

# How to use Google Map when offline

Without an Internet connection (carry), can we use Google Map? The answer is yes, we can still use it. Software tips will guide you how to use Google Map when offline.

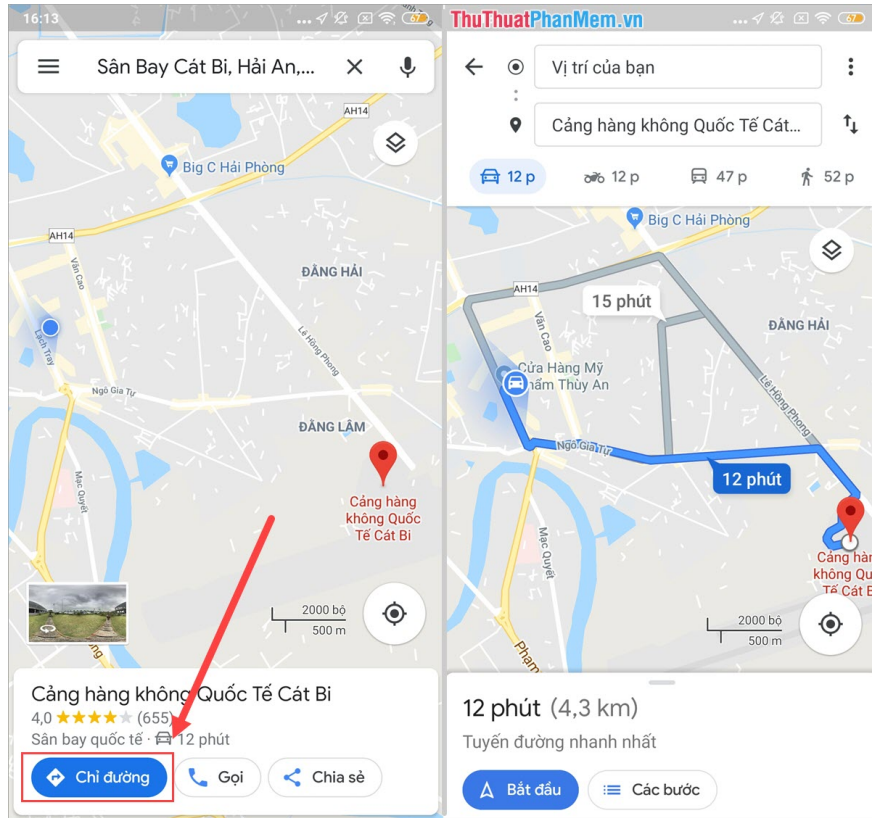

Google Map is one of the best navigation applications in the world today, but Google Map is often used when there is an Internet connection (network). So without an Internet connection (carry), can we use Google Map? The answer is yes, we can still use it. In this article, Software Tips will guide you how to use Google Map when there is no network.

