

How to use Firedrop multi-platform cloud storage service

Firedrop is a multi-platform free cloud storage service, available to users with 20 GB for free.

The cloud storage service has now become much richer for users to choose, besides the traditional services such as OneDrive, Google Drive, . There are many new names that bring us the Attractive offers, like Firedrop free hosting up to 20 GB.

Firedrop is a cross-platform cloud storage service such as Android, Windows, KODI and web platform. With each free account registered, we will have 20 GB of free storage, more generous than 15 GB free from Google Drive. The following article will guide you how to use the multi-platform Firedrop storage service.

1. How to download PDF files on Google Drive is blocked download
2. Use multiple Dropbox accounts on the same computer
3. How to convert images into text using Google Drive, OneNote

How to store the cloud on Firedrop

Step 1:

First of all, you visit Firedrop's homepage to register for Firedrop with free account. Click **Sign up** above.

1. <https://firedrop.com/>

Step 2:

Firedrop provides 3 types of accounts, of which LITE with USD 1.99 / month has 100 GB of storage and 200 GB BW, Professional package with USD 6.99 / month with 1 storage and 2 TB BW, free account package with 20 GB storage. Click on the **Get a Free account** package.

The screenshot displays the pricing options for Firedrop accounts. It features two main columns: 'LITE' and 'PROFESSIONAL'. The 'LITE' package is priced at \$1.99/month (\$23.88 paid yearly) and includes 100 GB Cloud Storage and 200 GB Bandwidth. The 'PROFESSIONAL' package is priced at \$6.99/month (\$83.88 paid yearly) and includes 1 TB Cloud Storage and 2 TB Bandwidth. Both packages have a red 'CHOOSE' button. Below these options, the 'Quantimeng' logo is visible, followed by the text 'Looking for something simpler?'. A green button labeled 'Get a FREE account' is highlighted with a red arrow pointing to it. Below this button, it states '20GB Cloud Storage' and includes a link for 'Limits & restrictions apply (View Limits)'.

Package	Price	Storage	Bandwidth
LITE	\$1.99/MO (\$23.88 paid yearly)	100 GB Cloud Storage	200 GB Bandwidth
PROFESSIONAL	\$6.99/MO (\$83.88 paid yearly)	1 TB Cloud Storage	2 TB Bandwidth
Free Account	Free	20GB Cloud Storage	-

Step 3:

Fill out all the information on the Firedrop page asking users, then click **Create Account** below to create an account.

A little about you...

Step 5:

Soon you will come to the main interface of Firedrop service. Simple interface with data management options located on the left and top of the interface. To upload data to Firedrop store, click **the Upload button** or drag and drop data to the page interface. Maximum download file size is 1 GB.

Step 6:

App loading interface appears. In addition to directly downloading the data available on the computer, we can use the download link URL in the **Remote URL Upload section**. Just paste the file link to store to upload to Firedrop. Files with secure passwords will not be used this way.

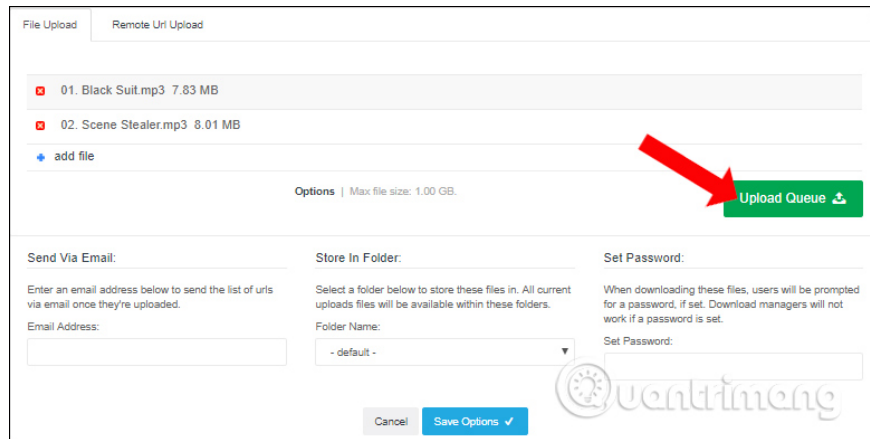

Step 7:

In the data download interface when clicking **Options**, we will have some other options for data including:

