

How to use Jetdrop to share files up to 10GB

Jetdrop allows downloading files up to 10GB or 1000 files directly for each share.

Instead of choosing Gmail to send files, nowadays people tend to choose online file delivery services, which both support sending large files and have some additional features such as self-destruct files or setting split passwords. file sharing. Jetdrop is an online file sending service that supports sending files up to 10GB for each or 1000 files when you download multiple files at the same time.

The support for large volumes when sharing helps users send heavy files such as software. In addition, Jetdrop has a password generator to secure sharing and sending files. All shared files are self-destruct within 7 days from the time the recipient opened the file. Jetdrop works on all device platforms, and is completely free with no registration account. The following article will guide you how to use Jetdrop to share files.

Instructions for sharing files online on Jetdrop

Step 1:

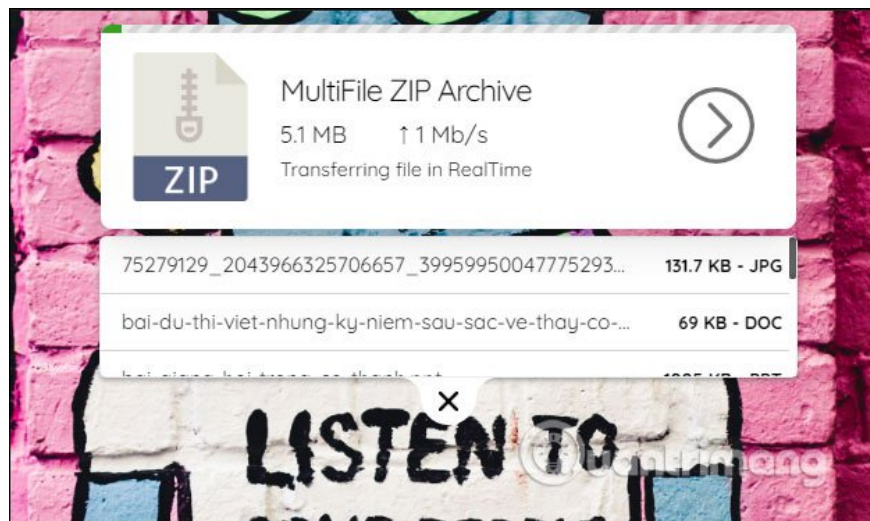

We visit the Jetdrop home page by following the link below.

<https://www.jetdrop.net/>

At the homepage, click **the plus icon** to upload the file you want to share to Jetdrop's server.

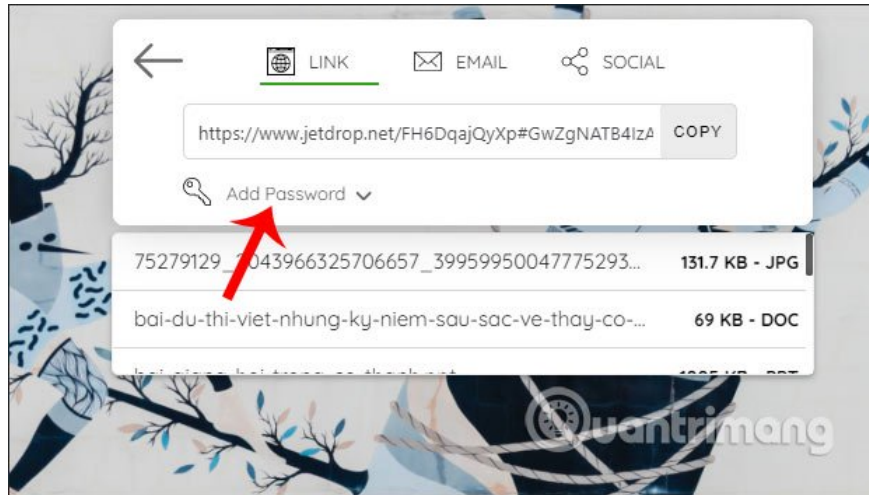

Then we wait for the process of uploading files to Jetdrop's system. Once the file has been uploaded, click on **the arrow icon** to get the file sharing link.

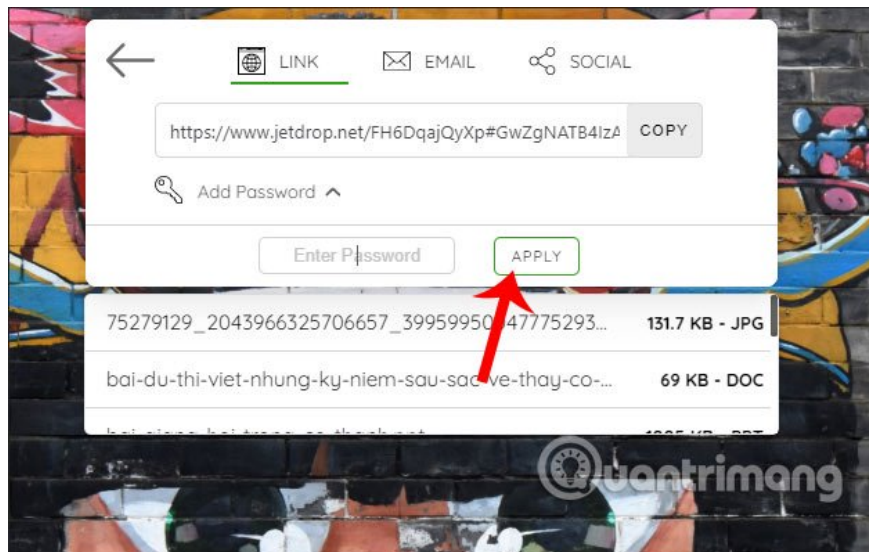

Step 2:

Switch to the new interface, to set a password for the sent files, click **Add Password** .

