

How to Use Radio Tray on Linux

Radio Tray is a very light application in Linux that is free to use. It can be configured to play radio stations from all over the world. This article will explain how to install it and how to use it. Steps may differ slightly depending on...

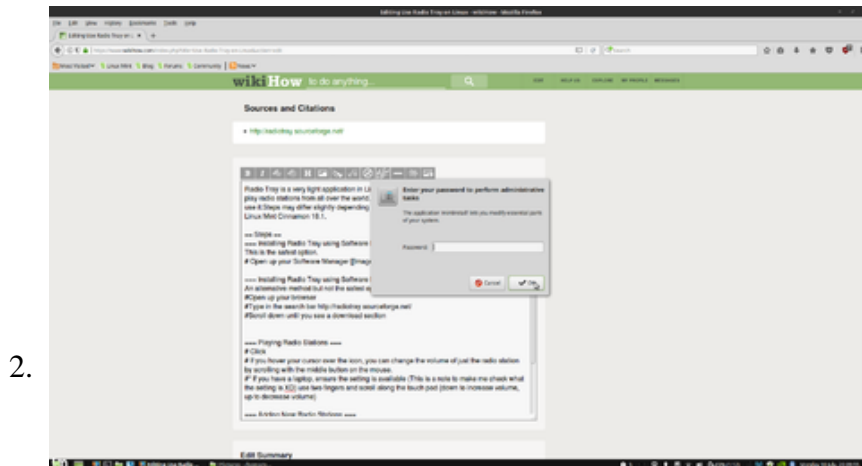

Method 1 of 4:

Installing Radio Tray using Software Manager

This is the safest option.

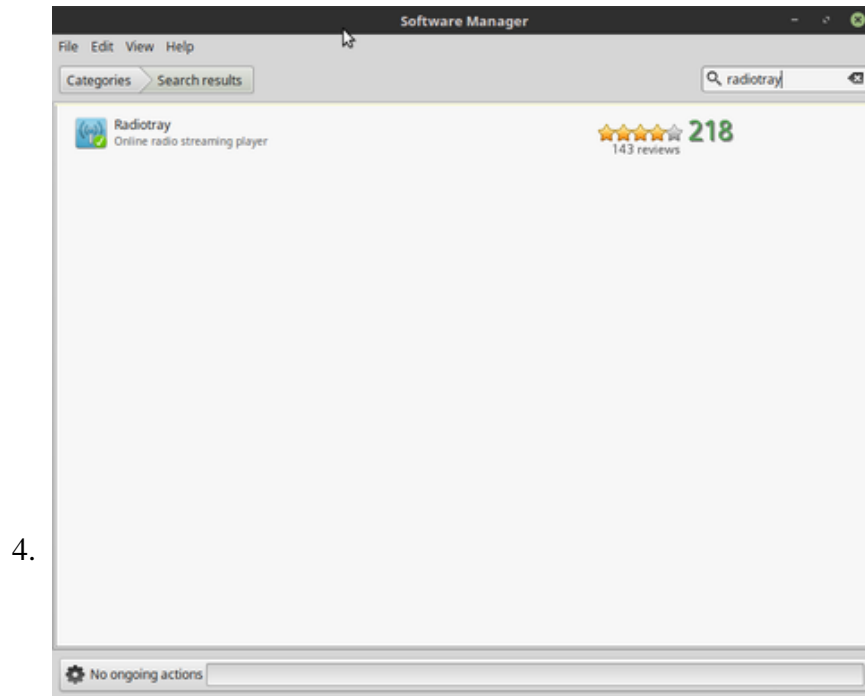

Open up your Software Manager.

Type in your password then click **OK**.

In the search bar, type "RadioTray" (not case sensitive but don't put in a space) and press Enter.

