

How to use Firefox Color to customize the Firefox interface

Firefox Color is a Firefox add-on that helps you personalize the theme on your browser according to your needs, with a very simple way to do it.

Often the theme interface on the browser will be fixed and you cannot change any content. However, with Firefox Color utility on Firefox browser, we can customize the theme interface as you like. This utility will help users to change the components on the interface such as changing colors, themes, buttons . and can share to anyone. Thus Firefox browser will become more new and unique with changes in the interface. The following article will show you how to use the Firefox Color utility on Firefox.

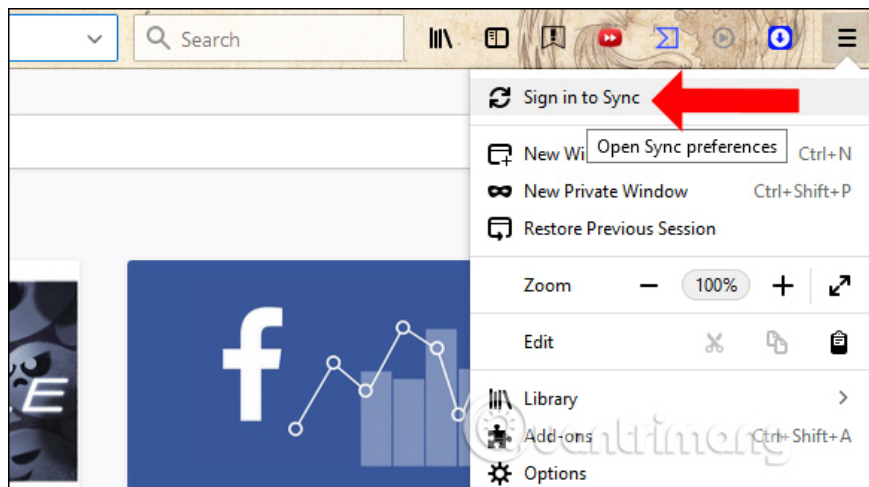

1. Automatically change the Firefox interface according to the weather
2. How to customize Firefox's new interface Quantum
3. Change the new tab interface on Firefox with 4 stylish add-ons

How to customize the Firefox interface

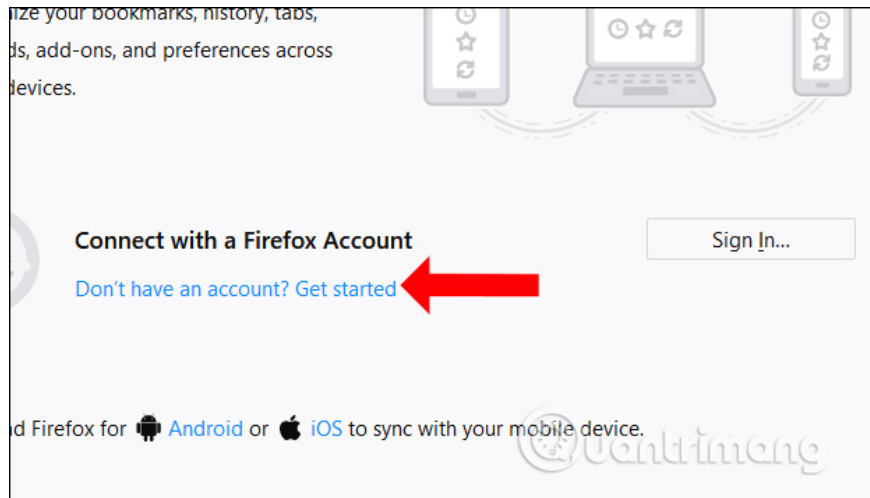

To be able to use the Firefox Color utility, you need a **Firefox account** and install the **Test Pilot extension** .

Step 1:

Access to Firefox browser. At the interface click on **the 3 dashes button** and click **Sign in to sync** .

If you switch to the new interface, click **Don't have an account? Get started** to proceed to create a Firefox account. In case you already have a Firefox account then click the Sign in button.

