

How to use multiple Dropbox accounts on the same computer

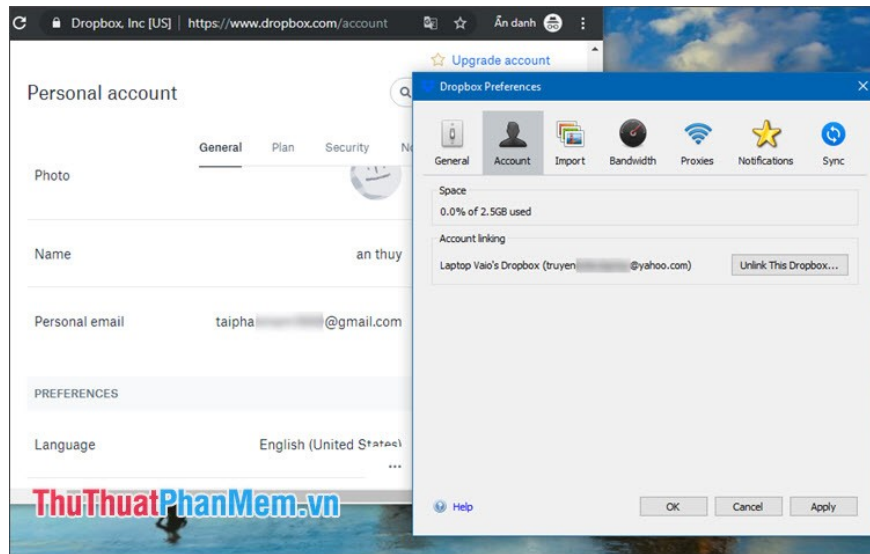

How to use multiple Dropbox accounts on the same computer. Dropbox is an online storage service using cloud computing technology. Dropbox has many advantages such as fast speed, can create multiple folders for data synchronization and sharing for accounts easily and conveniently.

Dropbox is an online storage service using cloud computing technology. Dropbox has many advantages such as fast speed, can create multiple folders for data synchronization and sharing for accounts easily and conveniently.

Normally, we use Dropbox with 1 account / machine. If you want to take advantage of multiple accounts logged on the computer, you can try the following.