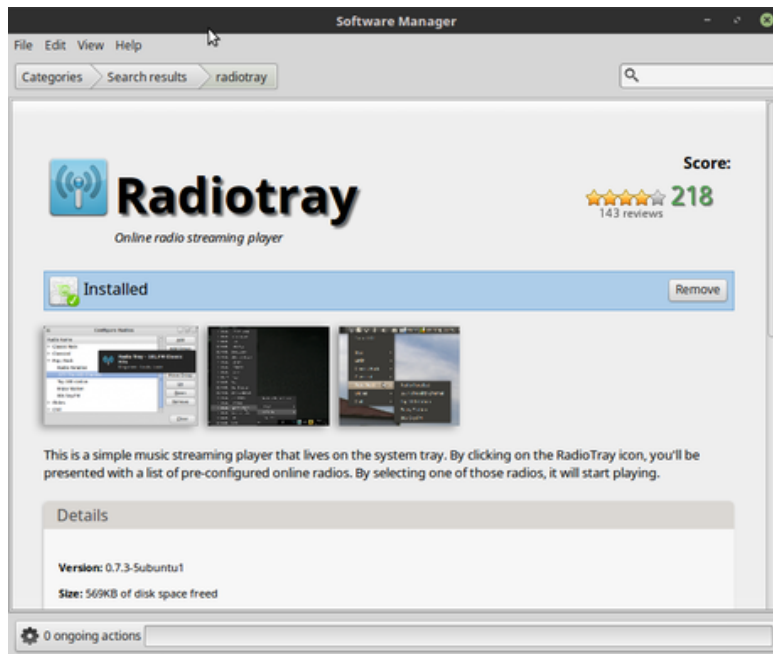

Double click the "RadioTray" icon.

5.

Click **Install**

1. You will see a message saying "Installed" if the process is successful

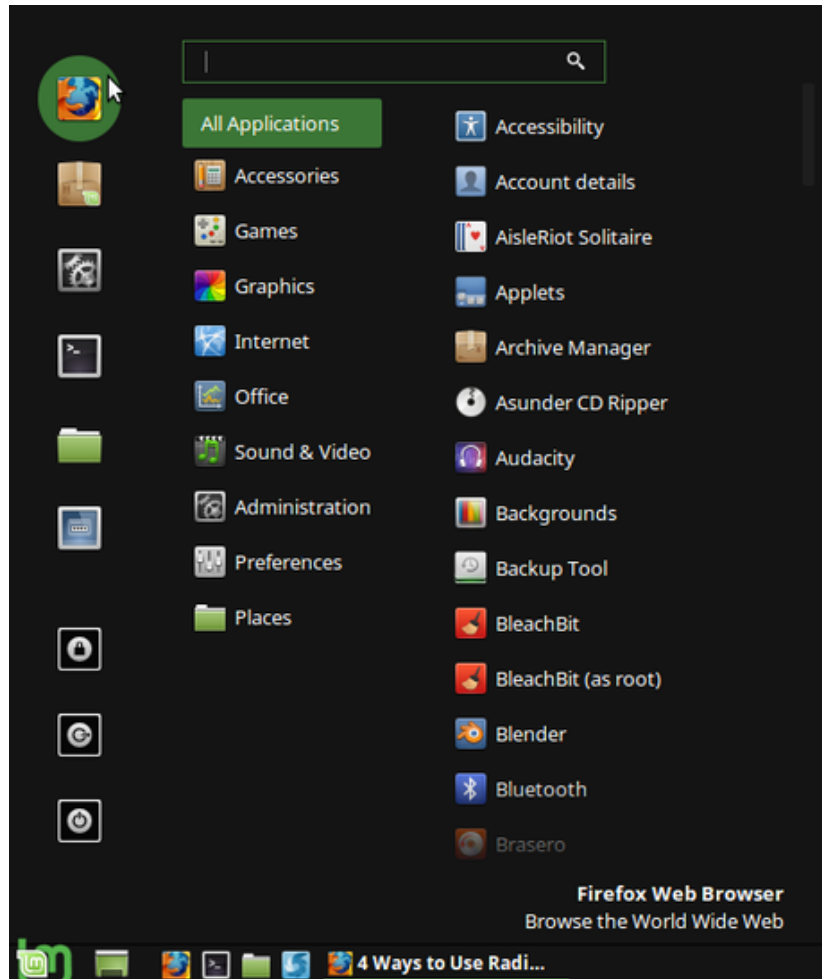

Method 2 of 4:

Installing Radio Tray using Sourceforge

An alternative method but not the safest option.

1.

