

How to use Microsoft Whiteboard Windows 10

Microsoft Whiteboard is a drawing application on Windows 10, combining many features like notes, sketches and cloud storage support.

In May 2017, Microsoft Whiteboard application was introduced to users but only on Surface Pro device. But we can now download the Microsoft Whiteboard application to a Windows 10 computer for use.

This is a drawing application on a computer but incorporates many other features like notes, drawing pictures, sketching and cloud storage. The following article will guide you how to use the Microsoft Whiteboard application.

1. How to use Screen Snip, a new screen capture feature on Windows 10
2. How to take screenshots of Windows 10 using Windows Ink Workspace
3. Ways to take screen shots of Windows 10

How to draw on Windows 10 with Microsoft Whiteboard

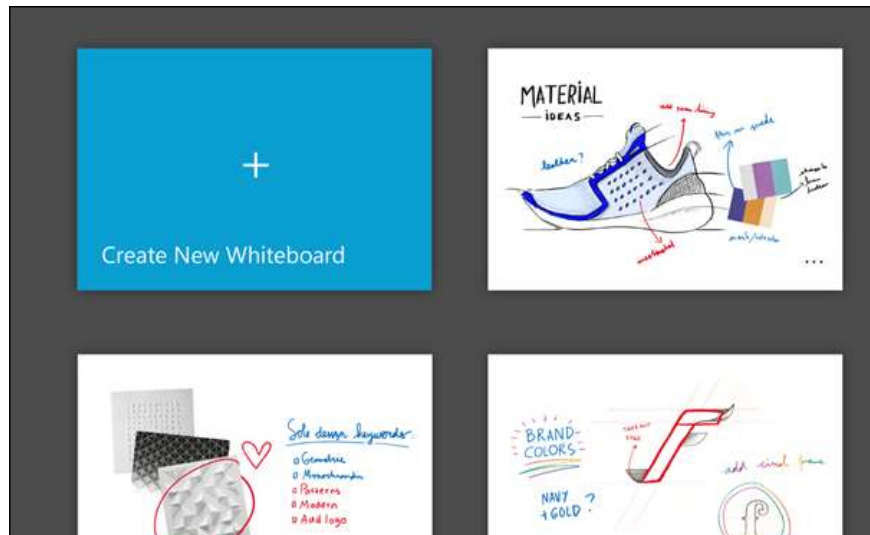

Step 1:

After downloading the Microsoft Whiteboard application to the user computer, proceed with the installation. To use the application you need to sign in to your Windows account or Office365.

1. Download the Microsoft Whiteboard app

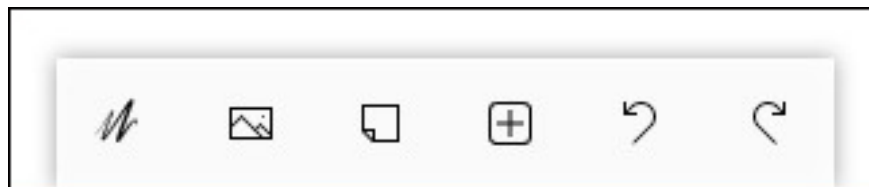

Step 2:

To create new white content completely, click **Create New Whiteboard** .

Step 3:

The application will provide users with a series of key tools including drawing, inserting images, inserting notes, adding buttons to draw pictures, Undo and Redo buttons.

With the drawing tool we will add some brushes with different pen colors.

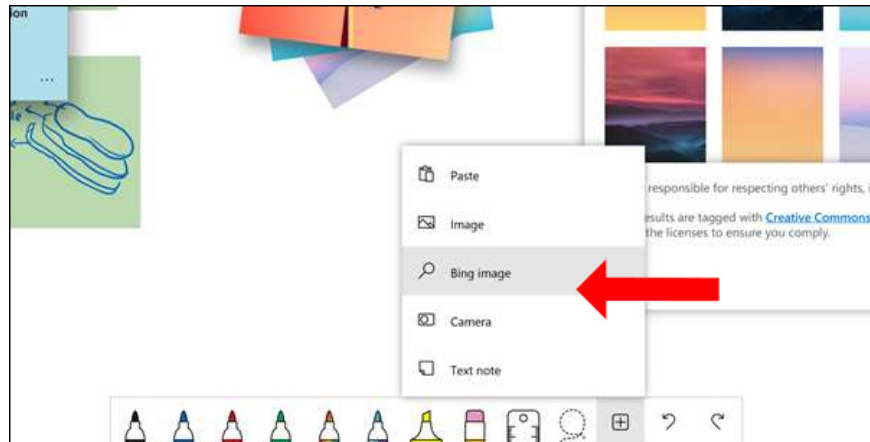

Step 4:

If you click on the plus symbol, there will be some other options.

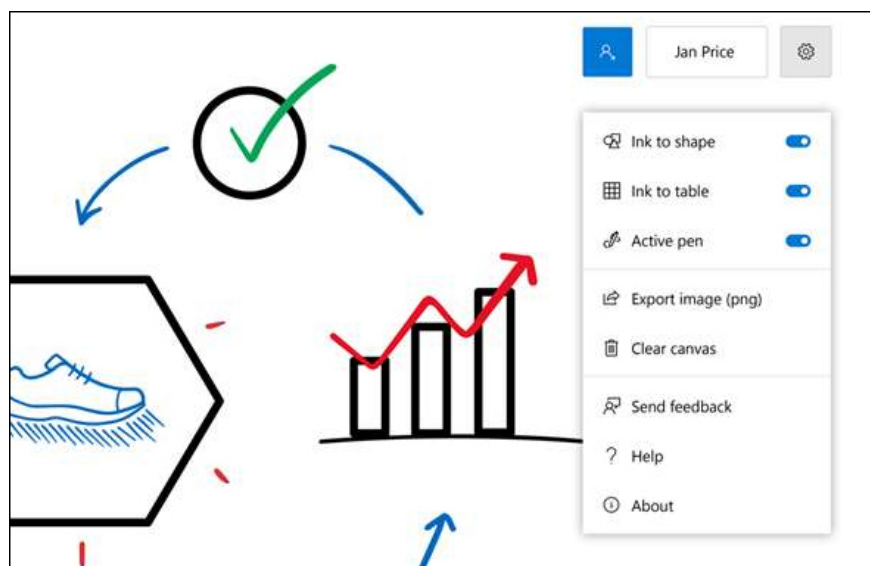

1. Clipboard: enter content in Clipboard.
2. Image: add PNG, BMP, GIF and JPG images from your computer to Whiteboard content.
3. Text note: add notes to the application.
4. Camera: take screenshots and add to Whiteboard content.

5. Bing image: search for images directly on Bing.

Step 5:

At Whiteboard interface click on **the gear icon** will appear a list of customizable on / off features used on the application.

Microsoft Whiteboard helps you to immediately implement ideas and drawings on a computer, can write notes or even create sketches. Whiteboard also supports searching right on Bing to insert content if needed.
