How to use iTunes for beginners. iTunes is Apple's software that allows connectivity between computers and mobile devices such as iPhone / iPad / iPod. With iTunes, we can copy music, videos, data from PC to iPhone / iPad / iPod. In addition, iTunes stork

iTunes is Apple's software that allows connectivity between computers and mobile devices such as iPhone / iPad / iPod. With iTunes, we can copy music, videos, data from PC to iPhone / iPad / iPod. In addition, iTunes can replace the default music player.

The following article Thuthuatphanmem.vn will guide you basic operations on iTunes. First, download and install iTunes to your computer at the following address:

<https://www.apple.com/itunes/download/>

1. iTunes and the basic menus

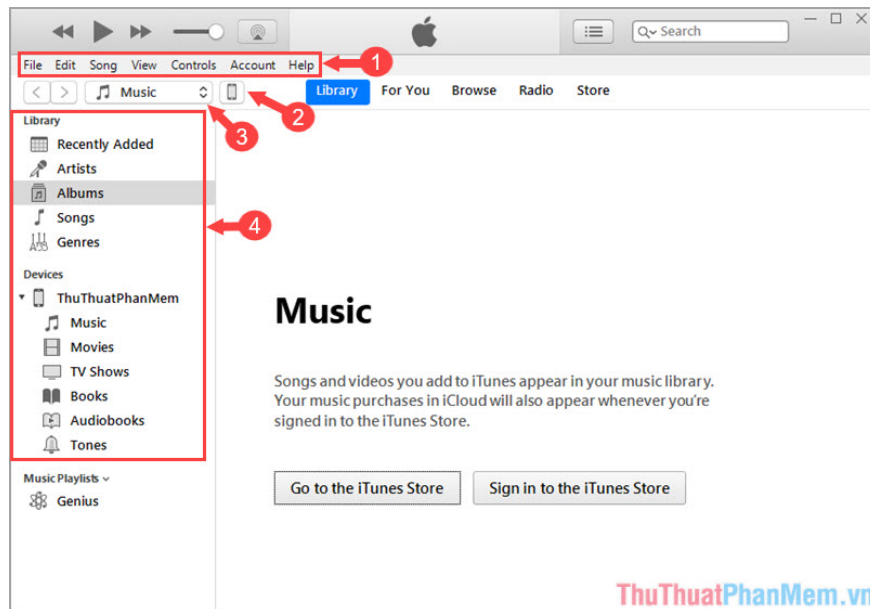

The iTunes interface is divided into separate menus

(1) Menu Bar: Like all other software, the menu bar functions such as adding, removing Playlist, logging into iTunes account .

(2) Device: This icon appears when you connect iPhone / iPad / iPod to the device.

(3) Genre: Select this item to move to other genres such as Movie (Movie), Podcasts, Audio Books (Audiobooks).

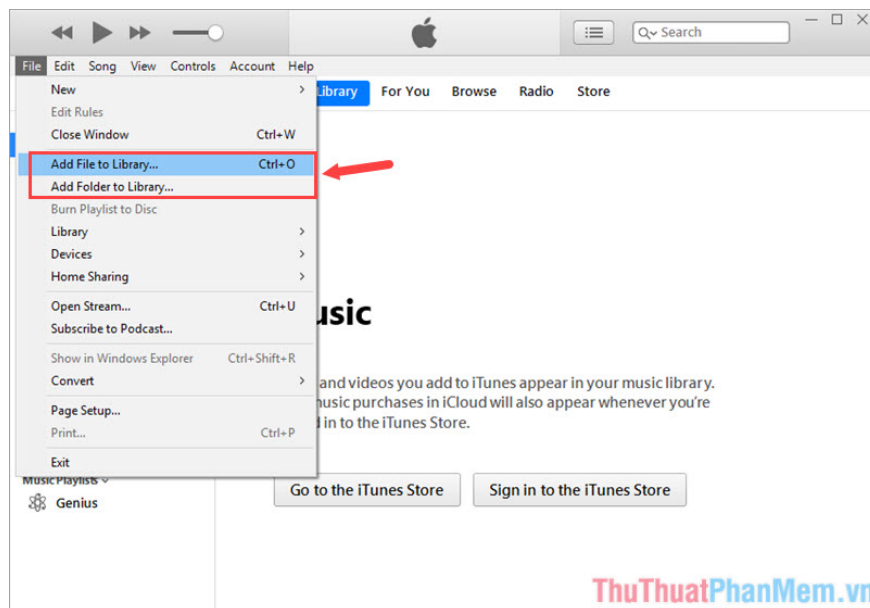

(4) Library: Here, iTunes divides music, movie, and podcast libraries into different categories.

