

# How to use more than 100 gadgets in the Pantherbar application only

Pantherbar application on Windows 10 brings a lot of other utilities to support the tasks we perform on the computer, nearly 100 utilities are completely free.

Pantherbar application on Windows 10 brings a lot of other utilities to support the tasks we perform on the computer, nearly 100 utilities are completely free. When you read the content of the document, you can immediately use the toolbar of Pantherbar to search information on Google or any other website, even send a link to Facebook. Especially, the application also features an auto-response template for you to reply to messages on Fanpage automatically, or email according to many other answers, composed by yourself. There are also many other useful features on the Pantherbar that will be introduced in the article below.

## Instructions to use Pantherbar on Windows 10

### Step 1:

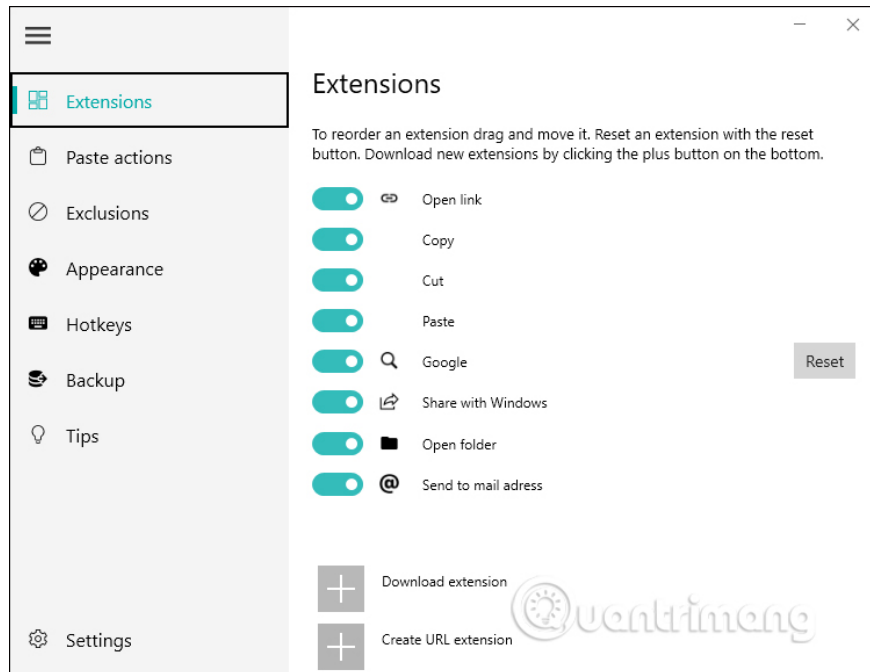

Users install the Pantherbar application by following the link below on Windows 20.

1. Download the Pantherbar Windows 10 app  
<https://www.microsoft.com/en-us/p/app/9npz2tvkjt7>

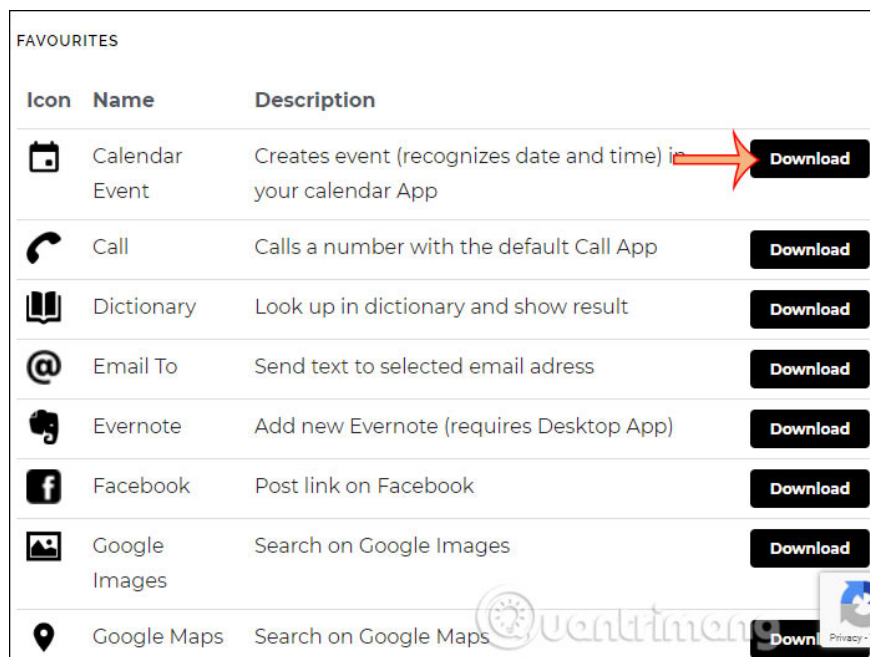

Opening the application will be the user interface then you will be transferred to the installation interface of the application. The utility of the application is divided into different groups.

