

# How to Use Rainmeter

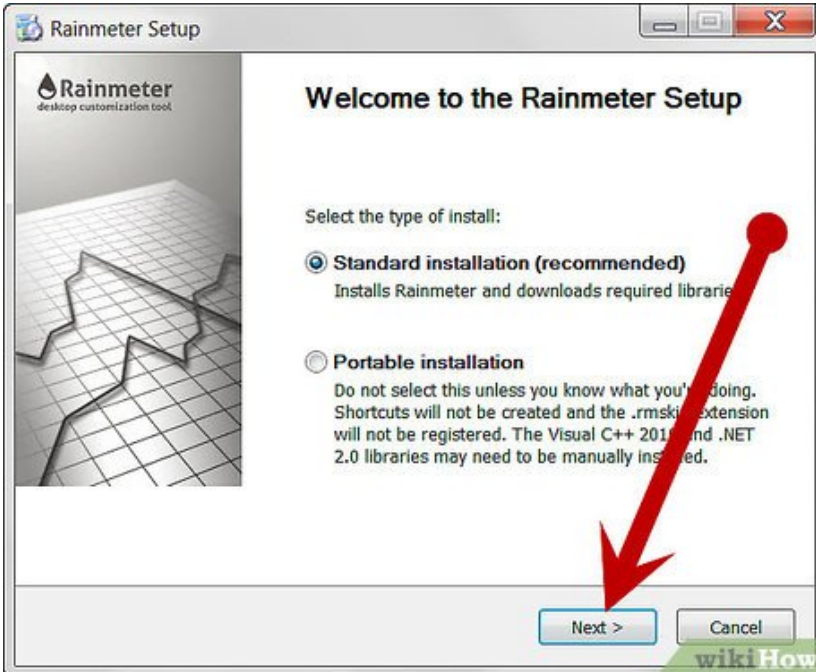

Rainmeter is a desktop customization tool for Windows. You can completely change the 'look and feel' of your desktop with Rainmeter. However, there is a short learning curve. This article will help you get started. Download Rainmeter from...

Part 1 of 3:

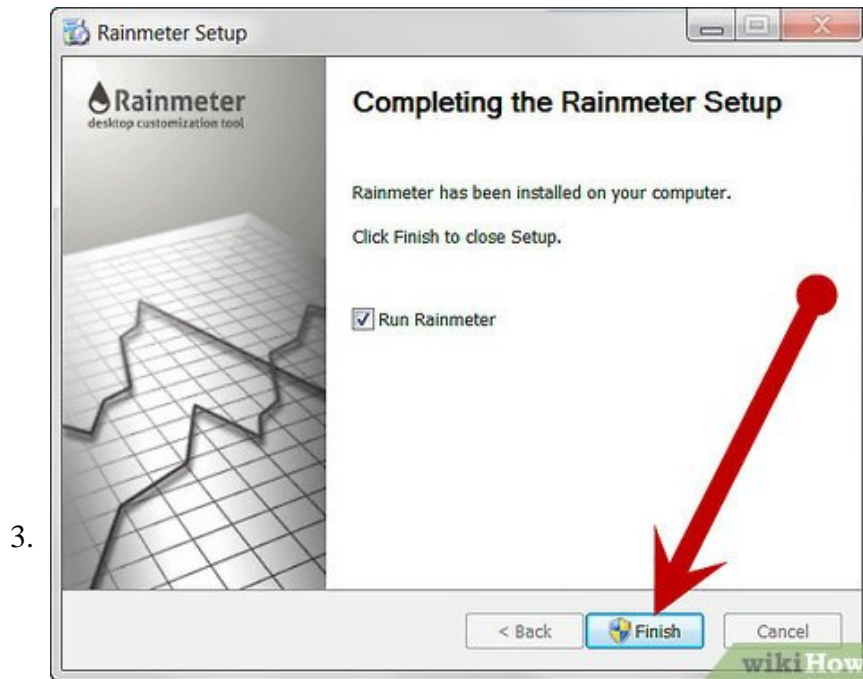

## Installing Rainmeter

1. 

Download Rainmeter from <https://www.rainmeter.net/>.

2. 

