

How to use GS Auto Clicker, automatically click mouse on computer

In this article, TipsMake provides specific and detailed instructions on how to use the GS Auto Clicker tool, an effective automatic mouse clicking software on computers today, helping gamers minimize repetitive mouse clicking operations.

GS Auto Clicker is a software that helps users perform basic operations on your computer mouse, including left, right and middle mouse operations. Supports single or double clicks depending on the needs and purposes of use. Usually, software like GS Auto Clicker is widely used in online games, offline games when clicking the mouse is very necessary. Currently, there are many software written about automatic mouse clicking, but to find a good software that works stably like GS Auto Clicker or **Super Mouse Auto Clicker** is very rare.

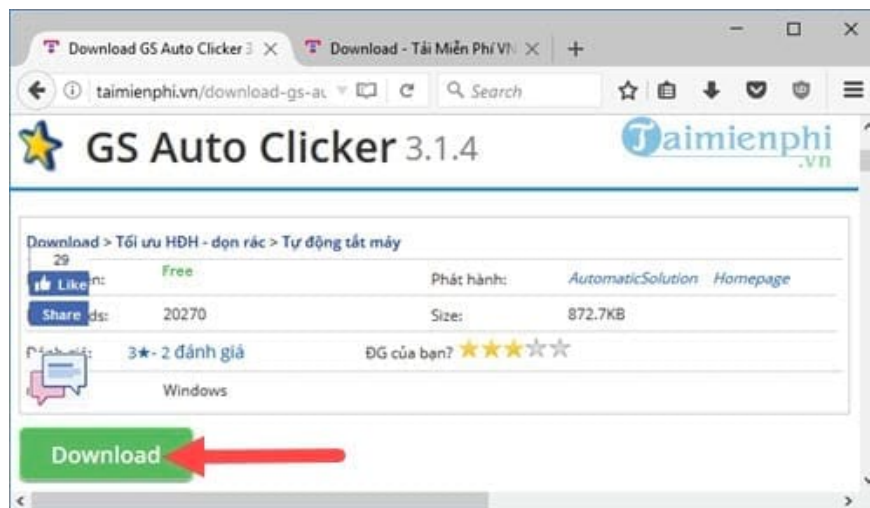

How to use GS Auto Clicker, automatically click mouse on computer

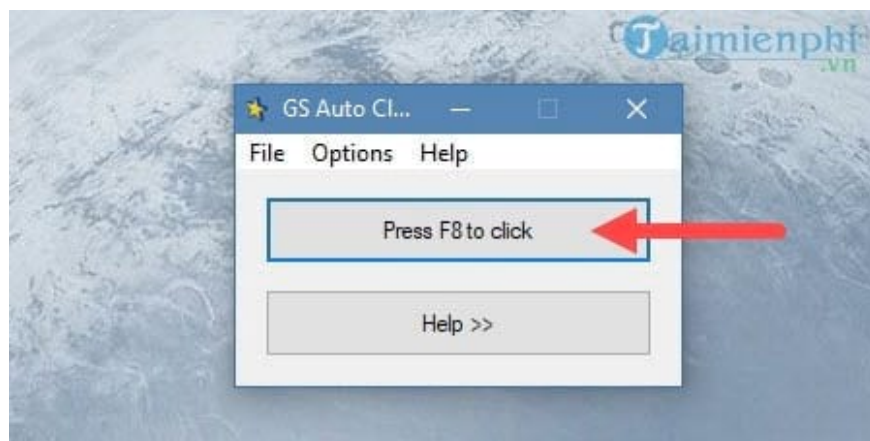

In GS Auto Clicker there are many modes that help users choose to apply to handle more problems. Moreover, the mode adjustment in Auto Click is minimized so it is completely easy to use and set up. Just a few clicks and clicks and you can **adjust the mode in Auto Click** to suit your needs.