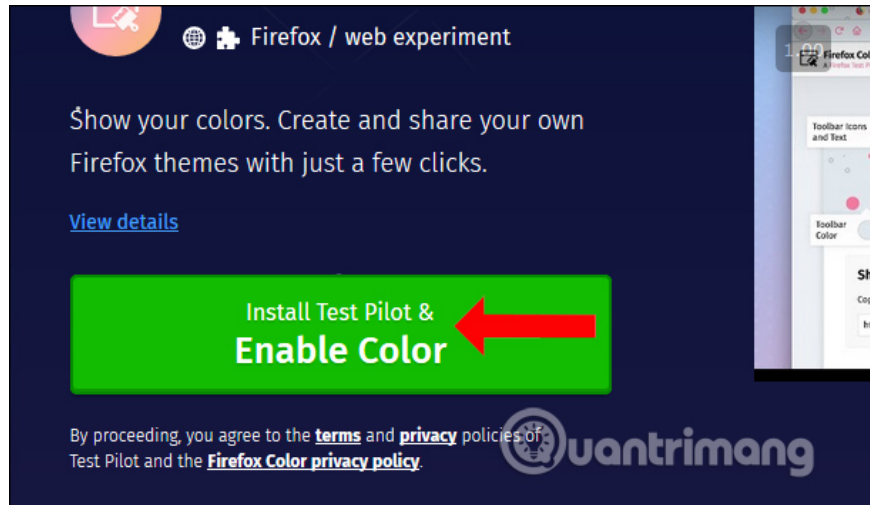

Enter all required information in the interface and then click **Create account** . Next, access the registered email account to **activate the created Firefox account** .

Step 2:

Next click on the link below to install the Test Pilot extension on Firefox, click **Install Test Pilot** to install.

1. <https://testpilot.firefox.com/>

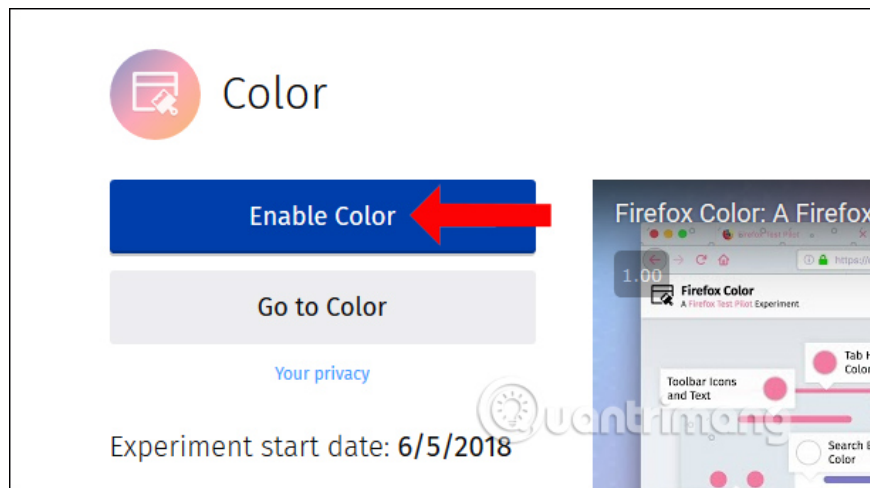

Step 3:

