

# How to use filters on Google Meet

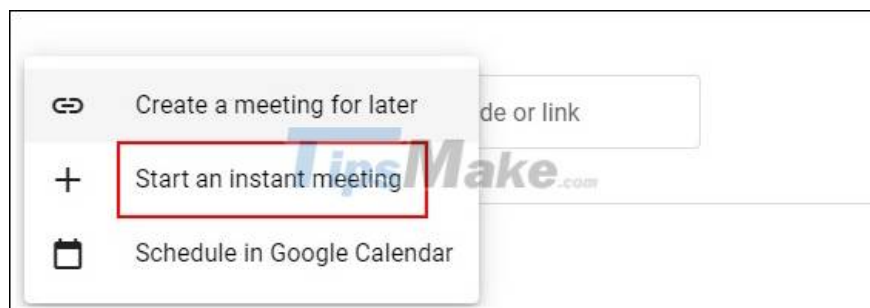

Using filters on Google Meet or using filters on Zoom, online learning services are now very popular to help users change video frames, or even mask their faces when calling videos, changing face or add other details to your face.

Using a filter on Google Meet will make the background behind it hidden and the video call frame is more beautiful and professional when we want to hide the current space. The following article will guide you to read how to use filters on Google Meet.

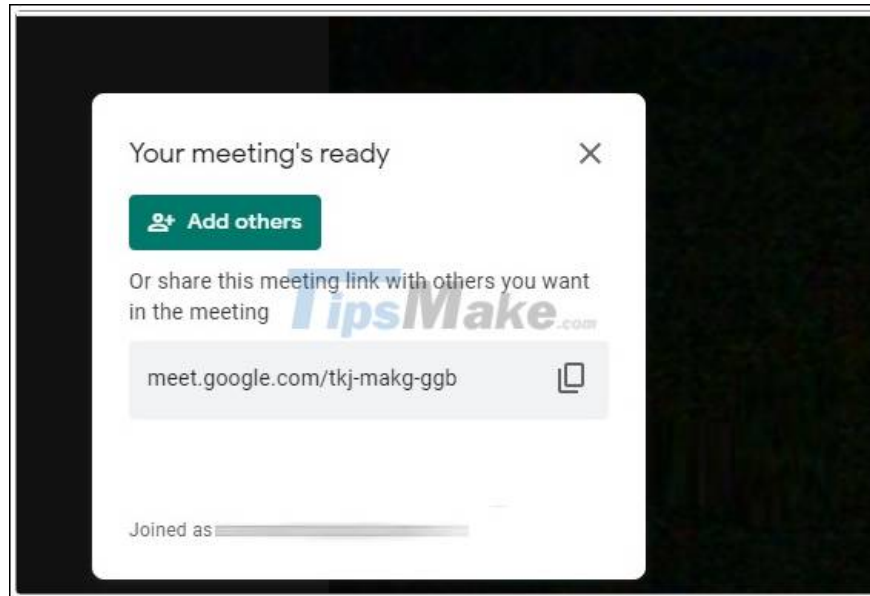

## Instructions for installing filters on Google Meet

Step 1. First of all, we install [Filters & Stickers for Google Meet utility](#) on the browser here.

Step 2. Then you login Google.com website through your Google account. At the interface we click New meeting and then select Start an instant meeting to conduct video calls on Google Meet immediately.

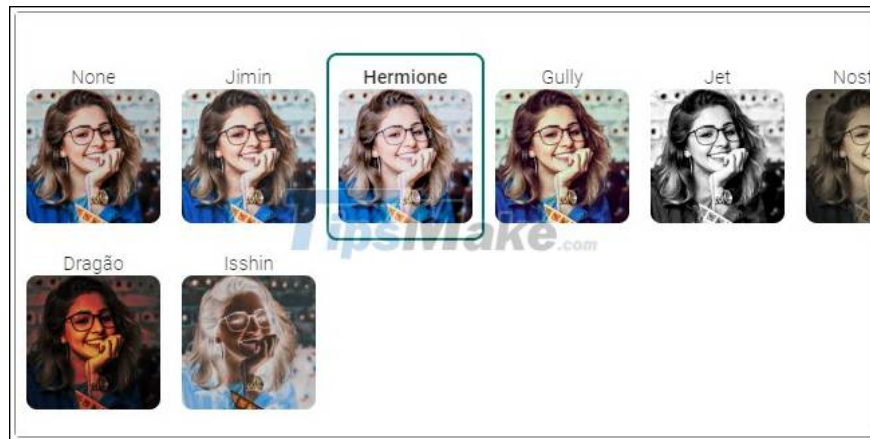

Step 3. Display the video call interface and look to the left side we have the option to Add others to add the email addresses of those who want to join the group meeting, or you can share the meeting via the displayed URL.

