

How to use Inboxen to create unlimited temporary emails

Inboxen is a service that creates temporary email with unlimited numbers, but you can still receive, view, download attachments or mail content.

Maybe you own several email addresses, when creating mail addresses is very simple, to cater to each individual needs. However, users will face problems such as advertising, spam, stealing personal information or you create multiple email addresses leading to the forgotten password. In this situation, it is necessary to use temporary email and virtual email services.

The use of these temporary emails will limit a lot of things, helping us to protect the main email address from spam and continuous advertising. Previously, Network Administrator had introduced you to 5 virtual email creation services. And you will get more inboxen temporary email creation service, without limiting the number of emails in the article below. Users can still receive, view, download attachments or content.

2. 2-layer security for Gmail how?
3. How to recover Gmail account?

1. How to create virtual email on Inboxen

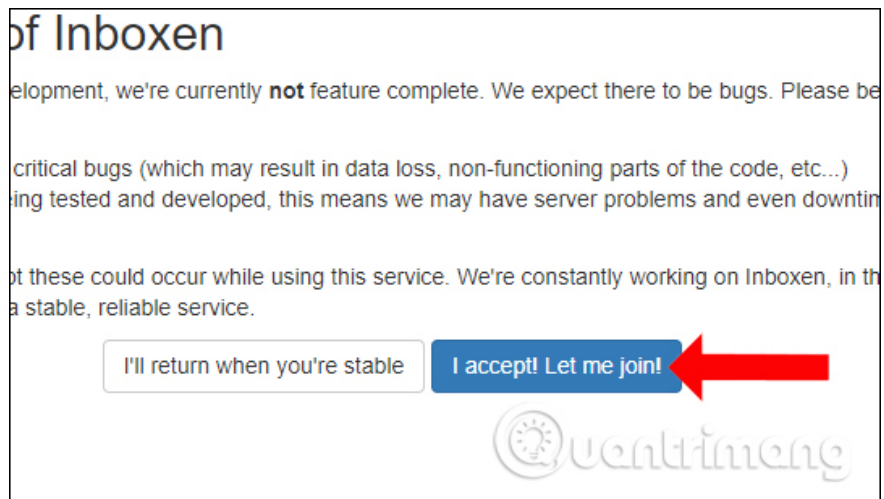

Step 1:

You access the link below to go to the homepage of Inboxen, then click **Join button** to use the service.

1. <https://inboxen.org/>

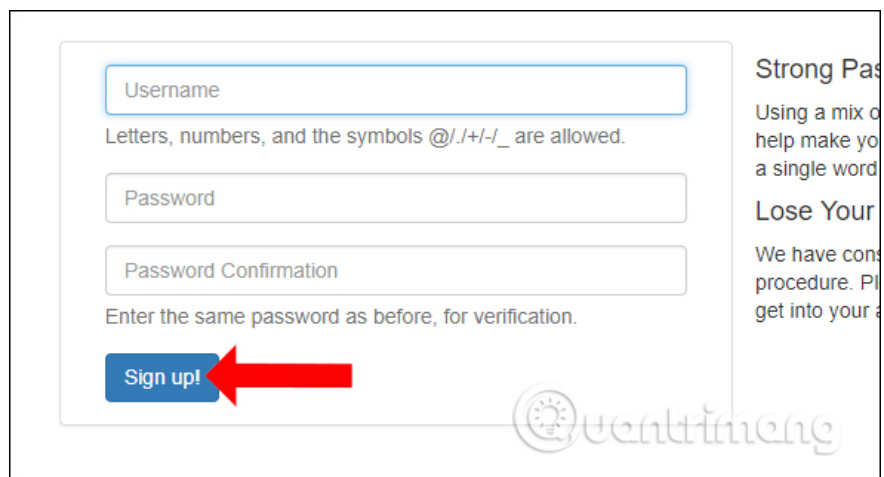

Next click on **I accept! Let me join!** to register.

