

How to Use SnapNDrag

SnapNDrag is a great application for your Mac: it let's you perform screenshots in a very simple way. This article will teach you how to use this app! Download SnapNDrag. You can download SnapNDrag for free from Softonic here.

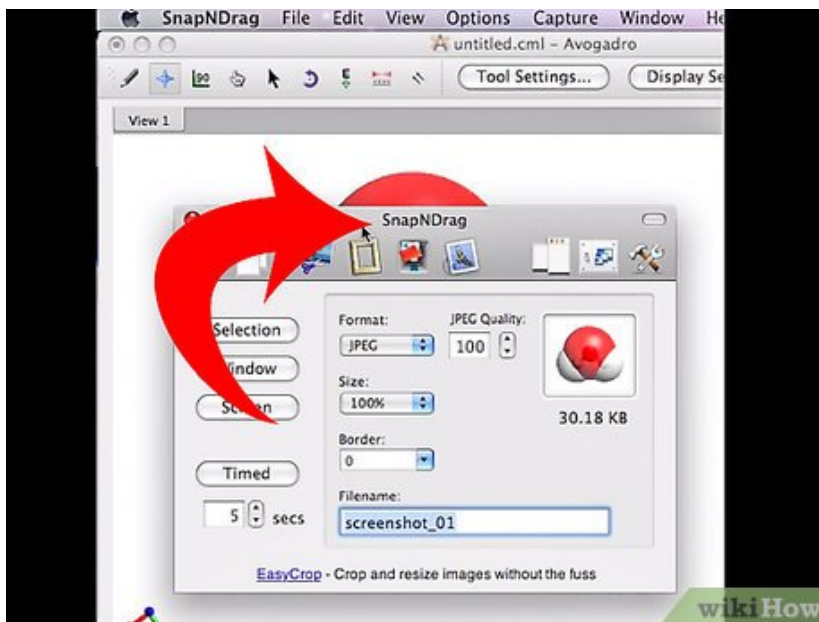

Method 1 of 2:

Download and Installation

1. The image shows a screenshot of the SnapNDrag download page on the Softonic website. At the top, the application name 'SnapNDrag' is displayed next to a small icon. Below it is a prominent green button labeled 'Free Download' with a white download icon and the text 'Safe Download' underneath. To the right of this button, a large red arrow points towards it. Below the download button, there are two tabs: 'Author's description' and 'User reviews'. The 'Author's description' tab is active, showing a text description of the application. To the left of the description, there are user ratings: a 'User' rating of 8.8 (5 stars) and a 'Softonic' rating of 8 (5 stars). Below the ratings is a 'Your rating' section with a slider. At the bottom left, the license is listed as 'Free' and the language as 'English'. The 'User reviews' tab is also visible, showing a small screenshot of the application interface with labels 'Click to Capture' and 'Drag Off'. A 'wikiHow' watermark is visible in the bottom right corner of the screenshot.

Download SnapNDrag. You can download SnapNDrag for free from Softonic here.

2.

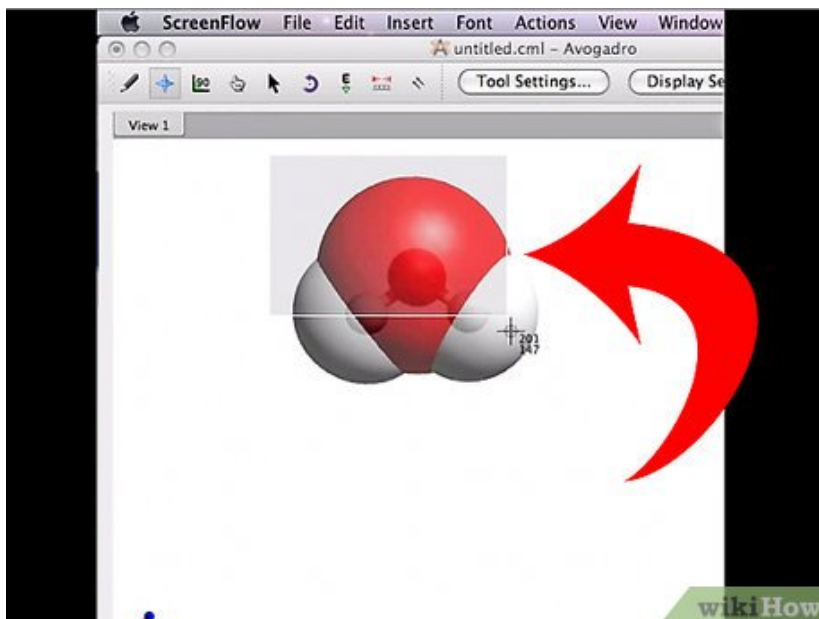

Open SnapNDrag.dmg Do this by searching your Downloads folder or directly open it from your browsers download bar. Then, in the window that appeared when you opened the .dmg file, drag the SnapNDrag icon to your Applications. Then double-click to open.

