

# How to use Prisma on a PC that doesn't have software installed?

Prisma application becomes a new trend of photo editing on mobile, bringing unique and new photo editing filters than many other applications. Can you use Prisma on your computer?

It's a new name in the village photo editing application, but Prisma has impressed the lovers of "taking a selfie" and demonstrating the ability to take photos of themselves. But what if you have a photo in your computer and want to use Prisma's filters? Manually copying photos to your phone and using Prisma is the only option?

Have you ever tried to think of using Prisma application right on your computer? The answer is absolutely world. The essence of Prisma is to store filters on the server and use API functions to analyze, then apply to images when users choose. Since then, the chat application Telegram has exploited these API functions and created the bot AIPrismaBot. With this Bot, we can completely use Prisma easily. So how to use Prisma on computers? Let's explore with the Network Administrator in the tutorial below.

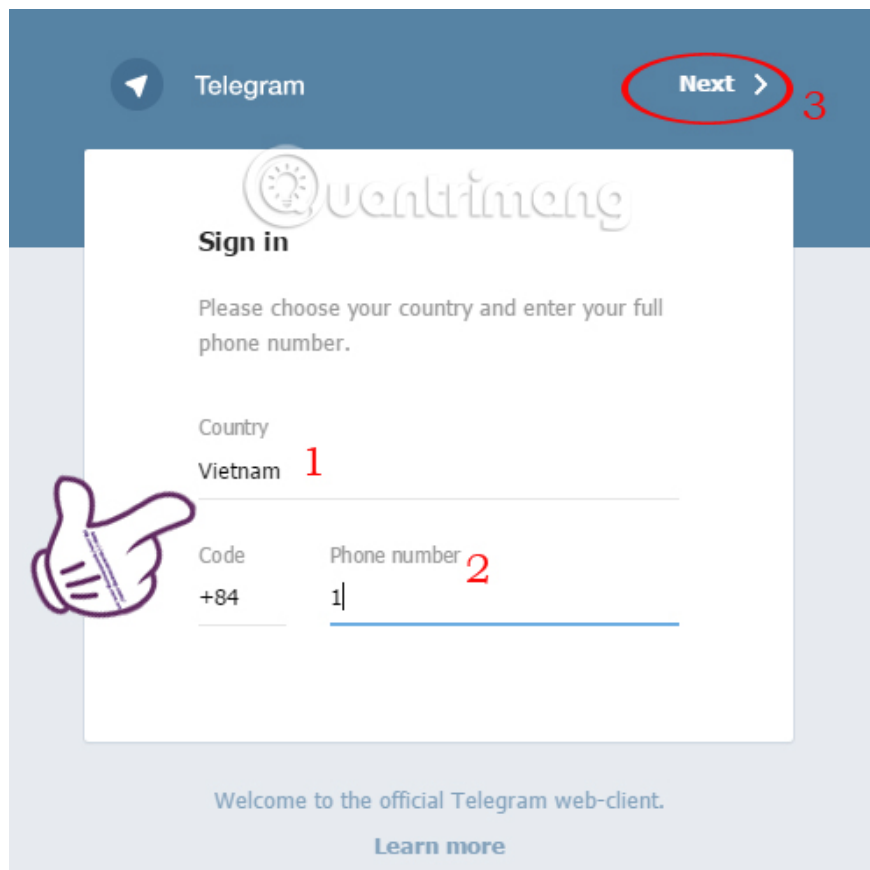

## How to use Prisma application on the computer

First, **download and install Telegram for your computer** or use the web version under the following link:

