

How to use AirDrop on iPhone

AirDrop is the easiest way to transfer files between your Apple devices. Whether you want to send or receive photos, videos, documents, etc. on iPhone, you can follow TipsMake's instructions to quickly learn how to use AirDrop.

How to send files from iPhone using AirDrop

AirDrop relies on WiFi and Bluetooth to allow Apple users to transfer files between their devices at almost lightning-fast speeds. However, because AirDrop uses Bluetooth to establish a peer-to-peer wireless connection, it is limited to a range of about 30 feet (or 10 meters).

To start sending files via AirDrop from iPhone, first open your iPhone's Control Center, then press and hold the group of network-related controls in the top left corner. Turn on AirDrop if you haven't done so already. WiFi and Bluetooth will turn on automatically when you turn on AirDrop.

Do the same on the recipient's device, then press and hold the AirDrop toggle and set it to Everyone for 10 minutes.

How to receive files on iPhone using AirDrop

To receive files via AirDrop on iPhone, you need to turn on AirDrop in Control Center as instructed in the article above. Also, if the sender isn't in your contacts, make sure AirDrop is set to Everyone for 10 minutes.

When someone else tries to send you a file, you'll see an AirDrop notification appear on your iPhone. Click Accept to receive the file on your iPhone.

Where an AirDrop file is sent depends on what type of file it is. For example, photos you receive will be saved in the Photos app, while notes will be saved in the Notes app.

If you can't find a specific AirDrop file, check the Downloads folder in the Files app. To find this, open the Files app and go to On My iPhone or iCloud Drive > Downloads if you have iCloud Drive turned on.

If you followed the instructions above but can't send or receive files, you can try a few solutions to fix AirDrop errors on your device. But in general, as long as both devices have AirDrop enabled properly, sharing files on your iPhone will be quick and easy with this Apple feature.
