

# How to use PicWish to remove photo background, improve quality

PicWish is one of the multifunctional photo editing applications, when you can change the image in many ways, including removing the image background to replace it with another background, or increasing the image quality with the original quality images short.

PicWish provides users with many versions to use, an online version for you to edit photos online or an installation version to edit photos on your computer or edit photos on your phone. The following article will guide you to use PicWish to edit images.

## Instructions for using PicWish to remove the background of photos online

### Step 1:

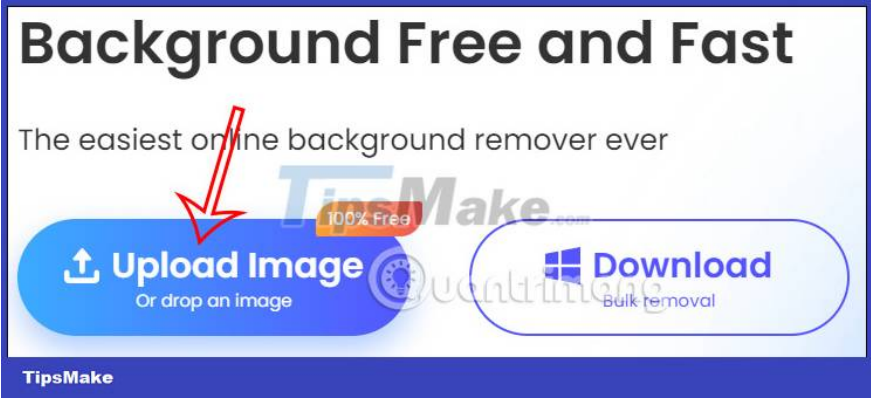

First, visit the link below to go to the PicWish image editing website. At this interface you will see there are 3 image editing options: remove the background Remove Background, sharpen the image to be blurred, Unblur Image and remove the Remove Objects object.

You will choose the type of photo editing you want to use to click.

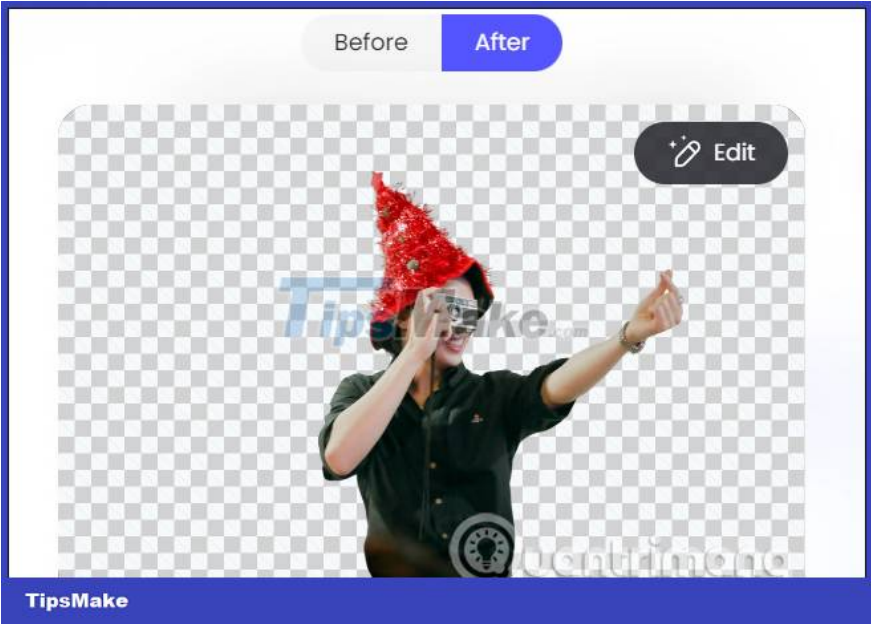

### Step 2:

At the interface to delete the image background, we **click on Upload Image** to upload the image.

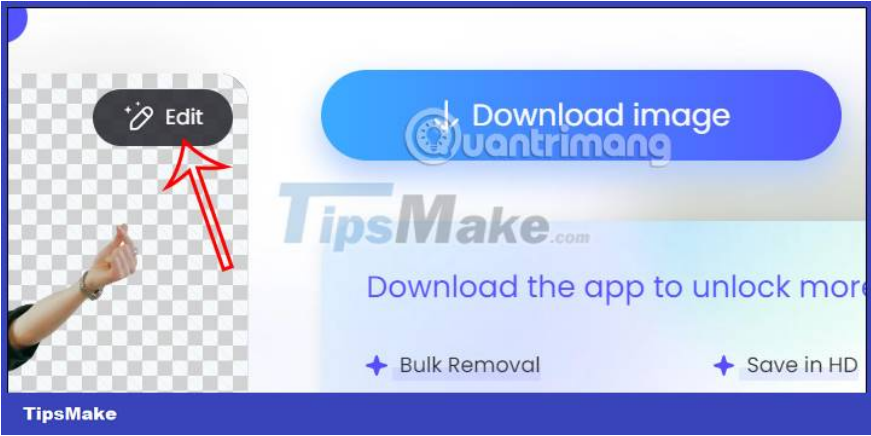

**Step 3:**

The website will then proceed to **delete the image background immediately** with the ability to remove the background image professionally as below.

