Instructions for recording videos, recording with Screen Recorder Plus

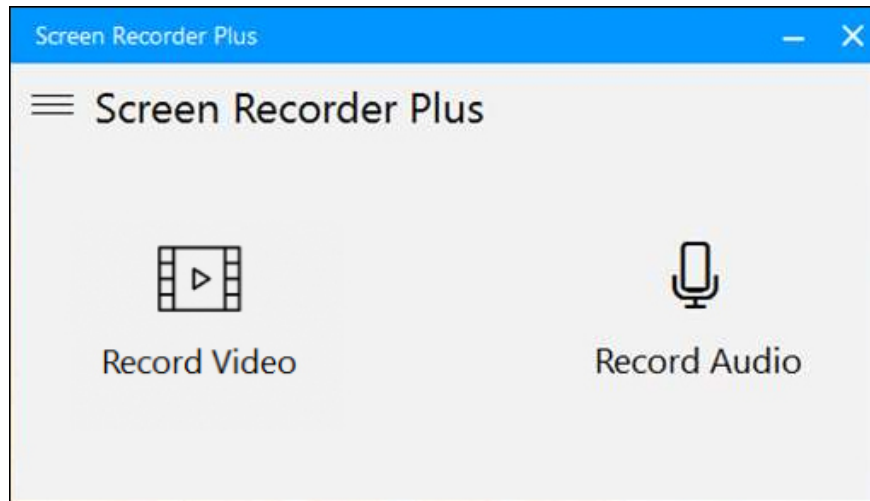

Step 1:

Users click on the link below to install the Screen Recorder Plus application on the computer.

1. Download the Screen Recorder Plus app

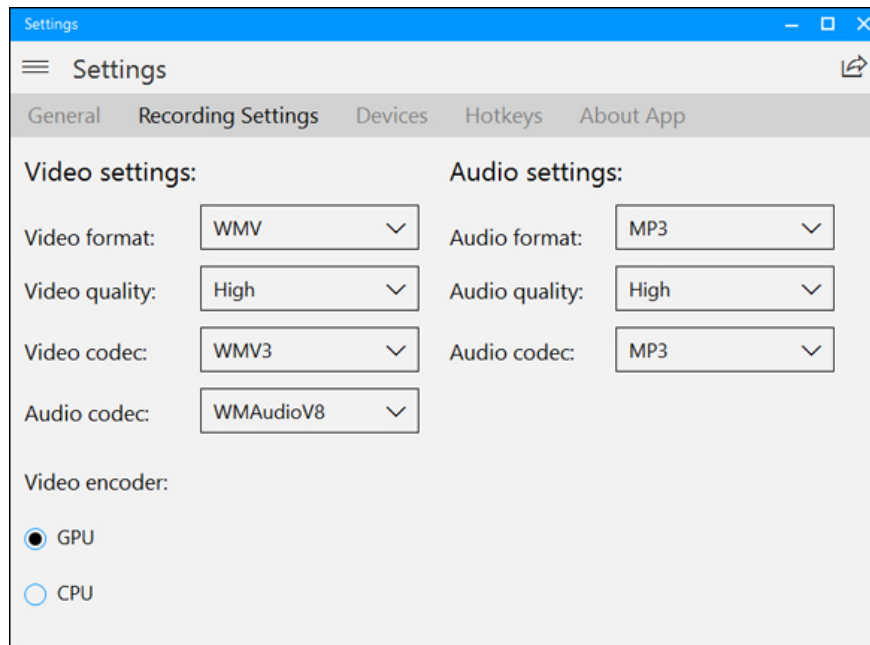

Step 2:

At the main interface of the application, click on **the 3 dashes icon** and select **Settings> Recording Settings** to customize the recording and video recording.