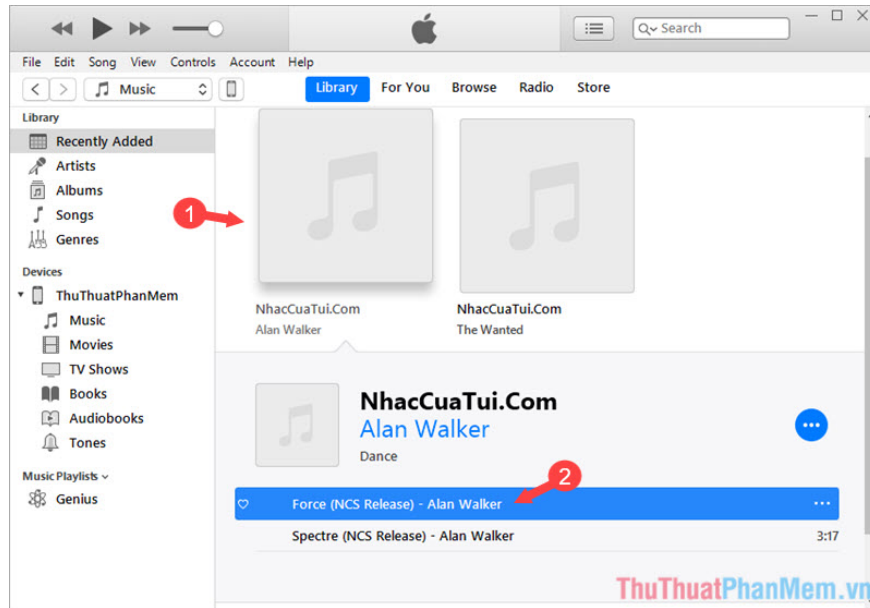

2. Use iTunes as a music and video player.

iTunes can also play some popular audio and video formats such as mp3, aac, wav, mov . To add music to iTunes, we follow these steps:

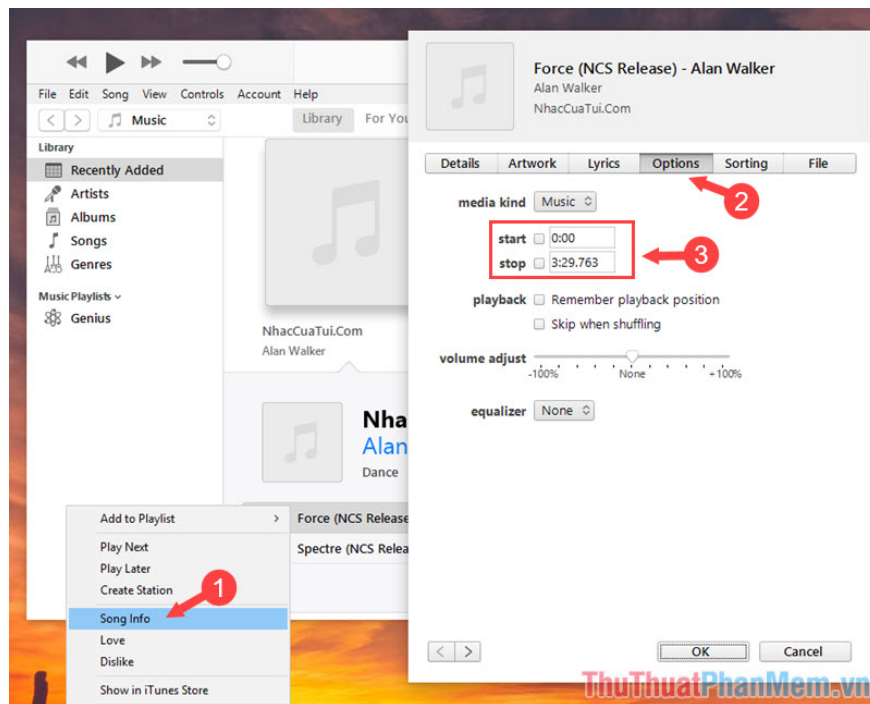

Step 1: Go to **File => Add File to Library** . if we just add a few songs to the library or **the Add Folder to Library** . if you want more fast 1 music folder to the library.

Step 2: After adding the music file, you can open it and enjoy it. Music playing interface is quite simple and beautiful compared to the default music player on Windows.

In addition, iTunes also allows you to cut your favorite music as a ringtone. To do this, right-click on the music file and select **Song Info**. In the dialog box **Song Info**, you select the **Options** and can cut music by setting the start point (Start), end point (Stop) of the song.

