1. How to create videos from videos available on FlexClip

Step 1:

Users visit the FlexClip homepage by following the link below.

<https://www.flexclip.com/>

At the interface we click **Sign-up Free** to register an account using FlexClip.

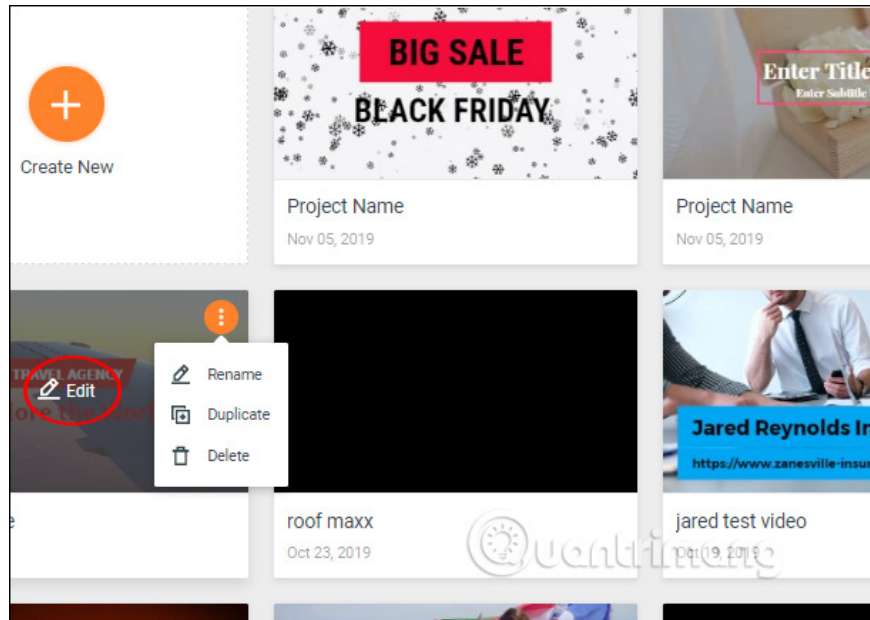

Log in the required information as shown below.

A screenshot of a 'Sign Up' form. The title 'Sign Up' is centered at the top. Below it, the text 'Already have an account?' is followed by a link 'Login' in orange. There are two large buttons for social sign-up: 'Sign up with Facebook' (dark blue) and 'Sign up with Google' (blue). Below these is a separator '— or —'. The form has three input fields: 'Email', 'Confirm Email', and 'Password', each with an icon (envelope, envelope, and lock respectively) to its left. At the bottom is a large orange 'Sign Up' button. A watermark 'uantrimang' is visible in the bottom right corner. Below the button, the text 'By signing up, you agree to our Terms of Use and' is partially visible.

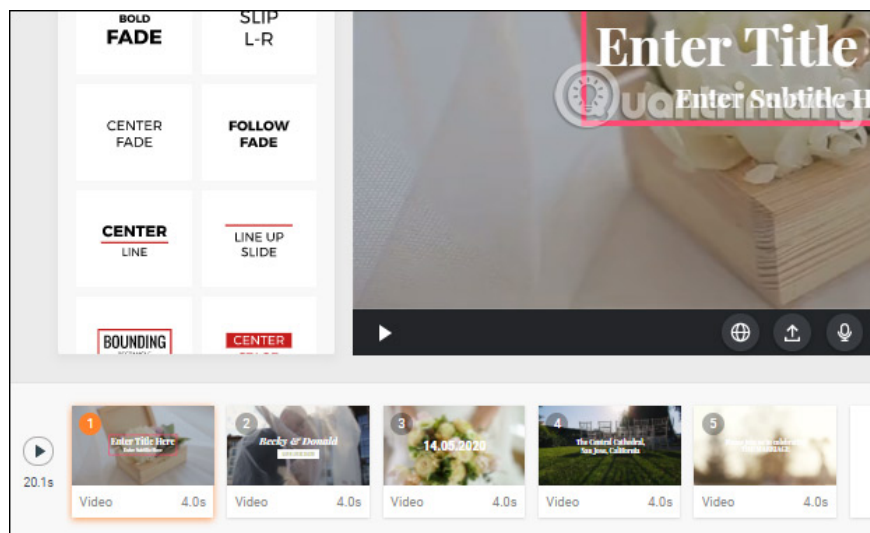

Step 2:

After creating an account, accessing the **My Project interface**, we will see many video themes have been created for you to change the content as you like. If you want to **use an existing video** to change the content, hover over the video and **select Edit** to edit.

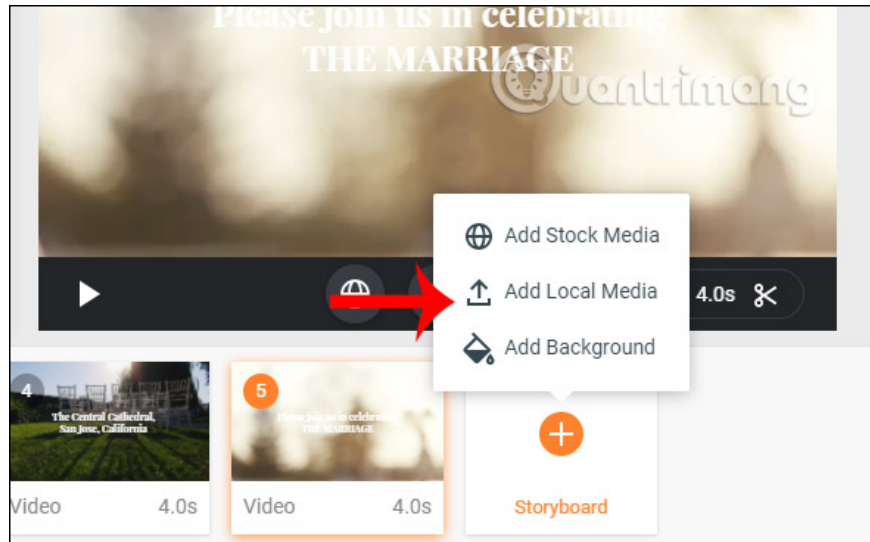

Step 3:

Display interface to edit the video again. FlexClip will spend videos into different segments, with different content for users to easily edit.

