Instructions for editing photos on Resizing.app online

Step 1:

Users access the link below to visit the home page of Resizing.app.

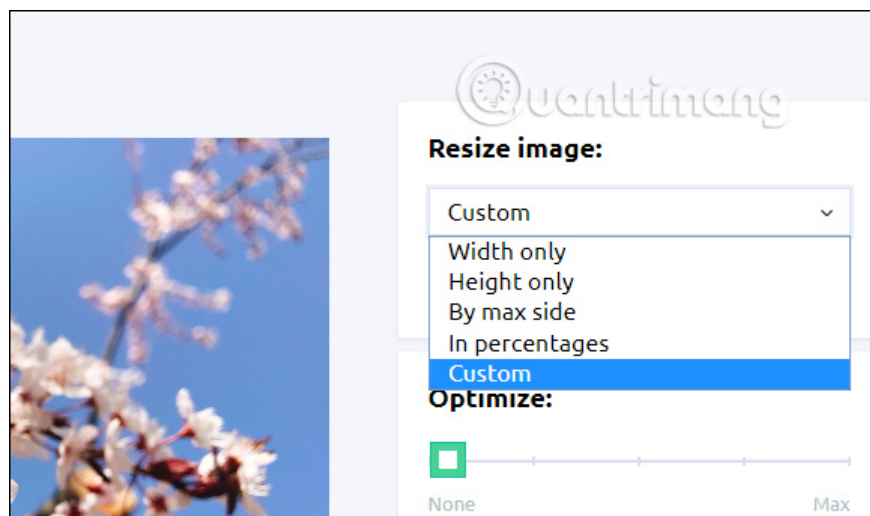

<https://resizing.app/>

At the user interface, click on **Choose file** to upload the image. The website supports images in PNG, JPEG, BMP, TIFF, GIF, WEBP formats.

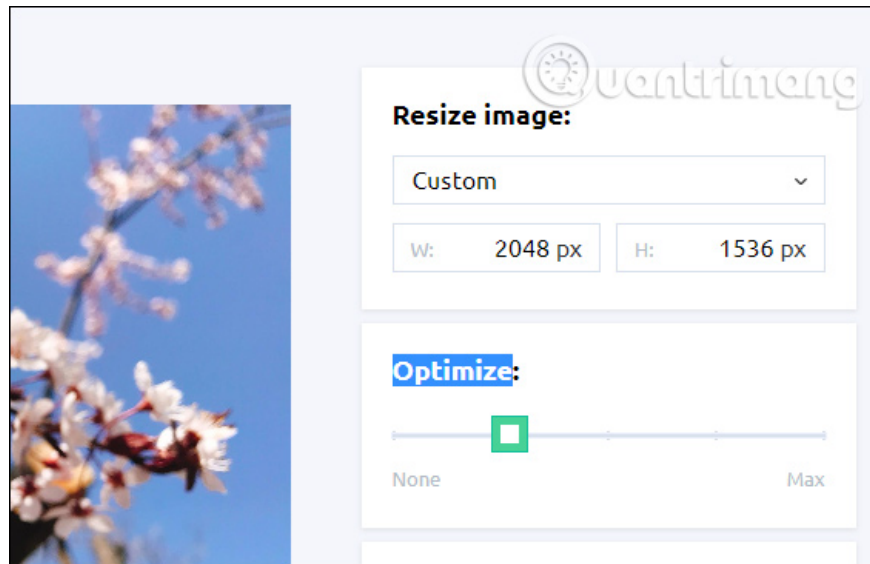

Step 2:

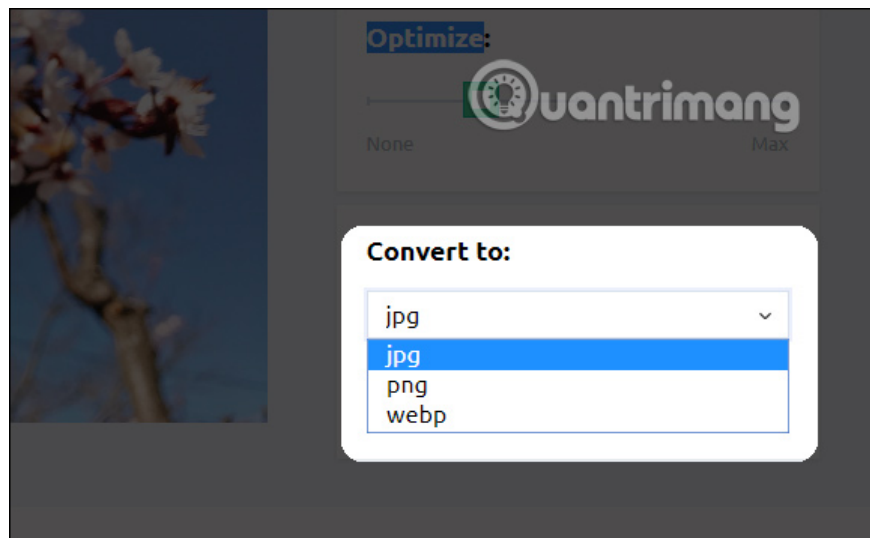

After uploading photos you will see images with editing options. At **Resize image**, user **resizes image**, including Width only or Height only. There are also many other options in the display list.

The **Optimize** section will use the slider to select **the compression level for the image**. The more you drag to Max, the higher the compression level. In general, Resizing.app does not focus too much on compressing image size, so if you want, you can use other image compression tools. If you do not want to compress, leave it at None.

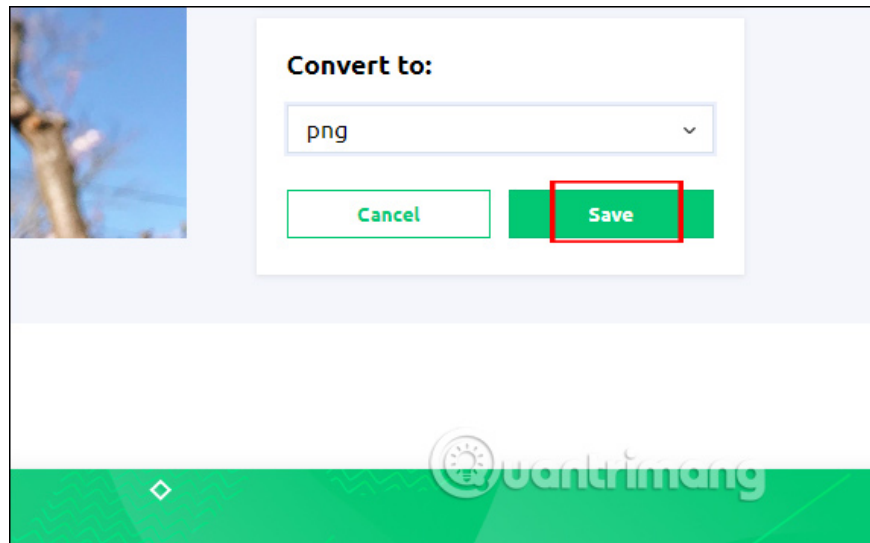

The **Convert** to section we **choose the image format** to convert to. Note that the user can use all the change options for the image, or apply only 1 of 3 customizations.

Step 3:

Finally, click **the Save button** to save the new image. Images are immediately downloaded to your computer.

I wish you successful implementation!