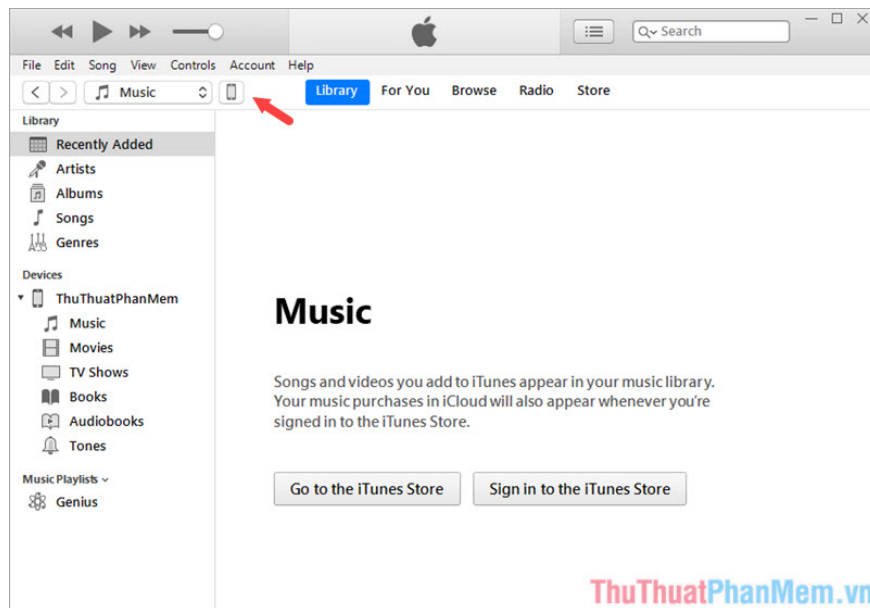

3. Operations on iPhone / iPad / iPod with iTunes

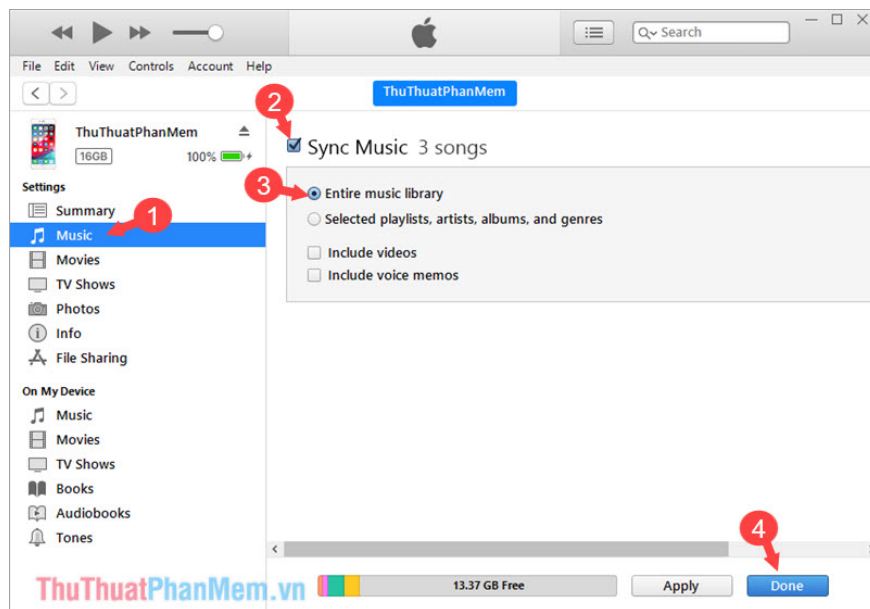

3.1. Copy music to iPhone via iTunes

To sync music to your iPhone / iPad, you must first add music to the library before you can manipulate music to iPhone.

Step 1: Click on the iPhone icon as shown below.

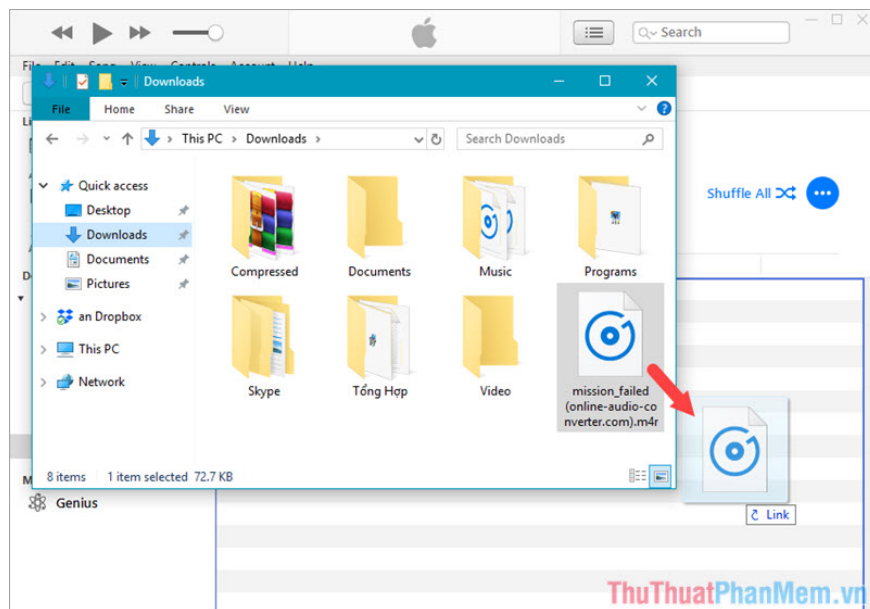

Step 2: Go to the Music section and select **Sync Music**. Select **Entire music library** to sync the music in the library to iPhone. Then click **Done** to complete.

3.2. Set a ringtone for iPhone with iTunes

To install ringtones for the fastest iPhone, you can download music files in .m4r format and put into iTunes to sync to iPhone.