If users want to add new content segments to the next, click the plus icon in the Storyboard bar. Now show 3 places to get content:

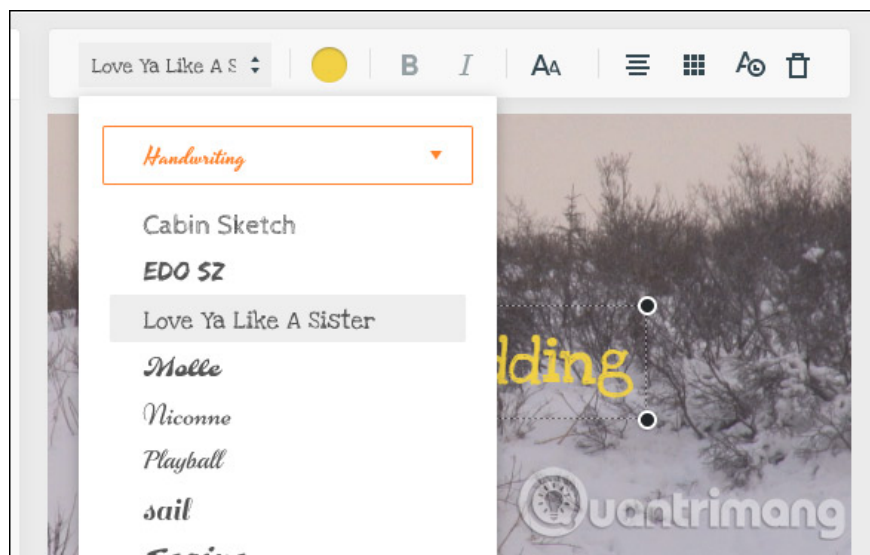

1. Add Stock Media: Use video stock available in FlexClip.
2. Add Local Media: Add media files in the computer.
3. Add Background: Insert background for the video.

Step 4:

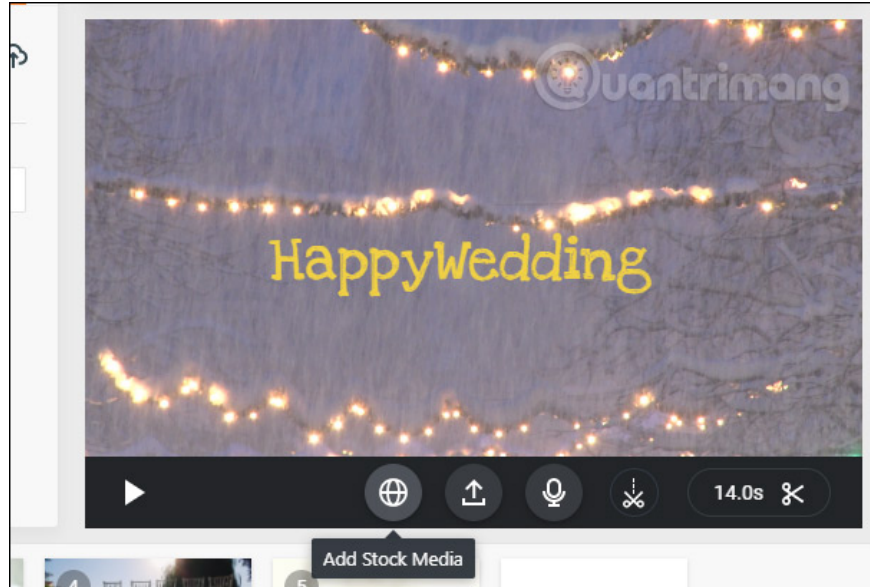

In each segment will be different text editing options, displayed through the icons at the top of the content.

1. Text and Logo: Choose a display style as text or as a logo.
2. Playfair Display: Choose a font style.
3. Text Color: Select the color of the text.
4. The format of bold, italic, font size.
5. Algin: Align text.
6. Position: The position to display words.
7. Adjust Text: Adjust the time that text is displayed in the video segment. You now have the word duration bar above the video segment timeline to adjust it.
8. Remove Text: Delete the text.

Next down are **3 icons to change the scene** for the video segment. If we do not want to use this video for the scene, then click the globe icon to use the built-in video store, the upload icon to select the video included in the

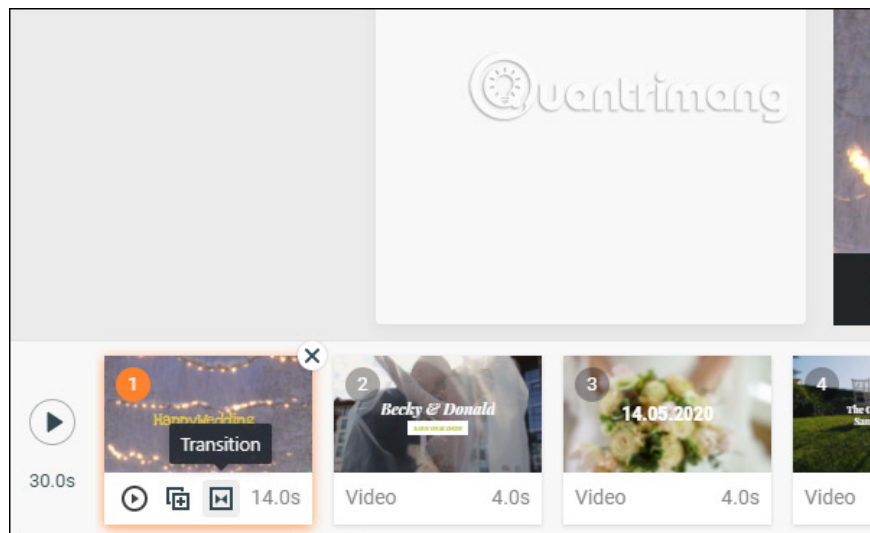

computer and the microphone to add audio to the video.