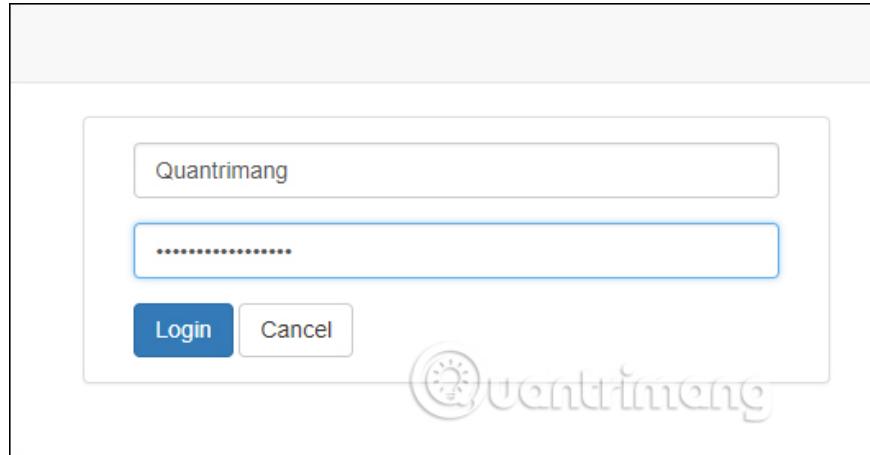

Step 2:

Switch to the new interface, enter your username and password at least 12 characters and click **Sign up!** .

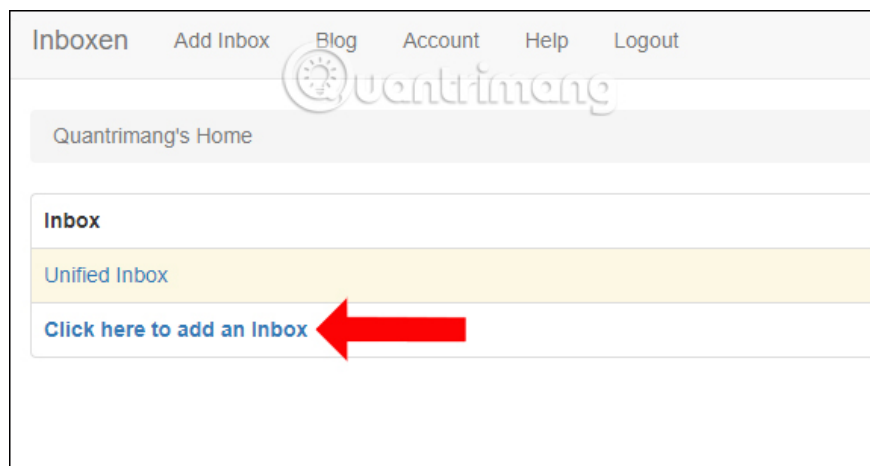

Step 3:

Log in to the account you just created on Inboxen to use the email address creation service.

A login form for the user 'Quantrimang'. It features a text input field containing the name 'Quantrimang', a password input field with masked characters, and two buttons: 'Login' and 'Cancel'. A watermark logo for 'Quantrimang' is visible in the bottom right corner of the form area.

In the next interface click on **Click here to add an inbox** or Add inbox to create an email address.

The Inboxen user interface. The top navigation bar includes 'Inboxen', 'Add Inbox', 'Blog', 'Account', 'Help', and 'Logout'. Below the navigation is a header for 'Quantrimang's Home'. The main content area is titled 'Inbox' and contains a 'Unified Inbox' section. A red arrow points to a link labeled 'Click here to add an Inbox'.

Step 4:

Next we **choose the email domain name** inboxen.co.uk or inboxen.org that the Inboxen service provides in the Domain. Next click on the description for the email in Description and **click Add** to create.

The option Exclude from Unified Inbox so that every email sent to the chosen email address domain does not appear in the Unified Inbox summary mailbox.

