:** By default, all videos can be found and viewed by all users.
 2. **Unlisted:** Only those who have the link to the video can view, not appear in search results on YouTube or Google.
 3. **Private:** Only you can see and see results shown when searching.
2. **Location:** You can mark the location so the video can be searched by location and distance.

Display mode and location of videos uploaded to YouTube

There are more advanced settings, such as video age restrictions, but you'll have to visit YouTube's website with a computer to change it after uploading it using a mobile device.

How to adjust the length of the video

As you can see, shooting and uploading videos to YouTube is very simple, and this app is even more amazing as it allows you to adjust the start and end points of the video with a drag and drop right on the interface of **More**

details .

1. Keep the white dots on the timeline to drag and drop the video length as you like.
2. Click and hold on the white dots to enlarge the image in the video for more precise cropping.

Keep the white dots on the timeline to drag and drop the video length as you like

After editing the video length, please continue to fill out the information and click the Submit arrow to upload the video as the steps TipsMake.com instructions above.

Add effects filters for uploaded YouTube videos

YouTube now offers a number of effect filters, making your uploads look more diverse. To do this, do the following:

Step 1: Touch the **magic wand icon** in the upper right of the interface.

Magic wand icon to add filter effects to YouTube videos

Step 2: On the current screen that shows up the filters available on YouTube, you drag the slider to the left to see all these filters, select the filter you like.

Choose the filter that matches your interests

Step 3: Tap the magic wand icon again to hide the filters, continue to edit the information and click the **Submit** arrow to upload the video.

Add music to videos uploaded to YouTube with an Android device

In addition to simple video editing on, YouTube also allows you to add music to uploads extremely quickly. How to do the following:

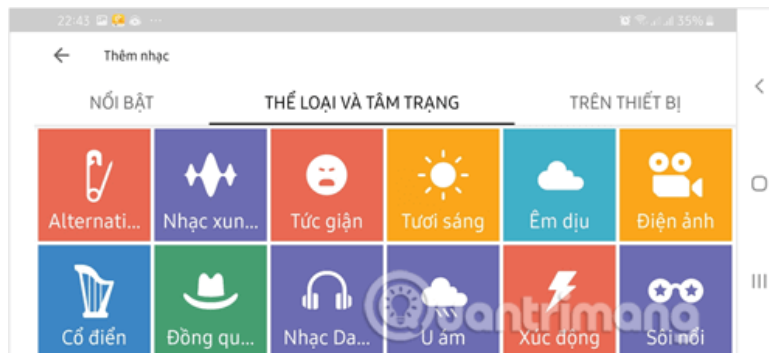

Step 1: Touch the **music note icon** in the upper left of the interface **Add details** .

Music note icon to add music for YouTube videos

Step 2: YouTube navigates you through the interface of **Adding music** , including 3 main tabs:

1. Highlights
2. Genre and mood
3. On the device

The interface of Adding music includes 3 main tabs

Click the tab you want to select music.

