

How to use FastStone Capture to record computer and laptop screens

With FastStone Capture, recording your computer screen is simpler and more effective than ever. This software offers many powerful features, including how to capture your computer screen and add annotations and effects to meet your needs. Let's learn how to use FastStone Capture to record laptop screen video.

FastStone Capture is one of the 2-in-1 software. The reason for saying that is that in addition to taking screenshots with FastStone Capture, you can record screen videos with FastStone Capture itself. In the previous article, Taimienphi showed how to **take screenshots with FastStone Capture**, in this article there will be instructions for recording video.

How to use FastStone Capture software to record the screen

Step 1: Download and install FastStone Capture: Download **FastStone Capture**

- If you don't have it yet, download FastStone to use.
- Click on the movie icon (Screen Recorder)

Step 2: Then the **Screen Recorder** dialog box will appear with options for you

Window/ Object: Record a window or an object that you choose

Rectangular Area: Record an area with the size that you choose

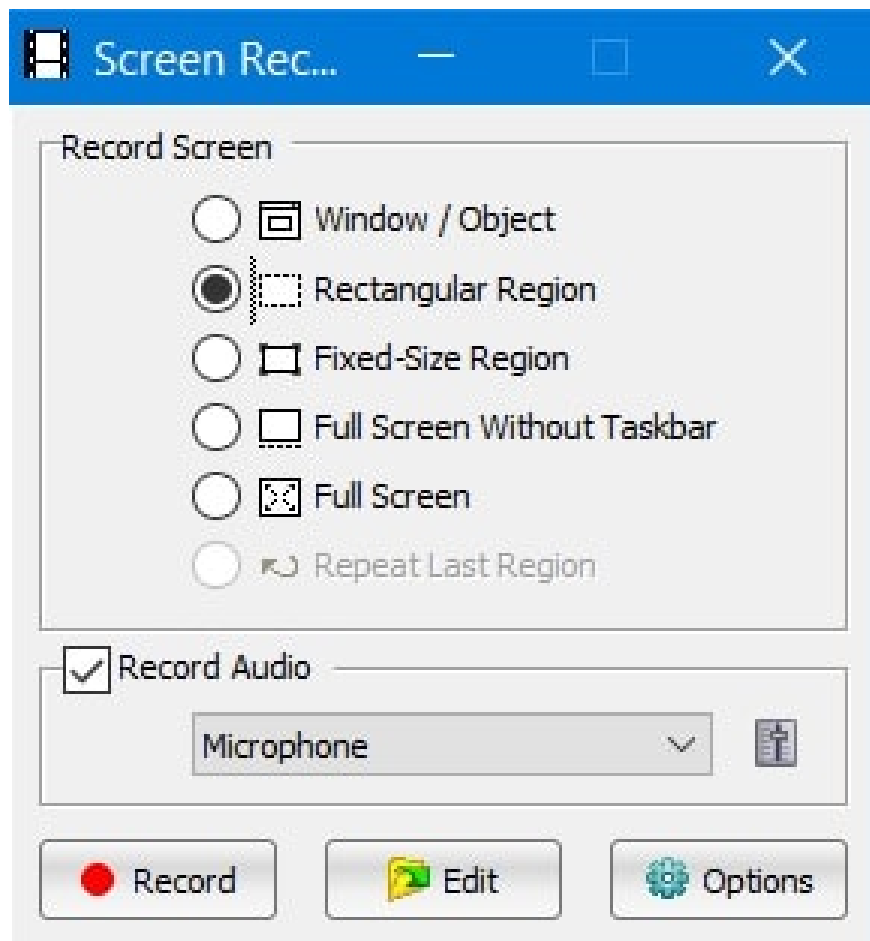

Full Screen Without Taskbar: Record full screen without Taskbar

Full Screen: Record the entire screen (In this mode you will display everything on the screen)