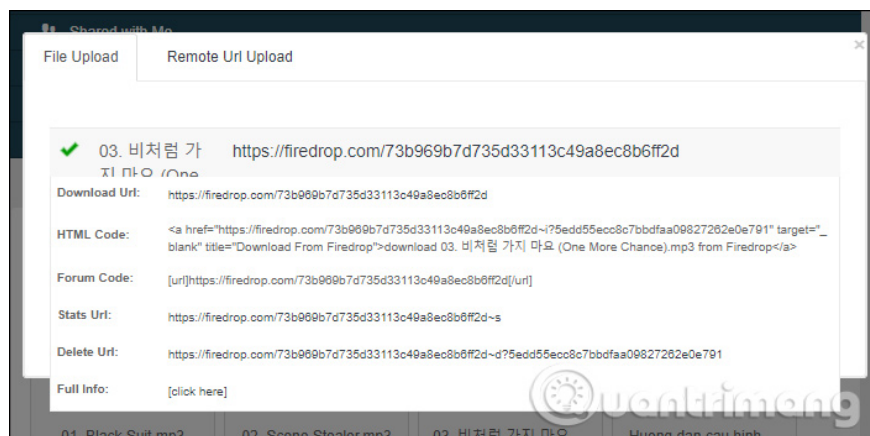

1. Add title: upload more data to Firedrop.
2. Send Via Email: Enter the email address of the recipient after downloading the completed data.
3. Store in Folder: select the folder containing the data in the Folder section.
4. Set Password: set security password for data.

After adding some options for data click **Upload Queue** to upload data to Firedrop.

Step 8:

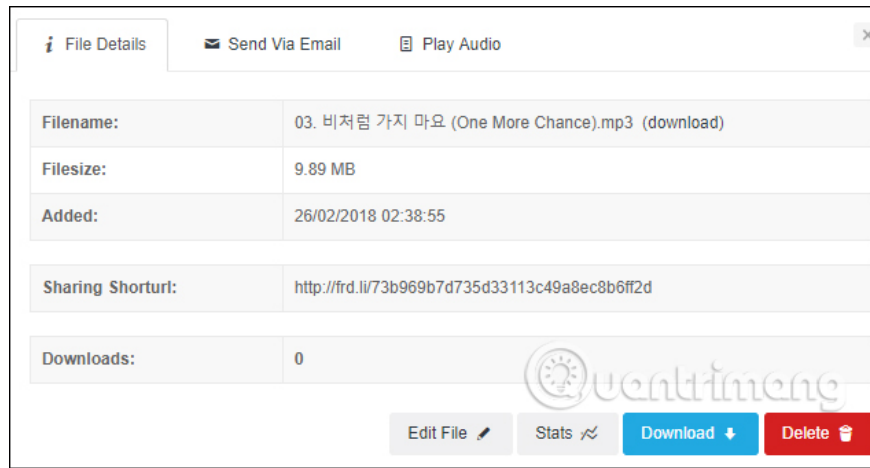

At the completed download interface will include a data link on Firedrop so you can copy immediately and send if necessary. Click **the arrow icon** to expand the data link interface.

Step 9:

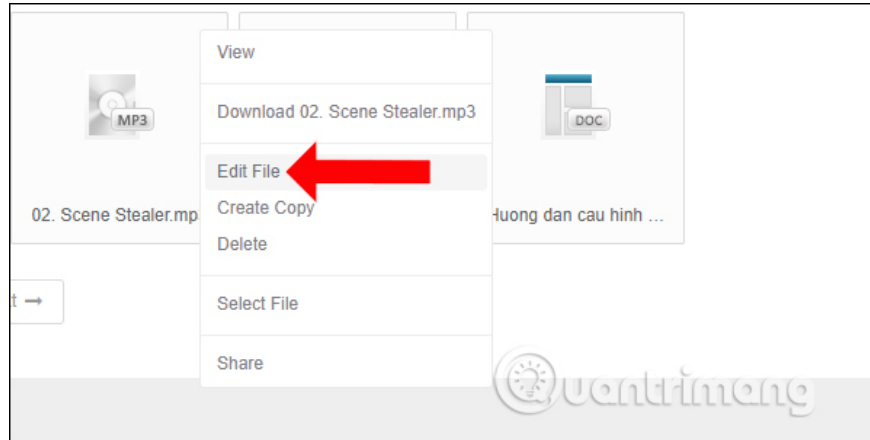

The data management interface will include a format icon in each file for users to know. Here, when clicking on a certain data, you will have more information about file name, file size, file download time, data sharing address and data download via shared link.