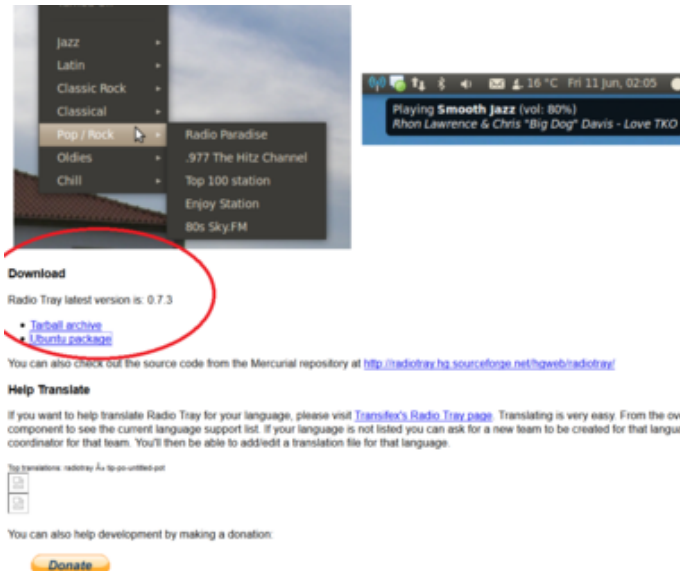

Open up your internet browser.

2.

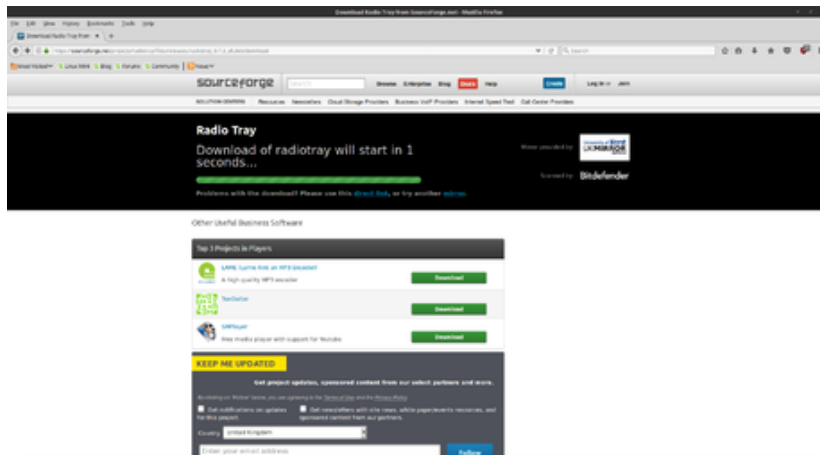

Type in the search bar <http://radiotray.sourceforge.net/> and press ? Enter.

3.

Scroll down until you see a download section and choose your desired download option. .

4.

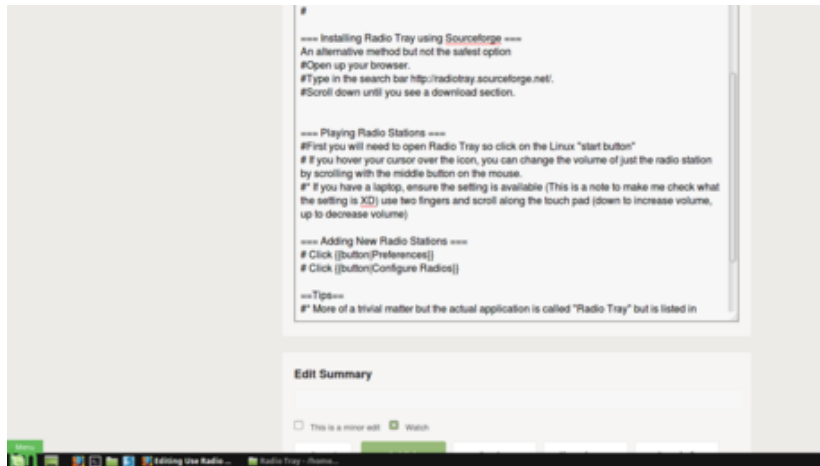

Wait for your download to start automatically.

1. Some browsers will ask you what you want to do with the file. It is recommended that you save the file first and then scan the file using an anti virus program just to be on the safe side.
5. Once it's downloaded, find the download location and open the compressed file.