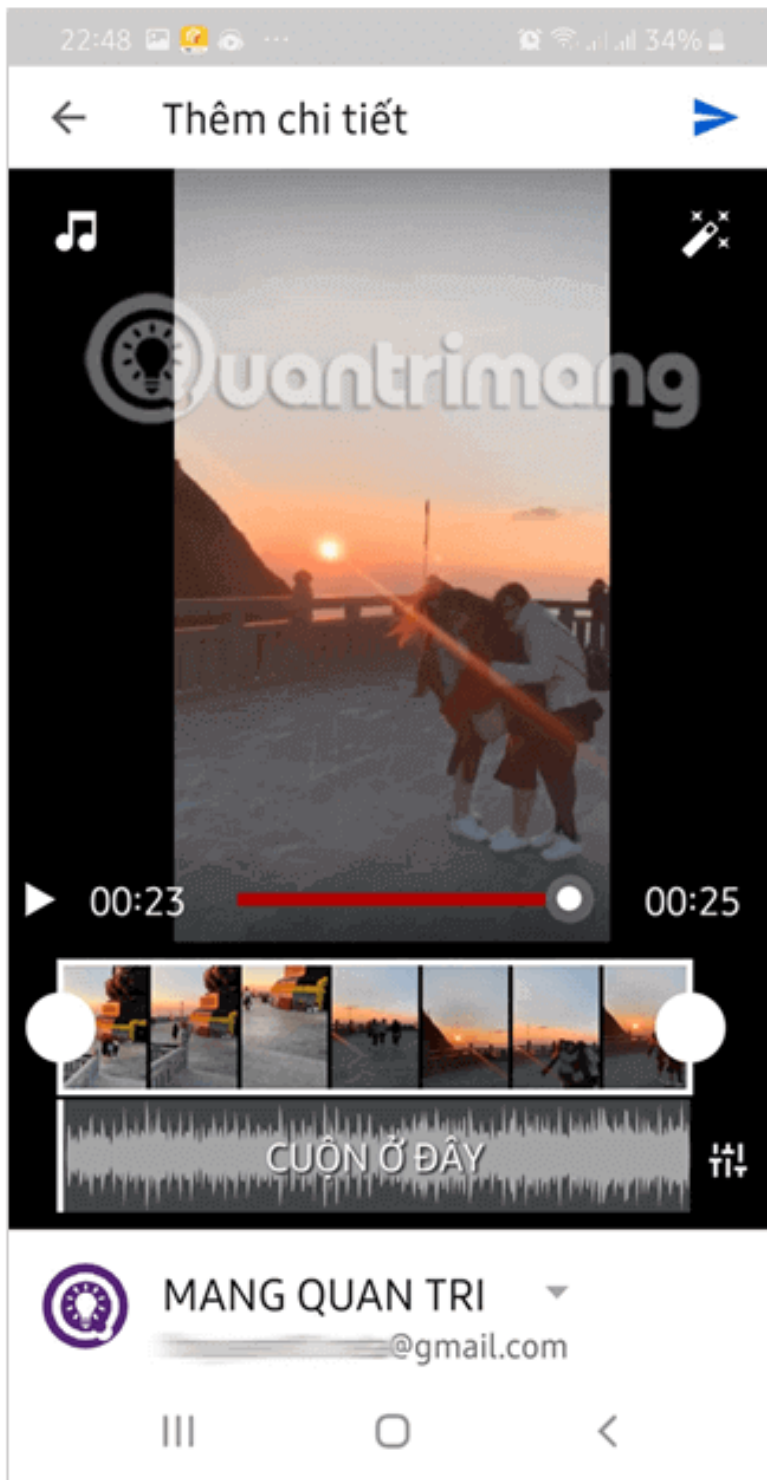

Step 3: To select a track, touch the plus button on the track.

Step 4: Adjust the music track to suit your video length.