Instructions for using GS Auto Clicker, automatically click mouse on computer

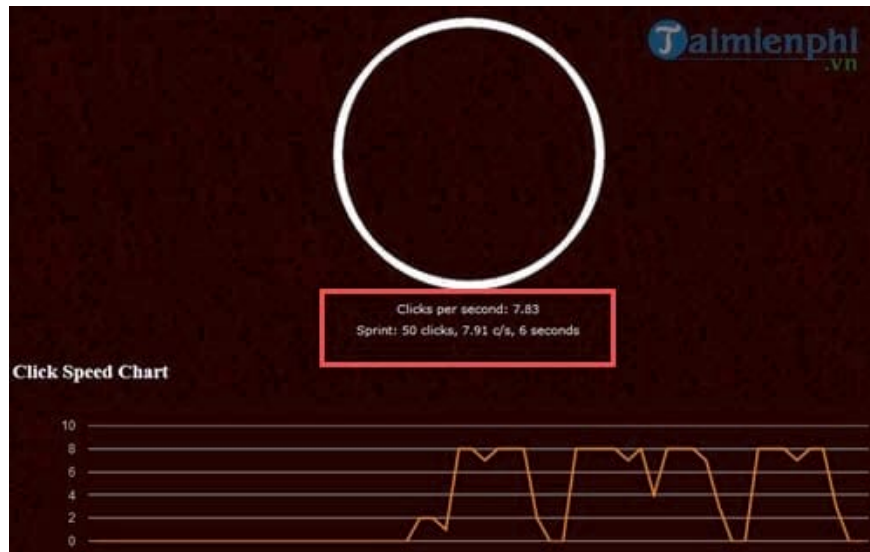

Step 1: First, readers can download **Auto Clicker** here.

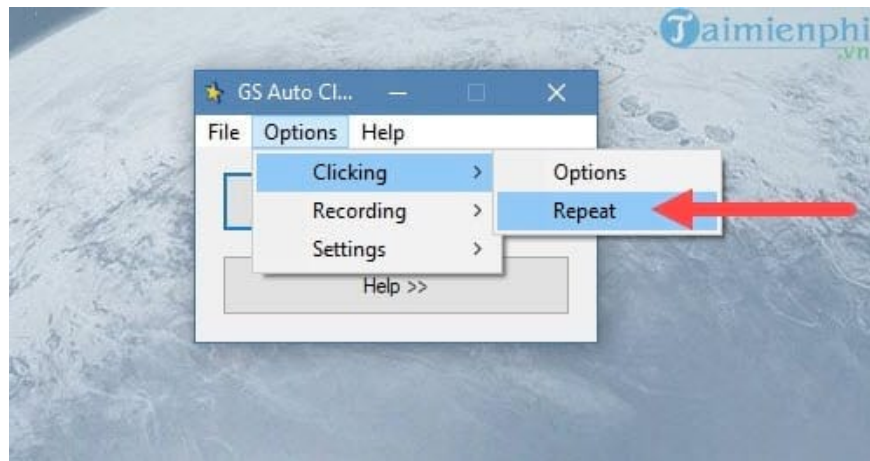

Step 2: After the download is complete, you just need to open the software and run it. Right at the GS Auto Clicker interface, you will see a very simple instruction icon " **Press F8 to click** " press F8 to automatically click.

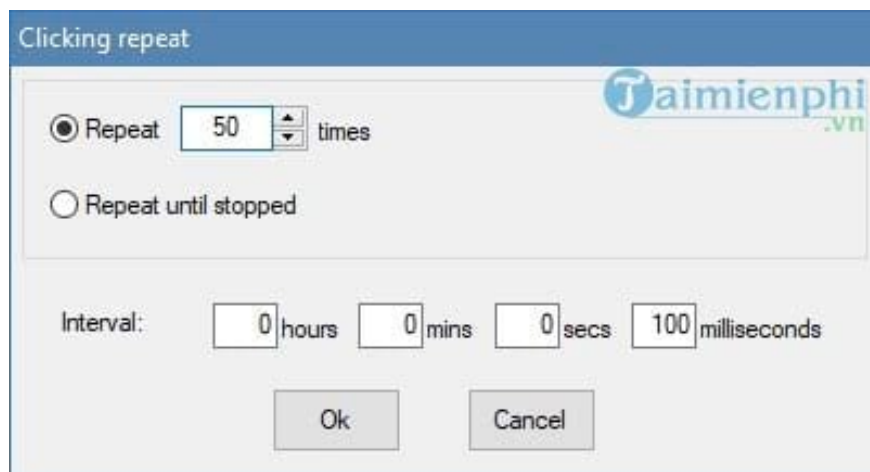

Step 3: Through the GS Auto Clicker mouse click speed test, it shows that this software defaults to **50 clicks for each F8 press** and the speed falls to about **8 mouse clicks / second** .

Step 4: Not only that, in GS Auto Clicker there are many features that you need to know. First is the **Options > Clicking >** section with 2 parts: Options and Repeat.

