Instructions for installing Primary font on computer

Step 1:

Users click on the link below to download the Primary font set on the computer.

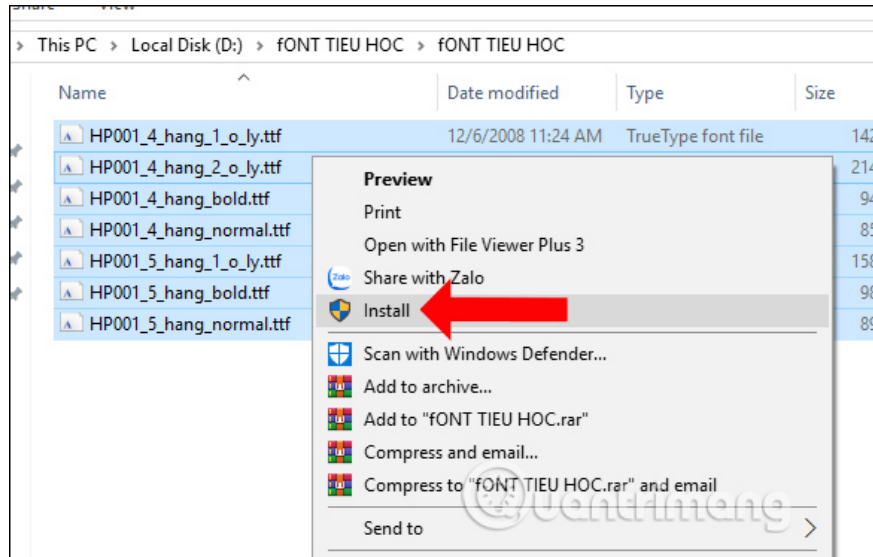

1. Download the Primary font set

After downloading the user proceeds **to extract the file** using the decompression software.

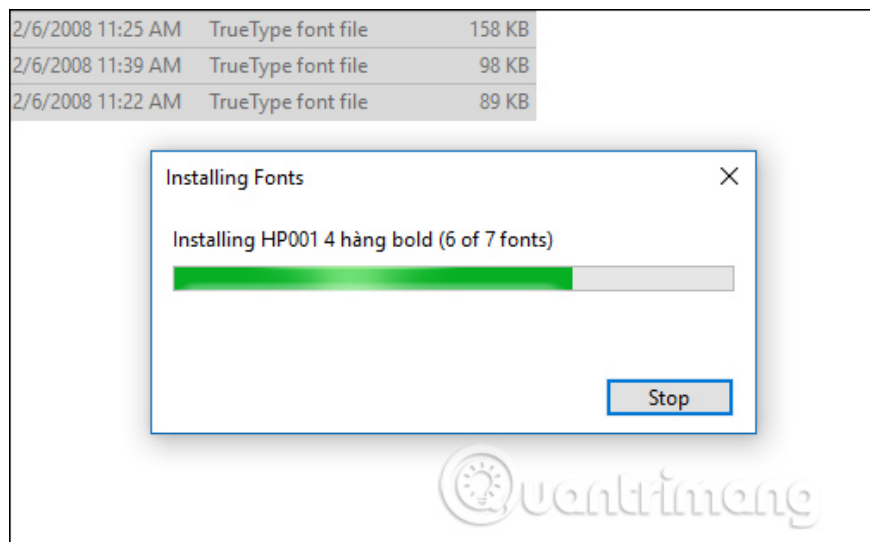

Step 2:

Continue to black out all unzipped font files and right-click and **choose Install** to install.

