In fact, not everyone can easily manipulate, install and use their remote. If you are also having trouble on this issue, please refer to how to use Samsung air conditioner control below.

Samsung air conditioner is one of the most popular air conditioners today. However, in reality not everyone can easily manipulate, install and use their remote. If you are also having trouble on this issue, please refer to how to use Samsung air conditioner control below.

Learn the meaning of symbols on Samsung air conditioner controls

On Samsung 1-way, 2-way Samsung air conditioners, the following symbols are available:

1. **Power button:** Has the function of turning on or off the air conditioner.
2. **MODE button:** Help you choose the mode. When using this button, you will be able to select 5 modes such as automatic mode, cooling mode, drying mode, fan mode and heating mode.
3. **FAN button:** The function of adjusting airflow with 5 different levels is automatic, slow, medium, fast and turbo.
4. **SET button:** The function to select or cancel the selected settings.
5. **">" Button:** A function to assist the operation of the timer process.
6. **SETTING button:** Mode setting function for air conditioner.
7. **Button TIMER:** Timer function.
8. **OPTIONS button:** New function 1 of 2 intelligent modes are Fast mode (quick cooling) or Comfort mode (comfort mode).

9. **SINGLE USER button:** Function to turn on or off 1 user mode. This is one of the smart functions that help minimize the power consumption of Samsung air conditioners.
10. **Button with wind blowing symbol:** Function of turning on or off auto-swing mode.
11. **TEMP button:** Control functions to increase or decrease the temperature as needed. Except for the fan mode which cannot change the temperature, all the other modes, we can adjust the increase or decrease of 1 degree C in the range of 16 - 30 degrees.

How to use Samsung air conditioner controller 2-way, 1-way

Whether it is Samsung one-way or two-way air conditioner, the operation method is quite similar to the remote.

The basic mode

When pressing the MODE button, we will be selected 1 of 5 modes:

1. **Automatic mode (AUTO):** When this mode is selected, the air conditioner will automatically set the temperature and rotation speed of the fan to equilibrate with the room temperature thanks to the built-in sensor.
2. **Dry cooling mode (DRY) :** This mode will help absorb moisture in the air but does not reduce the room temperature. However, this mode is only recommended to select on days when the weather is not too hot.
3. **Fan mode (FAN):** With this mode, the air conditioner both cools and combines with the reversing fan, helping the room space be ventilated and the temperature evenly distributed.
4. **Heating (HEAT):** This is the only mode in Samsung 2-way air conditioner. This mode has the function of increasing the temperature, making the room air warmer on cold winter days.
5. **Cool mode (COOL):** In this mode, the air conditioner will perform the cooling function, reducing the room temperature to the desired level. You can optionally choose to increase or decrease the temperature and airflow from the fan to get the most comfortable feeling. However, if the indoor and outdoor temperatures are too different, the air conditioner will take additional time and energy to fulfill the request.

How to set the good sleep mode (Good's Sleep) of Samsung air conditioner

This is a quite special mode of Samsung air conditioners, they are often used when the air conditioner is in the state of heating or cooling. With this smart mode, you will be able to save power quite effectively. There are 3 small modes when you choose Good's Sleep:

1. **Fall Sleep:** The more the night, the lower the temperature. Therefore, in Fall Sleep mode, your air conditioner will slowly lower the temperature over time, helping your body to fall into deep sleep with the most appropriate temperature.
2. **Sound Sleep:** This mode is the opposite of the Fall Sleep mode, ie they are activated when the air conditioner is in heating mode. When choosing this mode, the air conditioner will gradually increase the temperature to a suitable threshold for you to feel most comfortable, thereby helping to sleep better in cold weather days.
3. **Wake up:** When selecting this mode, you will be able to feel the refreshment in your own bedroom space with an extremely pleasant atmosphere.

The maximum time to set up Good's Sleep mode is 8 hours, enough for you to have a complete sleep. To cancel this mode, all you need to do is work so that the timer stops at "0.0".

How to set up 2-step cooling (Fast)

When the room temperature is higher than the set temperature, we can return it to its original orbit quickly. As follows:

1. **Step 1:** Press OPTION.
2. **Step 2:** Press ">" until display "2-Step" on the screen of the optional indicator.
3. **Step 3:** Press SET to start the Fast function.

Note: This function is only available when the air conditioner is operating in cooling mode.

Set the Comfort function

When learning how to use Samsung air conditioner control, you definitely should not ignore this Comfort function. In this mode, the air conditioner will give you the most comfortable and comfortable atmosphere with temperature, wind . at an ideal level. You can set this function by:

1. **Step 1:** Press OPTION.
2. **Step 2:** Press ">" until display "Comfort" on the screen.
3. **Step 3:** Press SET to start the Comfort function.

Note: This function is only available when the air conditioner operates in cooling mode.

Set the power saving function (Single User)

This is an extremely intelligent mode of Samsung air conditioner, helping you save energy efficiently.

In this mode, instead of cooling the whole space, the air conditioner will only cool where you operate. To enable this function, do the following:

1. **Step 1:** Press SINGLE USER to turn on the function.
2. **Step 2:** Press SINGLE USER again to turn off.

Note: This function works only when the air conditioner is in cooling mode.

Set the automatic cleaning function

Thanks to the ability to automatically clean you will enjoy the fresh, fresh atmosphere. The main function of this function is to minimize the humidity inside the indoor unit to a minimum. To set this up, do the following:

1. **Step 1:** Press SETTING until the CLEAN indicator light flashes.
2. **Step 2:** Press SET.

3. The CLEAN indicator will turn off after 3 seconds since setting. Instead, the TIMER indicator light and air conditioner will perform the cleaning function after the machine stops working.
4. Depending on the active air conditioner mode, this self-cleaning function will perform in different times. For example: Auto mode, cooling mode, drying mode will perform in 30 minutes. And heating mode, fan mode will perform in 15 minutes.

How to mute "beep beep" when using Samsung air conditioner

To turn off this sound, do the following:

1. **Step 1:** Press the SETTING button until the light shows "Beep".
2. **Step 2:** Press SET to complete the setup. After 3 seconds, the indicator light on the screen will disappear and this function will start working.

To turn on the beep again, you do the same thing when you turn it off.

Hopefully, the above sharing of how to use Samsung 2-way, 1-way air conditioner will be useful to you, so you can easily use all the features of this air conditioner.