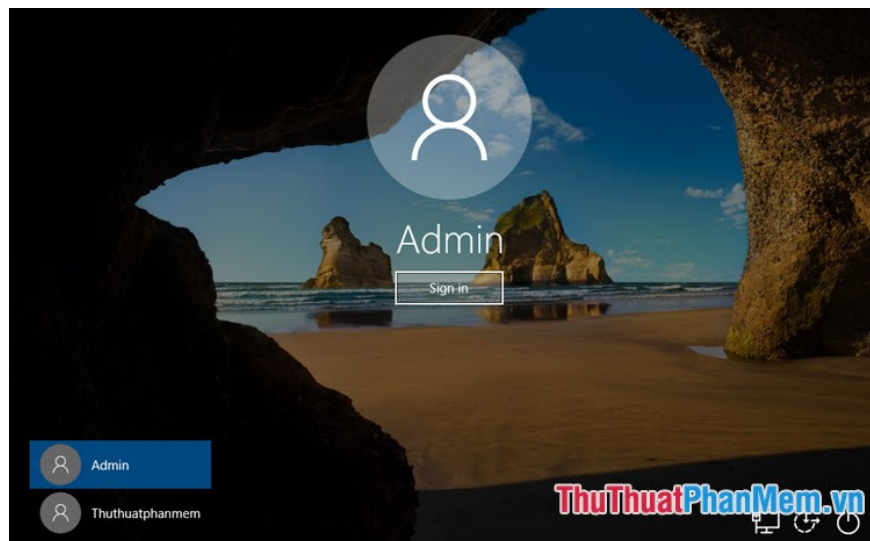

1. Log in to two Dropbox accounts on the web browser and the Dropbox app

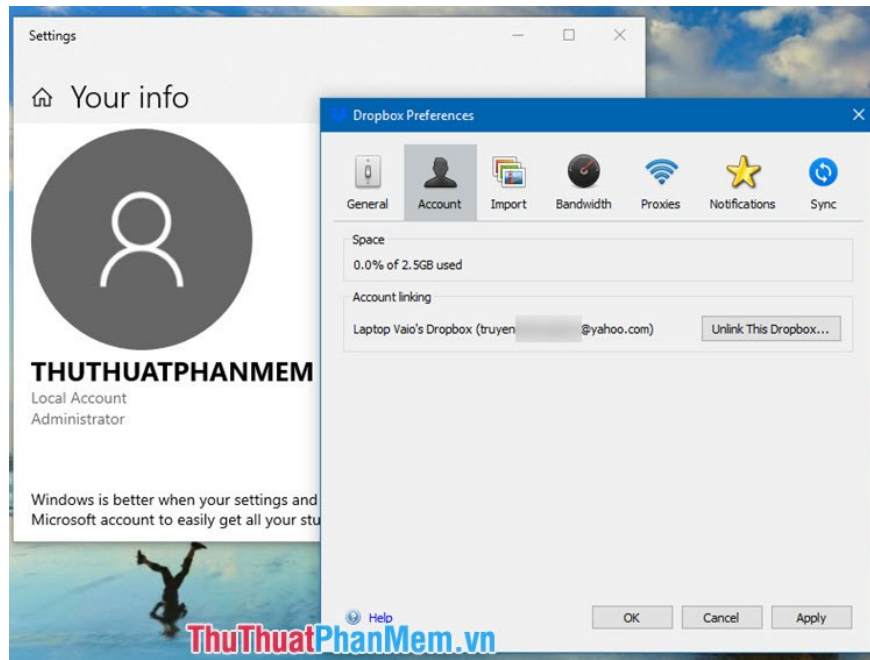

This is the simplest way for you to sign in with two or more Dropbox accounts on your PC. Dropbox interface on the web is still fully functional such as viewing, uploading, downloading files, creating folders .

2. Log in 2 Dropbox accounts on two different Windows accounts

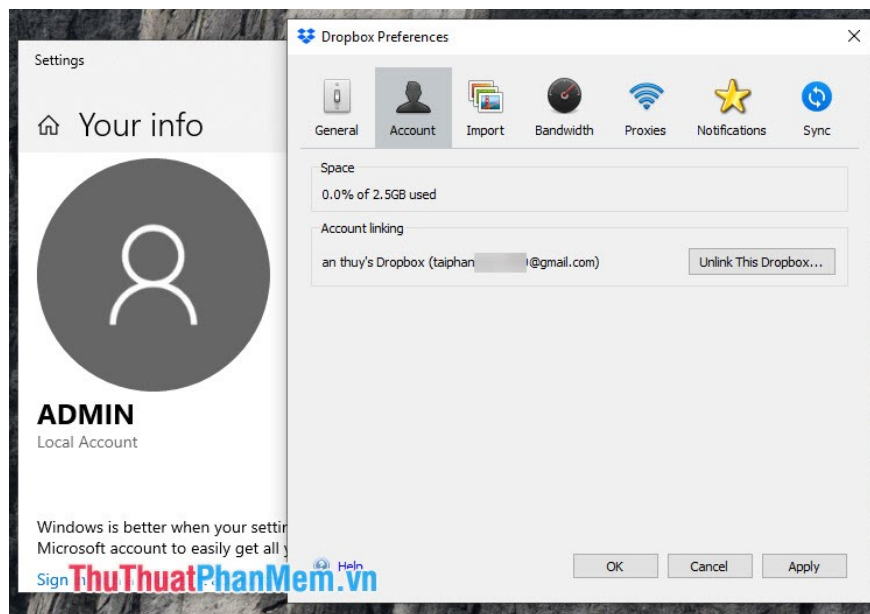

This is a pretty good and effective way, we can create 2 users on the same computer and log in each user / different Dropbox account.

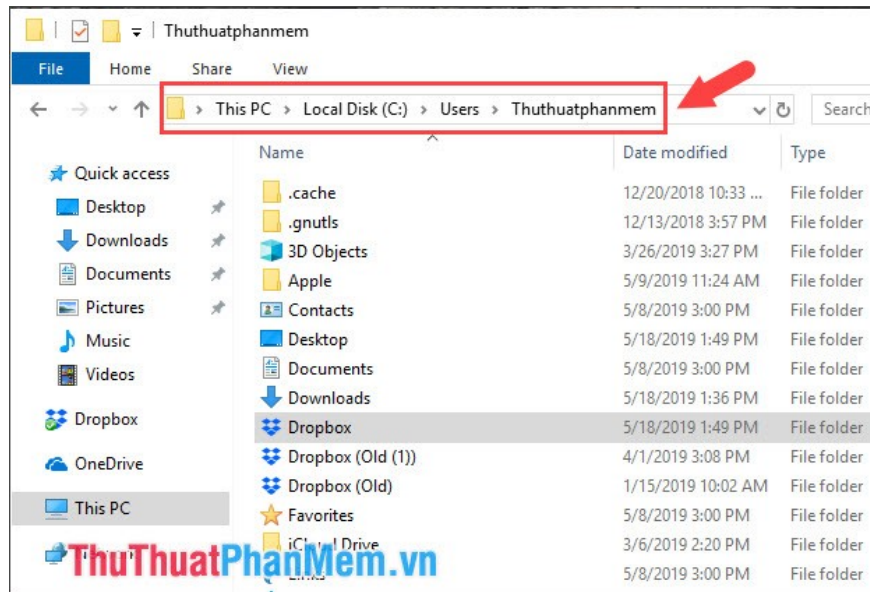

Step 1: We log into the **Dropbox** account on two different sides. With the main Dropbox account login on the main **Windows** account .

And secondary Dropbox account login on secondary **Windows User** .

Step 2: We access one of the two Windows Users. To access the Dropbox of the other User, we access the path *C: / User / (name of the 2nd User) / Dropbox* . This way, we can create multiple Windows accounts and log in different Dropbox accounts according to your purpose.

With two ways to log in multiple Dropbox accounts, we can respond to daily tasks more effectively than using a Dropbox / PC account. Please leave your review of the article in the comment section below!