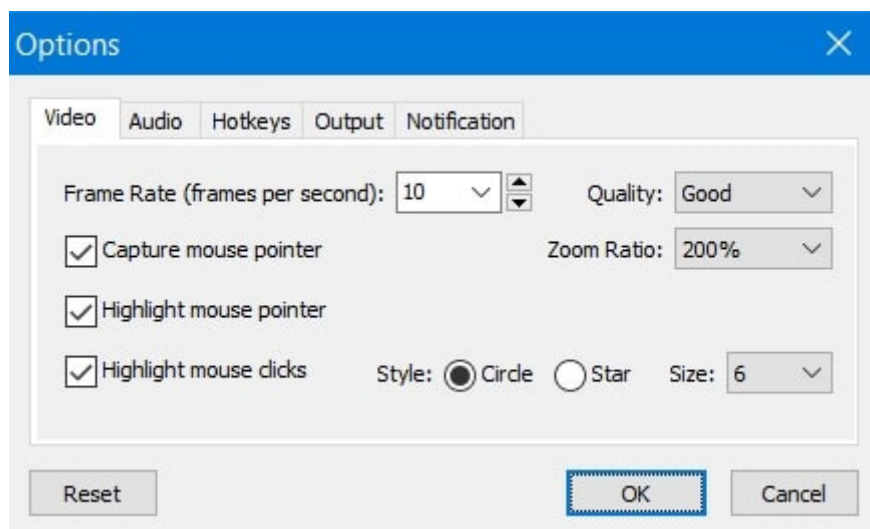

Record: Start returning to the screen

Options: Settings options

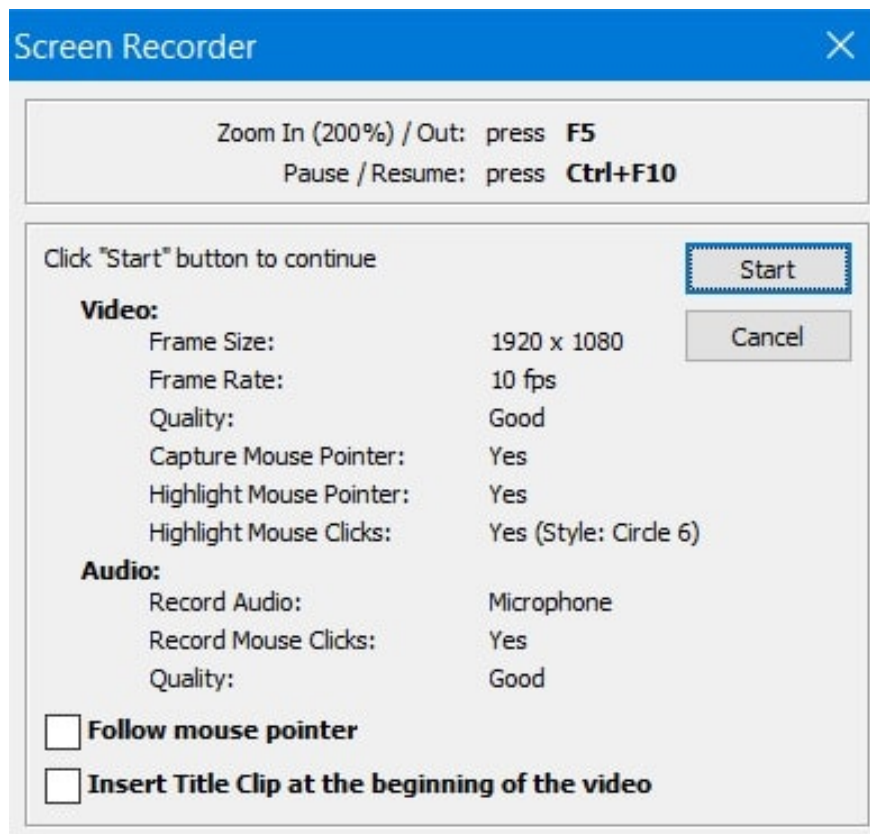

Exit: exit exit screen recording mode

Step 3: In the **Options** section there are many choices for you. You can customize the frame rate, image quality, or change the shortcut key combination (Ctrl+F11) in Hotkey

Step 4: To start recording, click **Record** , to continue, select **Start**

Step 5: After you have selected Start, **FastStone Capture** will automatically return to the screen for you. If you want to finish, click **Resume** . To save, select **Save** , and select **Discard** to exit the process and not save.
- **Note:** To save, you need to find the folder where you want to store the video and name the video you just recorded.