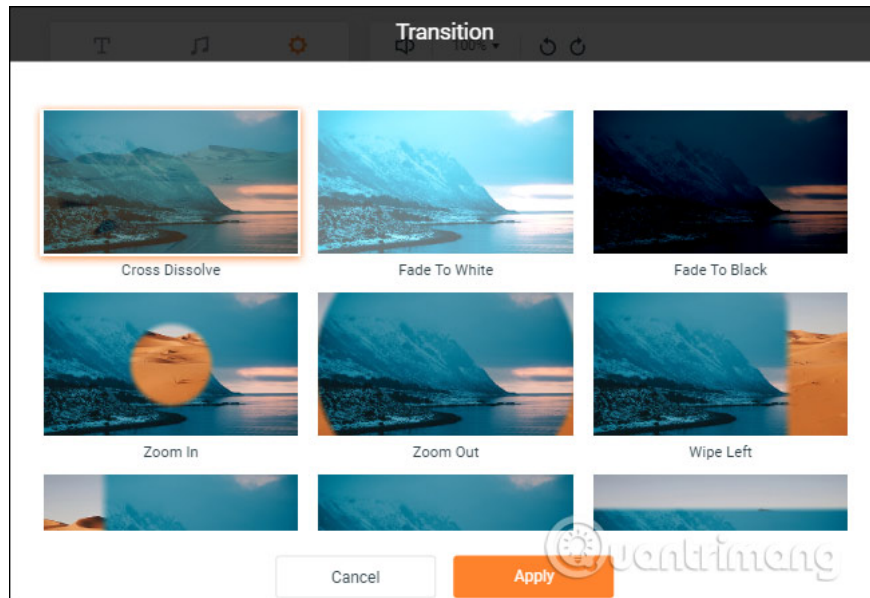

Step 5:

Looking down **the Storyboard bar** below, when hovering over each scene will have 3 different icons:

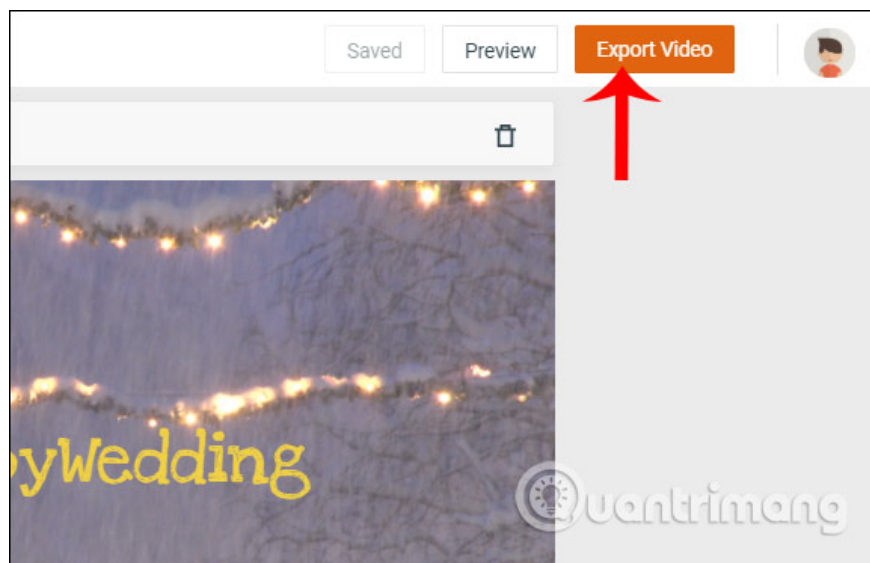

1. Play From Here: Play this video segment.
2. Duplicate: Duplicate this segment.
3. Transitions: Add type transitions.

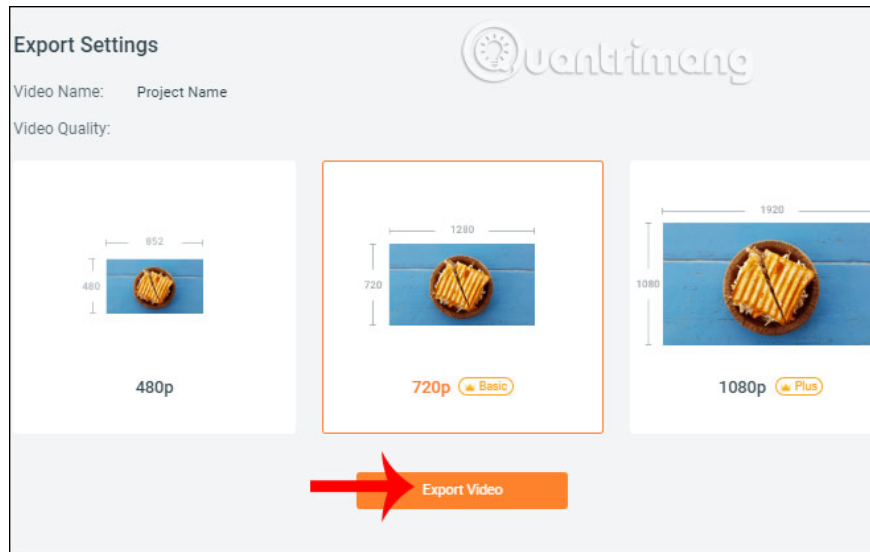

When clicking **Transition** we have many **different transition** styles, click on the type of effect you want to use and then click **Apply** .

