

How to use Kidgeni to create photos for children using AI

Kidgeni is a website that creates drawings into a complete picture thanks to AI technology. For families with young children, Kidgeni is extremely useful as your child can freely draw and create interesting pictures.

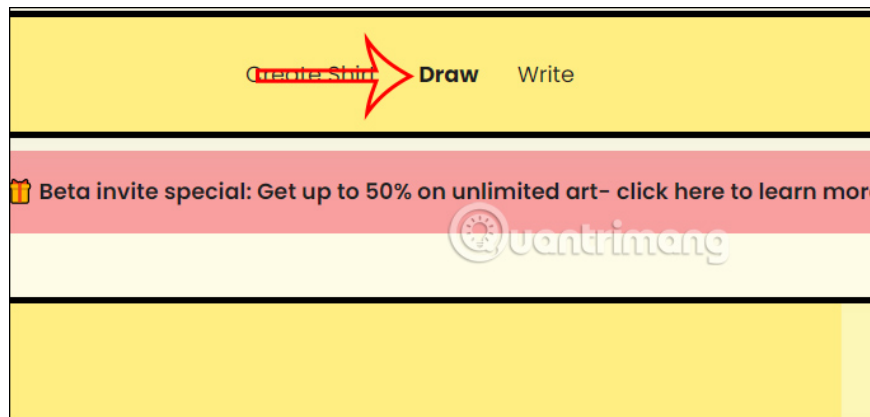

Kidgeni is a website that creates drawings into a complete picture thanks to AI technology. For families with young children, Kidgeni is extremely useful as your child can freely draw and create interesting pictures. You don't need to create an account and can use Kidgeni right away. The article below will guide you how to use Kidgeni to draw pictures with AI.

Instructions for using Kidgeni to draw pictures with AI

Step 1:

At the interface on the Kidgeni website, follow the link below, users **click on Draw** to proceed with drawing.

<https://kidgeni.com/>

Step 2:

Next we will see a **white frame for drawing**. You just need to draw pictures in this interface. Below is an eraser icon to erase wrong or unwanted strokes. If you are a child, please guide your child to draw on this white frame.

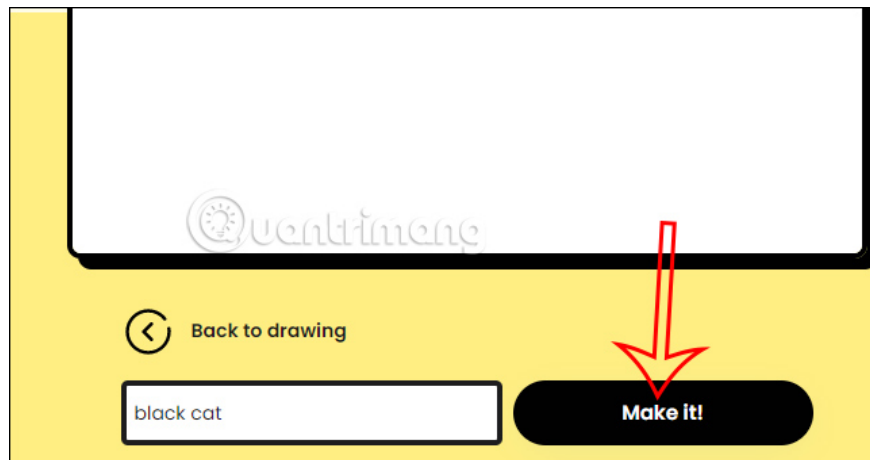

In case you already have a drawing, click Upload image to upload it.

Finally **click OK, I'm finished** to complete the drawing.

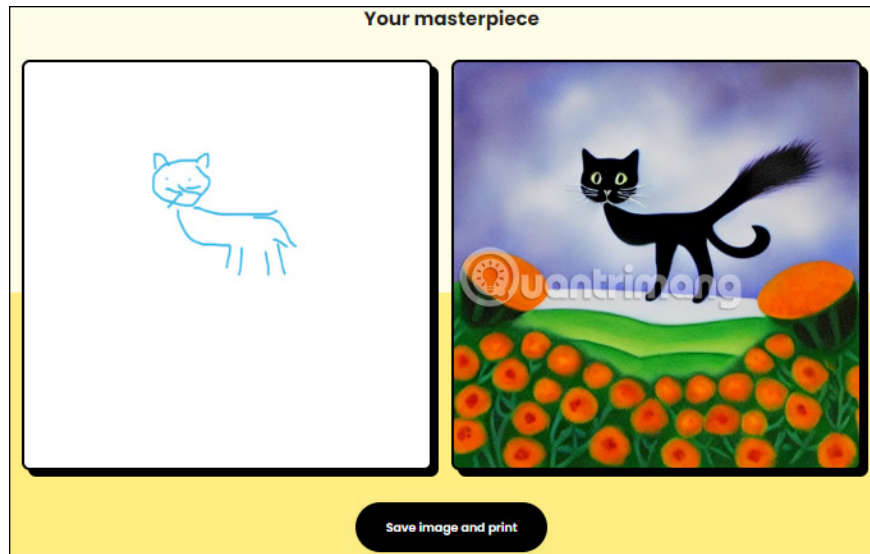

Step 3:

In case you want to **clearly describe the drawing**, enter **additional keywords** in the bar below to describe. After filling out, **click Make it** so the website will draw a picture from what you drew and described.

Step 4:

Now the user will see how the AI ??picture is created from your drawing. Currently, the website does not support downloading the picture, but you can take a photo of your computer screen to save this picture.