### Step 2:

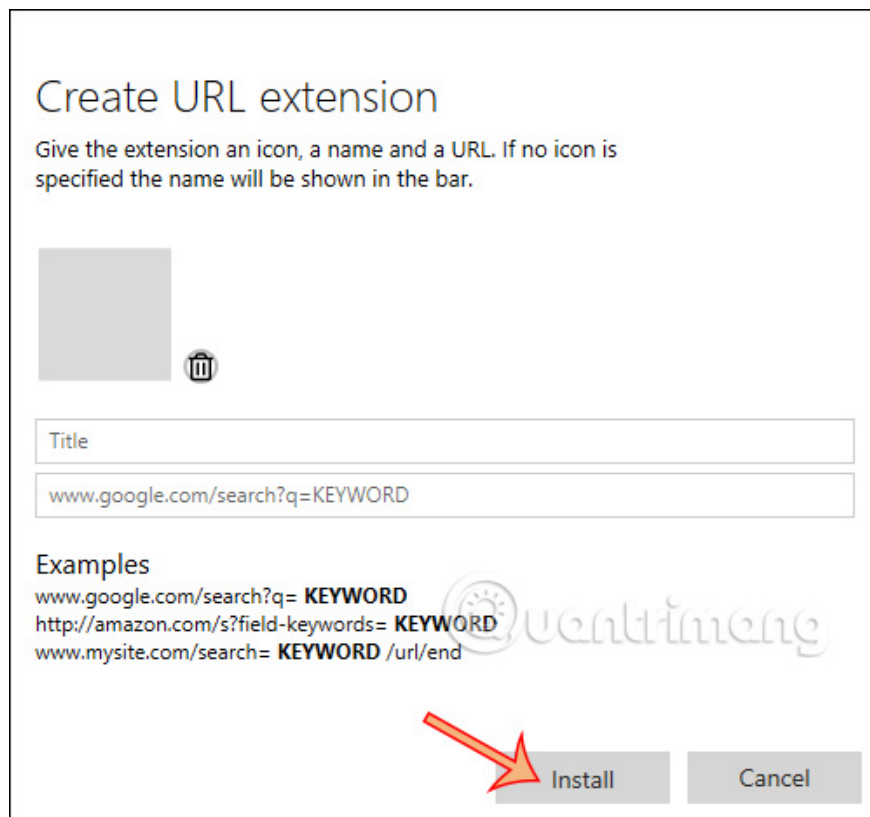

At the **Extension group** , we will see the utilities are supported and enabled. You may see some utilities like copying, searching, sharing.... To install more utilities, **click Download extension** .

Now you are transferred to the new interface, we find the utility you want to use and then **click Download to download** . Soon after, the newly loaded utility appeared in the Pantherbar Extensions interface.