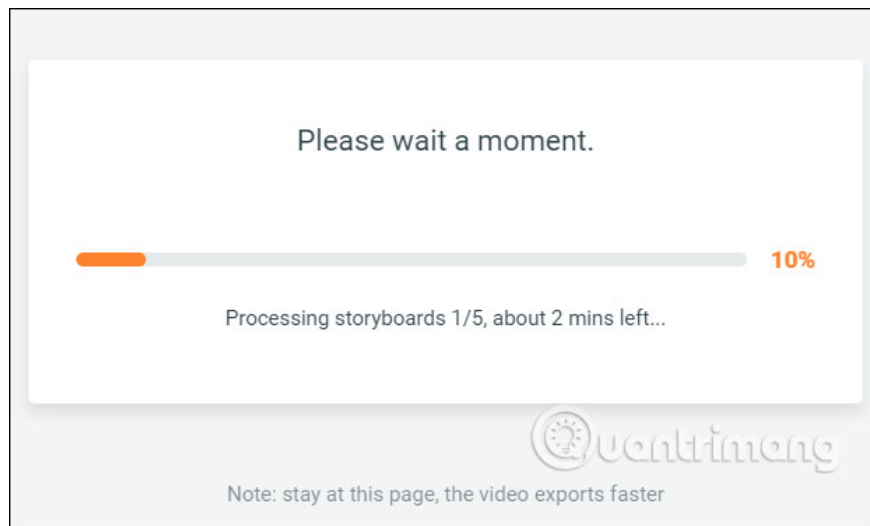

Other segments you continue to add transition effects to the end. After finishing, press **Export Video button** above to export video.

Display interface for **selecting video quality** . With the free account, you can only download videos up to 480p, while the maximum upgrade account is 1080p. In the Video Name section above we enter the video name, then **click Export Video** below.

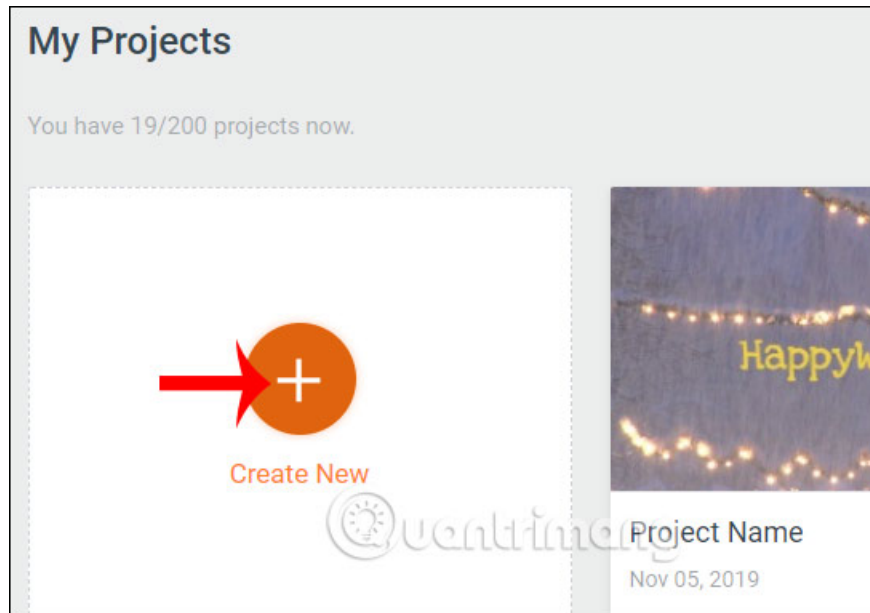

We wait for the video export process to complete and the video will be saved to the Downloads folder on the computer.

2. How to create videos on FlexClip yourself

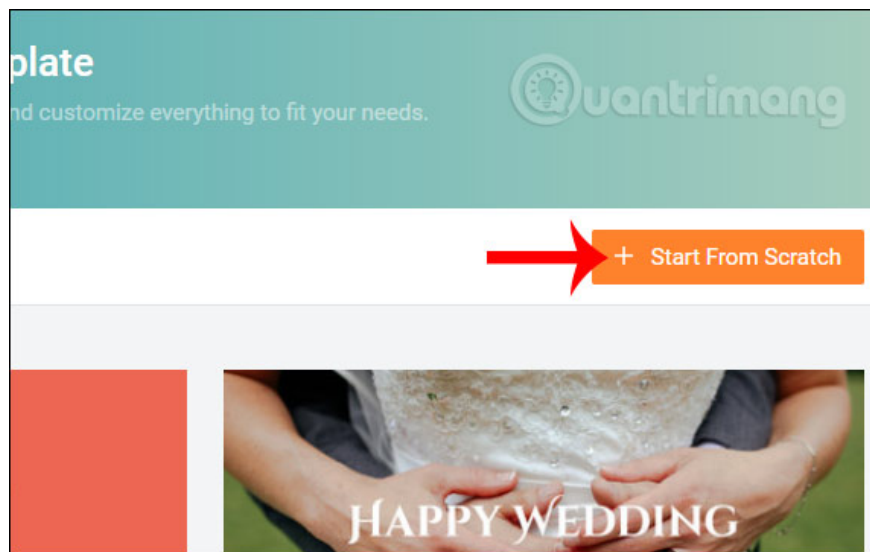

Step 1:

Also at the My Project interface you will see **the Create New icon** to click.

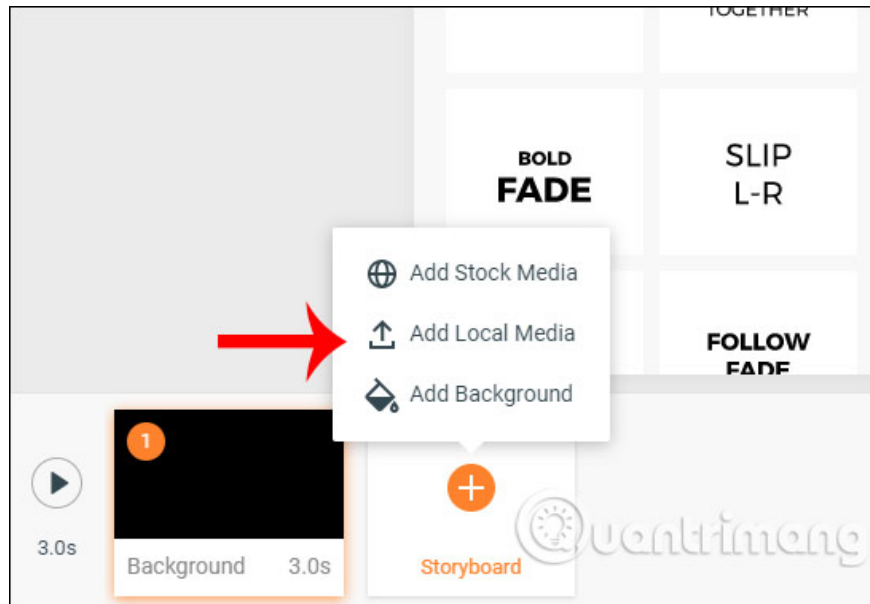

Step 2:

In the new interface, click on **Start from scratch** on the top right to create a completely new video.

