

How to upload videos longer than 15 minutes to YouTube

How to upload videos of more than 15 minutes on your YouTube channel? In the article below, Network Administrator will guide you how to upload a video longer than 15 minutes on your YouTube channel.

By default, you can upload a video up to 15 minutes in length to your **YouTube** channel. If your video is longer than 15 minutes, how to upload it? In the article below, Network Administrator will guide you how to upload a video longer than 15 minutes on your **YouTube** channel.

1. On your computer, go to <https://www.youtube.com/upload> to upload your video to **YouTube** channel.
2. Click **Increase your limit** located at the bottom of the page, or visit <https://www.youtube.com/verify>.
3. Follow the steps to confirm your account. You can choose to receive a confirmation code by sending a message (on a mobile phone) or an automated voice call.

The maximum size of a video that you can upload to **YouTube** is 128 GB and the maximum time is 11 hours.

Upload videos before verifying the account

If you accidentally forget to confirm your **YouTube** account before uploading a video longer than 15 minutes. After the video upload process is complete you will receive a message to verify your **YouTube** account .

In the video manager you will see the words "**Rejected**" (the length of your video is too long). Click **Verify account** next to your video to verify your account.

After confirming your **YouTube** account, on the video manager, click on **Active this video** (enable video) to publish your video.

No "Increase your limit" link found.

If you do not find the "**Increase your limit**" link. You access Account Features page (page feature) and then tick the **Video** item with a longer amount to enable this feature.

Verified account but cannot upload long videos

If you have ever downloaded videos of long duration to **YouTube** but now do not, you need to check your account for copyright strikes and complaints.

You can only upload long-duration **videos** to **YouTube** if your account is in good standing according to the YouTube Community Guidelines and your content is not blocked by Global Content ID.

Video larger than 128 GB

If your video is larger than 128 GB, you can try compressing the video in the video editor before uploading it to **YouTube** . Doing so will reduce the video file size and still keep the video in high quality. Another way to compress videos on **YouTube** is to encode videos with **H.264 codecs**.
