Instructions for using Windows 10 Pinterest application

Step 1:

Users click on the link below to install Pinterest on Windows 10.

1. Download Pinterest app on Windows 10

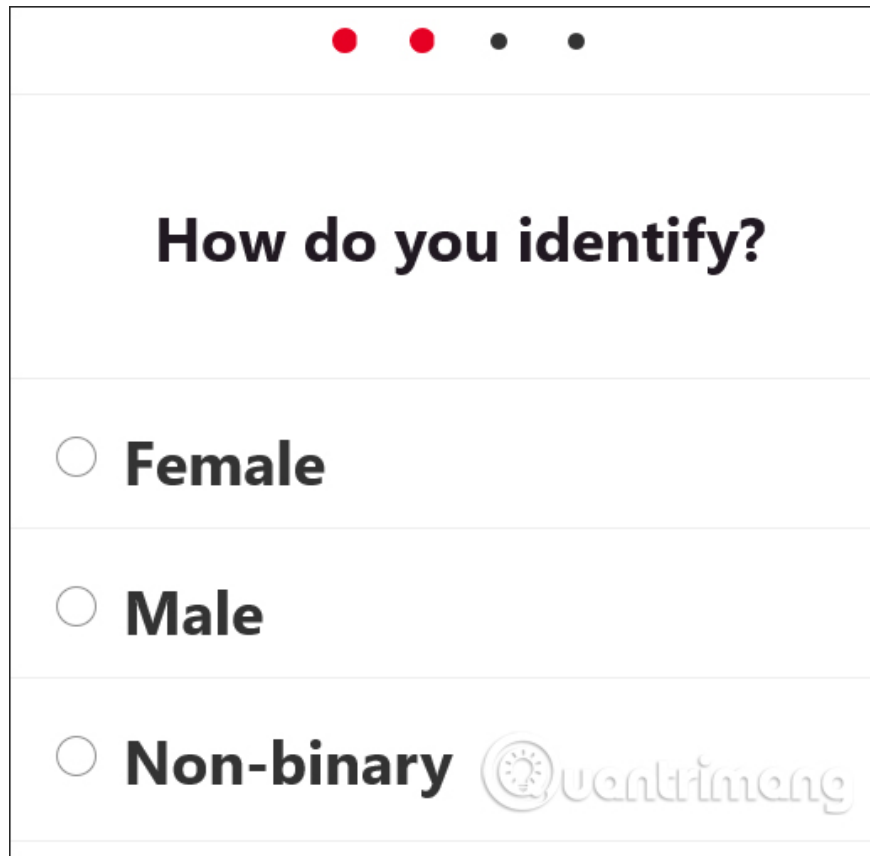

Step 2:

After installation is complete, the application automatically starts. In the main interface, click **Log in** to log in, or create a new account. Pinterest also has the option to create a separate business account with businesses.

