2. How to copy, copy contacts from iPhone to SIM with iTools
3. How to customize the iPhone Home screen
4. Download high-quality background images instantly for iPhone Xs and Xs Max
5. How to adjust the level during the virtual Home button on the iPhone

## Instructions for using iPhone Xs, Xs Max for newbies

### I. Basic operation

#### 1. Open iPhone and return to the main screen

First to turn on the iPhone, instead of using the Home key or the power button, you can tap twice on the screen to open the iPhone Xs and Xs Max. In addition to this, you can also use the **Raise to weak option** in **Settings** , usually this option will be enabled by default when you purchase the device.

If you want to return to the main screen of the iPhone, just swipe up from the bottom of the screen.

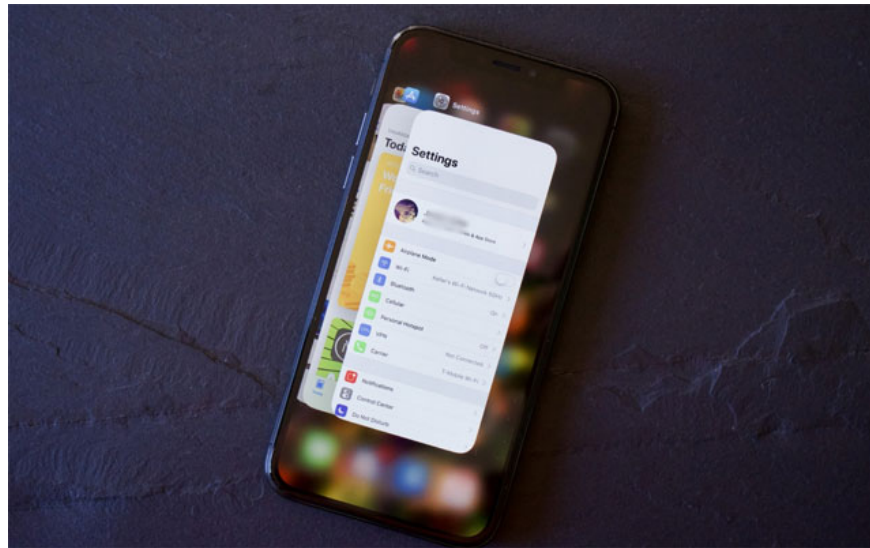

## 2. Put the iPhone to the main screen

The next tip is to bring your iPhone back to the main screen, if you previously pressed home to do this, now on iPhone Xs, Xs Max, we just need to swipe from the bottom of the screen to go back to Home. Screen.

Next is the multitasking operation, if you are on the old iPhone you just need to press twice on the home key to open the multitasking interface, then on the iPhone Xs and Xs Max, you should swipe up at the bottom, then stop in the middle of the screen and swipe right.

### 3. Start Siri

With iPhone lines with a home button, you just need to press and hold the home button for a while to wake up Siri virtual assistant. But for iPhone X, iPhone Xs, and iPhone Xs Max, you just need to press and hold the power key next to the device. And the power button also works when using Apple Pay, you just need to double-click the home button to make this payment method.

#### 4. Open Control Center

You can see above, the swipe from the bottom up will just return to the home screen or open the multitasking menu. And this is also the way to open the Control Center menu on iPhone lines with a home button. But for the iPhone series of screen overflow, please swipe down in the upper right corner of the screen.

## 5. Power off iPhone Xs, Xs Max

A rather important operation is to **turn off iPhone X**, iPhone Xs, and Xs Max. We saw above that pressing and holding the power button on the iPhone Xs, Xs Max will launch Siri, and that's how to power off the iPhone with the home key. As for the iPhone series of overflow screen, press and hold the power button and volume down button at the same time.

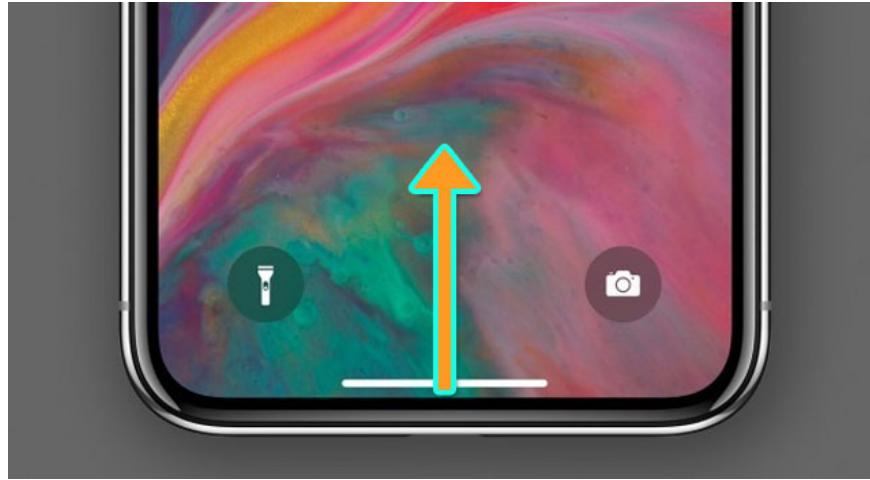

## 6. Take screenshots of iPhone Xs and Xs Max

On the iPhone series with the home button, the screenshot operation will be to press the power button and the home button at the same time. As for iPhone X, Xs, and Xs Max, the iPhone screen capture operation will hold the power key and volume up key at the same time.

