## How to enable iCloud Photos on Mac

We open the Photos app then click on Photos > Settings displayed at the top. Next, click on the iCloud tab and check iCloud Photos to activate on Mac.

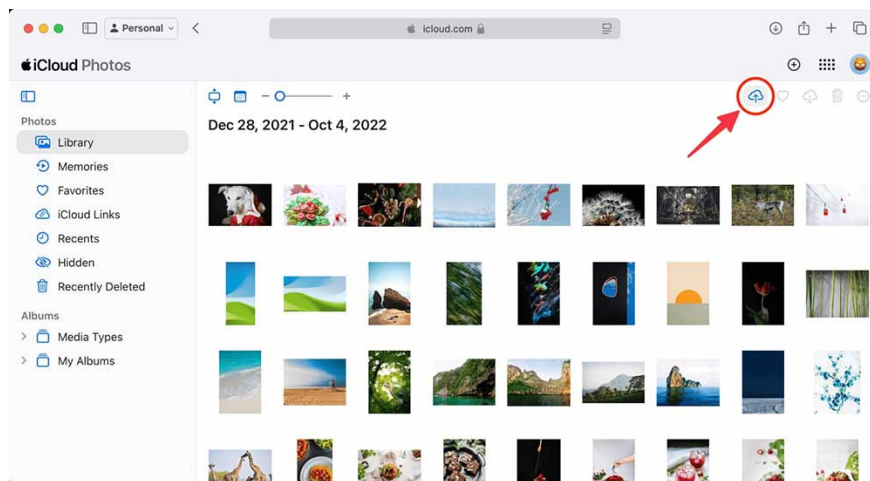

## How to enable iCloud Photos on the web

We access the iCloud website via the link below, then log in to our Apple account.

1. Access iCloud Photos on the web

In the Library interface, simply click on the cloud icon and select images from your computer or drag and drop them into the iCloud web interface to sync.

## What to do if iCloud Photos won't turn on?

There are two main reasons why you can't turn on iCloud Photos: low iCloud storage or system errors.

### If iCloud storage is low:

1. Delete unnecessary photos, videos, and screenshots from the Photos app. Delete all data in the Recently Deleted album and clear the iPhone/iPad cache. .
2. Delete files and backups to free up your iCloud storage .
3. Sign up for iCloud+ or Apple One for more cloud storage.

### If the reason for the system error:

1. Check WiFi connection on device
2. Quit and reopen the Settings app or the Photos app.
3. Restart iPhone, iPad, Mac
4. Update your device to the latest operating system version.
5. Sign out of your Apple account, then sign back in.
6. Reset all settings and try again.