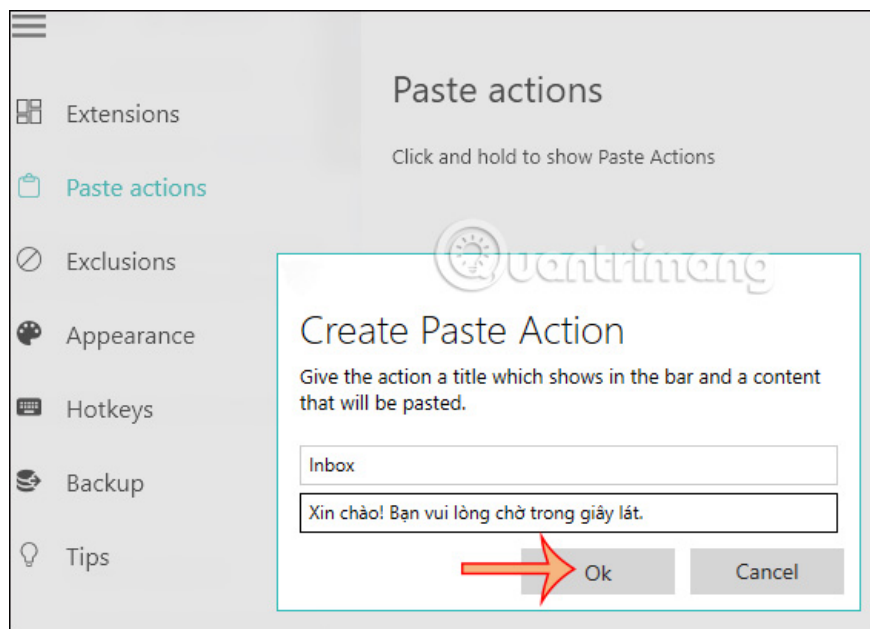

In the Extension interface, the **Create URL extension** option, you **add** another **search engine** for Pantherbar, you can add any website.

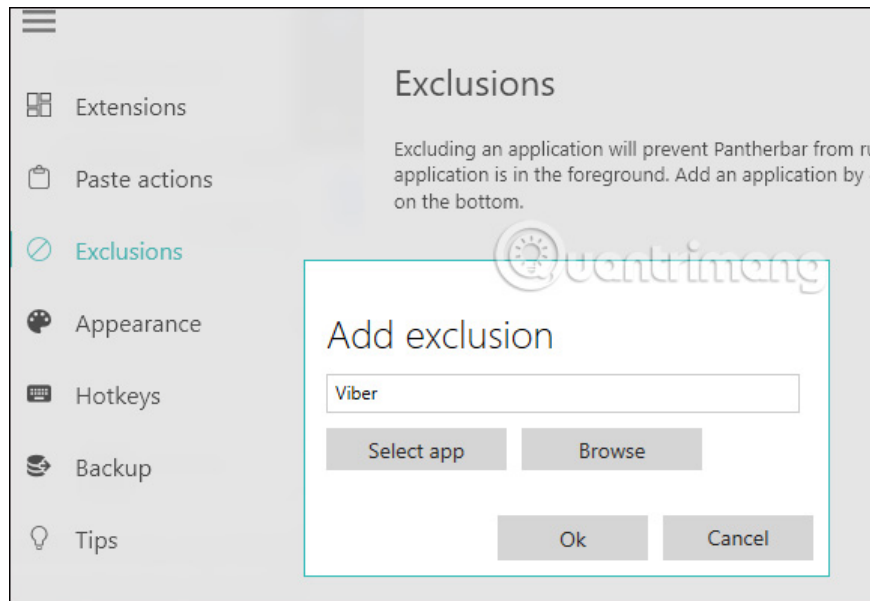

### Step 3:

Switch to **Paste actions** are copy paste tools but have more paste options for many different applications, like **the built-in answering tool** . In the interface click **Add paste action** and enter the title and content of the reply.