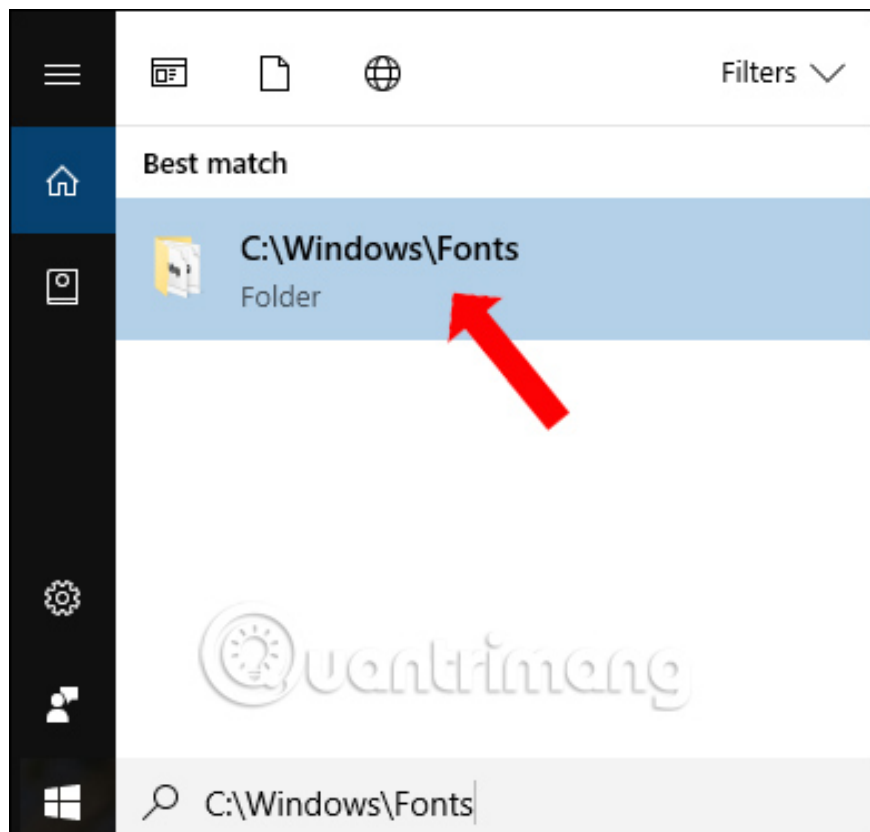

We wait for the font sets to be installed successfully on the computer.

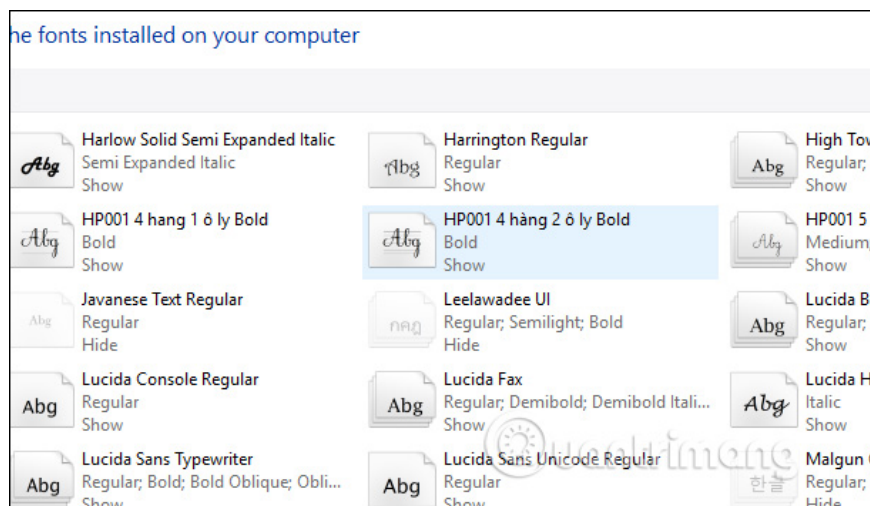

Step 3:

Leave this font folder intact, then enter **the path C: WindowsFonts** into the search bar on your computer. Click on the results of **the Fonts folder** on the top of the list.