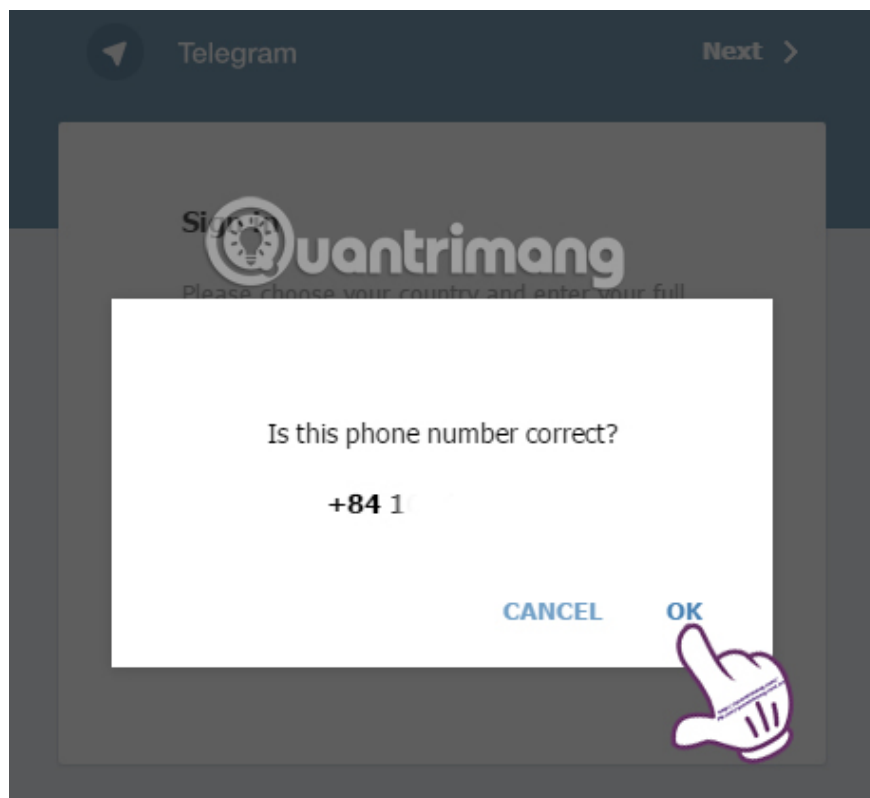

1. Download Telegram for Windows
2. Use Telegram web version

### Step 1:

Telegram will ask you to login. We choose **Country Country as Vietnam** . Then enter **the Phone Number phone number** next to **the Code area code section** . Finally click **Next** to proceed to the next step.

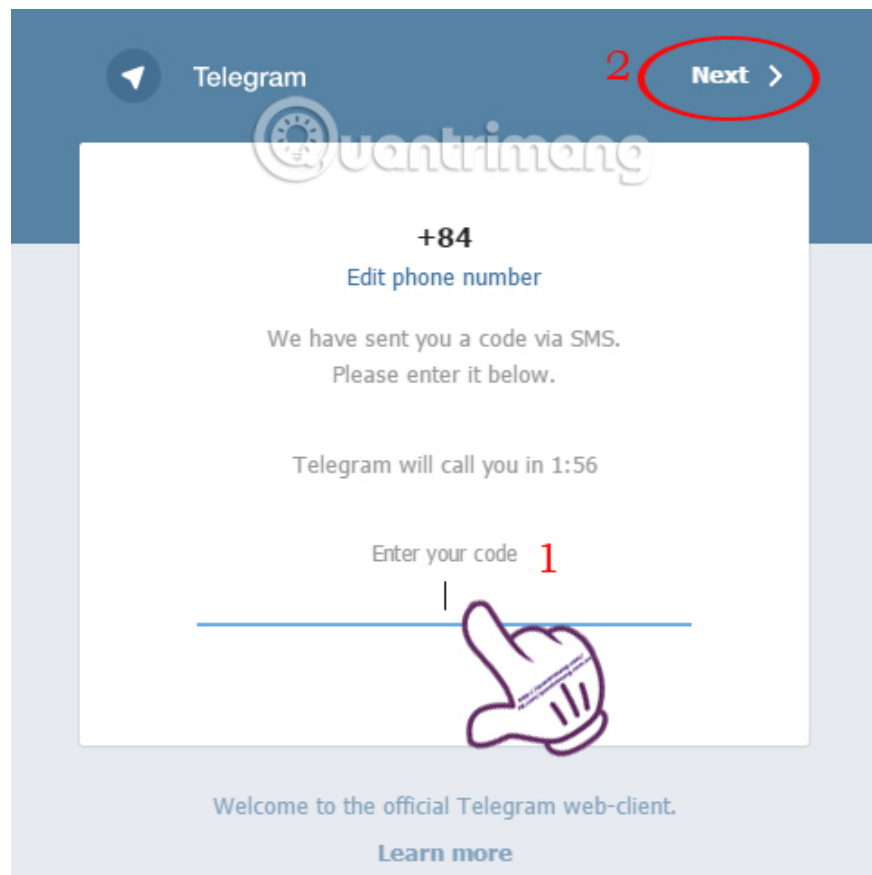

Soon, the application will ask again to **confirm your phone number** . Check and click **OK** .