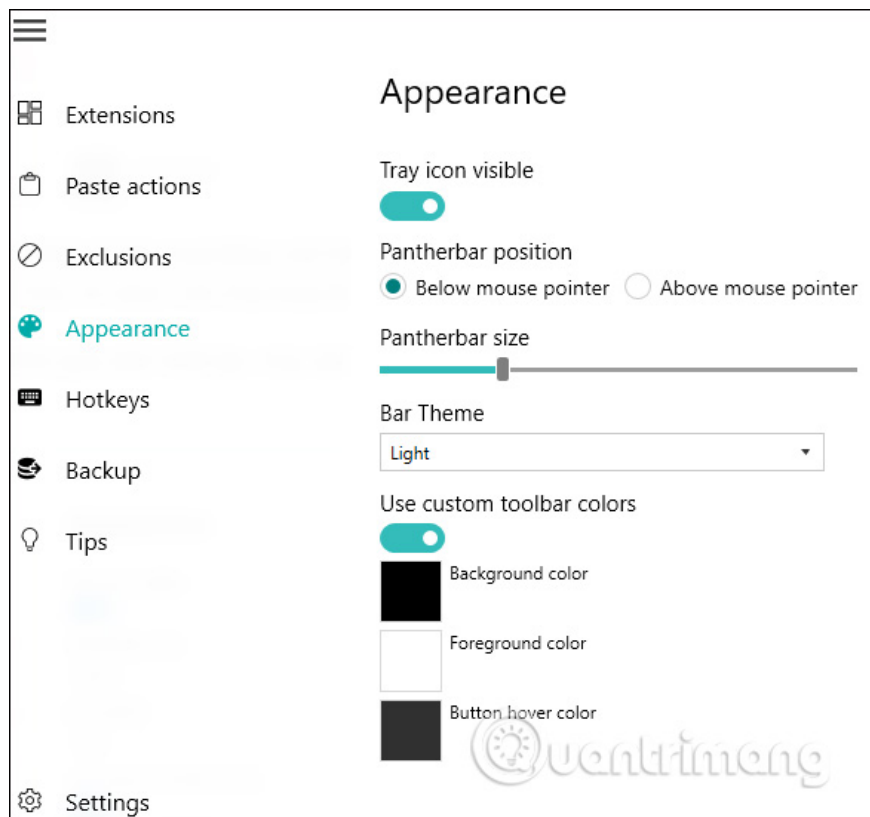

### Step 4:

Go to **the Exclusions section** to let you set which applications are allowed to function on. Click Add exclusion then click Select app to add the application, or click Browse to select the exe file.