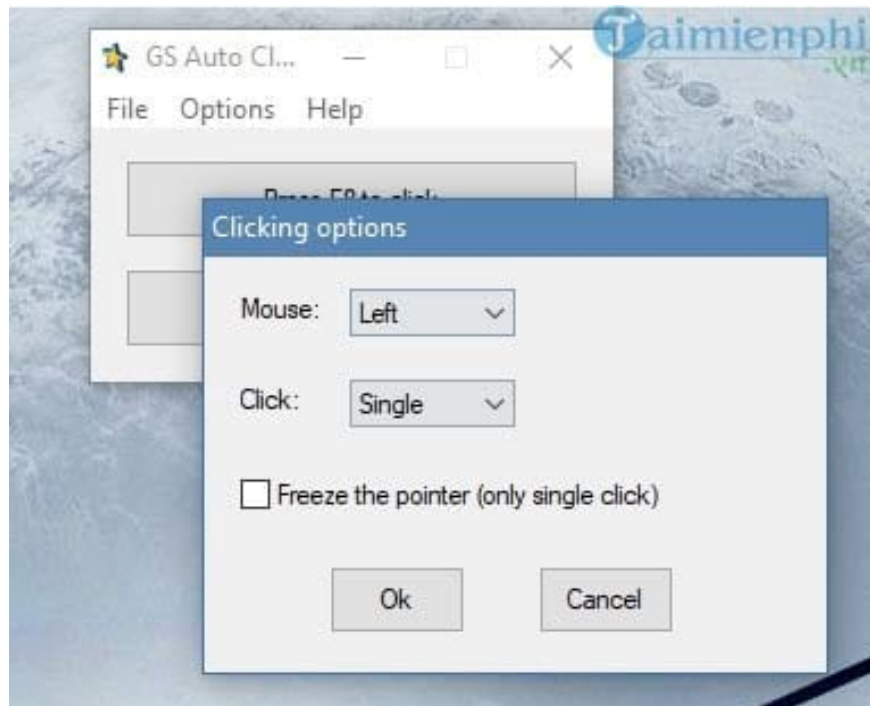

- **The Repeat section** allows you to set the number of mouse clicks each time you press F8 or the Repeat Until Stopped mode allows GS Auto Clicker to work continuously, only when you press F8 again will it stop automatically clicking the mouse.

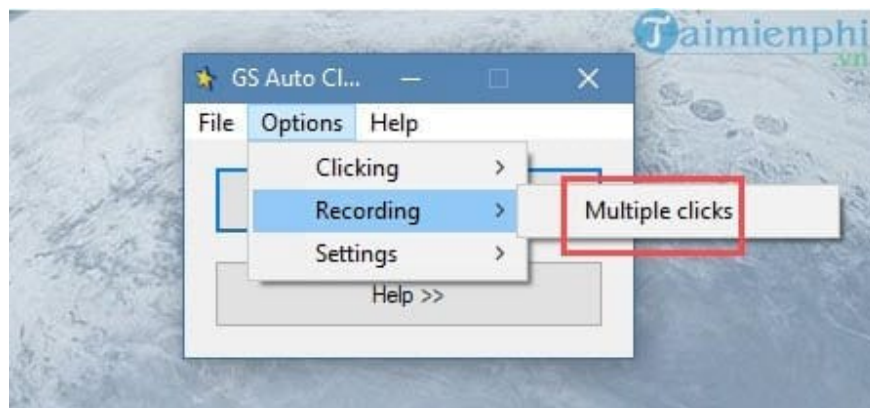

In addition, below you will see **the Interval section** to set the mouse click speed.