Method 3 of 4:

Playing Radio Stations

1.

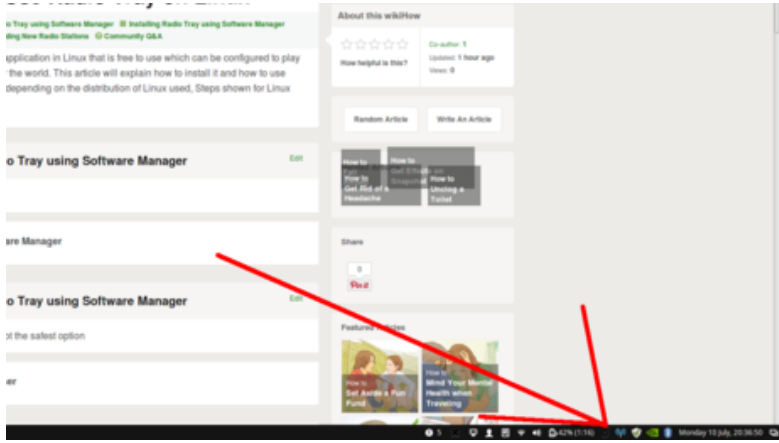

Open Radio Tray so click on the Linux "Start" button.

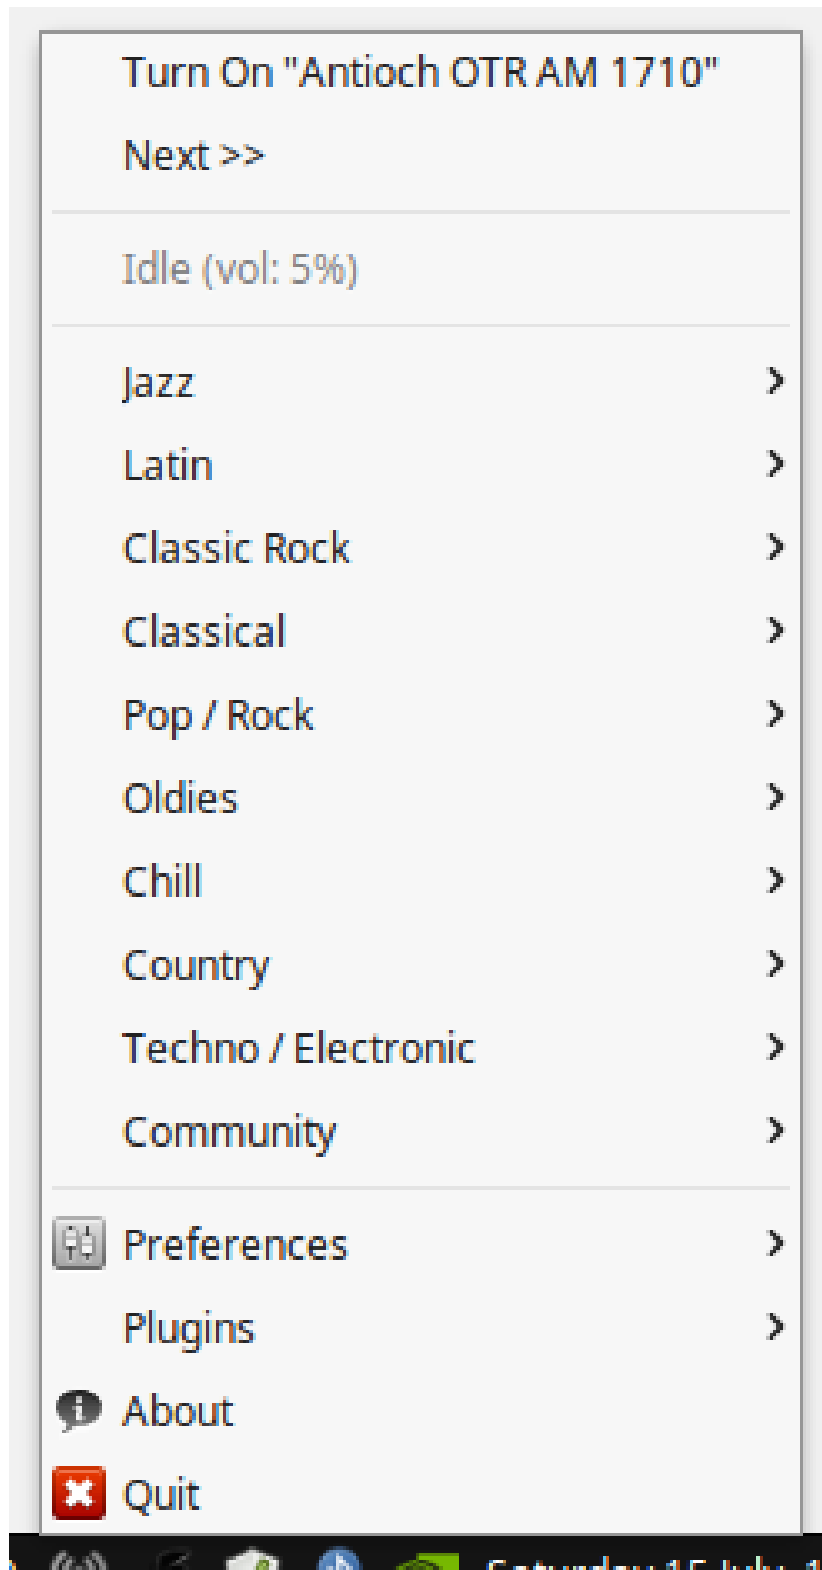

2.

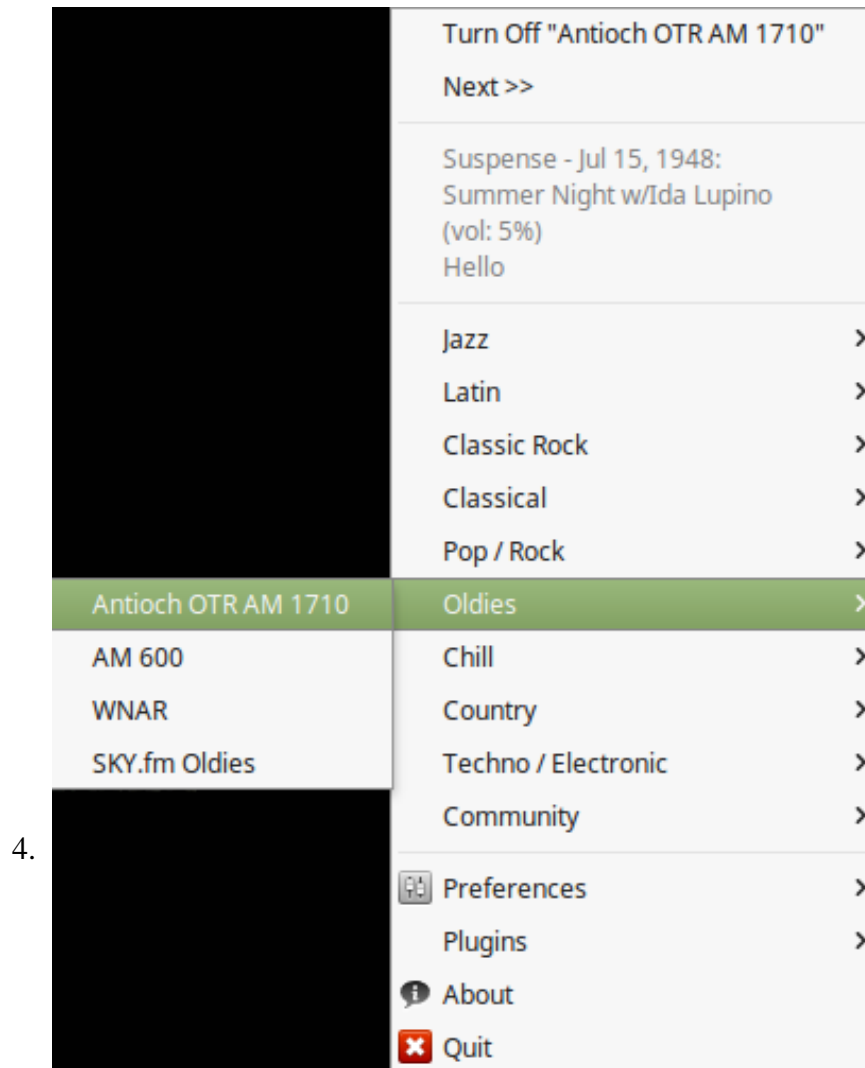

Navigate to **Sound & Video**, then click **Radio Tray**.