## Step 2:

In a few seconds, Telegram will **send verification code messages** to you. We **enter the code** in the **Enter your Code section** to be able to use Telegram. Click **Next** to continue.

## Step 3:

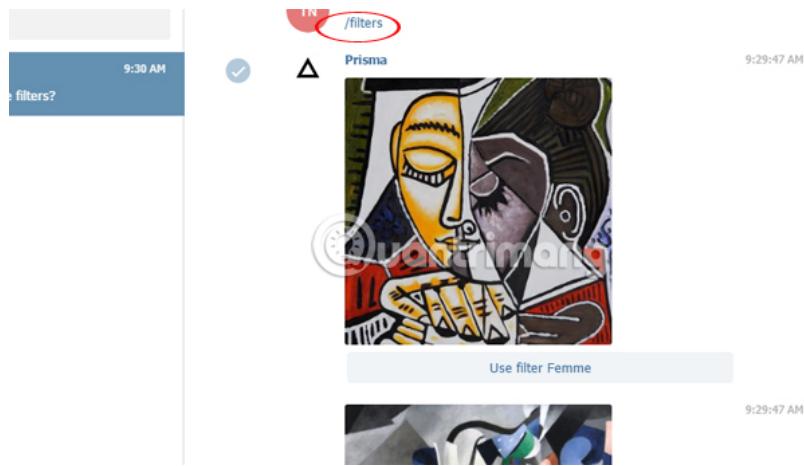

Next, we will be redirected to **the message management interface in Telegram** . Click on the link below to use the bot.

1. Use AIPrismaBot

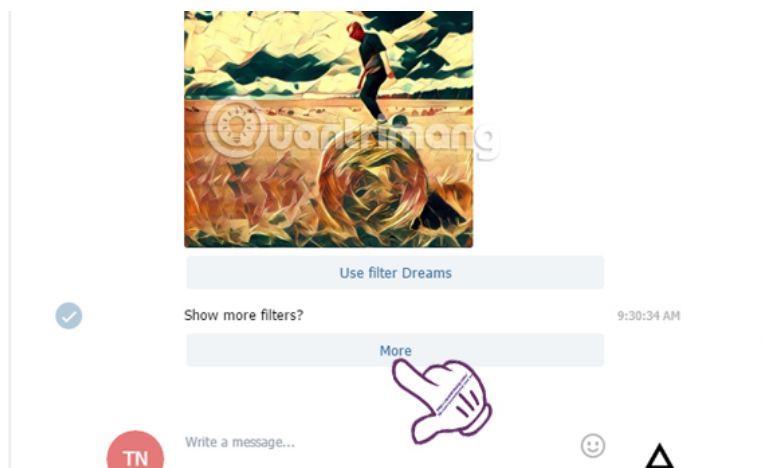

Click **Start** to proceed with photo editing with Prisma.

## Step 4:

Try entering the **command / filters** and then click **Send** to send. You will see that AIPrismaBot returns a **list of some filters** so you can choose to edit, such as Femme, Udnie, Tears, .

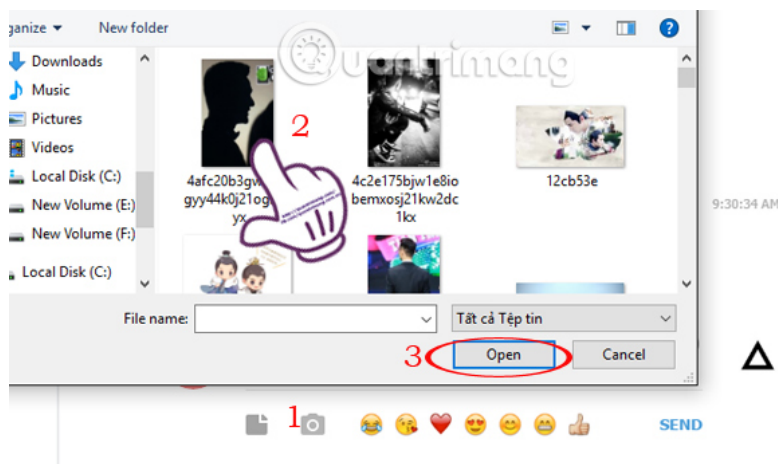

To see more filters, click **More** right below.