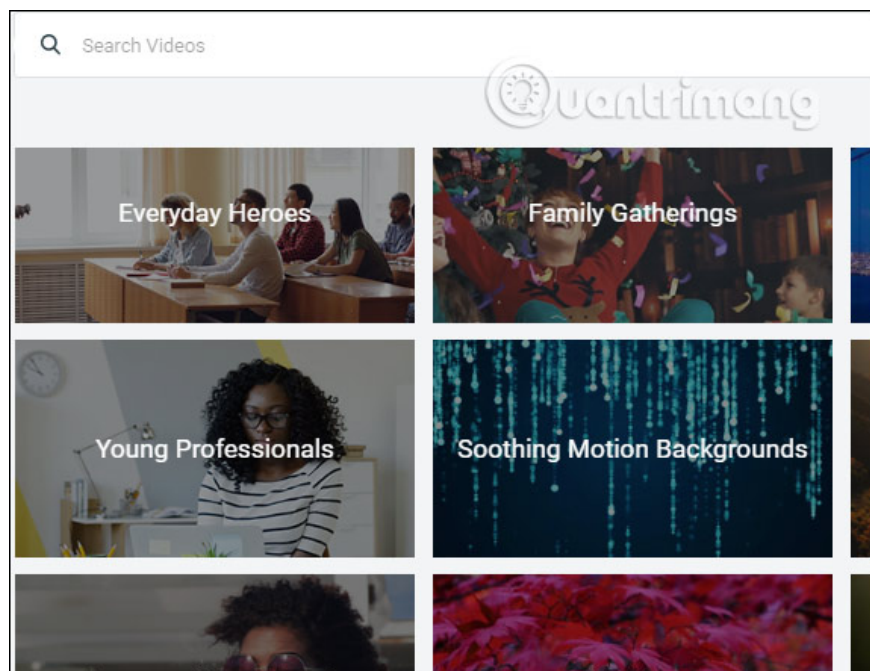

Step 3:

Now show a completely new interface to create videos with a black background for us to add our own content. In the **Storyboard bar**, click the **plus sign** to add each scene to the video and select the content you want to add.

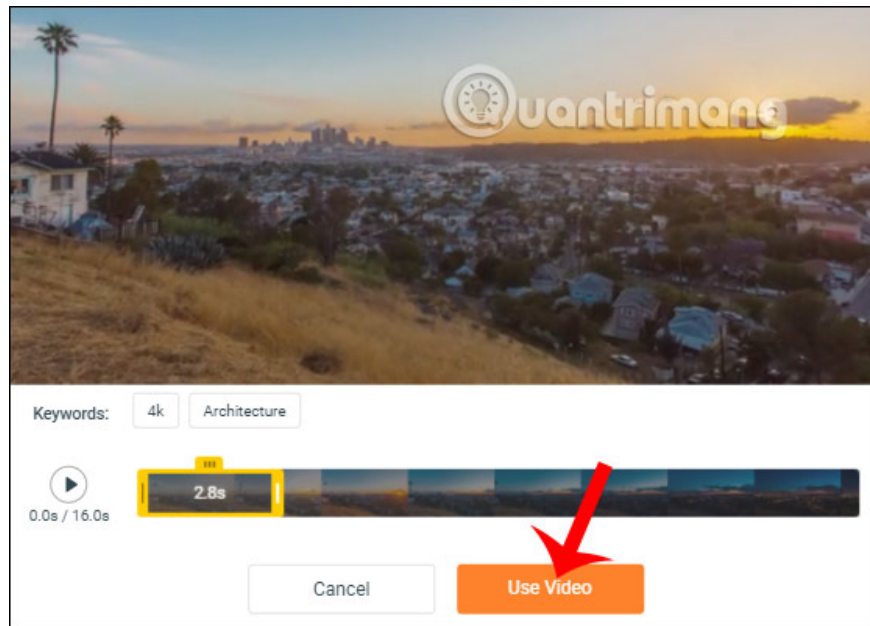

Step 4:

When clicking on **Stock Media** users will see there are many different video topics. Clicking on each topic displays other video stores.

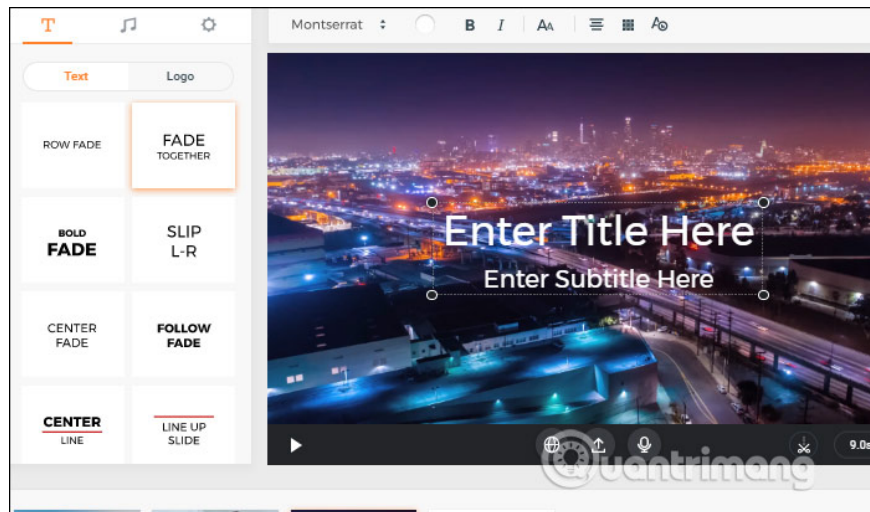

Click on the video you want to use. In a candle-like interface, if you want to shorten the video display time, just drag the gold bar. **Click Use** video to use this video.