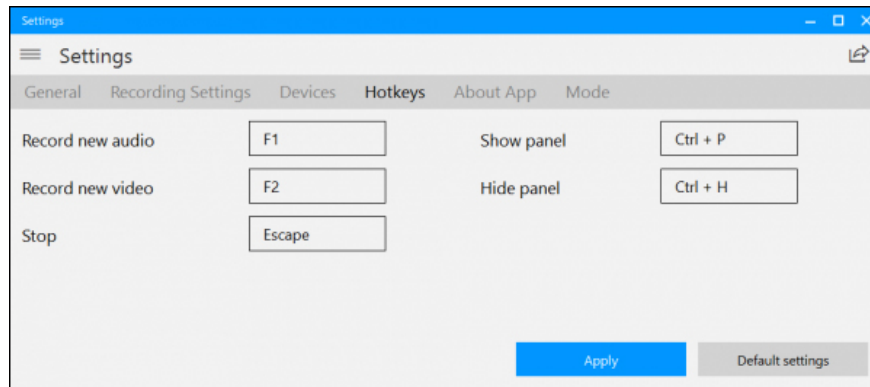

Step 3:

In the setting interface **Recording Settings** select video quality, format for output video, . at **Video settings** . With **Audio settings** also choose quality, save format for audio files after recording.

Step 4:

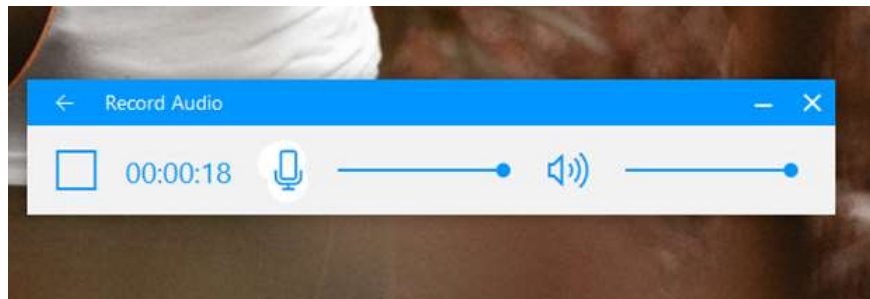

Besides, the application also supports shortcuts during recording and video recording screen. Clicking on **the Hotkeys item** will see shortcuts. Finally click **Apply** to save the changes if any.

Step 5:

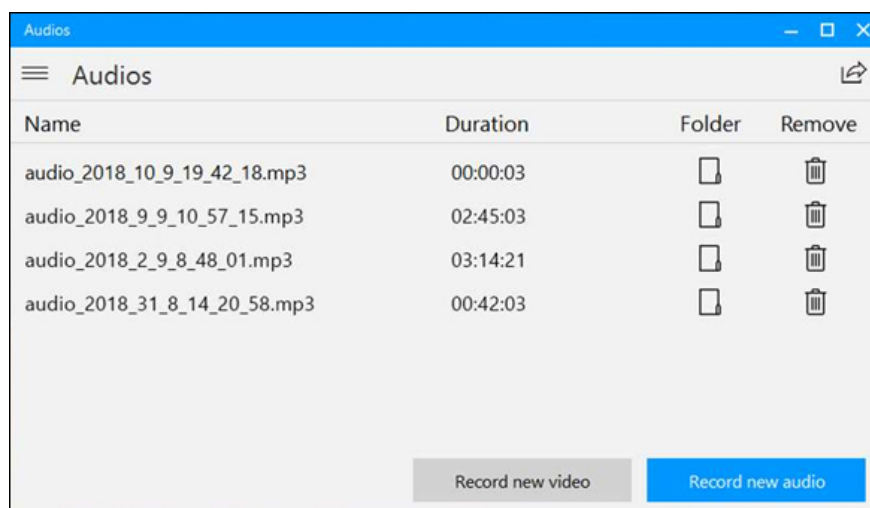

Go back to the main interface of the application and click **Record Audio** to start recording. The application will record the sounds on the computer including the sound from the microphone.

In case you do not want to record audio from the microphone, click on the mic icon to turn it off, or adjust the volume to 0 . Press **the round button to record** . After the tone is finished press the square to stop and choose where to save the audio file.