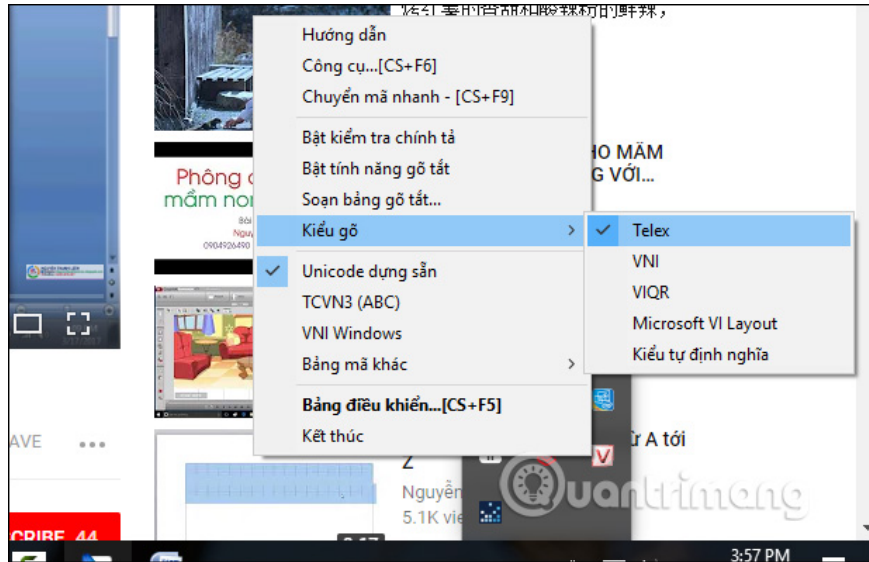

Step 4:

Then copy or cut the entire **Primary font** in the unzipped **folder into the Fonts folder** on your computer to use as a font on your computer.

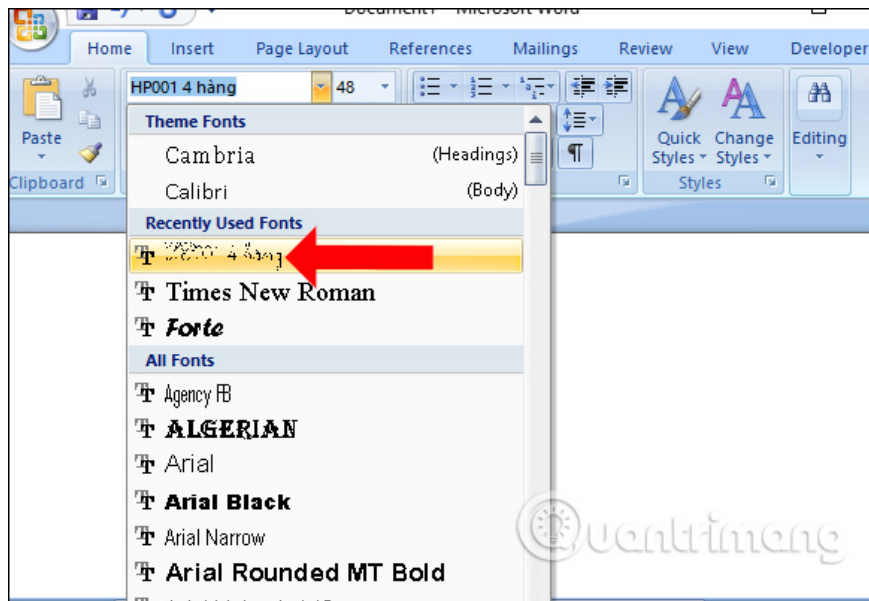

Step 5:

Click on the **Unikey** icon in the system tray and then **turn off Enable spell checking** if you're using, **built-in Unicode** and **Typing Method Telex** .

Step 6:

Now open Word and find the Primary fonts. Primary fonts include HL Hoctro, HP001 4 rows, HP001 4 rows 1 glass, HP001 4 rows 2 glass, HP001 5 rows, HP001 5 rows 1 glass. If you want to find any font, enter that font and will see in the font list.