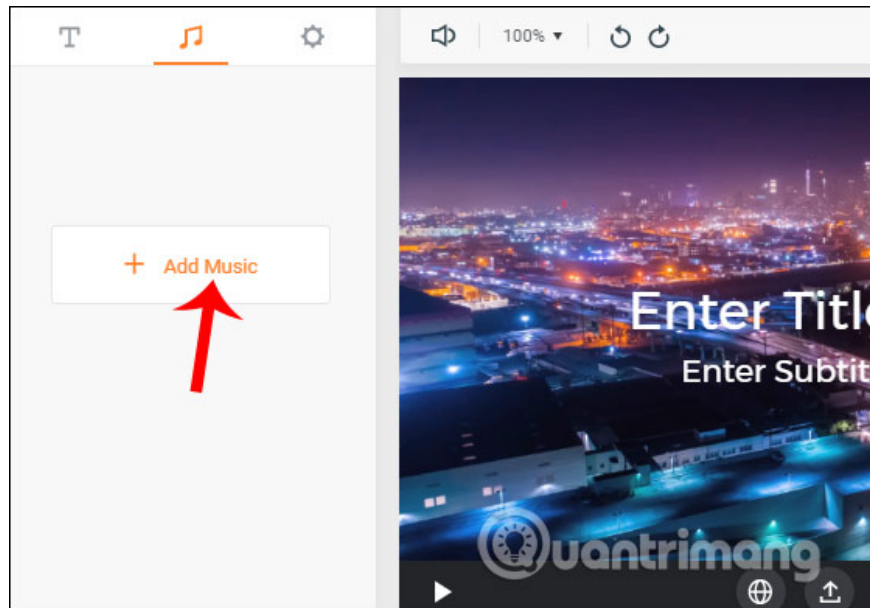

Step 5:

After adding the videos for each segment, we will **insert the text content into the video** .

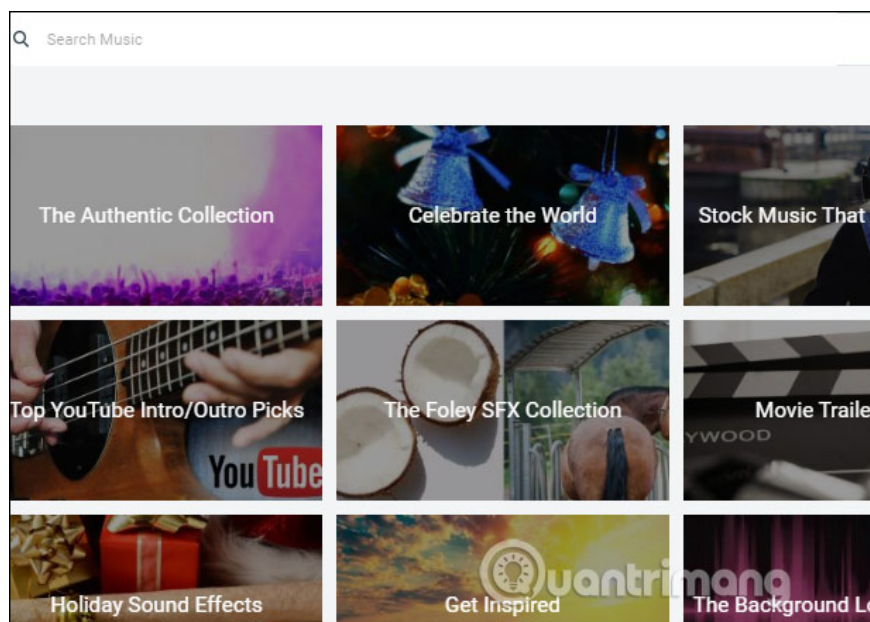

To **add music to the video**, click the **note icon** and then click **Add Music** to add music to the video.

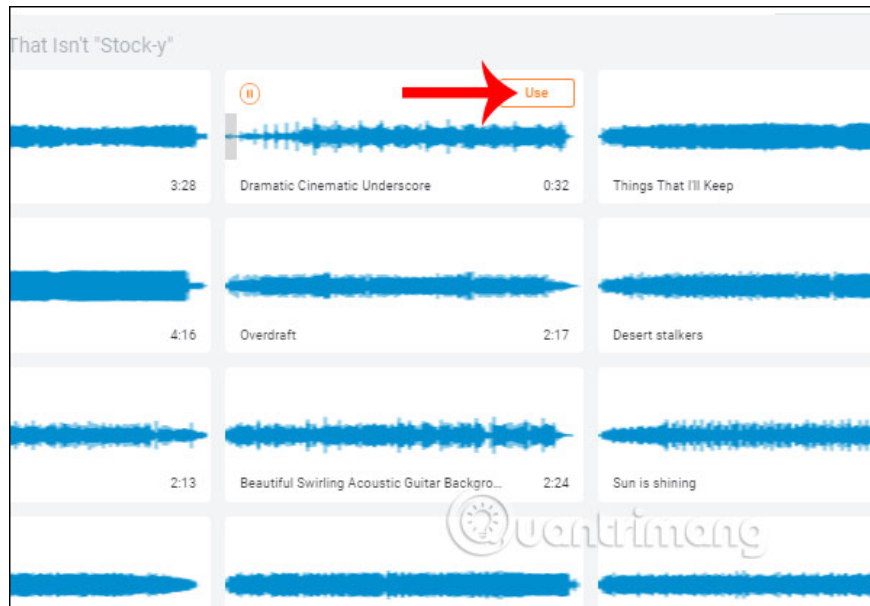

Step 6:

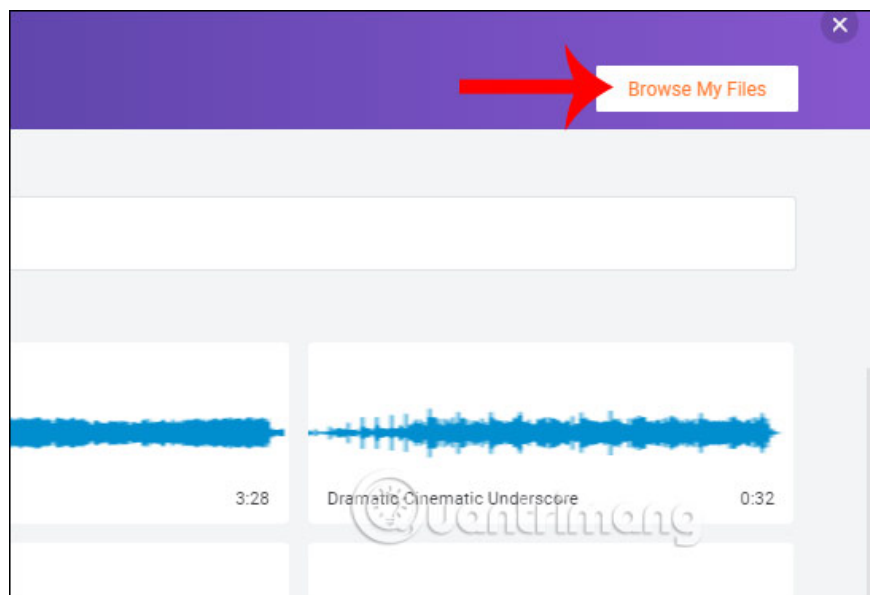

FlexClip also provides many different audio themes for us to insert into the video we are creating. In each topic, there are different audio clips to choose from.

Click to listen to the audio and **click Use** to use.

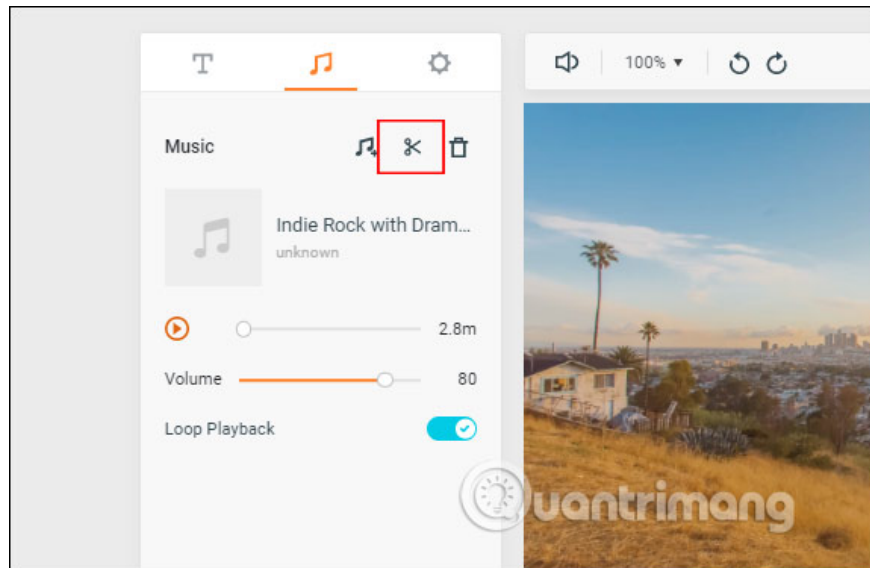

If you do not want to use audio from the website, click **Browse My Files** to download the audio available on the computer.

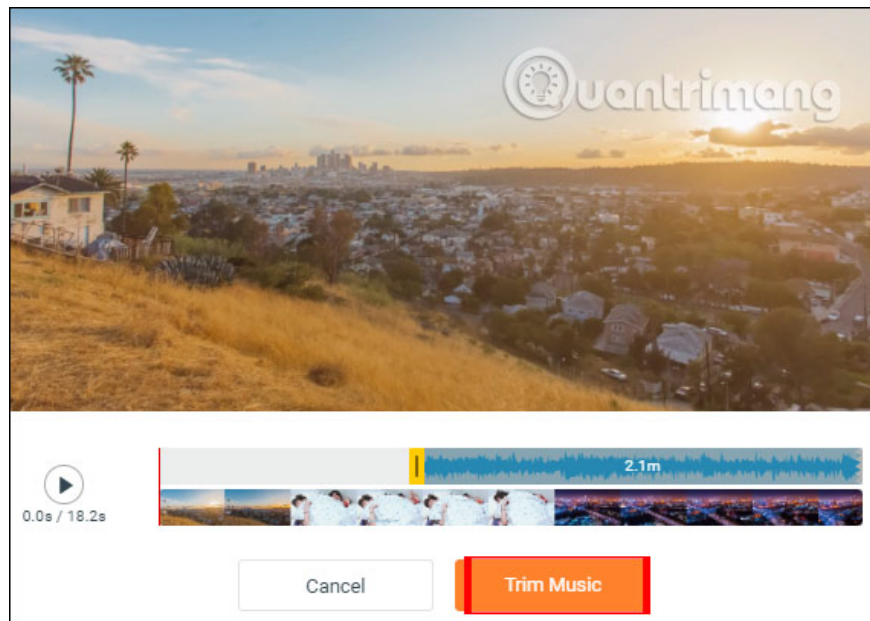

Step 7:

Audio after being inserted into the video will have additional editing. Click **the scissors icon** to cut the music.

