### Step 3:

Click on the file you want to hear, or click on **the 3 dots icon** in each folder, file to appear more options such as Download (save to the device), Add to playlist (add to playlist), Play next (select next play), Add to queue (put into play queue). You click on a song you want to play to listen to music.

In the music player interface, there will be a button to adjust the sound, randomly play, repeat, transfer songs, play / pause, very similar to other audio players.

#### Step 4:

When clicking on **the horizontal dot icon** in the music player interface, additional options will appear.

1. Clock icon: timer to turn off the music, you choose the time (minute) available or finish when playing all the music and then press Start.
2. Optimize for Voice: an audio editing tool for better listening.
