

How to use FaceCat to chat privately

FaceCat brings new, themed and extremely private chat space.

Besides the popular chat applications such as Facebook, Twitter, Zalo, there are many extremely new chat applications such as FaceCat. FaceCat brings chat space like themes when you post status on Facebook. The special feature of FaceCat is that those who chat with you will not know who you are, unless you reveal your identity.

In addition to making the conversation more interesting, FaceCat also has the option to create its own emoticon set from your own face, according to many different expressions. The following article will guide you how to chat on FaceCat.

1. Private chat with zhoo.app
2. Chat with 5 unique chat robots for Android
3. How to use AiMee to create a sticker from the face
4. How to create Facebook sticker with Zamoji application