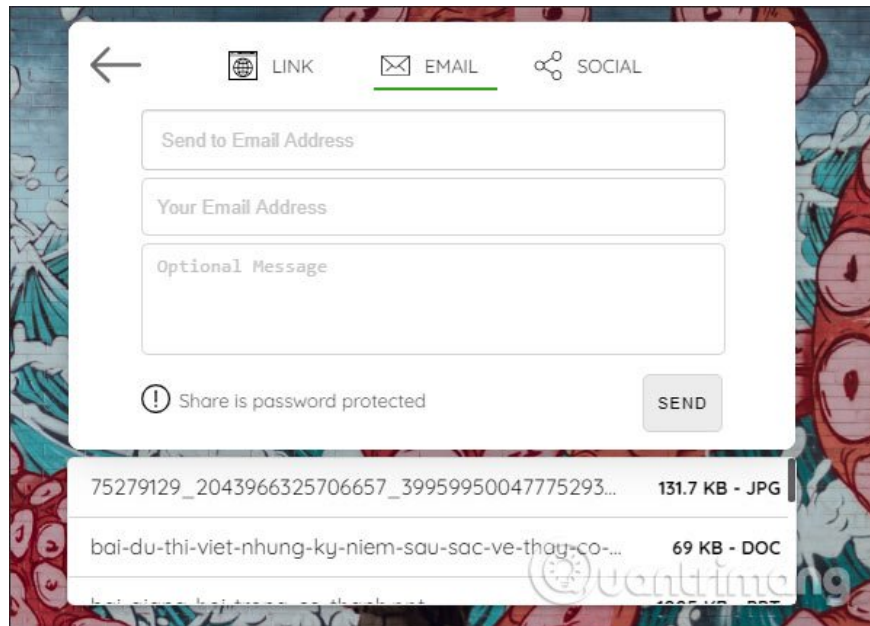

Now display the box below for us to enter the password you want to add to the account, **click Apply** to add the password.

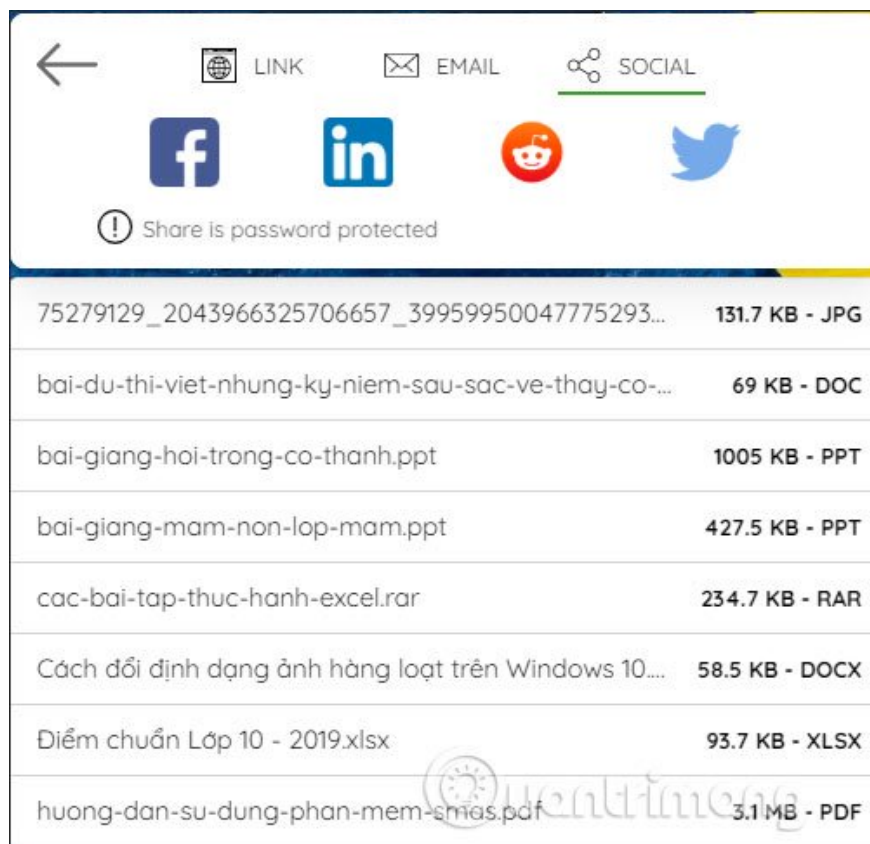

Step 3:

Next we choose the **way to share files**, if **via the sharing link**, **click Copy link**. If you want to **send by email** then **click Email**. Display interface to enter sender email information, recipient email and attached messages if available.