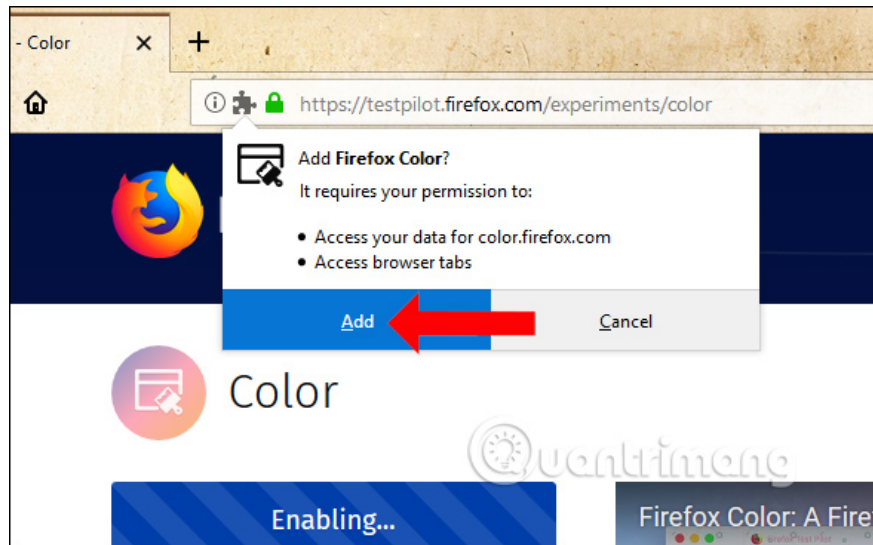

After installing the access utility, go to the link below to install the Firefox Color utility, customize the new interface for the browser.

1. <https://testpilot.firefox.com/experiments/color>

Click on **Enable Color** to activate the colors on the browser.

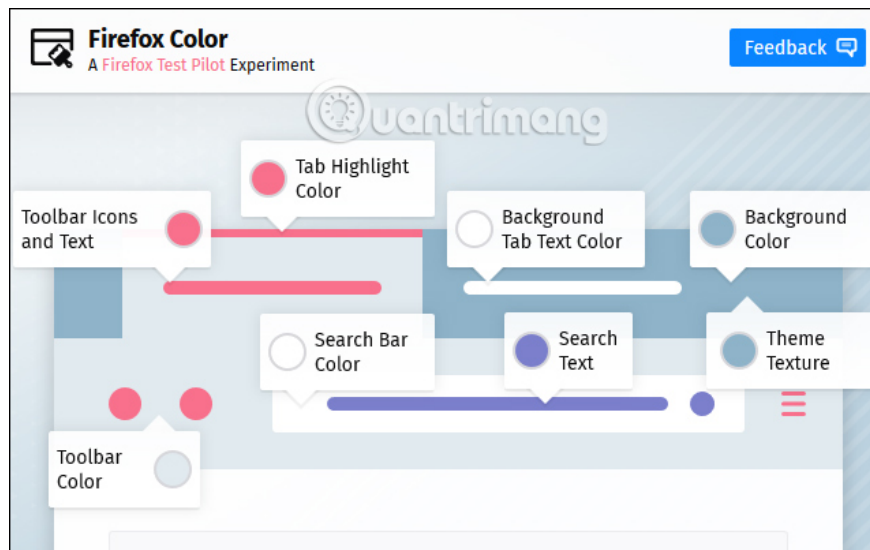

Click on **the Add button** that appears to install the Firefox Color utility on your browser.

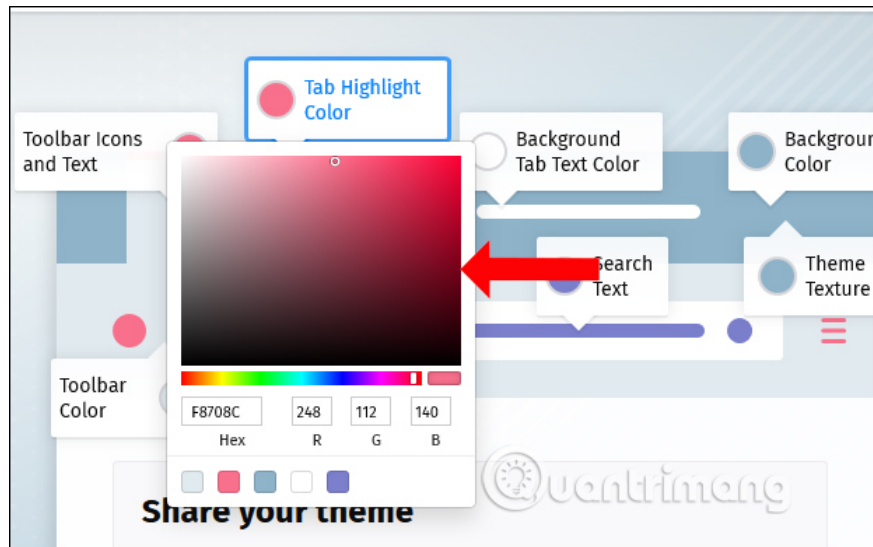

Step 4:

A theme editing interface appears so you can create a new theme with different custom categories.

