Instructions on how to Ghost Windows 7 with Onekey Ghost

Step 1 : Download and install OneKey Ghost on your computer, download [Onekey Ghost](#) .

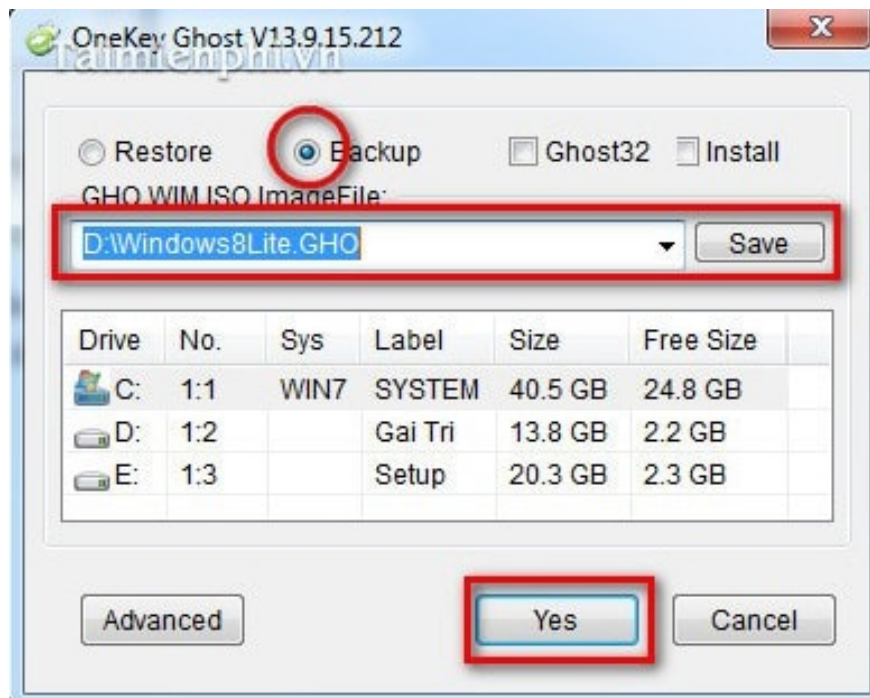

Step 2 : After waiting a few seconds, the program will list information about the drive and the Ghost files you previously saved on the hard drive.

Step 3 : If you have not saved any Ghost files on your computer, create a Ghost file in case the operating system fails.

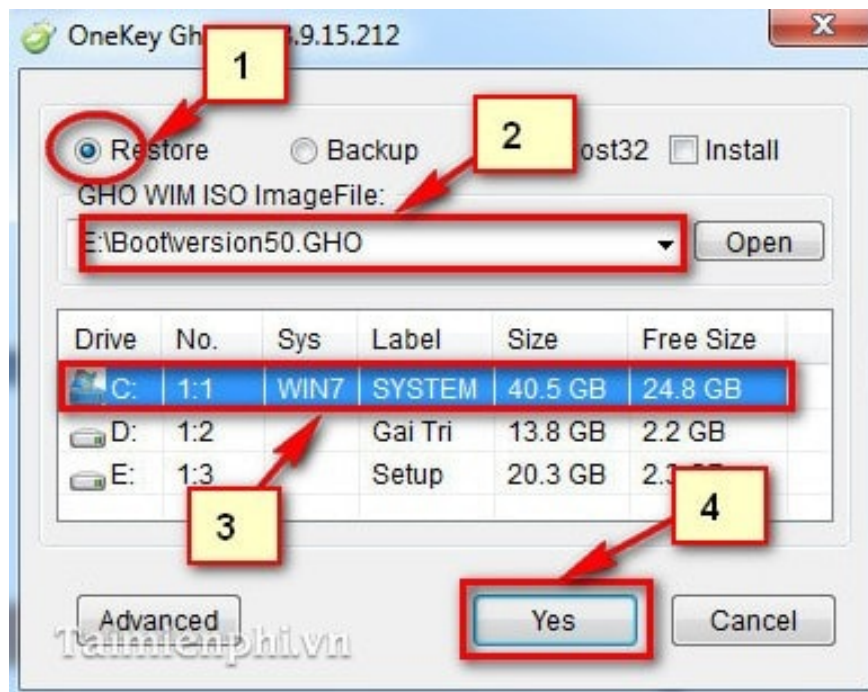

- Check **BackUp** , then select the path to save the Ghost File, next click **Yes** so the program will backup for you.

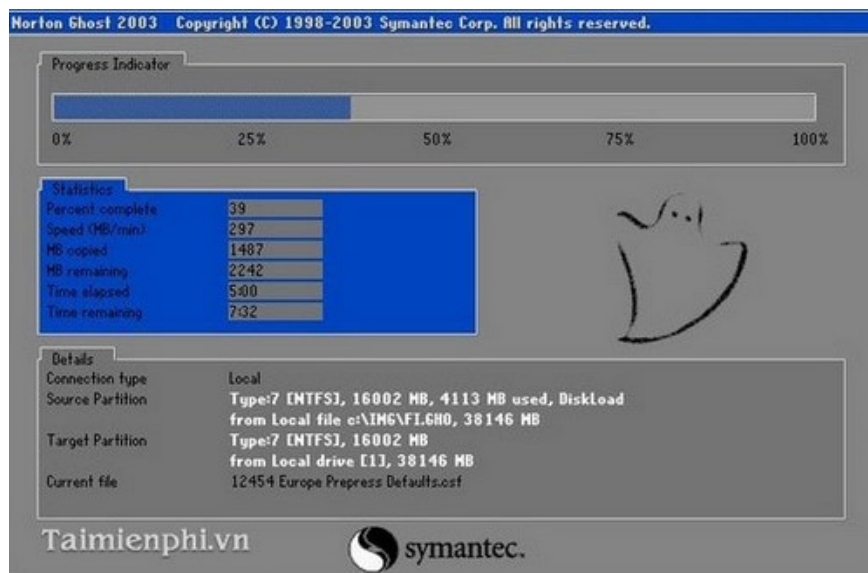

Step 4 : When prompted, Click **Yes** to start the computer and the backup process will take place.

- If your computer already has the Ghost file saved, leave the Ghost on your computer and go back to **Step 2**. Here, select **Restore** , then select the Ghost file saved on your computer and select the partition to restore. Restore then click **Yes** . The program will automatically restore the operating system for you in a short period of time.

- After clicking **Yes**, the program will automatically ghost your computer back to you on drive **C**: You just need to wait a short period of time to get results.

Using Onekey software helps you Ghost win 7 simply and quickly, thereby saving a lot of time and effort compared to installing the operating system.

Update: The official version of Windows 10 has been released, along with many different ways to install Windows 10. However, to save more time, TipsMake recommends that you should ghost win 10 instead of finding the installation version and then installing Windows 10, which will be very time consuming.