1. You will see this icon if the program has launched successfully.

Browse the list of genres to choose from.

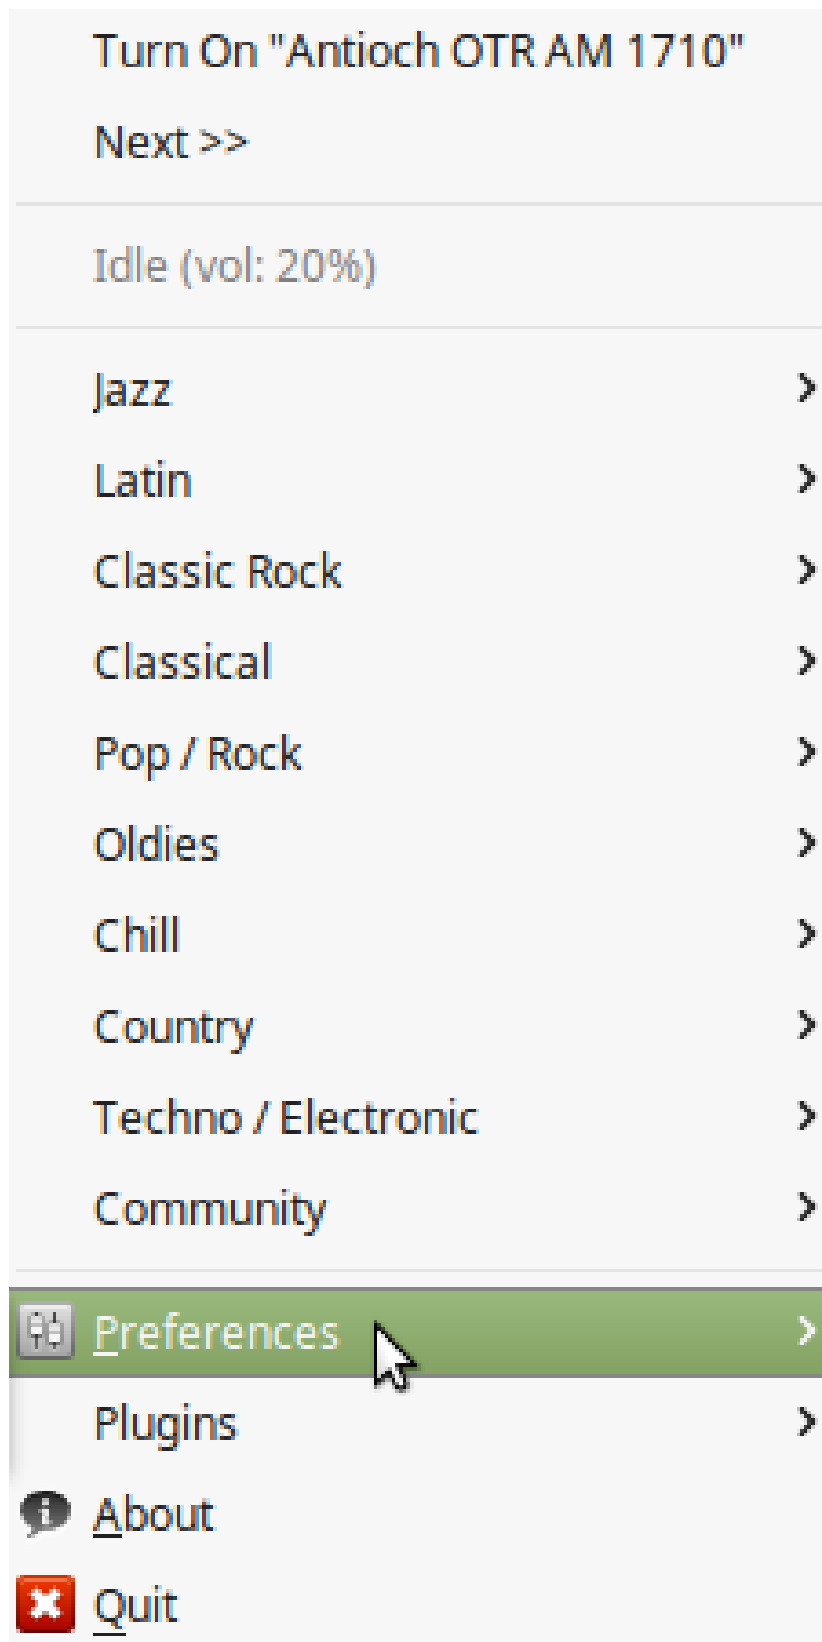

Hover your cursor over a genre then click on the radio station you want to listen to.