If you want to delete the data, click **the Delete button** below. The service also allows viewing data or playing video music when pressing directly on the file.

Step 10:

When hovering over the file and clicking on **the 3 button**, the data options panel will appear. Click **Edit File** to edit the data if you want.

You can rename the file, put it in a folder, set a password, or remove the file download statistics at Stats if you want.

Edit Existing Item (02. Scene Stealer.mp3)

Filename
02. Scene Stealer

- Default -

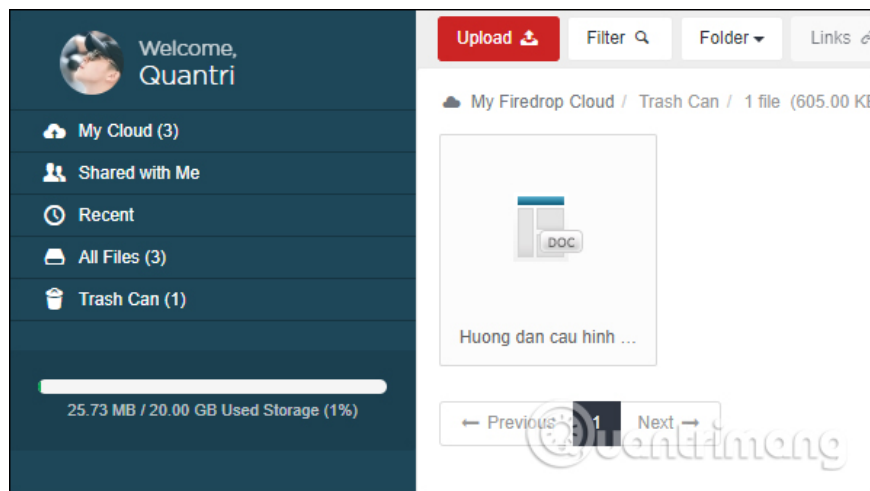

Access Password

Reset Stats
No, keep stats

Cancel Update Item ✓

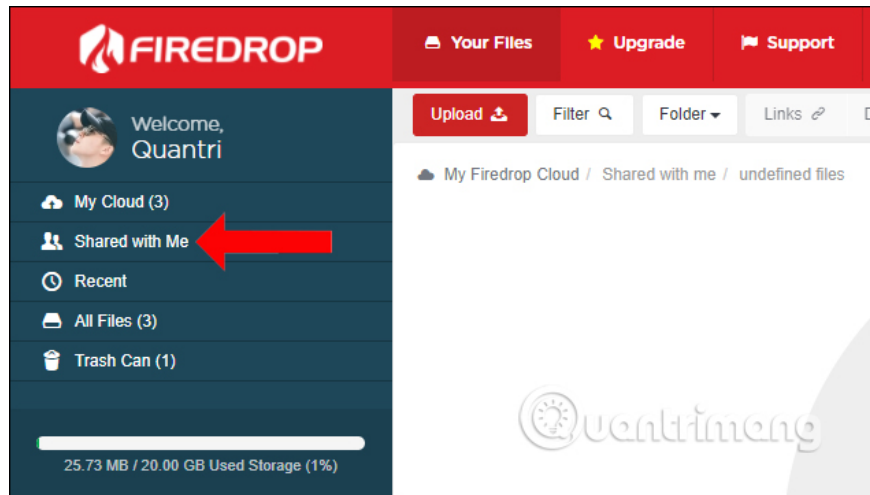

Step 11:

And like other cloud storage services, when deleting data they will be transferred to the **Trash Can** area so that users can find it again if needed.

Step 12:

On the Firedrop service, add **the Shared with Me feature** to search for files and folders that you have shared with everyone.

Step 13.

To change account information, click **Account Settings**> **Account Details** to change your name and password. If there is an edit, click **Update Account** below to save the new information.

Account Details	Support Tickets	Financial
	Title	Miss
	Firstname	QuantriMang
	Lastname	
	Email Address	quantrimang17@gmail.com
Change password.		

In general, using Firedrop is simple, even easier to use than some other hosting services. All options are fully displayed on the interface for you to choose to use. 20 GB free will definitely be enough for basic user storage requirements on Firedrop.