### Step 5:

For random photo editing, click **the Send file icon** below and **select the image you want to edit** . Click **Open** to apply the filter.

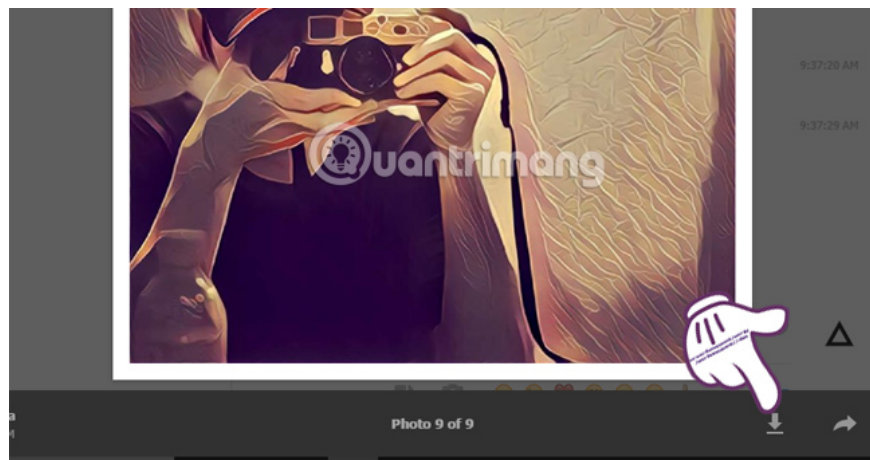

Soon, your photo will be applied with Prisma filter as shown below.

## Step 6:

To **download the edited image to your computer** , click on the image and select **the Download arrow icon** .

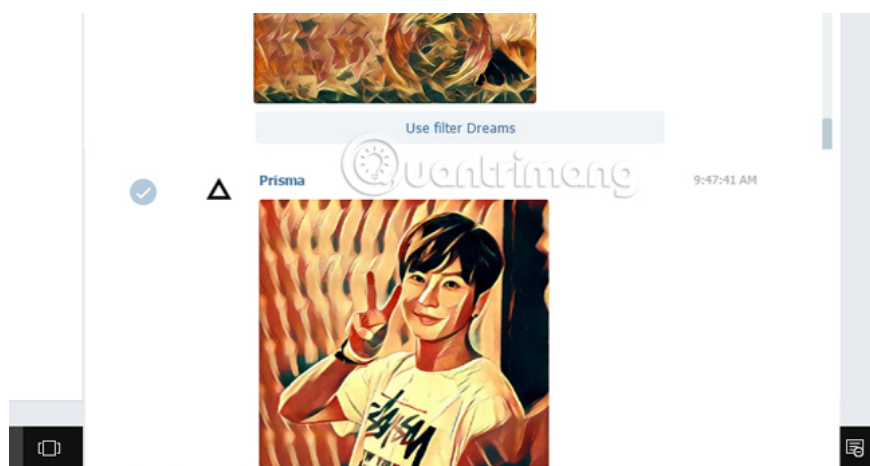

In addition, we can also **request AI Prisma to use another filter**. You select 1 filter according to the list above and click on **Use filter filter name**. Then, the message using the filter appears.

For example, I chose the Dreams filter as shown below.

Results of already applied Dreams filter images as used.

So, we have completed the steps to edit photos with filters of Prisma application on the computer, when using bot AIPrisma Bot via Telegram application. Although the ability to edit AIPrisma Bot has not been as rich as the Prisma photo editor on the phone, such as not adjusting the intensity of the filter, but also quite interesting so that we can blow a new wind into each picture. ?!
