

How to use Sizer to resize Windows windows

To add multiple size options for windows on Windows, you can install the Sizer tool.

To minimize or enlarge the window size on Windows, we use the icon on the interface right away. However, you will not be able to choose the size that the window will shrink to the default size of the system. If so, users can install the Sizer tool to add more customizations to the window size on Windows.

You just need to select the size you want and then drag and drop the window. Besides, we can also use the tool to adjust the size of the standard Facebook cover image or edit the avatar, . The following article will guide you how to use the Sizer tool on Windows.

Instructions for adding sizes to adjust Windows windows

Step 1:

Visit the link below to download the Sizer tool for your computer. There will also be a msi install version or portable file zip version. You choose 1 of 2 copies of the software you want to install.

1. <http://www.brianapps.net/sizer4/>

Step 2:

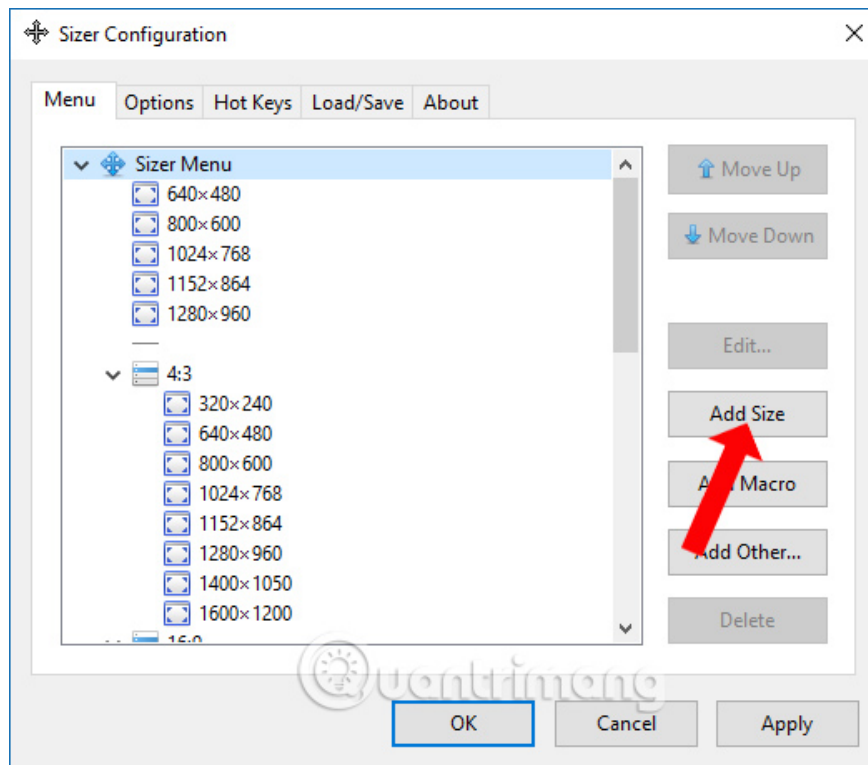

After installation is complete, the tool icon will be displayed in the system tray. Right-click the icon and select **Configure Sizer** . to configure it.

Step 3:

In the main interface of the tool is the first tab Menu will contain different sizes for you to choose. Sizes are divided into frame rates like 4: 3, 16:10 or YouTube aspect ratio.

In case you want to add a new size, click the **Add Size** button.

Display the Sizer Menu Entry interface. Here you **enter the height size** and width in Width and Height. Name the size in Description, you can enter the size name as shown and click OK.

Sizer Menu Entry

Description: 640x335

Width: 640

Height: 335

Don't resize window

Move to: Don't Move Allow move outside screen bounds

Relative to: Active monitor

Using: Workarea coordinates

Left:

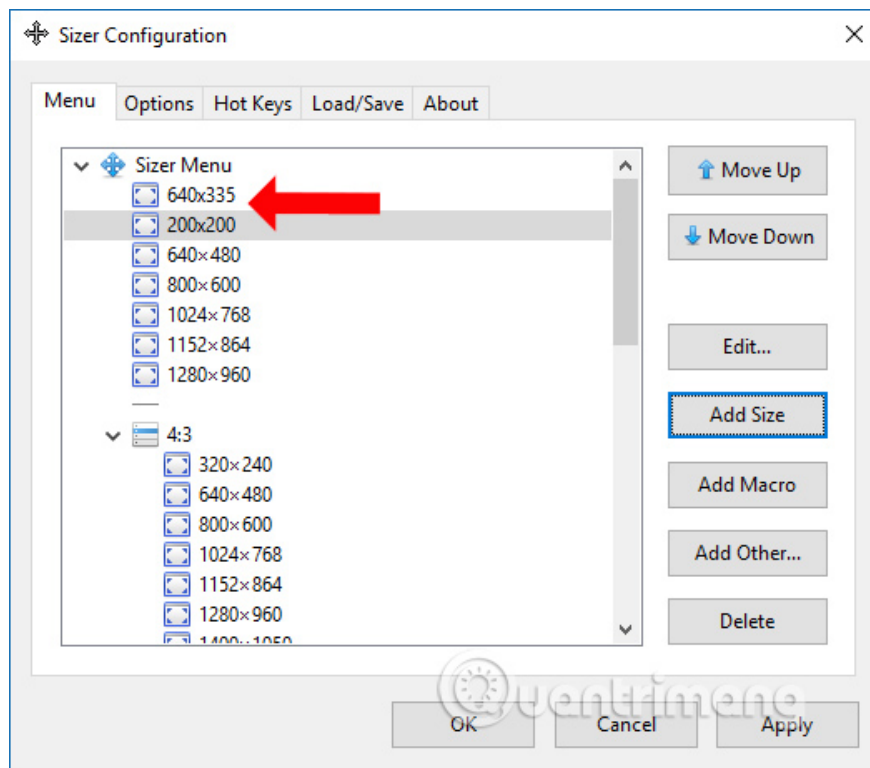

Top:

Shortcut key: Shift Ctrl Win Alt Clear Key

OK Cancel

Step 4:

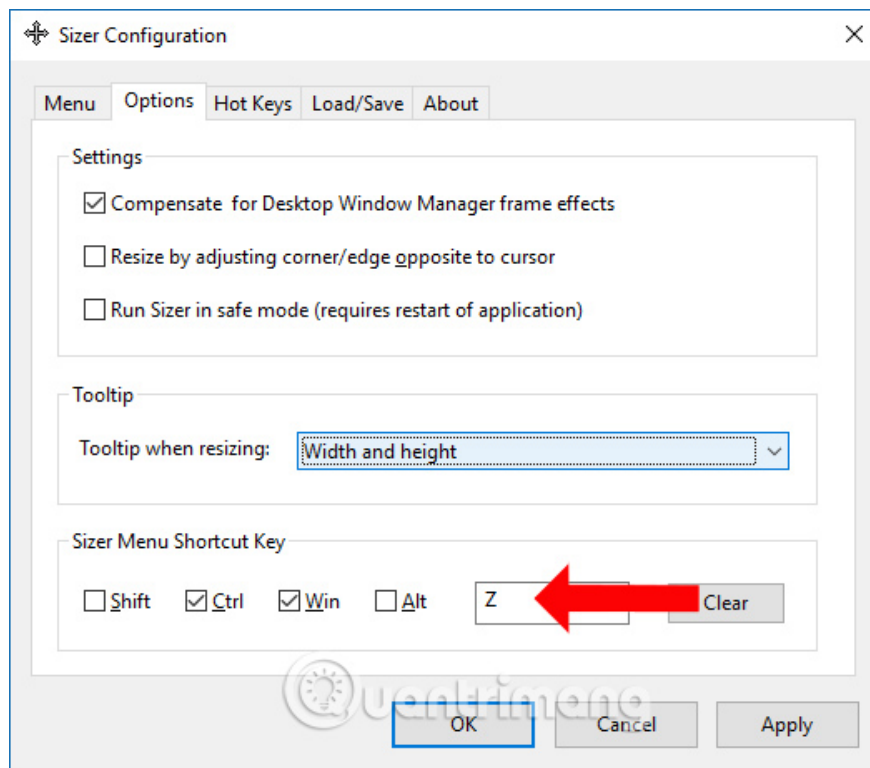

The results will see the new dimensions displayed at the top of the interface.

Step 5:

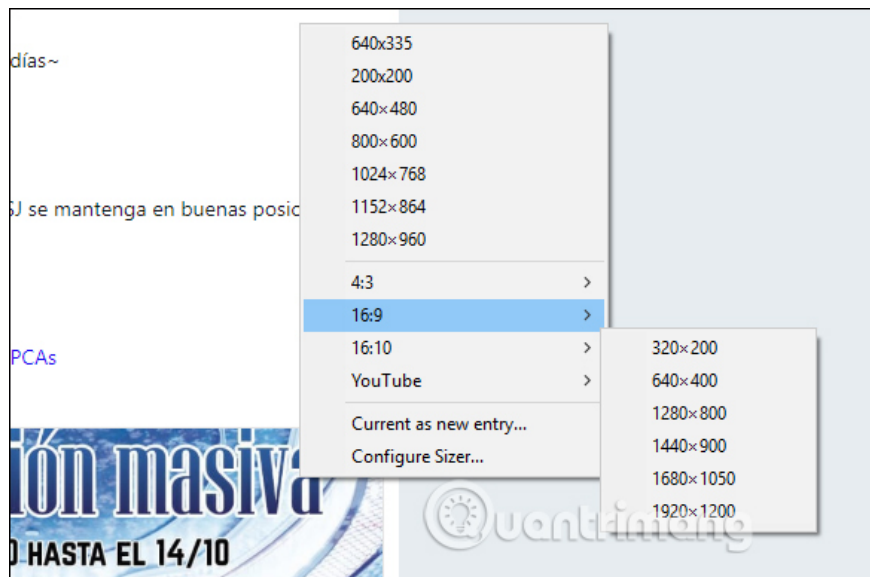

Clicking on **Options** will be changed to options for the screen size. The **Sizer Menu Shortcut Key** section will have a shortcut to open the window to resize the window.

By default the shortcut currently in use is **Ctrl + Win + Z**. We can change the Z key or switch to the Shift or Alt keys, as long as it is convenient to use. Click OK to save.

Step 6:

Open any Windows 10 application window that you want to resize and then press the key combination to open the Sizer size menu. This will display the size list frame. User N clicks on the size to apply immediately to the open window.

With just one key combination, you can choose different sizes for the application window that is open on Windows. The Sizer tool will quickly change the size according to the selected size. However, keep in mind that applications that have fixed window sizes cannot be changed with Sizer.