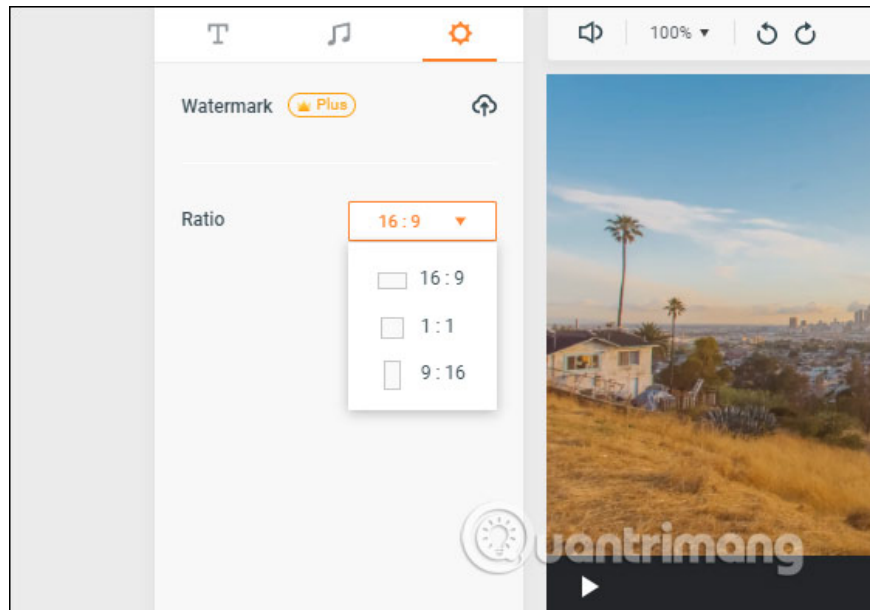

Select the time the video should be cut and **click Trim music** below.

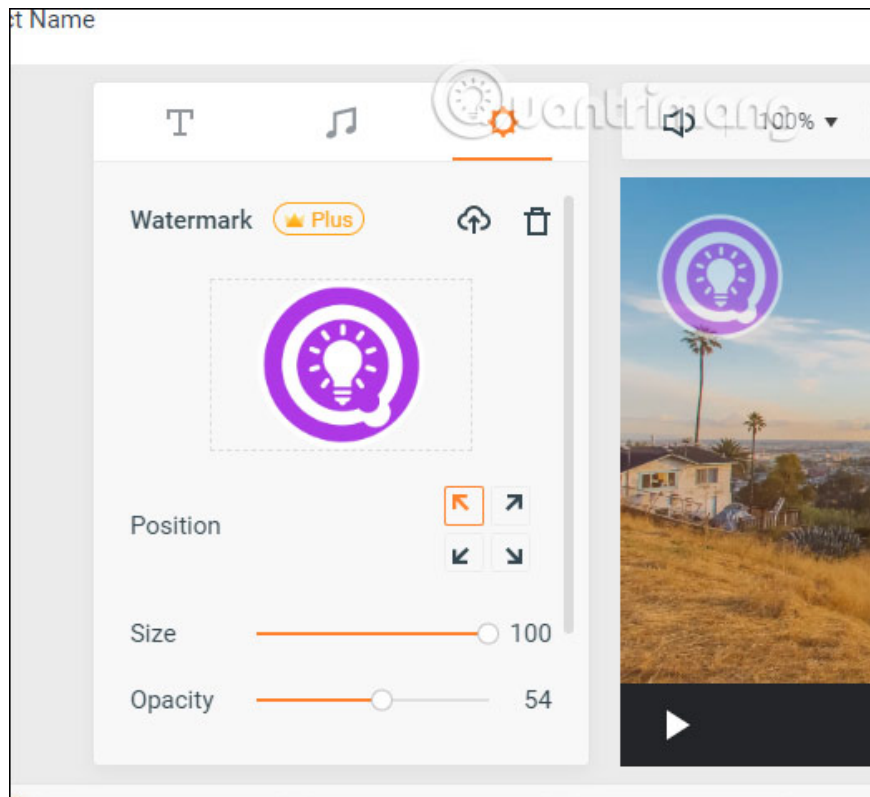

Step 8:

Click **the gear icon** to enter the **frame size** interface for the video for video at Ratio.

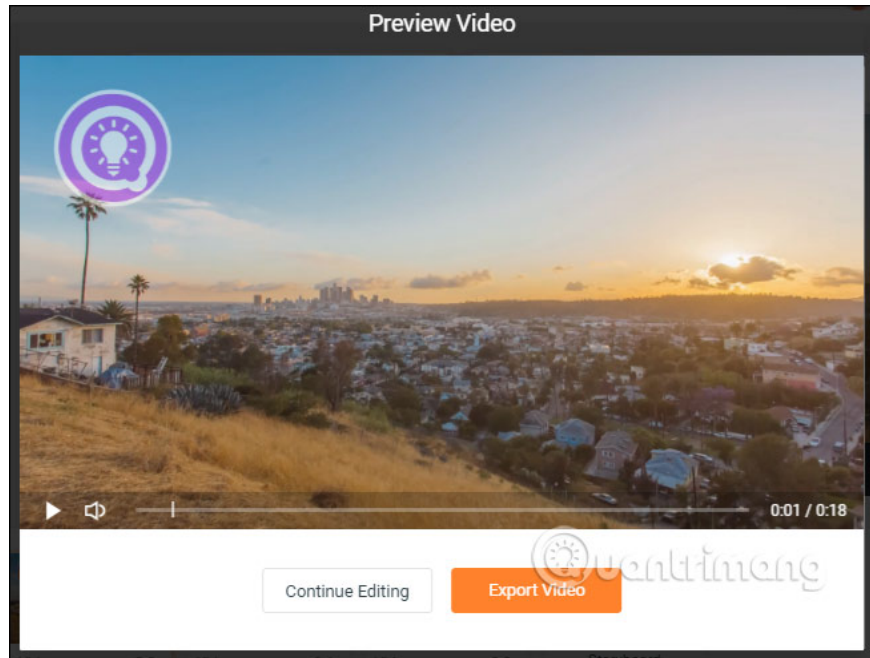

Particularly for **Watermark inserts**, a Plus account is required. Click the upload icon to upload the logo. Then the logo is displayed in the video screen interface. The video is fixed on the edge of the 4 corners, select the corner at Position.

Size for the logo in the Size and Opacity tabs to adjust the logo opacity.

Step 9:

Play the video to preview before downloading it. The remaining steps we perform as in part 1.

FlexClip owns a rich repository of templates with many different topics for us to create videos for ourselves. You can rely on existing videos to turn them into your videos, or create entirely new videos from the videos you have. With FlexClip, you have all the tools to create and edit videos.

I wish you successful implementation!