1. Toolbars Icons and Text: Icon color and text on the toolbar.
2. Toolbar Color: Toolbar color.
3. Highlight Color tab: The color highlighted on the tab.
4. Background Tab Text Color: Background text color tab.
5. Theme Texture: Theme, toolbar design.
6. Background Color: Toolbar background color.
7. Search Bar Color: Color the search bar.
8. Search Text: Search text color.

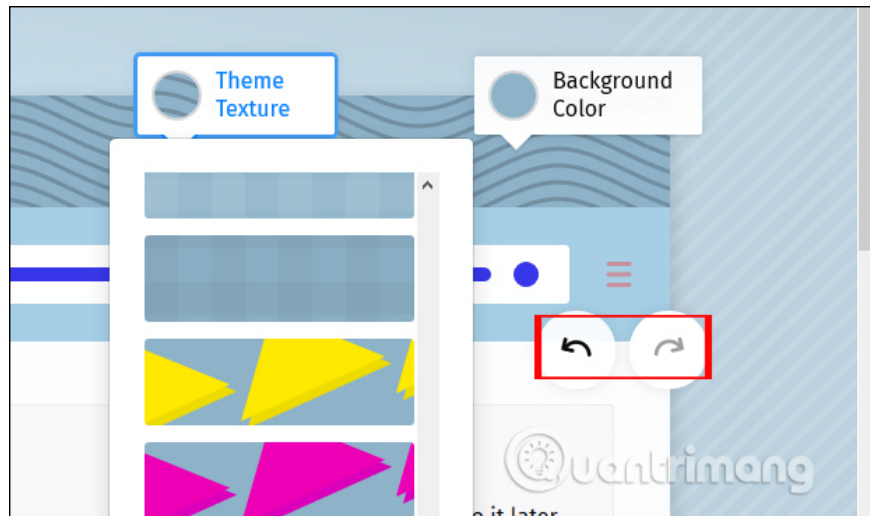

If you want to edit the colors for any item, just click on the circle and then select the color you want to use in the color code table.

In the **Preset themes** section, we can also select the available **themes** .

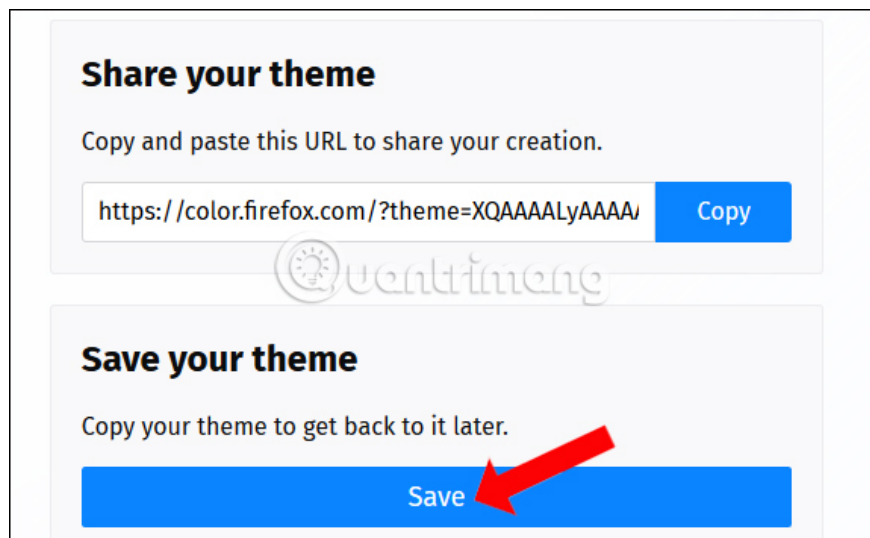

In case you want to undo the actions performed, click the **Redo and Undo icons** as shown.