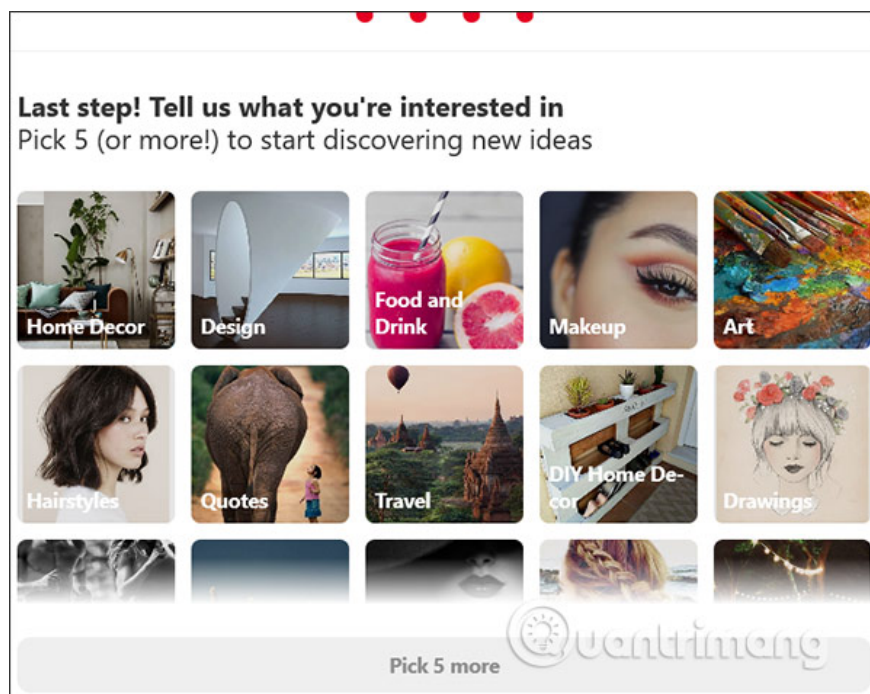

The image shows the Pinterest sign-up screen. At the top left, there is a "Log in" button. The Pinterest logo is centered at the top. Below the logo, the text "Sign up to see more" is displayed in a large, bold font. Underneath, it says "Access Pinterest's best ideas with a free account". There is an input field for "Email", followed by a blue button labeled "Create a password", and a red button labeled "Continue". Below these is a small "OR" separator. There are two social login options: "Continue with Facebook" (with the Facebook logo) and "Continue with Google" (with the Google logo). At the bottom of the sign-up section, there is a link for "Already a member? Log in" and a link for "Create a business account". A watermark for "Quantimeng" is visible in the background of the screen.

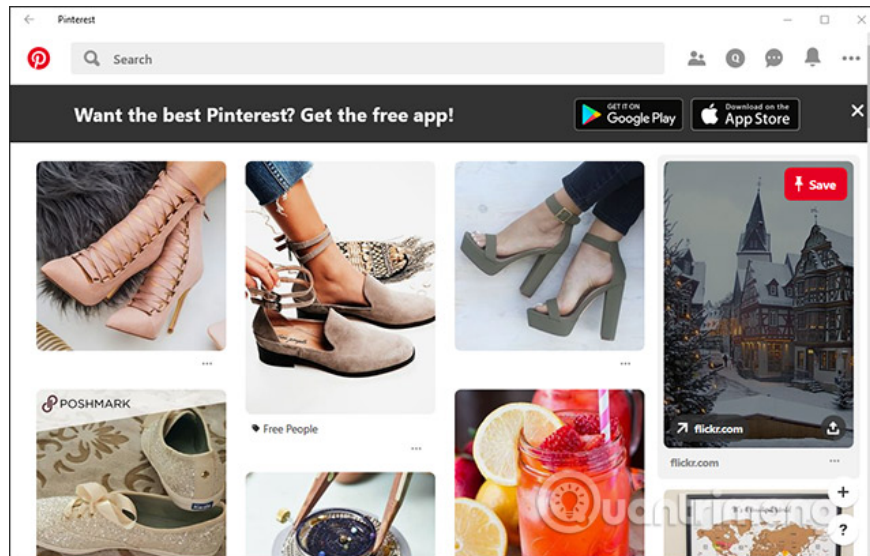

Next, users need to provide some information about themselves for this social network.

