

# How to use Photoshop CS5 - Part 25: Remove automatic background images with Photoshop Action

In fact, there are many ways to delete any object or background image in Photoshop, and the way we are about to introduce the following is arguably the simplest and easiest. Specifically, we will learn how to apply this process with the help of Photoshop Action ...

**In fact, there are many ways to remove any object or background image in Photoshop, and the way we are about to introduce the following is arguably the simplest and easiest .** Specifically, we will learn how to apply this process with the help of Photoshop Action.

First, go here, and download the Photoshop Action from the **Transparent Channels** section. After that, we will proceed to install and integrate into Photoshop (refer here):

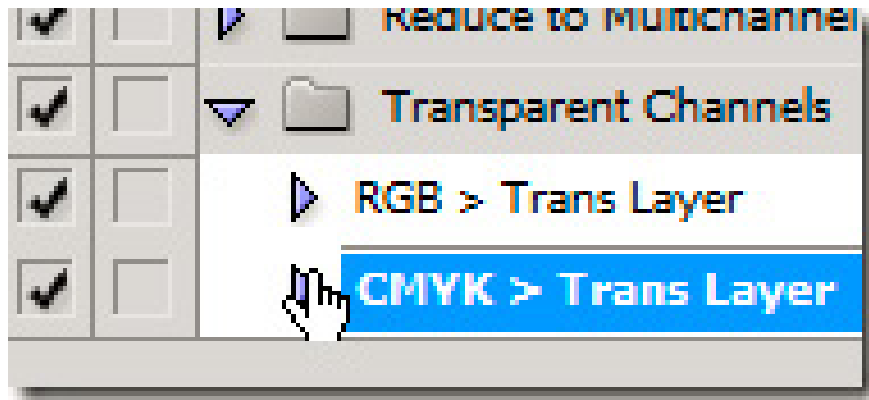

## Use Transparent Channels:

**Transparent Channels** ' mechanism of action is by 'digging' color areas around the main **channels** , while focusing on the main information filtering process of the object.

It is possible that this **Action** does not meet 100% of users' needs, but for most cases it is still effective and acceptable. To remove the background with light light tones, select **Image> Mode> CMYK Color**. There are 2 main actions, and only work with certain color modes:

Specifically, **CMYK> Trans Layer** will remove light areas from the image, applicable to many layers. Therefore, you just need to press **Play selection** button :

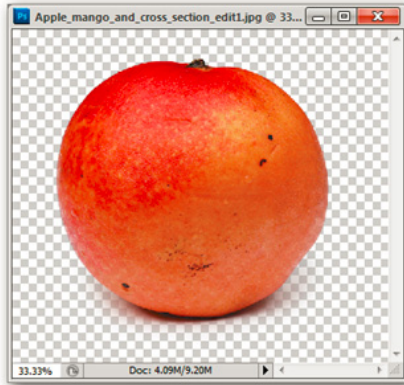

Examples are as follows:

And our results:

Continue:

Or:

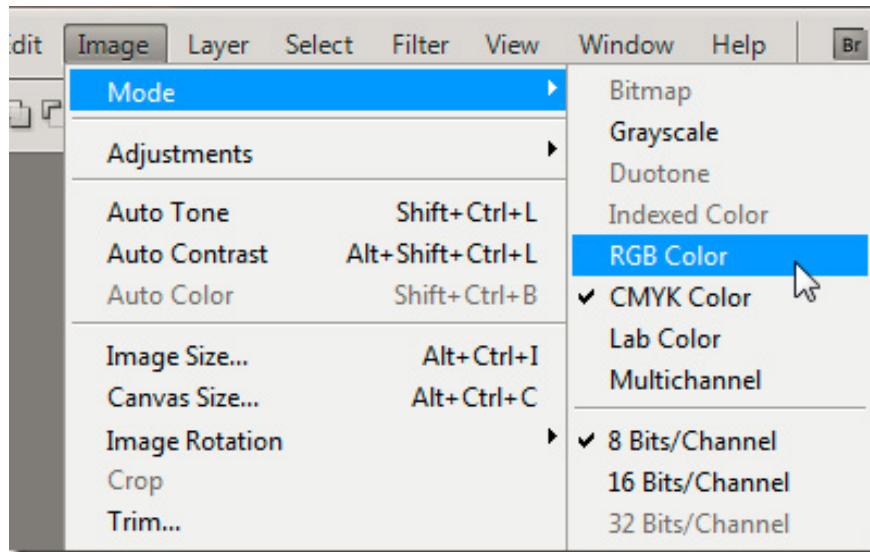

For quite complex images, maybe we will have to do a few times to achieve the desired results:

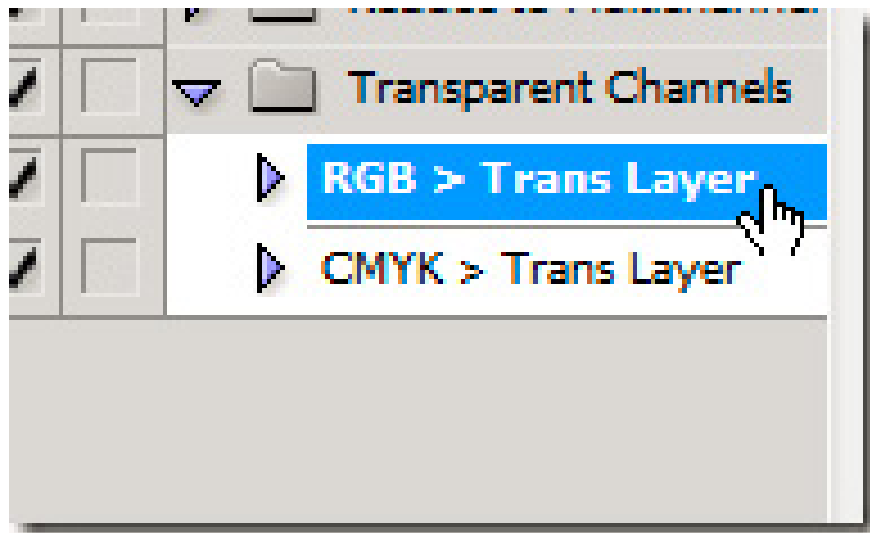

**Remove the Transparent Channel dark background image:**

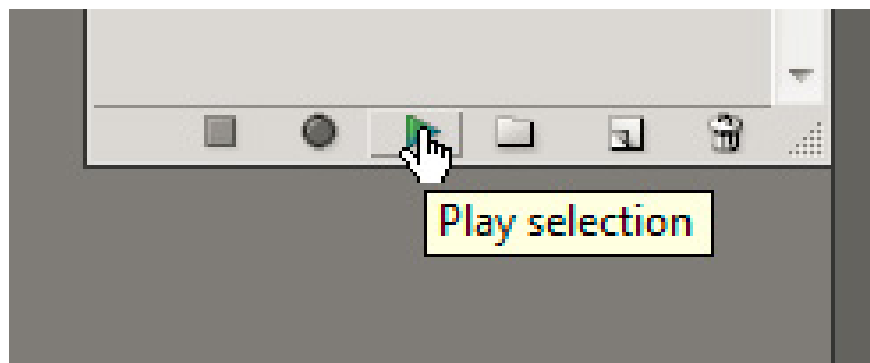

In fact, the above set has two actions we can apply. The first action to use with the background image is light white, and the second action is used with a dark background image (as shown in the example above). Note that this action feature only works with **RGB Color** mode, if your image does not meet the above requirements, select **Image> Mode> RGB Color** to set it.

Make sure you are selecting the **RGB** section > **Trans Layer** in the Action set:

All you need to do now is to press the **Play selection** button :

And wait for Photoshop to finish the rest of the work:

Our results:

Good luck!