2. How to use virtual email on Inboxen

Step 1:

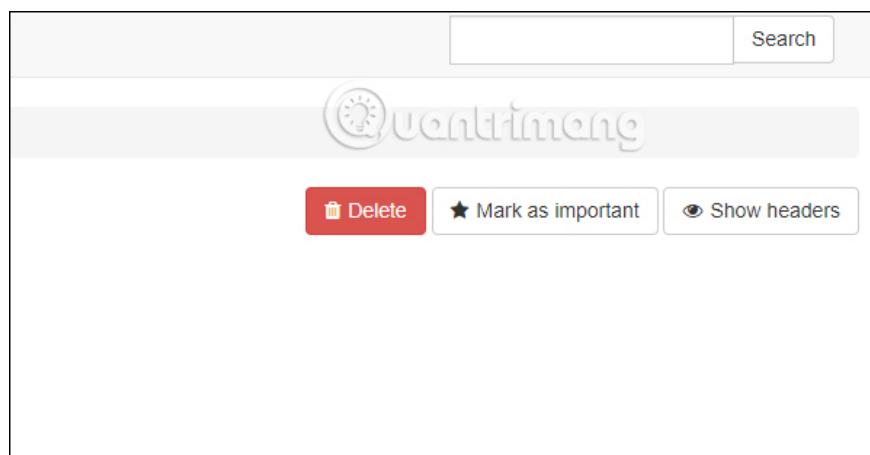

After creating a temporary email address, users can use that email to send or receive email. If there is an email sent to you, just click on the email address to view the content.

In the content of the message, the service will provide users with many options such as saving the text in the message into txt, html file, downloading the attachment when clicking **the Download button** .

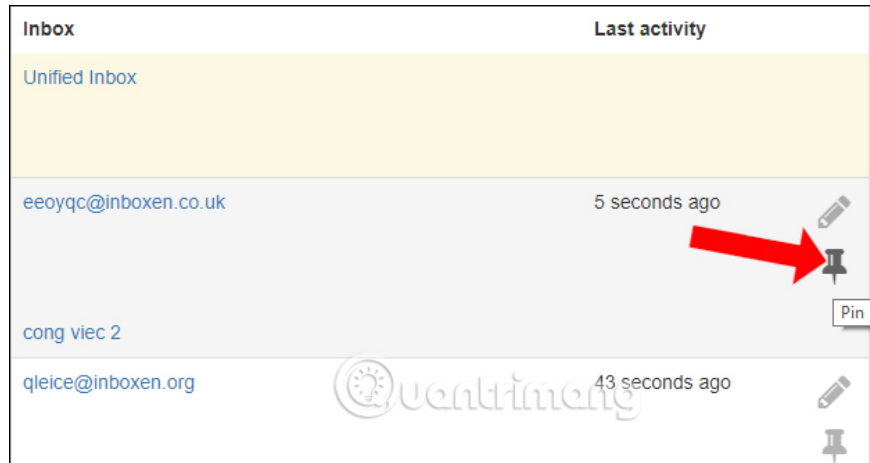

Or on the far right, the user can see the recipient's IP address by clicking Show headers, deleting the message (Delete), and marking important messages (Mark as important).

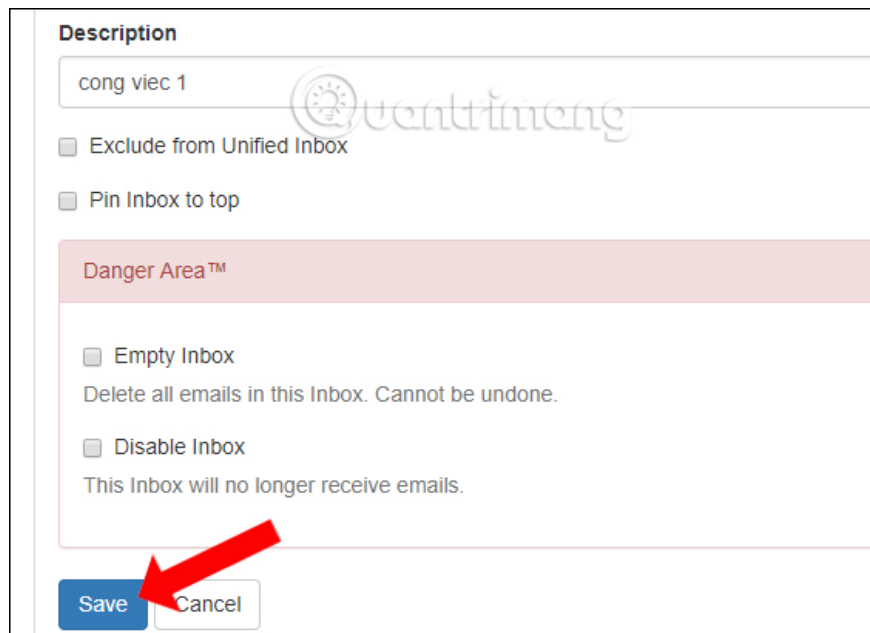

Step 2:

When creating multiple emails on Inboxen, we can divide frequently used addresses to the top of the list. At the usual email address, click **the pin icon** .

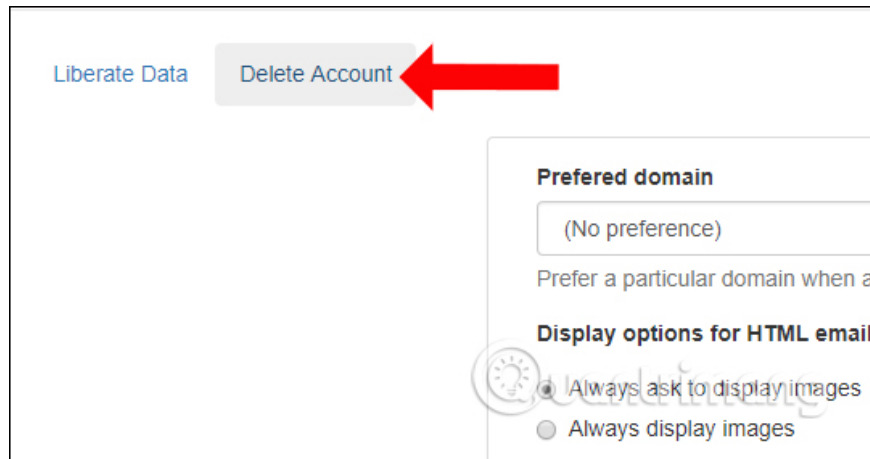

Step 3:

Next when clicking on **the pen icon** , users will have options including Empty inbox to delete all messages at this email, Disable inbox to temporarily disable receiving mail. Click **Save** below if there is a new change.

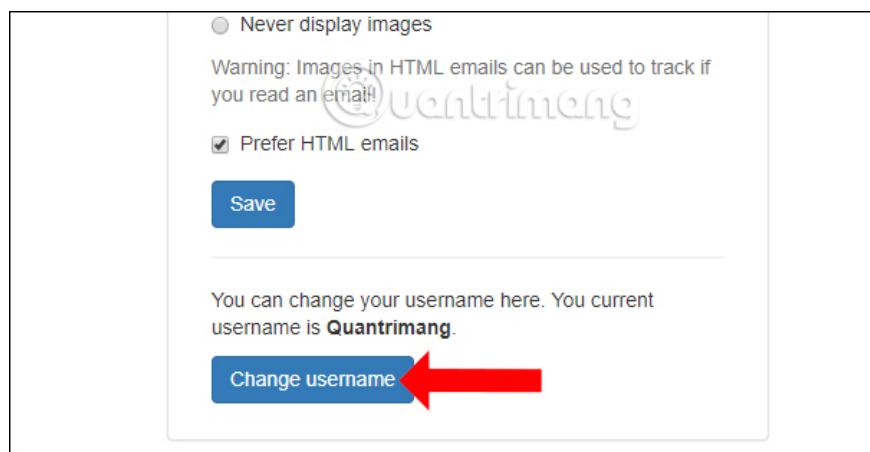

Step 4:

If you no longer want to use this temporary email address, you will need to delete the created Inboxen account. Click **Account** and select **Delete account** to delete. You can then re-create a new account because the Inboxen service does not require you to enter any information.

Also in this Account interface, we can click **Change username** to change the name for the account if desired.

A service to create virtual email, temporary email with a very simple way to do. Inboxen will not need you to enter any personal information to create an account. The number of temporary emails created on the Inboxen is not limited, so we can comfortably use it for many different purposes, without worrying about disclosing personal information.