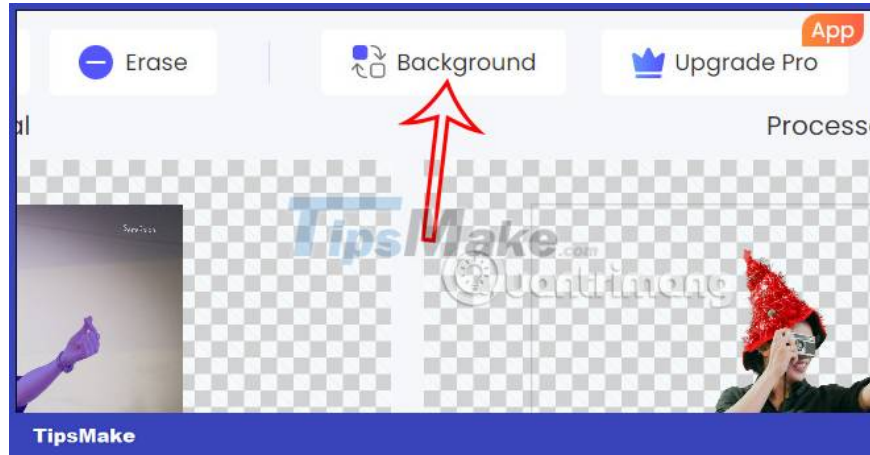

If you are satisfied with this background image, you can immediately click Download Image. In addition, you can also click Edit to edit the image.

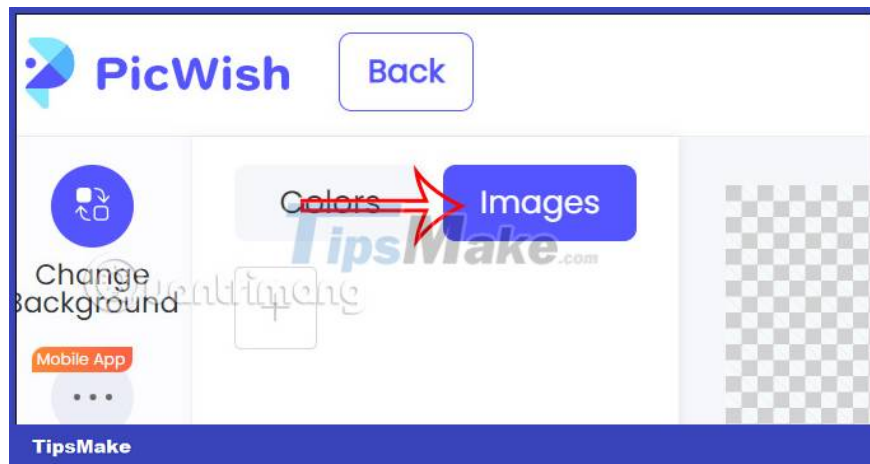

#### Step 4:

Switch to the image custom interface, **click Background** to change the background for the image .

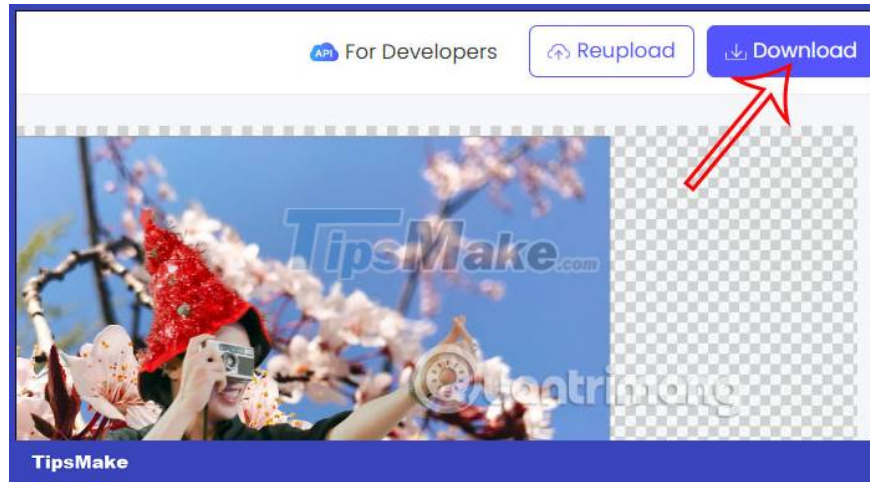

#### Step 5:

In the background editing section for photos, you can choose a background color or image by clicking Images to upload a new background image for the image.

#### Step 6:

After adjusting the image background, **click Download** to download the image.

## How to improve the quality of blurry photos on PicWish

### Step 1:

We will immediately click on the link below to enter the interface to increase image quality on PicWish.