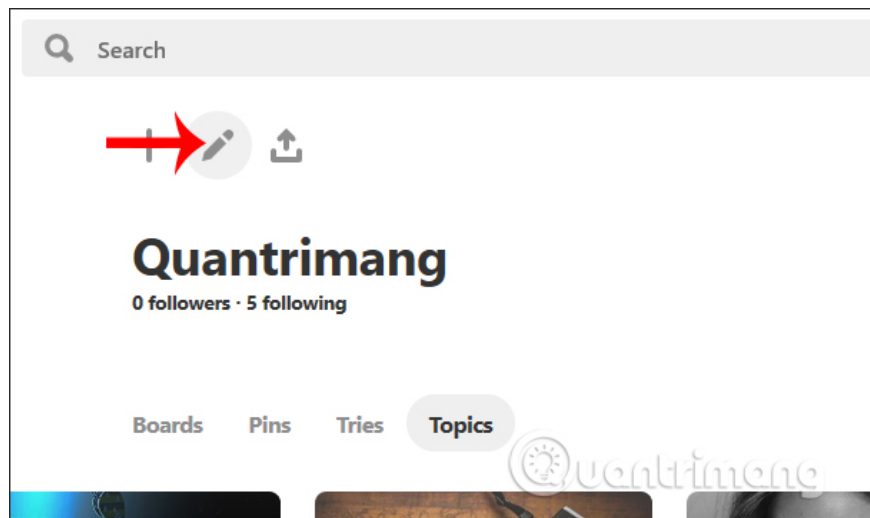

Pinterest also asks you to choose the **5 topics that interest you most**, thereby displaying images on the stage in accordance with the topics you have chosen.

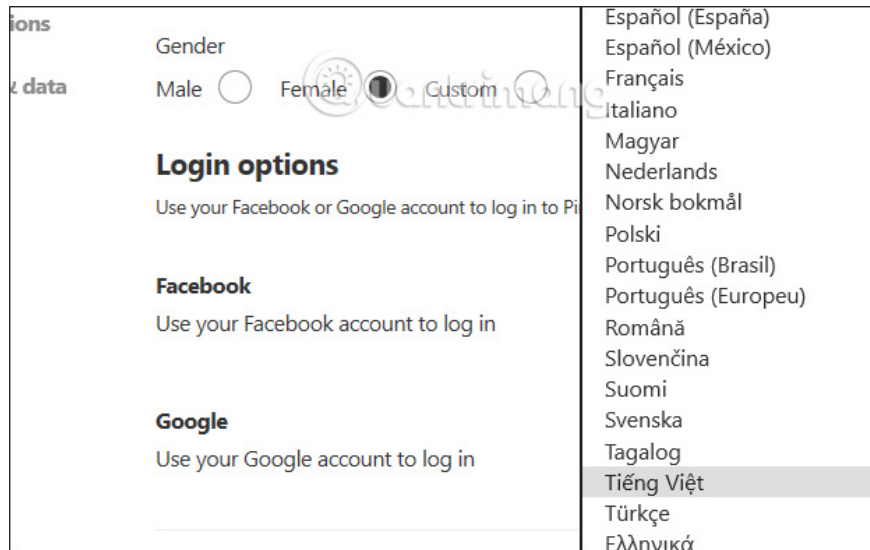

Below is the interface of Pinterest application on Windows 10.

For ease of use, you can **switch to Vietnamese language** . Click **the account image** above the right corner and **select the pen shape** .