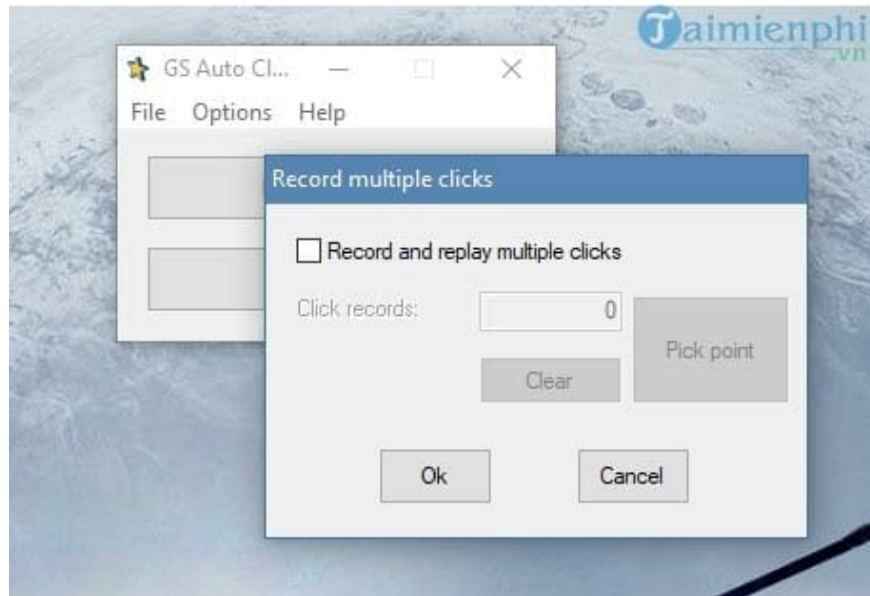

- In **the Options section**, there are 2 modes: adjusting left, right or middle click and single or double click.

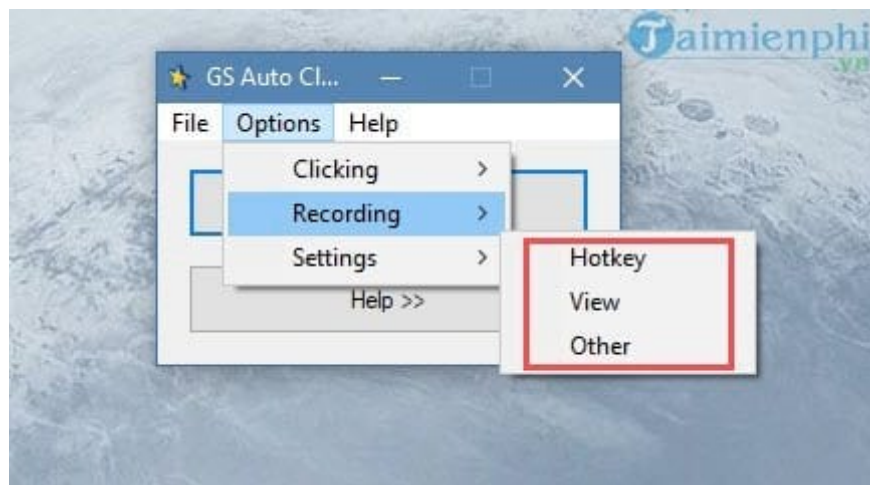

Step 5: The next part we learn about is **Recording** located in the folder **Options > Recording > Multiple Clicks**

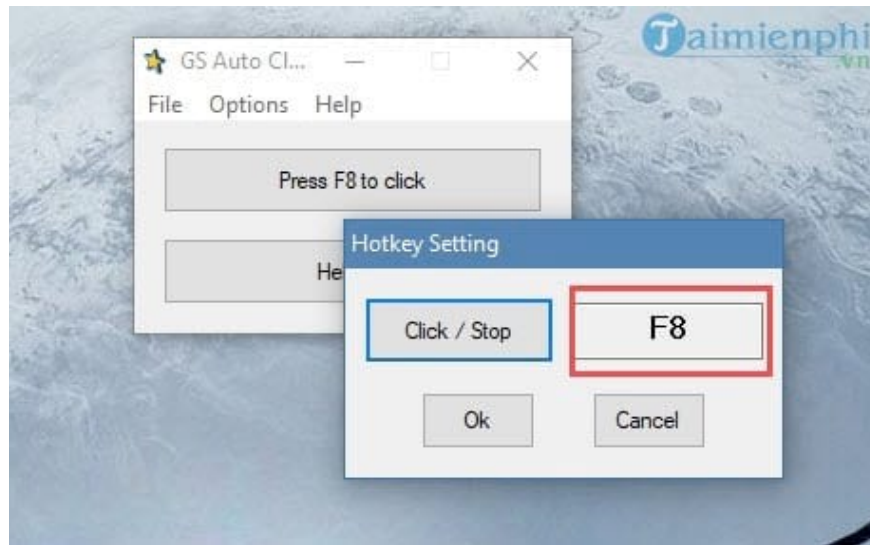

- This is a very special feature of GS Auto Clicker that allows **you to record mouse clicks and then repeat them exactly the same way** . Although this feature is good, it is very difficult to use when it requires high precision.