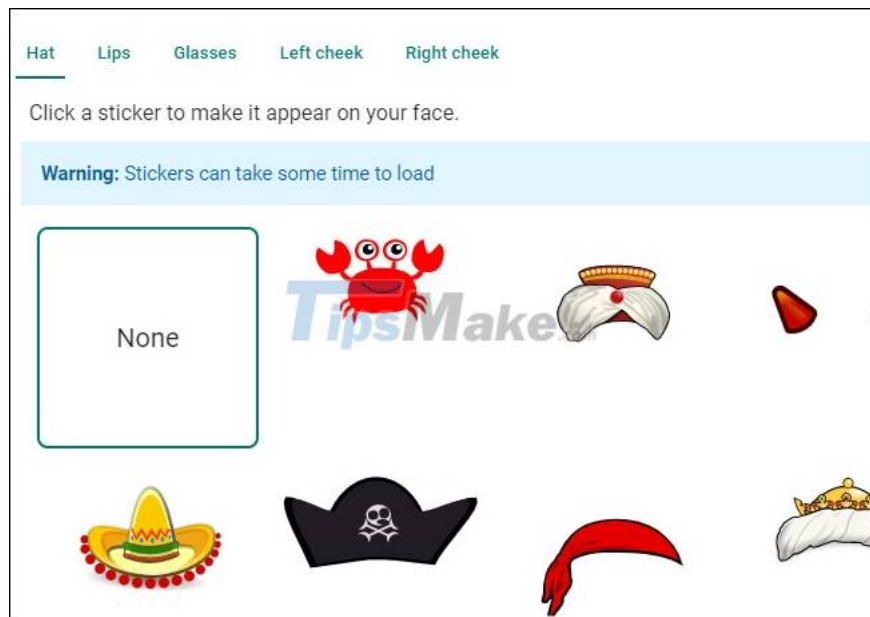

Besides, we will also see the Filters & Stickers for Google Meet toolbar to use filters on Google Meets. You will have a choice of color filter for the frame or mask options.

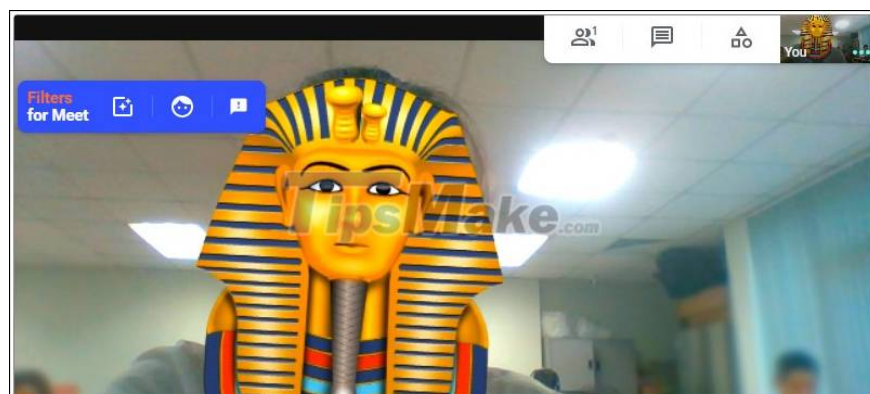

Step 4. With the color filter option, you will have 13 different color filters such as Jimin, Gully, Jet, Merano, . You just need to click on the color filter you want to use.

Step 5. With mask filter, you will have some options such as hat, glasses, stickers to stick to left cheek or right cheek. Click on the sticker you want to use and then wait for the sticker to appear on the frame. If the computer has a high, stable configuration, when applying this masking filter will be faster than a slow computer.

As a result, you will see a mask displayed on the Google Meet interface so that anyone participating in the call can see.

Hope this information is useful to you. Good luck.