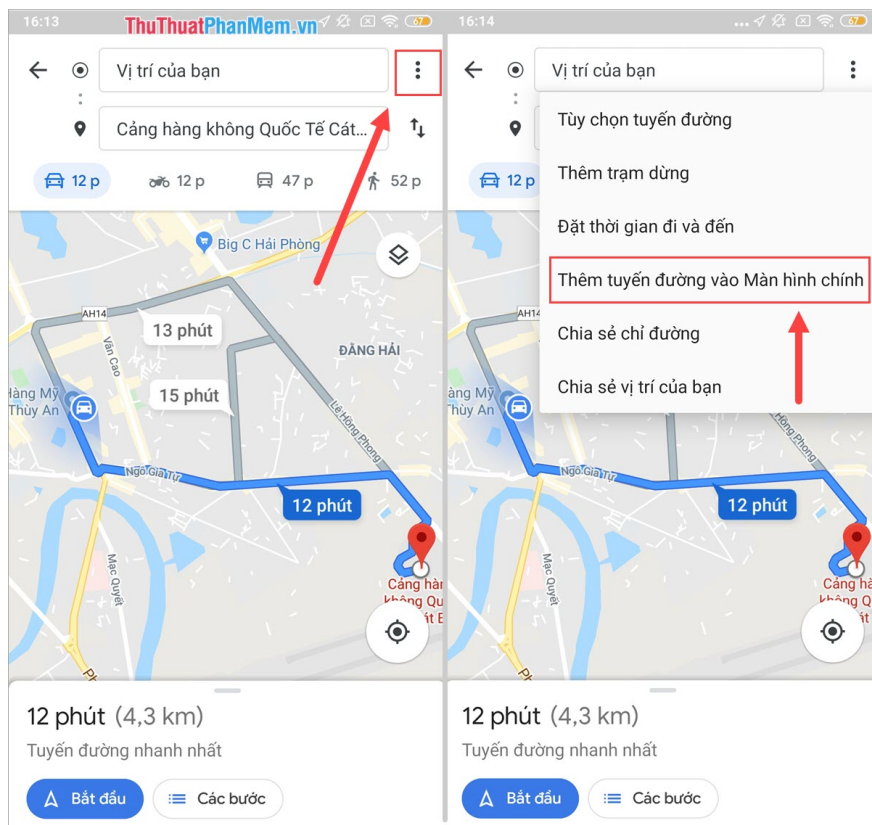

## Method 1. Use directions to Google Map

With the way to save directions to Google Map, you can only use on certain routes (set by me). If you want to save a map of an entire city area, go to Method 2.

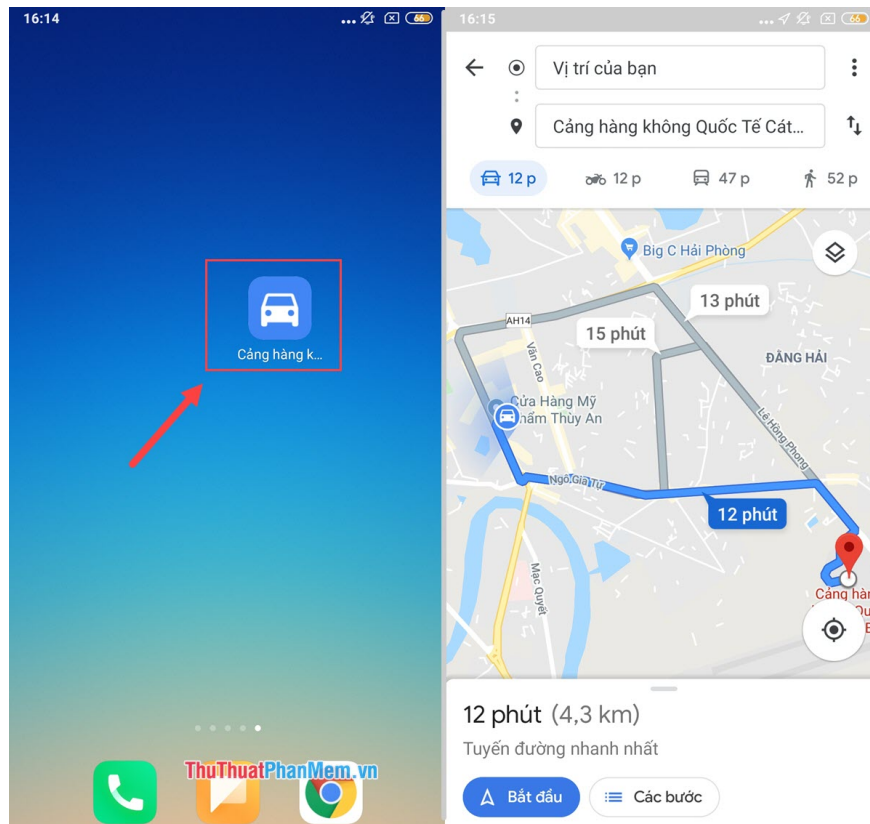

**Step 1:** You proceed to **enter the location** you need to on the search and select **Directions** to see directions.

**Step 2:** After that, select the **3-dot** icon and select **Add route to the Home screen** .

**Step 3:** Immediately, on the main screen of your phone will have a directions icon. You can click this directions to use Google when there is no Internet connection.