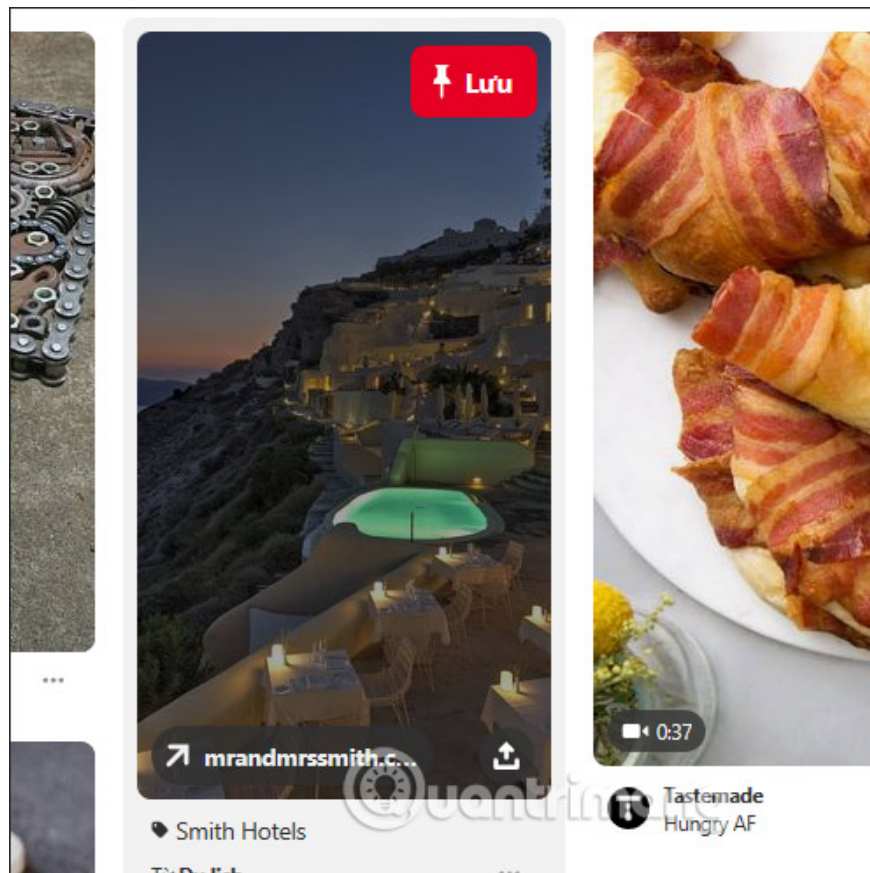

Switch to the interface to change account information, click **Account settings** and select **Language** . We will **select Vietnamese** to use and **click Done** to save the changes.

Step 3:

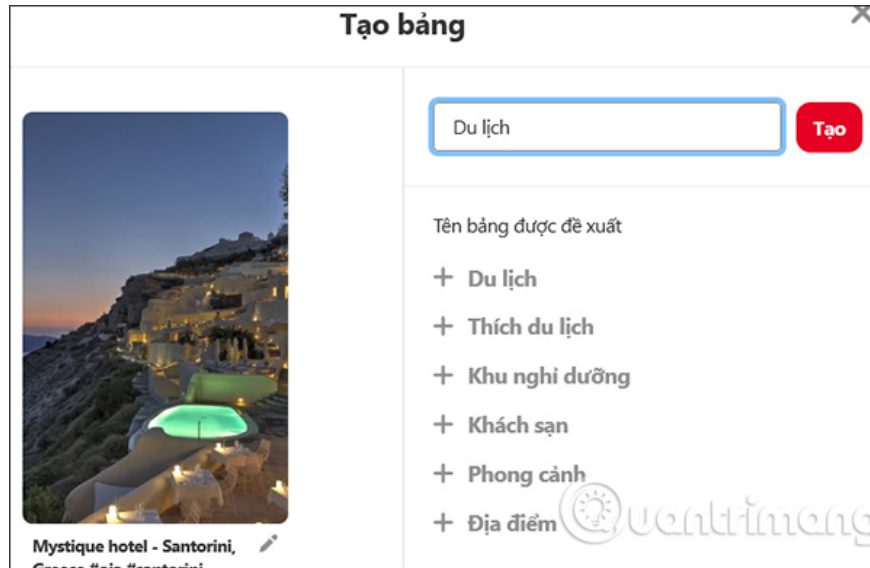

Go back to the Pinterest app interface, with **the Home page interface** displaying images and videos from topics you care about or people you're following.

Hovering on each image will display the content source link and share function buttons, save, pin to your personal theme table.

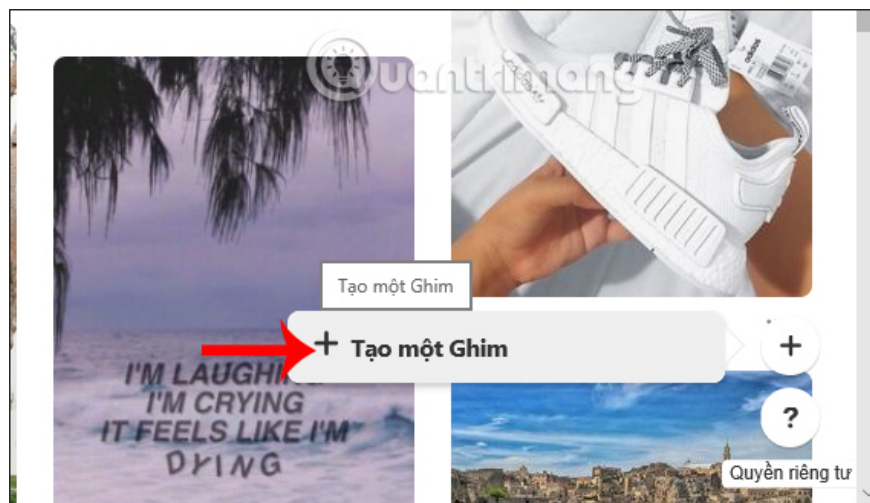

Step 4:

When **the save button** is clicked, the interface Create a display table so that users can create new table topics if desired.

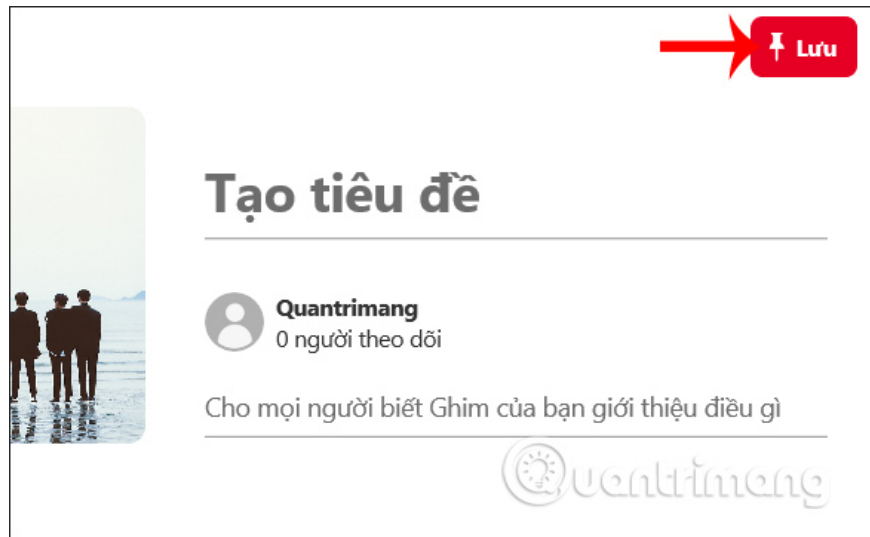

Step 5:

To **create a new post** on a personal Pinterest account, click **the plus button icon** below the right corner and select **Create a pin**.

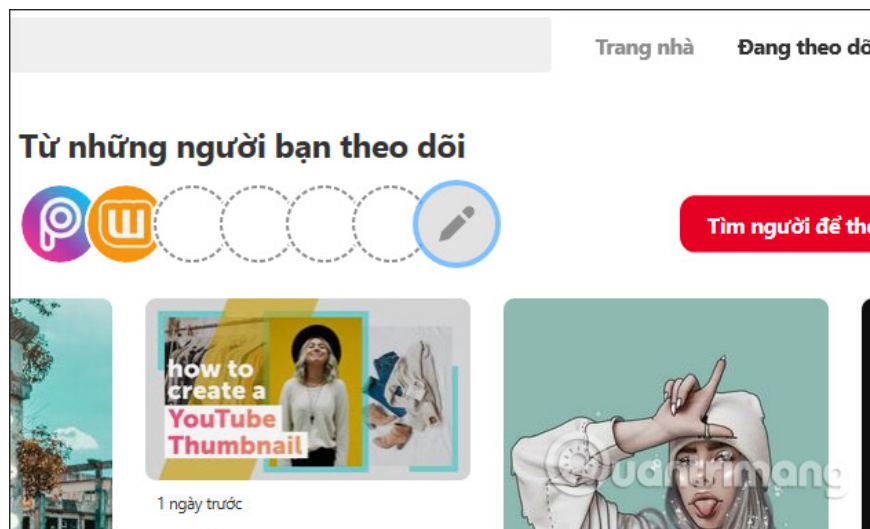

On the post creation interface we download images with a capacity of less than 10MB. Images can be preloaded on the machine or from another website at Save from the page. Next we enter the title, description, website link / image source, select the save table and click the Save button in the top corner.