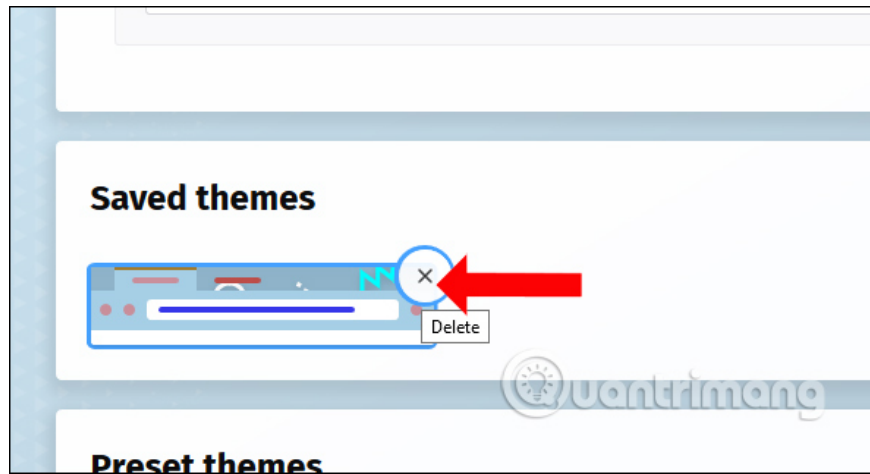

Step 5:

When you have finished editing the interface click **the Save button** to save it. Users can also share the interface with friends using Firefox in the Share your theme section with the shared link below. However, to use the link recipient must also have a Firefox account and also install the Test Pilot utility according to the above method.

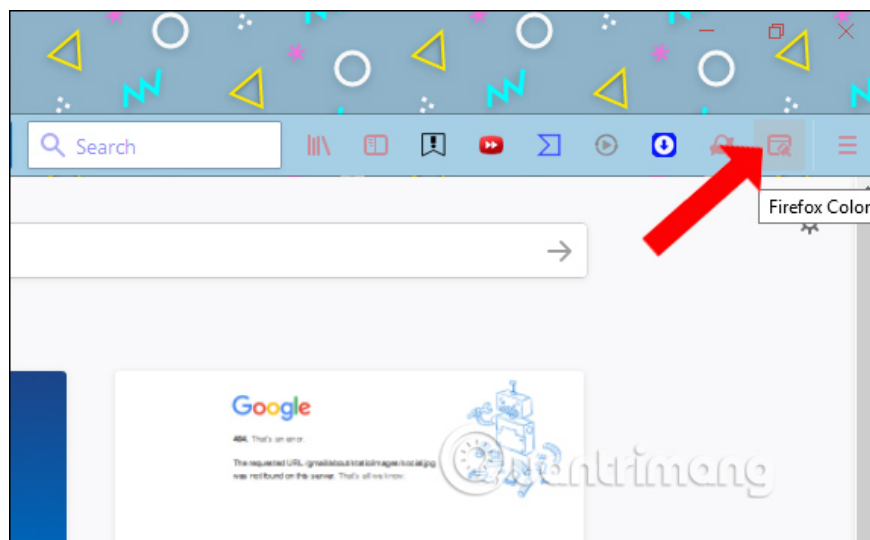

Step 6:

The theme you create will be displayed immediately in the **Saved themes** section below the editing page. With this part, users can reuse the theme if they want. Or if you want to delete the created theme, just click the x sign icon to finish.

Step 7:

If we need to customize or create another new theme, click and **the Firefox Color icon** on the toolbar.

With the Firefox Color utility, we can change any Firefox browser component with basic colors and textures, but also refresh the interface. You can now apply new interfaces to your browser, and you can share that self-designed interface for your friends on Firefox.