← Lãng mạn

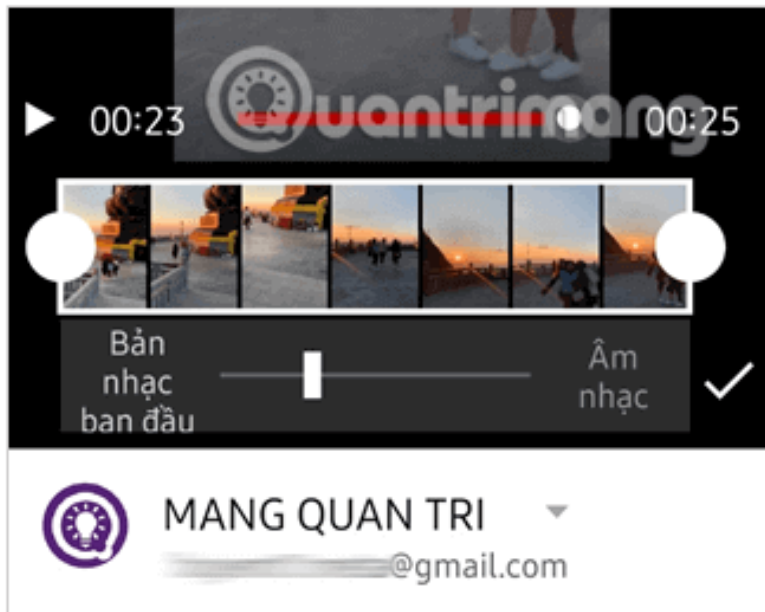

▶	Satin Sugar Huma-Hu...	02:34	+
▶	The Enga... Silent Part...	02:26	+
▶	Sweet as... Topher Mo...	03:20	+
■	Wedding... Jason Far...	01:41	+
▶	Succotash Silent Part...	03:27	+
▶	Standing... Silent Part...	02:51	+
▶	Sunflower Topher Mo...	03:56	+

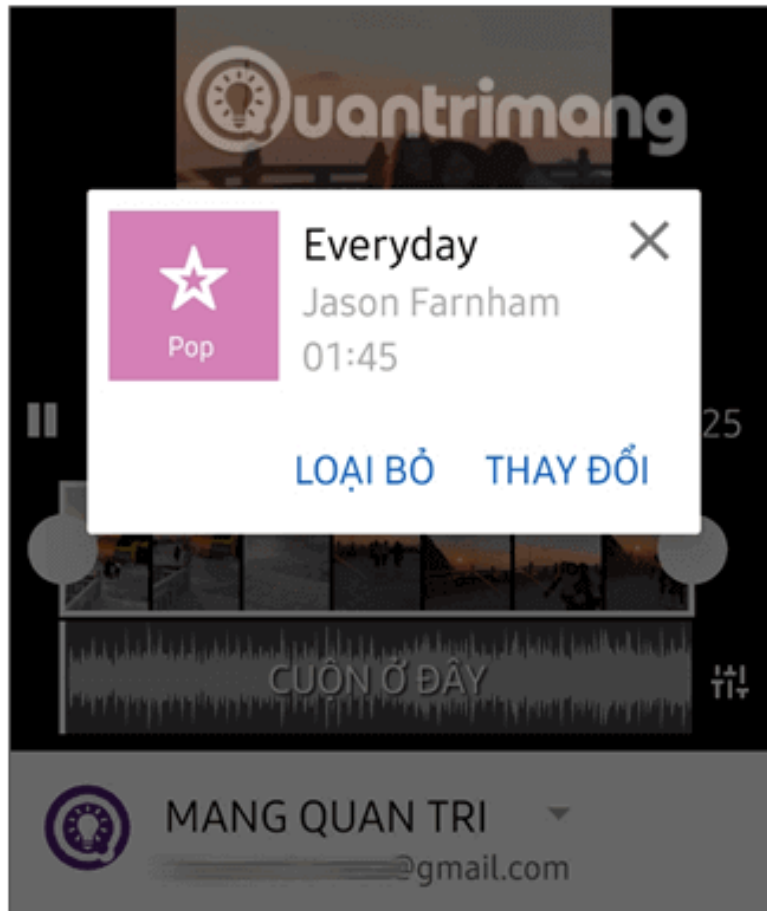

Add and adjust the music track to suit the video length

Step 5: Click the music level icon to the right of the inserted music to adjust the volume of the original video compared to the volume of the newly added music.

Adjust the volume of the original video compared to the volume of the music you just added

Step 6: If you want to change the track or delete the track, touch the note icon in the upper left of the interface **More details**, select the action you want is.

Actions change music or delete music

Step 7: After inserting the appropriate music, continue other editing operations, fill in the information, describe and upload the video is complete.

Simply that, you can easily upload your videos to the YouTube application. If you have any questions, don't hesitate to comment below the article for Quantrimang.