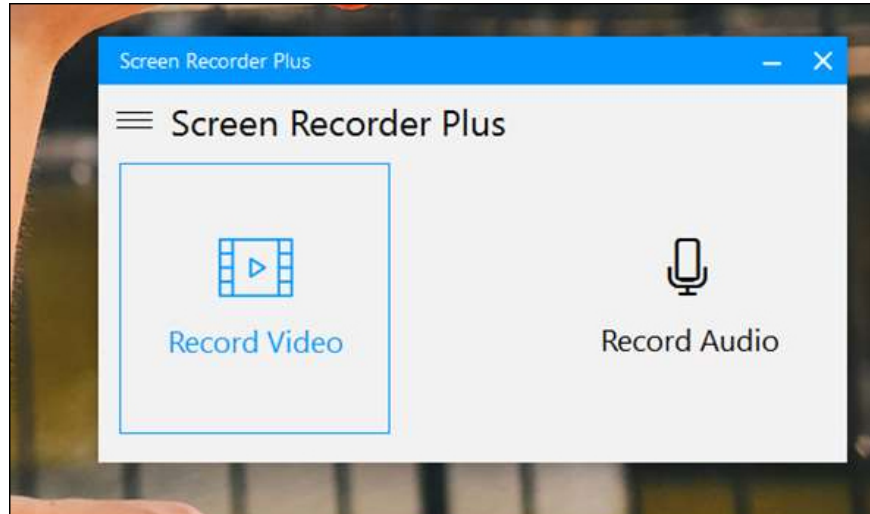

Step 6:

After saving the recorded audio management interface, it displays. You will know the duration of each recording, file storage folder and trash icon to delete the file.

Step 7:

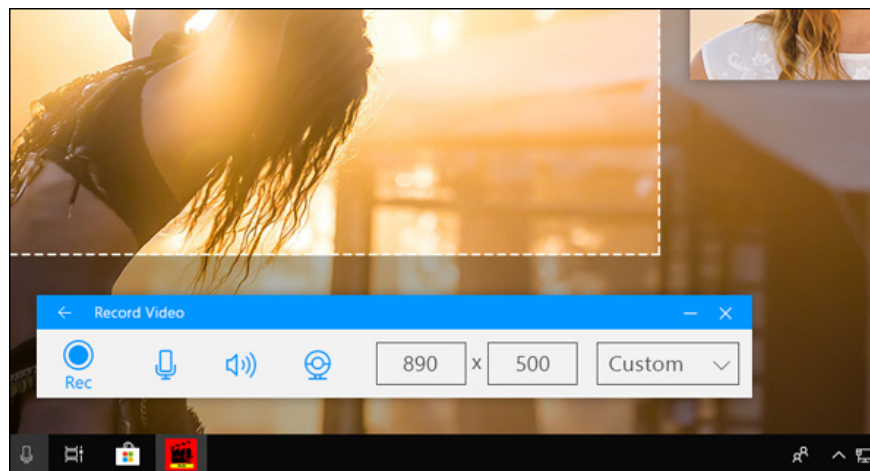

Go back to the main interface of the application and **press Record Video** to make a video recording of the screen.

Step 8:

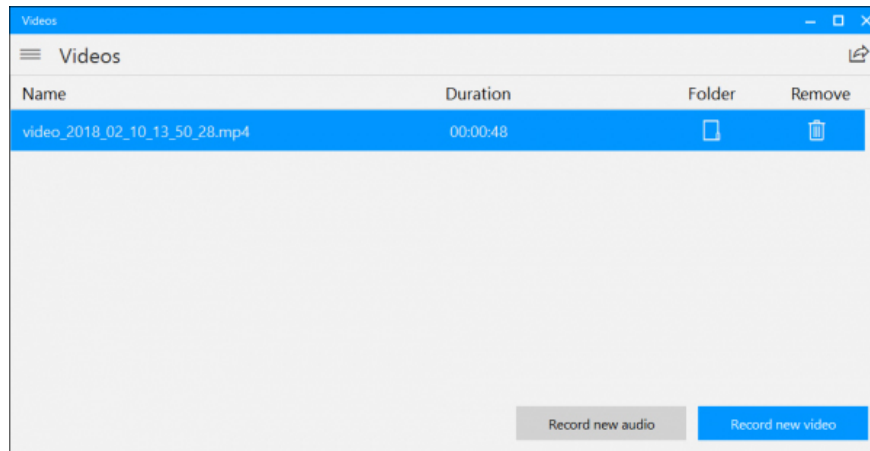

The application will record full screen. If you want to **adjust the recording size**, click Fullscreen to select the recording frame size like 1280 x 720, 1920 x 1080, Custom. If you click Custom, enter the size into 2 cells.

Press the round button to record the video screen on the computer.

Step 9:

When the video is saved, the video management interface will be displayed. The interface is similar to the audio management interface.

Screen Recorder Plus does not have many options when recording as well as recording. The settings are at a basic level such as selecting video and audio formats, selecting frames when recording or selecting microphone recording.