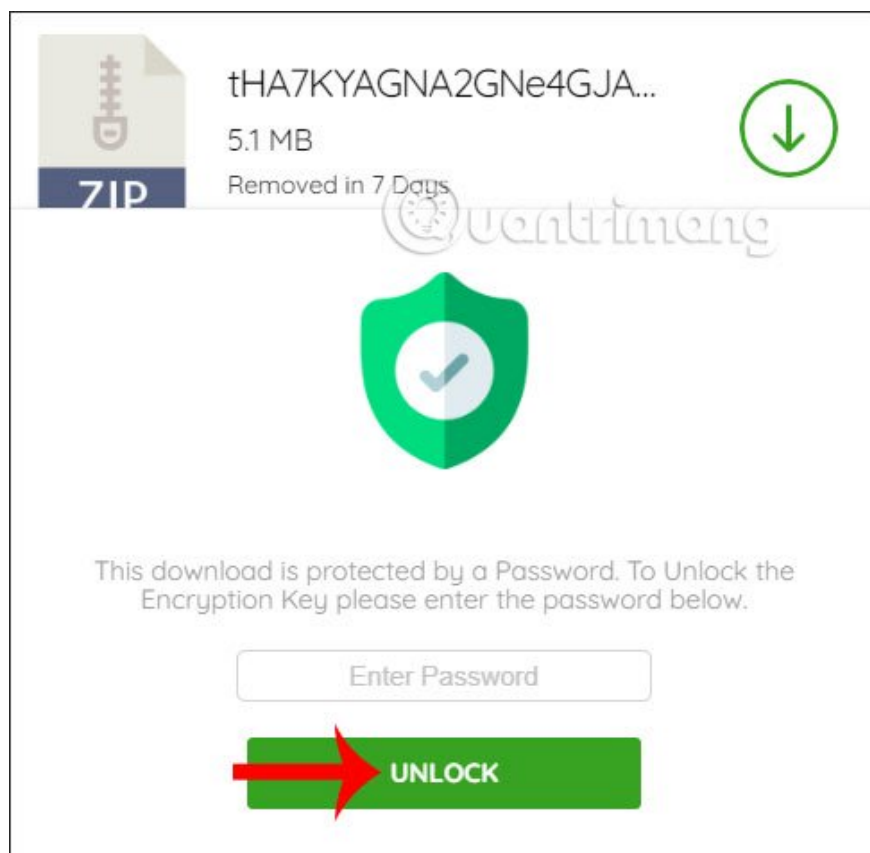

In addition, the service also supports **sharing file links to social networks** such as Facebook, Twitter.

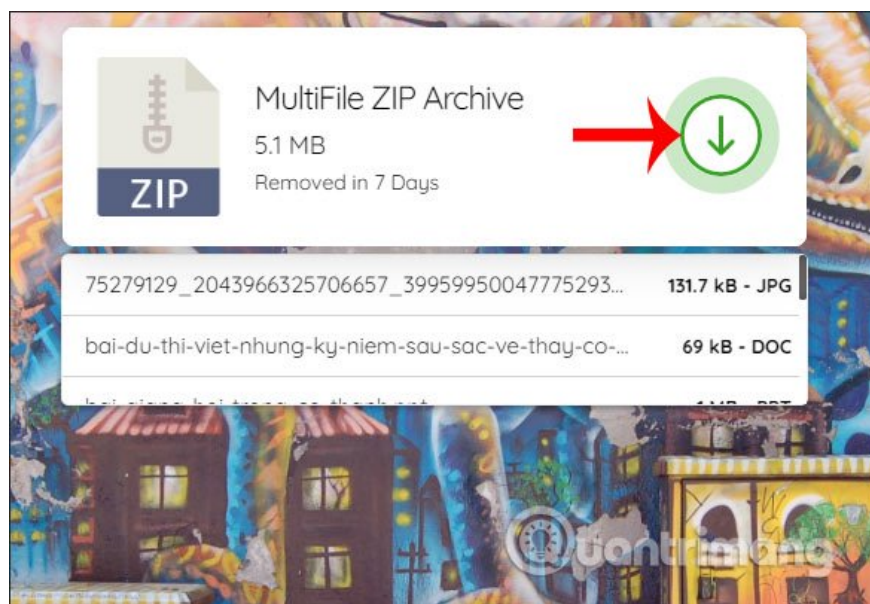

Step 4:

For those **who receive the link** when accessing, they will be asked to enter the password if any, **enter the password and click Unlock** to unlock the sharing link.

Finally, just click **the download icon** to download the files to your computer in zip format.

Thus, sharing files online on Jetdrop is very simple and fast. The file is uploaded with a large capacity and automatically destroyed after 7 days of file sharing.

I wish you successful implementation!