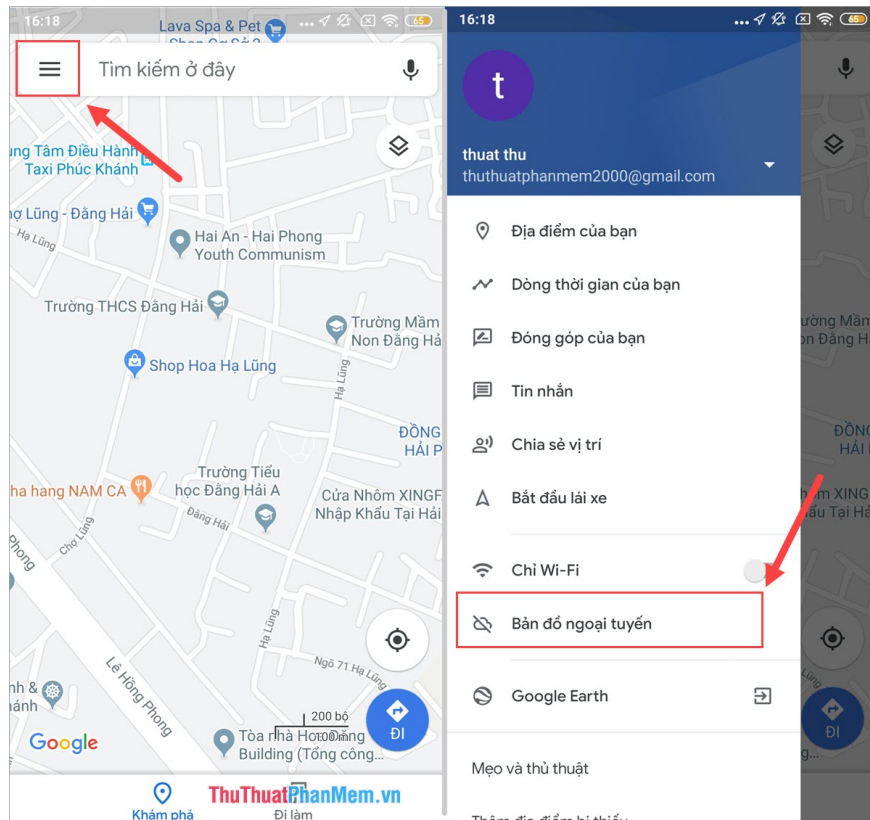

**Note:** The above steps do while the device is connected to the Internet, 3G, 4G, . Once created **Add routes to the Home screen** , you can turn off the network and use it in a normal way often.

