

How to use iParking to find parking spots on the phone

iParking is an application to find parking, send cars on the phone. Users can use iParking to find parking in the fastest time.

After several months of pilot implementation, currently iParking application to find parking, parking on the phone has officially come into operation with more street updates.

iParking application will help you find parking spots according to the current location that users update. After that, we can register to send multiple vehicles at the same time on the same account. iParking supports a variety of ways to find parking points such as via QR code at the parking point, enter the point code on the app, or search for parking spaces that are constantly updated on the app. Before the parking deadline expires, you will receive a 15-minute message from the application.

The parking price is calculated according to the regulations of the agency, international card payment, domestic ATM card or via SMS. Until now, iParking has deployed services to 9 urban districts of Hanoi: Hoan Kiem, Dong Da, Hai Ba Trung, Ba Dinh, Tay Ho, Thanh Xuan, Nam Tu Liem, Long Bien and Cau Giay. There are a total of 151 parking spots that deploy iParking.

2. Search for car parking by QR code iParking

As mentioned above the app offers 3 ways to search for parking checkers including scanning QR codes. We click on **the QR code scanning icon** on the map, then bring the camera to the QR code slot placed on the street signs.

You will also receive car parking locations.

3. Find parking spots by entering the parking code

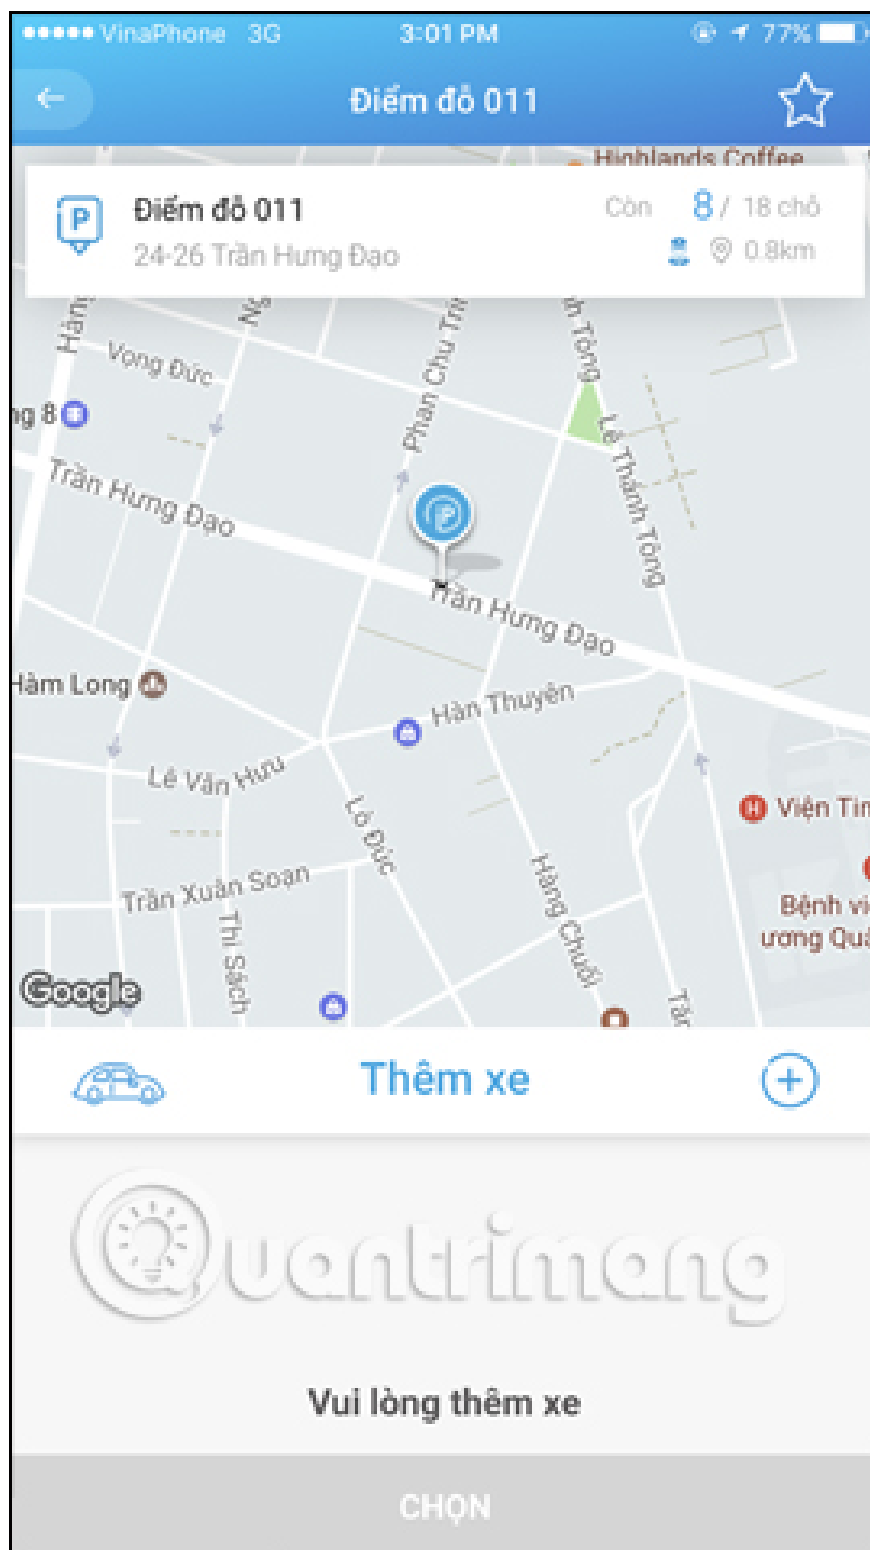

In addition, we can also enter parking codes on iParking. Currently parking spots will be marked starting 001 to 017. You just need to click on a parking code to search.