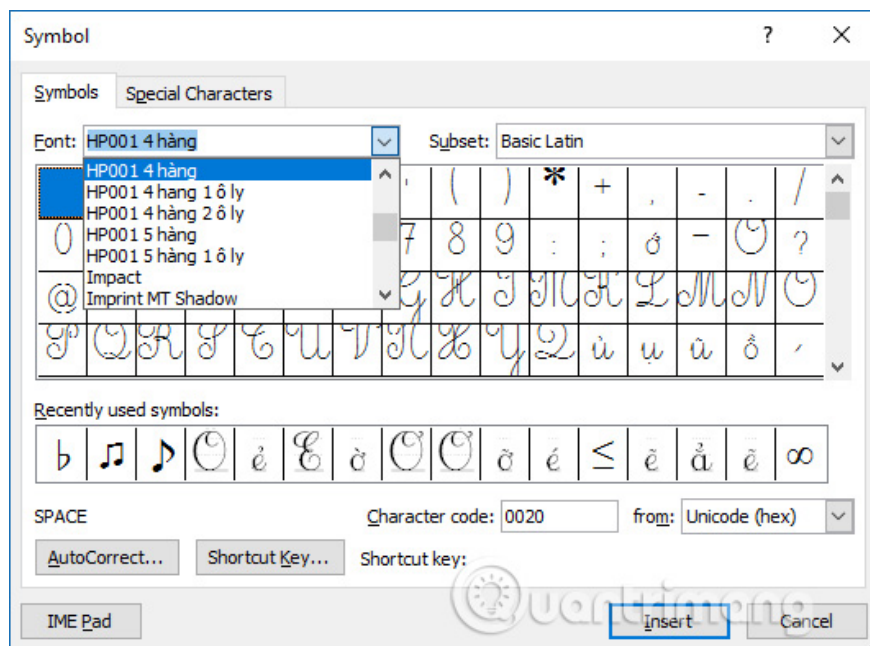

Enter the content and see the Primary font as shown below.

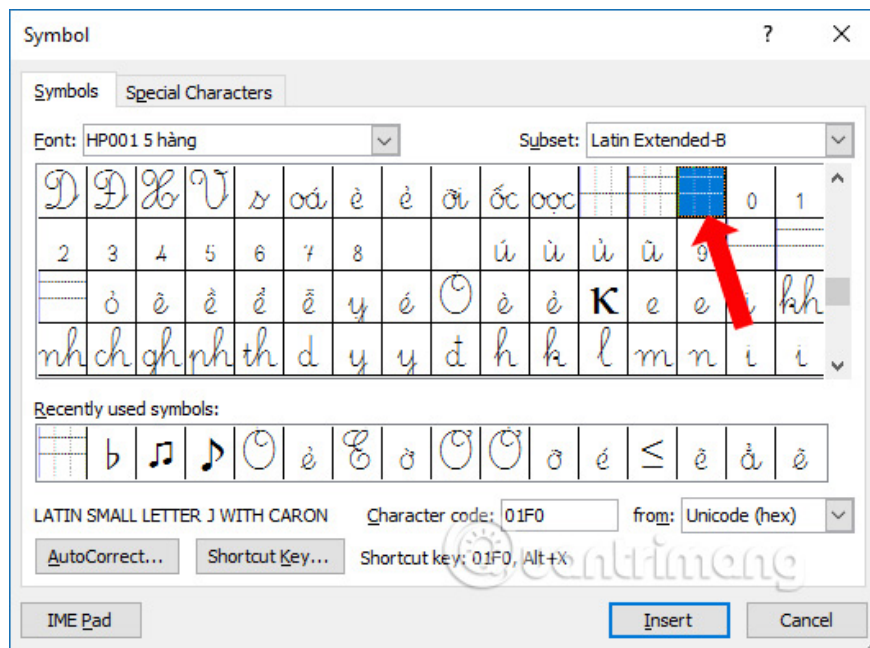

Step 7:

Also when adding this Primary font user can add Primary characters like reticle on Word. Click **Symbol** and select **More Symbols** to open the icon to select the icon.

In the Font section you also select the Primary font and will see the icons below.

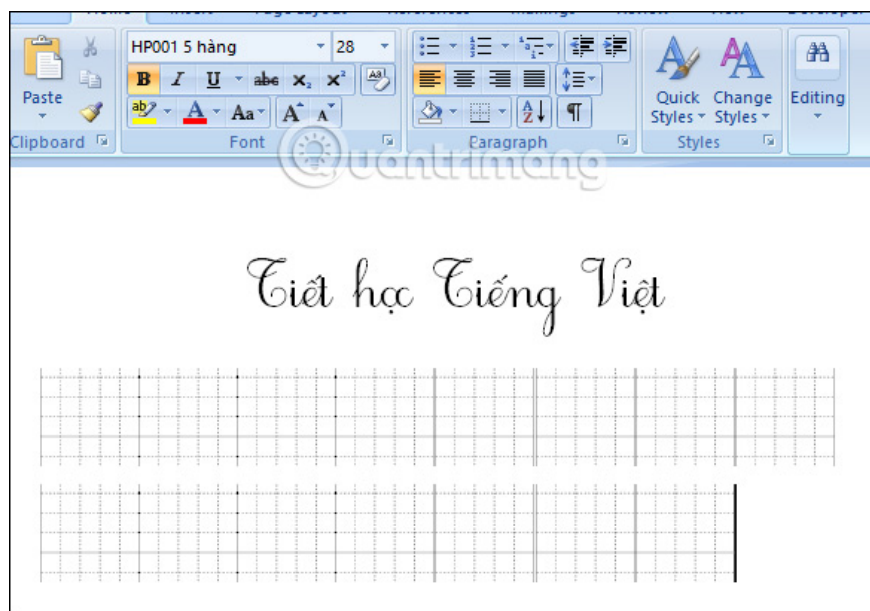

Select the grid icon to use.