### Step 2:

Then you also **click Upload** to upload the image you want to improve the quality. As a result, you will see the image after it has been changed in quality compared to the original image.

If you like, **click Download** to download the new image.

## How to use PicWish to remove objects from photos

### Step 1:

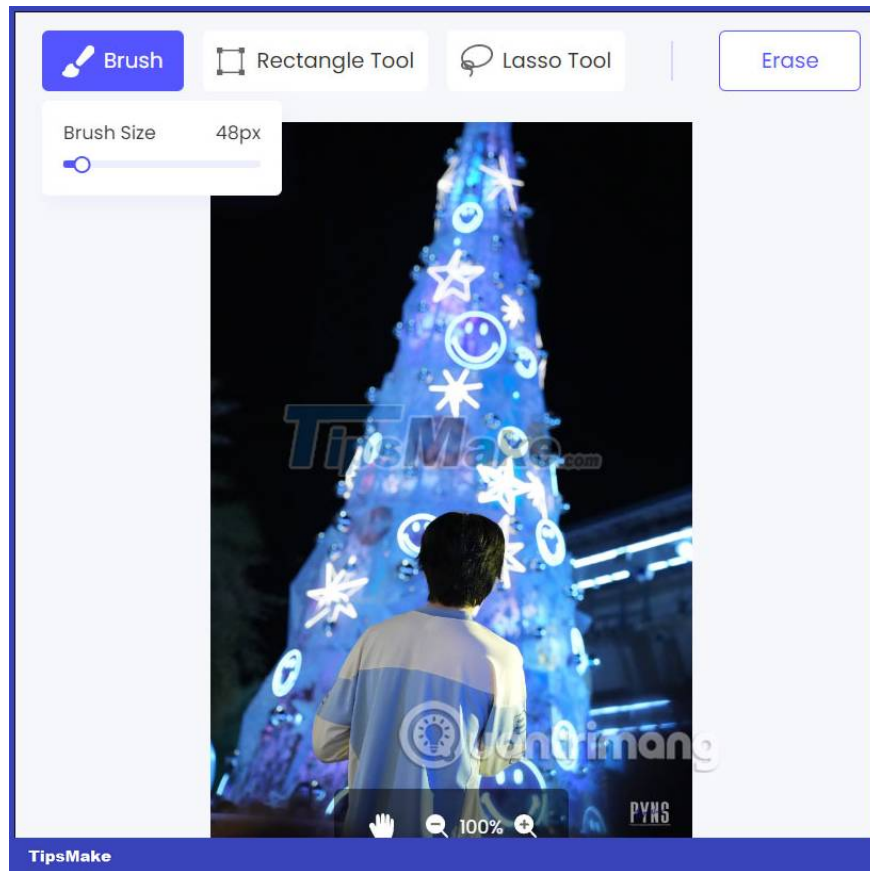

You immediately access the link below to go to the website to remove objects from images.

Next also upload photos to the website to remove objects from photos.

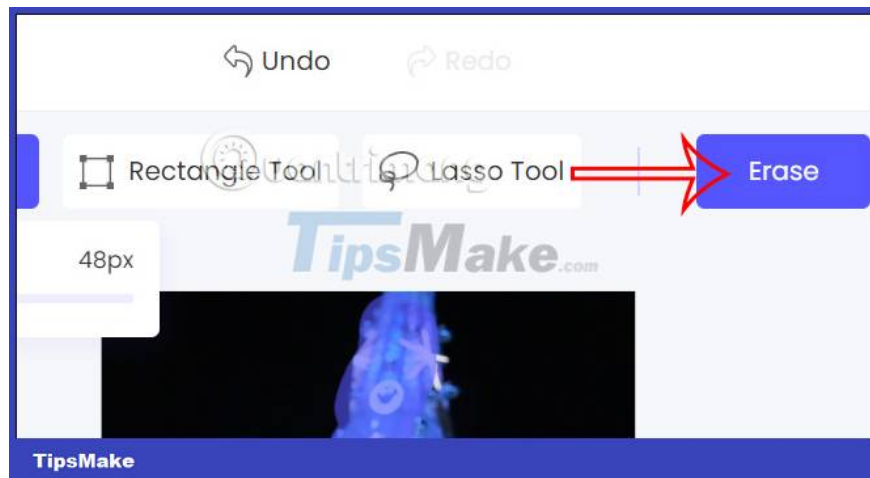

### Step 2:

Now display the image editing interface with 3 different editing styles.

1. Brush: You will paint around the object you want to remove from the image, when you do, you can customize the thickness of the brush.
2. Rectangle Tool: You select the objects you want to split by placing them in the frame.
3. Lasso Tool: If the object has many details, then you select this tool, dot the points on the object to separate.

If the area is wrong, you can press Undo to undo the task. Then **press Erase to delete the object** .

### Step 3:

Depending on the object you want to delete, we choose the appropriate tool. The result is also the image of removing the object as shown below. Click Download to proceed to save the image.

In addition to the above 3 photo editing tools, PicWish also has many other photo editing tools for you to explore.