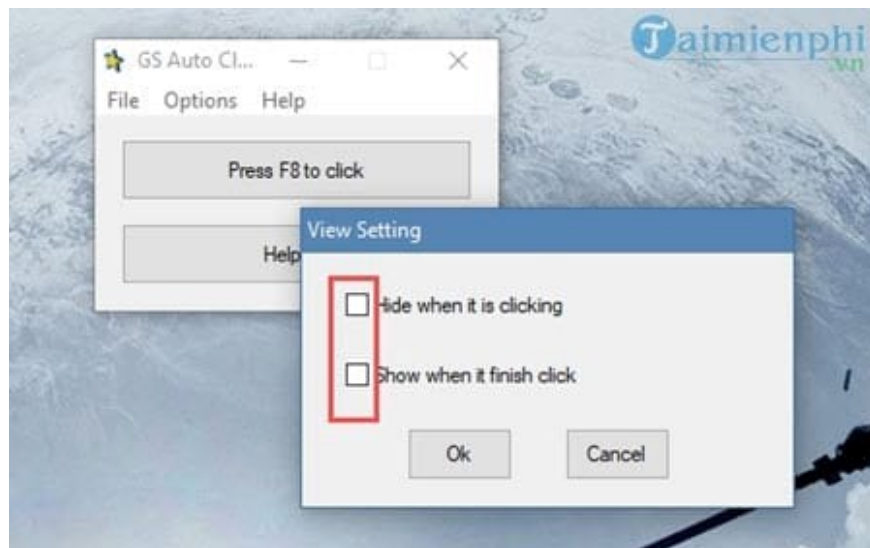

Step 6: The last part we learn is Settings located in the **Menu Options** > **Settings** bar of GS Auto Clicker with 3 main parts: **HotKey** , **View** and **Other** .

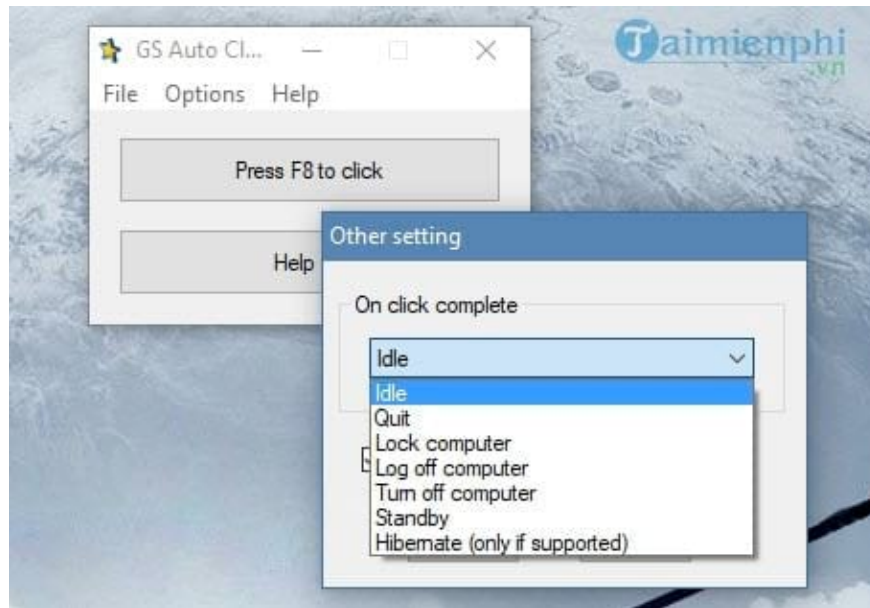

- With simple Hotkey means adjusting the shortcut key, here you see there is only 1 shortcut key which is also the main function of GS Auto Clicker which is the automatic mouse click button.

- The View section allows us to choose 2 functions : **Hide when it is clicking** - hide the program when using GS Auto Clicker (ie running). Or **Show when it finish clicking** - Allows to display the software again after using GS Auto Clicker.

- The Other feature will execute the action immediately after using GS Auto Clicker, with corresponding commands such as **Idle** (leave as is), **Quit** (exit the program), **Lock computer** (lock the computer), **Log off Computer** (Exit the working session, current account in use), **Turn off computer** (turn off the computer), **Standby** (put the computer in sleep mode) or **Hibernate** (sleep mode - if the computer supports it).

Above is how to **download GS Auto Clicker** or how to use basic Auto Click as well as the functions you need to know when using GS Auto Clicker. It can be said that on the market today, there is hardly any software that can surpass GS Auto Clicker, using smoothly with few errors like GS Auto Clicker and when you use Auto Click, you will see that this is really the best automatic mouse clicking software on the computer.