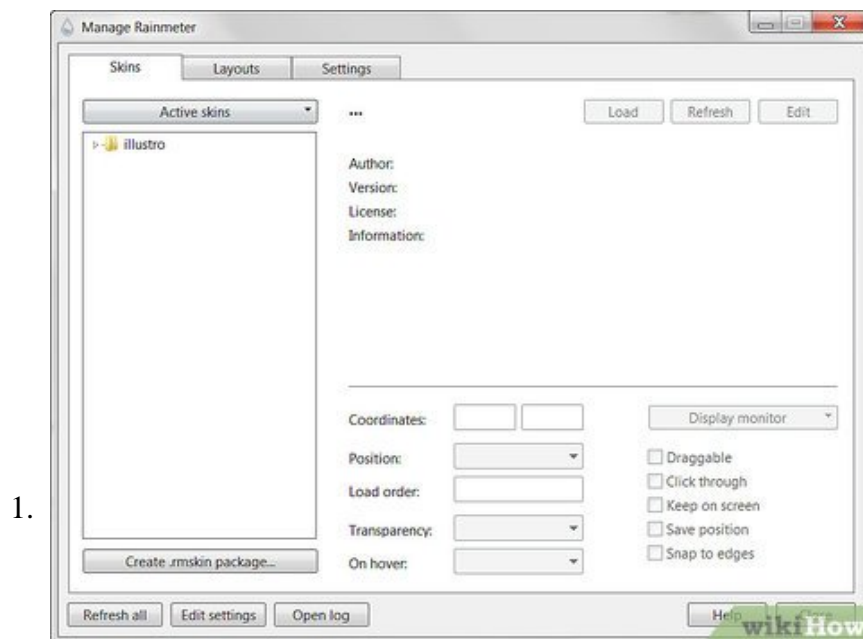

**The Rainmeter application is simple enough to install.** Just keep pressing "Next" when in doubt.

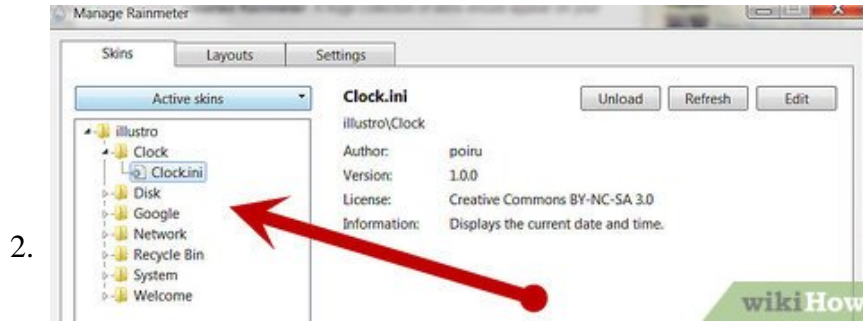

**You have successfully installed Rainmeter.** A huge collection of skins should appear on your desktop.

Part 2 of 3:

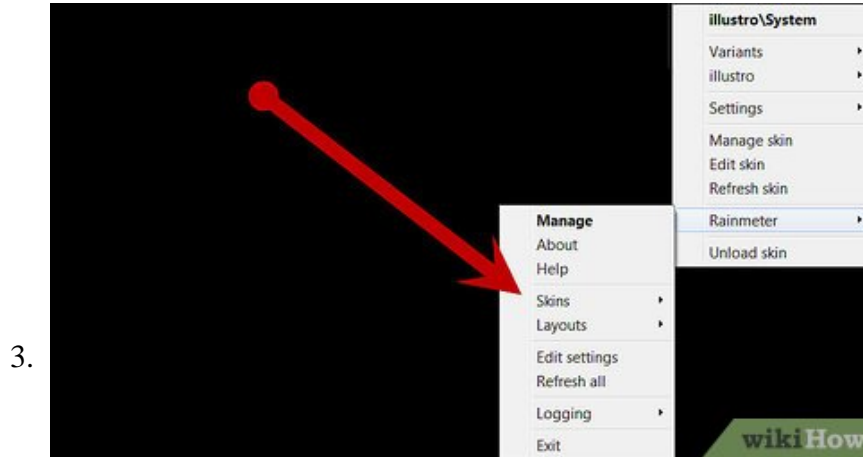

## Installing a Skin

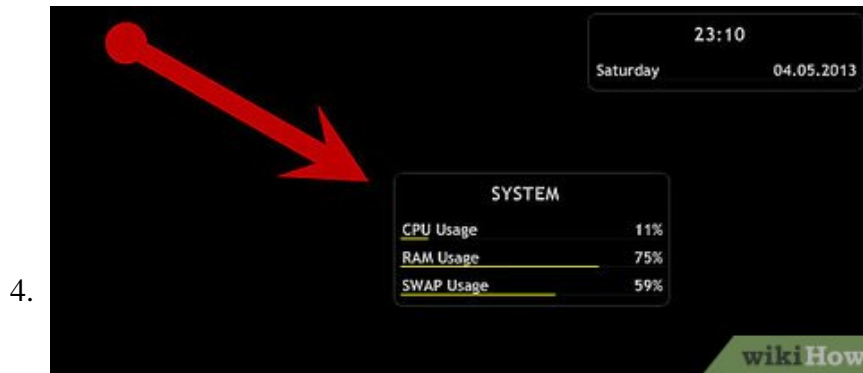

**Download a "skin".** By the Rainmeter terminology, skins can be compared with widgets. Skins come in many styles, most new ones have a .rmskin extension.

