

# How to use Boomerang effect on Instagram

Boomerang on Instagram has added a new trio of effects and video cutting options to this video recorder.

Recently, the Boomerang video recorder on Instagram has been updated with a new video cutter and a new set of 3 effects including SlowMo, Echo and Duo. This gives users more options when recording videos in Boomerang mode.

Accordingly the user has an additional video cutter backwards, then apply 3 more effects. The SlowMo effect will slow down the action, the Echo adds a motion blur effect to Boomerang, and the Duo will accelerate the reverse shots, making Boomerang rewind from the beginning faster. Each of these effects has a unique option for you to use in your video.

Videos after using the new Boomerang effect still have additional options to insert. The following article will guide you how to use the new Boomerang effects in Instagram.

## Video tutorial on using Boomerang effect in Instagram

### Instructions to insert Boomerang effect on Instagram

#### Step 1:

We open the video recorder on Instagram and then select **the Boomerang video recording mode** . Then you **press the middle button** to start recording video as usual. Keep clicking **the infinity icon** at the top to open the Boomerang effects as shown.

## Step 2:

First you will see **the length bar for the recorded videos** . You can shorten the video if you like. Next, we **click on each icon to use different effects** for the Boomerang video we want.