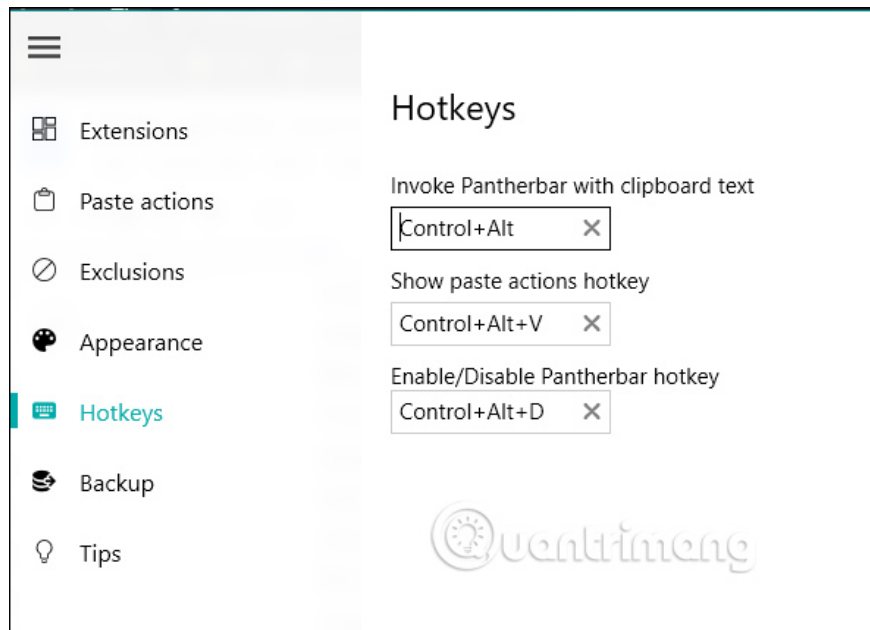

**Step 5:**

**Appearance** will customize the interface settings, the color of the application or turn it off in the system tray.

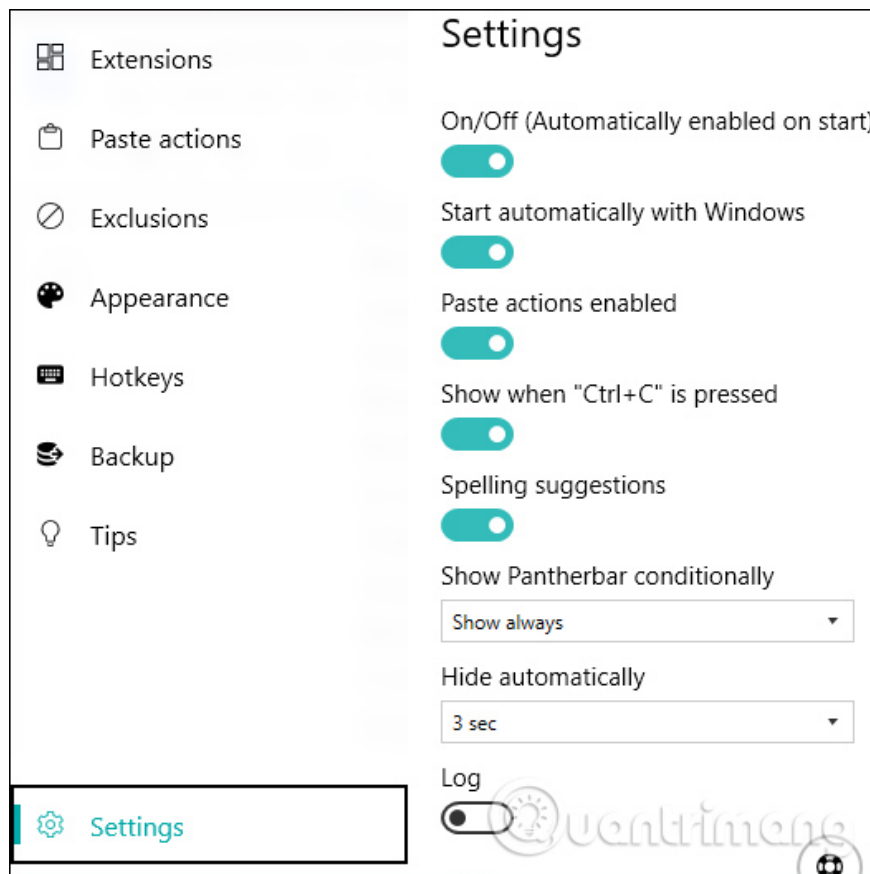

**Step 6:**

**Hotkeys** to set up shortcuts when using utilities. We can change keyboard shortcuts as we like. Continue to click **Backup** to back up the settings on the Pantherbar application.

**Step 7:**

Finally click on **Settings** to access the application management interface.

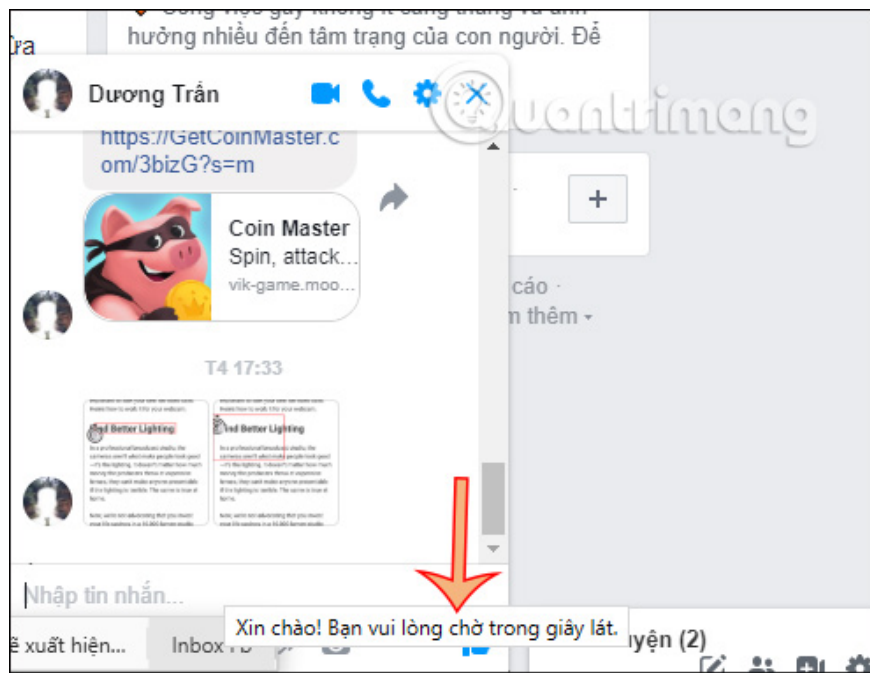

### Step 8:

After we have set up all the gadgets, we highlight certain phrases or content and display the **Pantherbar** . You will then see search engines for the content, images, or web pages you have previously added.

To use the **Paste actions feature** , open the application you want to reply to the message and then **press and hold the mouse button for a few seconds** will appear a bar containing **the title of the prepared content** . You click on the title of the content you want to paste to reply.