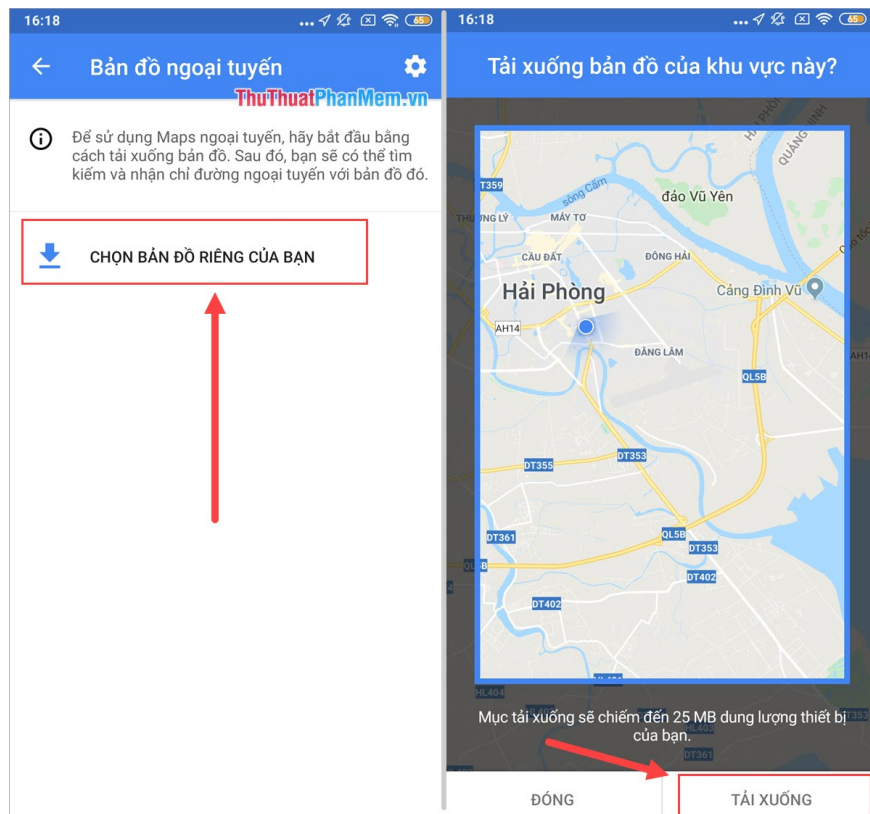

## Method 2. Use a city area map on Google Map

This way you can use Google Map when there is no network connection and view a large area of ??the city, even the city.

**Step 1:** You proceed to click on the **Settings** icon on the toolbar and select **Offline Map** .

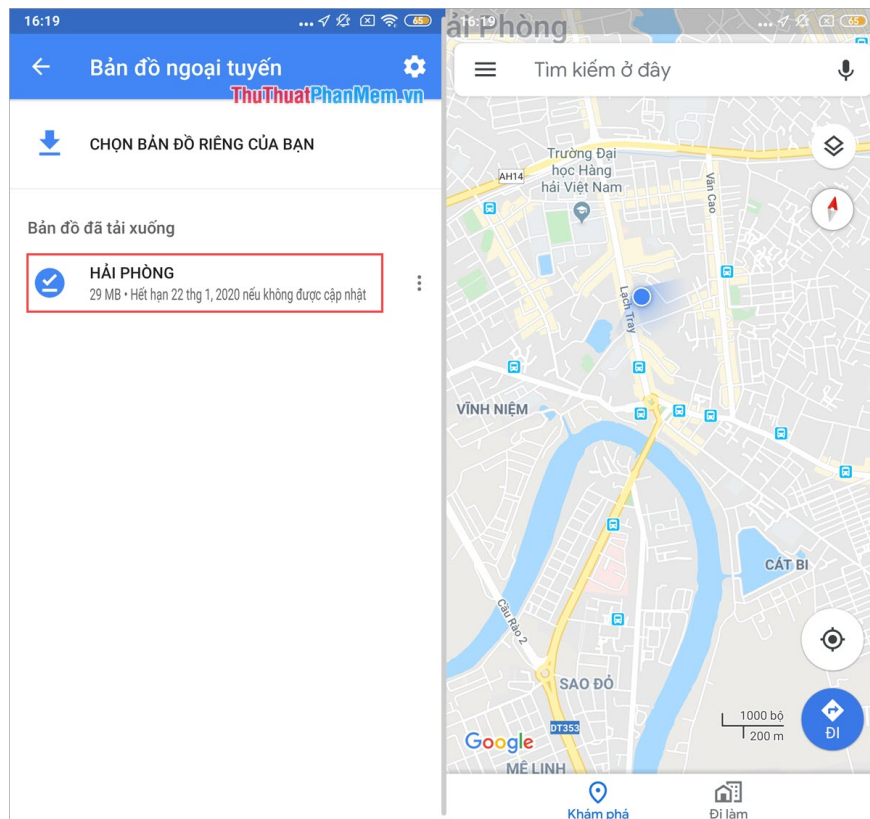

**Step 2:** After that, select **Choose your own map** to proceed to create Offline map. Next, you move the area, the location where you want to create the Offline map (can be moved and zoom in / out) and click **Download** .

**Step 3:** Finally, we will have a map of the city we have chosen. Now, you can click to view the map when there is no Internet connection.

After creating the map, you can drag, zoom in and out of each area to easily view and track.

***Note:** Within 1 month, you should update the **Download Map once** . If you do not update, it will disappear by the notified time.*

If you want to add new maps to use Offline, then select **Choose your own map** . Google Maps currently has no limit on the number of downloaded maps, so make as many convenient as possible.

In this article, Software Tips have shown you how to use Google Map when not having the most effective network. Good luck!