1. In this tutorial, we will choose the **Oldies** genre and then click **Antioch OTR AM 1710**.
5. **Wait for a notification in the top right corner of the screen.**

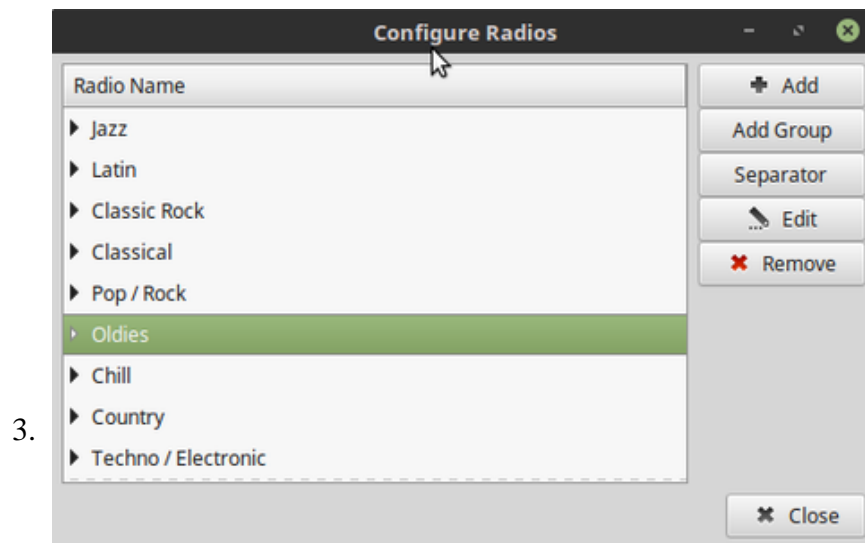

Method 4 of 4:

Adding New Radio Stations

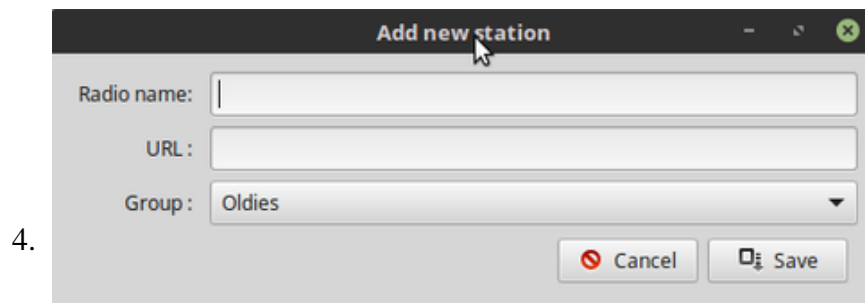

Click **Preferences**

2. Click **Configure Radios**

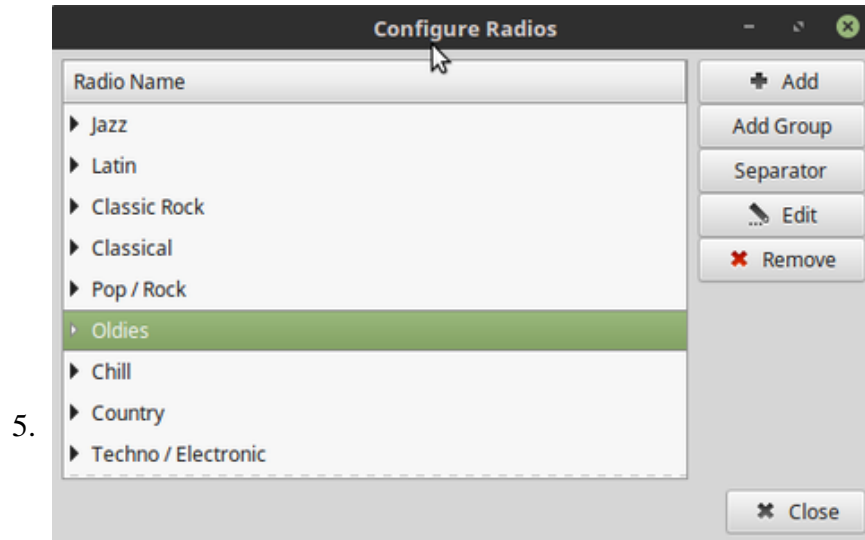

Click **Add**

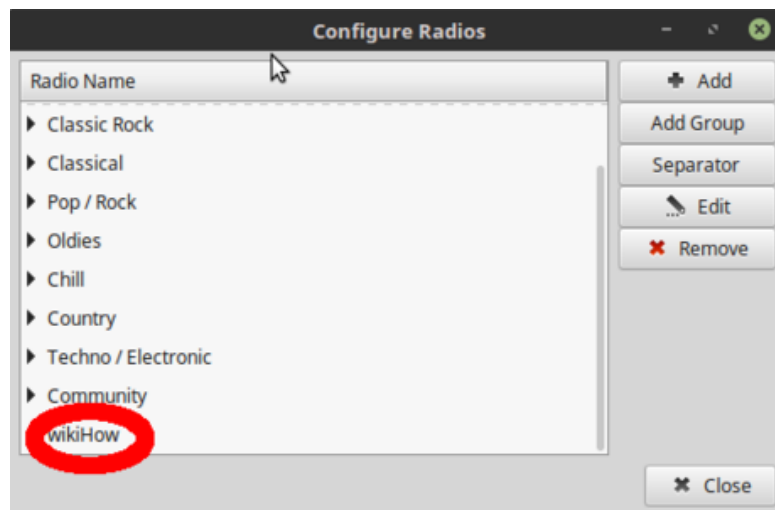

Type in the name of the Radio Station and the Direct address of the radio station (not the URL at the top of the page) and the group then click **Save**.

1. The direct address should be listed somewhere on the radio station's website. If not, you will need a URL sniffer.
2. If your new radio station doesn't fit any of the preselected genres, choose the root genre for now.

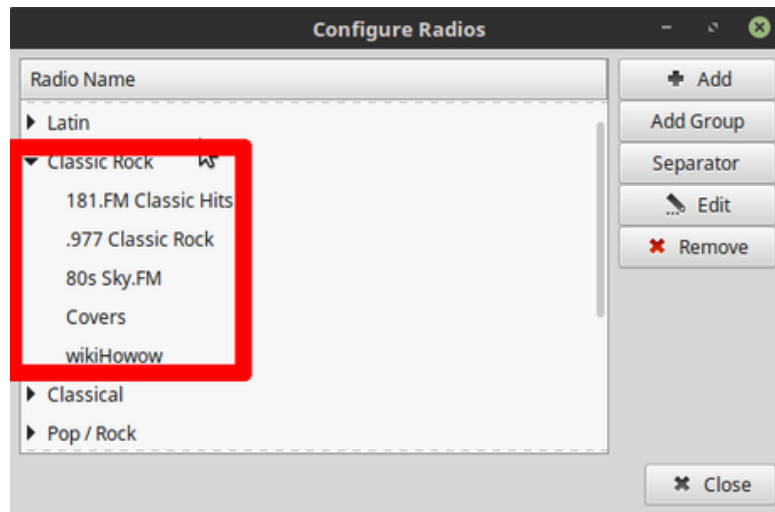

To add a new group, click **Add Group**.

6. Type in the name of your new group and select a parent group and press **Save**.
1. If you select the parent group as root, you'll find the new group here.

2. If you select the parent group as something else (for example "Classic Rock"), you'll find the new group underneath that group.