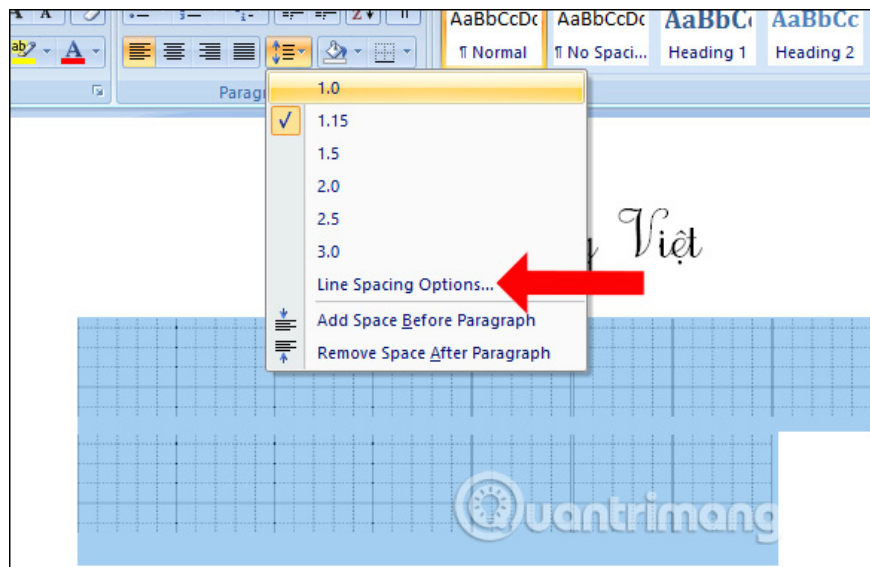

Step 8:

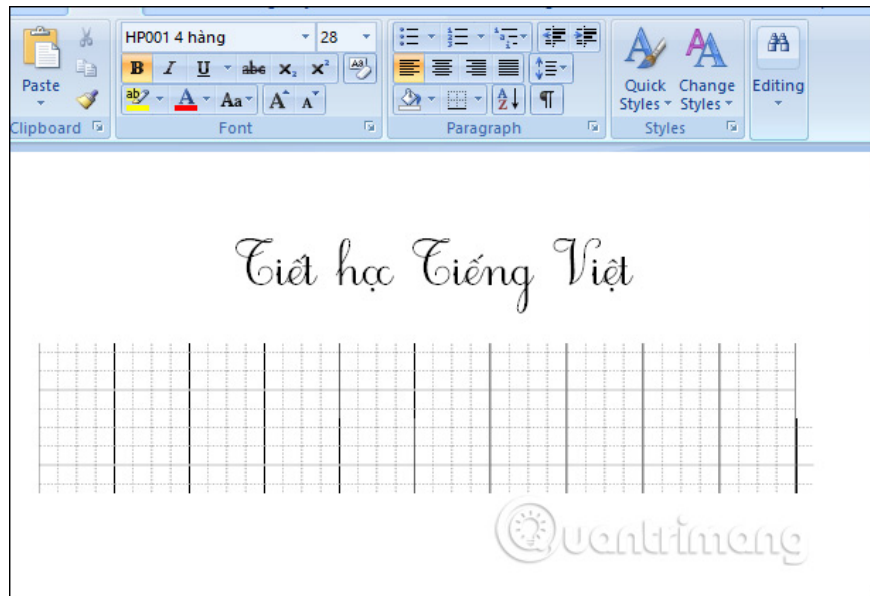

As a result, you will get the following lines.

If the rows are separated, click on the **Home** item and then select the **Line Spacing** section to choose **Line Spacing Options**.

Then adjust the items as shown below and click OK to save.

So you know how to write Primary text on Word by installing Primary font. Besides, it is also easy for us to learn how to write and write.