**Click on the skin to install the skin.** The installation window is a single-click job.

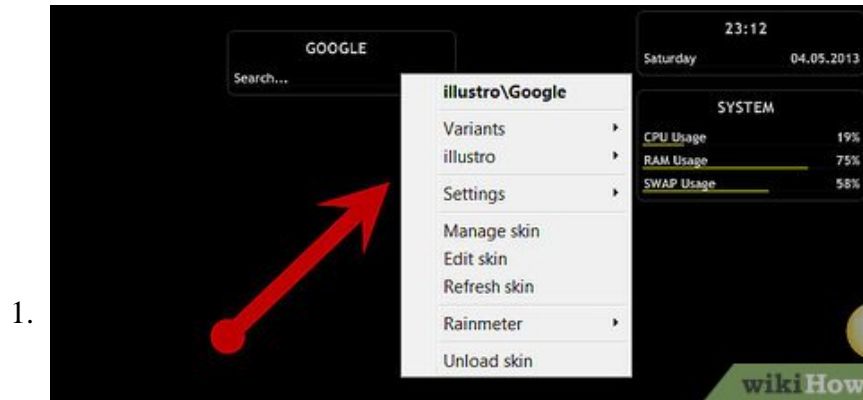

**Right Click on any skin on your desktop**(which were there after installation). In the Right click menu, select: Right Click>Skins>NAME\_OF\_SKIN\_PACK>Skin\_name.

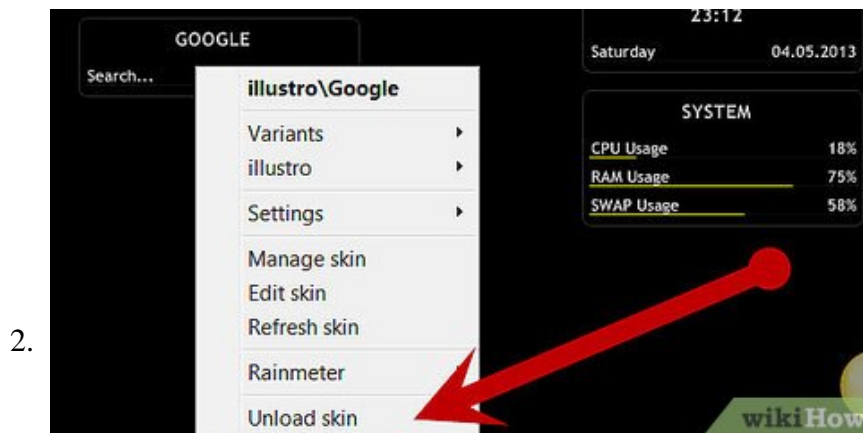

**A new skin should pop up.** You can drag it around.

Part 3 of 3:

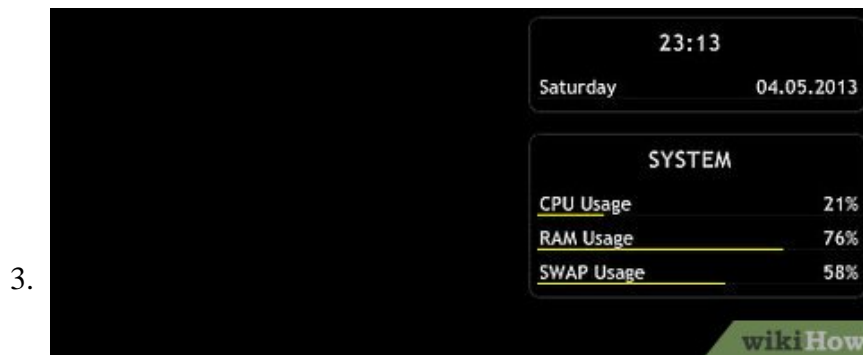

## Deleting a Skin

**Right click on the skin.**

**Select "Unload Skin" from the menu.**

**The skin should be removed.**