Method 2 of 2:

Using the App

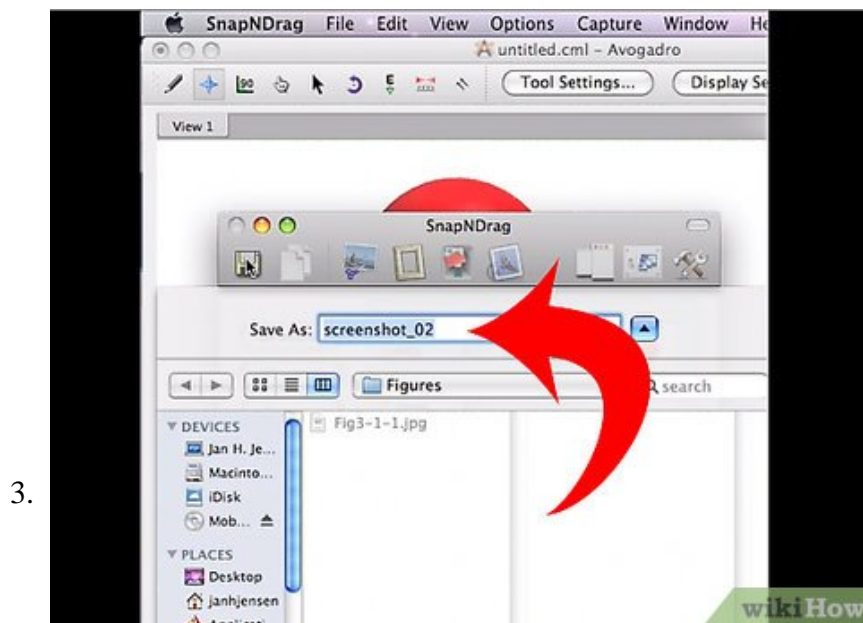

1.

You can now take screenshots! There are 3 instant options: there is "Selection", which takes a screenshot of a part of your screen; "Window" Takes a screenshot of the tab you have open; "Screen" takes a normal screenshot of the whole screen. In addition to these 3, there is a fourth, "Timed", where you decide a set amount of time (by clicking the up and down arrows) and after that the app takes a "Screen" screenshot.

Edit your screenshots name. To edit it's name, take a screenshot and select it (by clicking it once) and look for the space which says screenshot_(number). It should be on the lower right. Then delete the default name, and name it what you want!

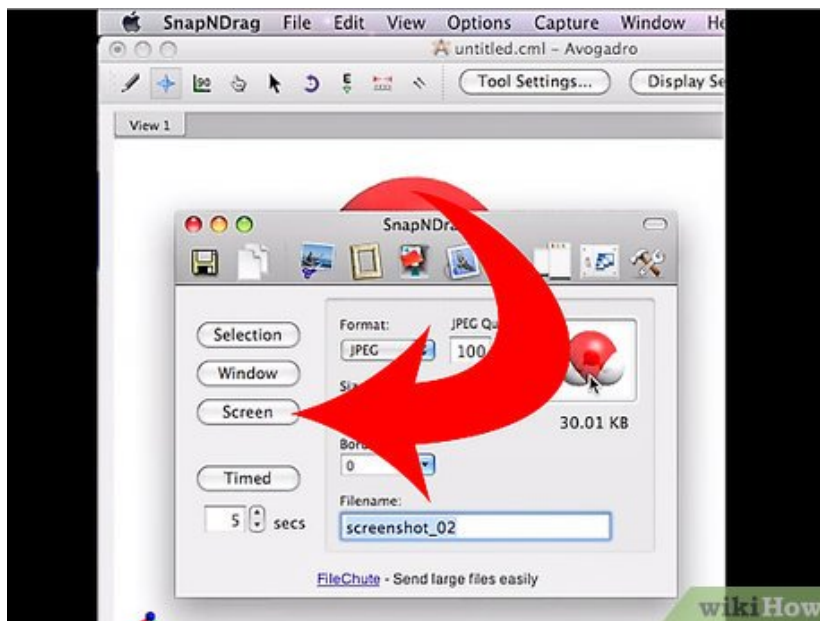

Change your screenshots location. Do this by opening the Finder window where you want your screenshot to be, and drag the file from the SnapNDrag app to your folder.

4.

Edit your screenshot. You can edit your screenshot using Apple's Preview, which is the default application used when you try to open your screenshot. Go to the folder with the screenshot, double-click the file and it should open with Preview. In Preview, click the icon with a pen inside a box (it should be in the top-right part of the Preview app). From there, you can add lines, shapes, crop the screenshot and a lot more! If you want to know all of Preview's features, click [here](#).

5.

Enjoy using SnapNDrag!