## 7. Scan back to Face ID

Sometimes when unlocking iPhone with Face ID, the system will not recognize your face, then swipe from the bottom of the lock screen to reopen your Face ID.

## **II. Tips for using iPhone Xs and Xs Max you need to know**

### **1. How to create virtual home keys on iPhone X, Xs, Xs Max**

The biggest change of the iPhone overflow is the screen size. In an effort to provide a great screen experience for users, Apple has officially removed the physical home key on the iPhone X, Xs, Xs Max and Xr lines.

The removal of the virtual home button is caused by the user being afraid that the physical Home button will be pressed so much that it will be damaged. But you can still install the virtual home key on this iPhone screen borderline screen in the tutorial How to turn on Virtual Home on iPhone X.

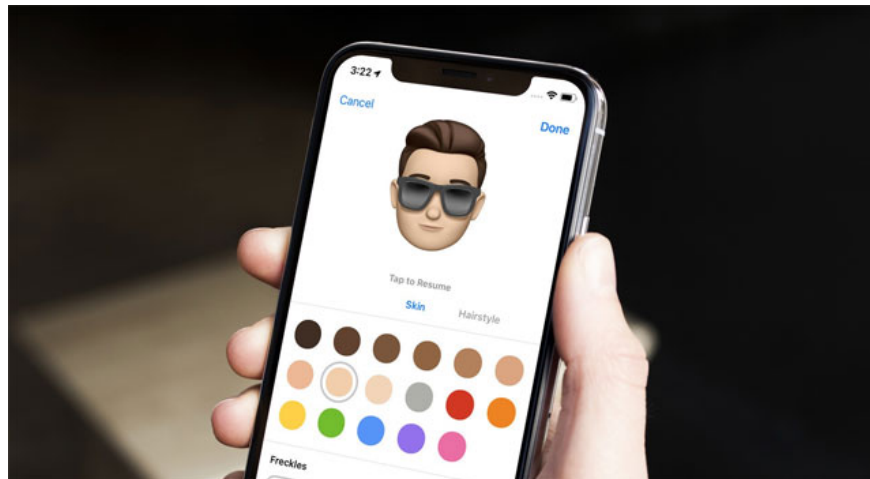

### **2. Shooting 4K movies**

4K movie recording mode has appeared from iPhone 6s version, by default iPhone will only record videos in 1080p resolution. 4K resolution will help you get a high definition video. However, this 4K mode will have more options if you use it from the iPhone 8 / 8Plus, iPhone X and above.

You will have three frame rate options for recording 4K videos on iPhone Xs, Xs Max at 24 frames per second, 30 frames per second and 60 frames per second. See more settings for recording 4K videos on iPhone in the article Raising the quality of 4K video recording on iPhone X "quality" across DSLR cameras.

### **3. Customize Animoji**

This is also the unique feature most mentioned when talking about iPhone X, this is an application in the iMessage messaging application. This feature simulates your face movement based on TrueDepth camera. If you want to have great Animoji experience, you should not ignore this feature, take a look at how to use Animoji on iPhone X in the article How to use Animoji on iPhone X.

### **4. Edit the lock screen icon on iPhone X**

When using Face ID to unlock the face on iPhone X, you will see the lock icon open or closed, indicating the device's current unlock status. The default icon will not be changed on iPhone X, Xs, Xs Max. But you can still change this icon through the instructions in the article [How to edit the icon of unlocking iPhone X](#).

## 5. See UIUD

UDID is a string of characters with numbers and letters attached to each device iPhone, iPad and iPod Touch. This serial number is used to monitor data, register equipment in the portal to test the application or use to install the iOS version of Beta. On iPhone Xs and Xs Max, watching UDID will be more complicated than the iPhone X or below, you can simplify this with instructions in the article [How to view the UDID of iPhone XS and iPhone XS Max](#).

Here are a few useful tips when using iPhone Xs, Xs Max, with the above instructions you can see the hard key operation on iPhone Xs, Xs Max is not much different from iPhone X. And with the tweaks [Fixing the above software](#) will help you get more interesting experience when using iPhone Xs, Xs Max.