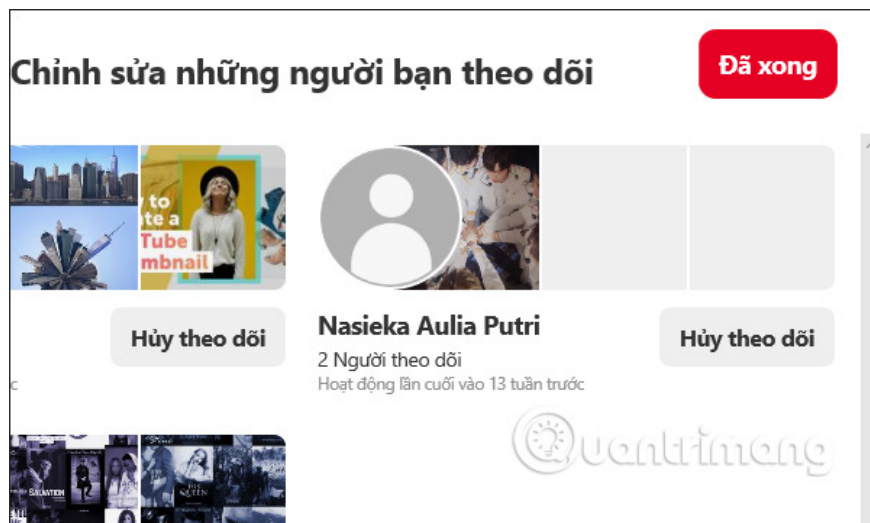

Step 6:

With the Following **tab** will show all the pins from the people you're following. Click Find people to follow if you want to follow more, press the pencil icon to change followers.

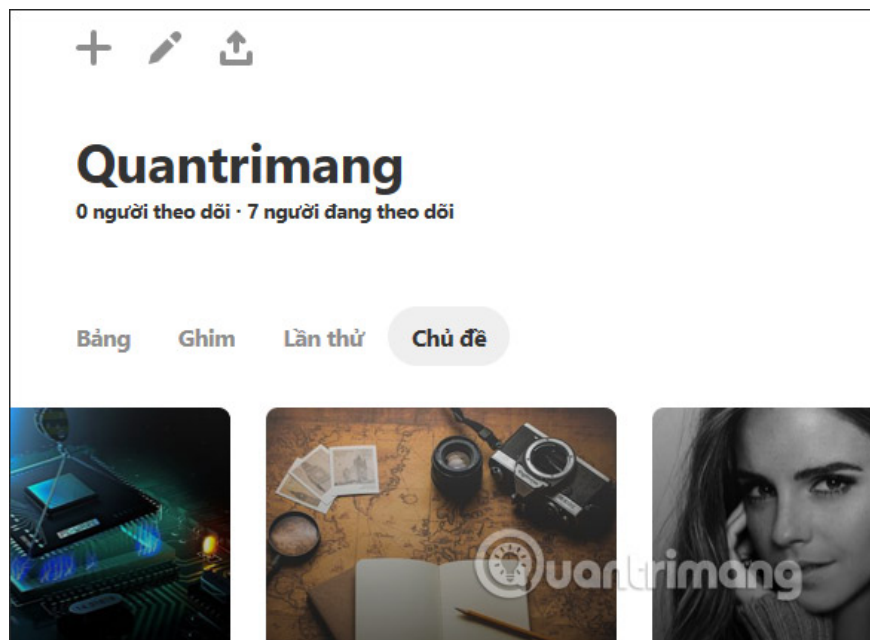

In this interface you can cancel the accounts you are monitoring, or track down the canceled accounts.

Step 7:

Finally click on **the account name** to enter the profile page. At this interface, there are table content, pins, topics being tracked and account setup done.

Click **the pen icon** to enter the account information setting interface.

Overall the interface as well as the content used on Pinterest Windows 10 applications are similar to those on other platforms. Application capacity is not too heavy, does not occupy much system capacity.

I wish you all success!
