

# How to use Spoon social sound network application

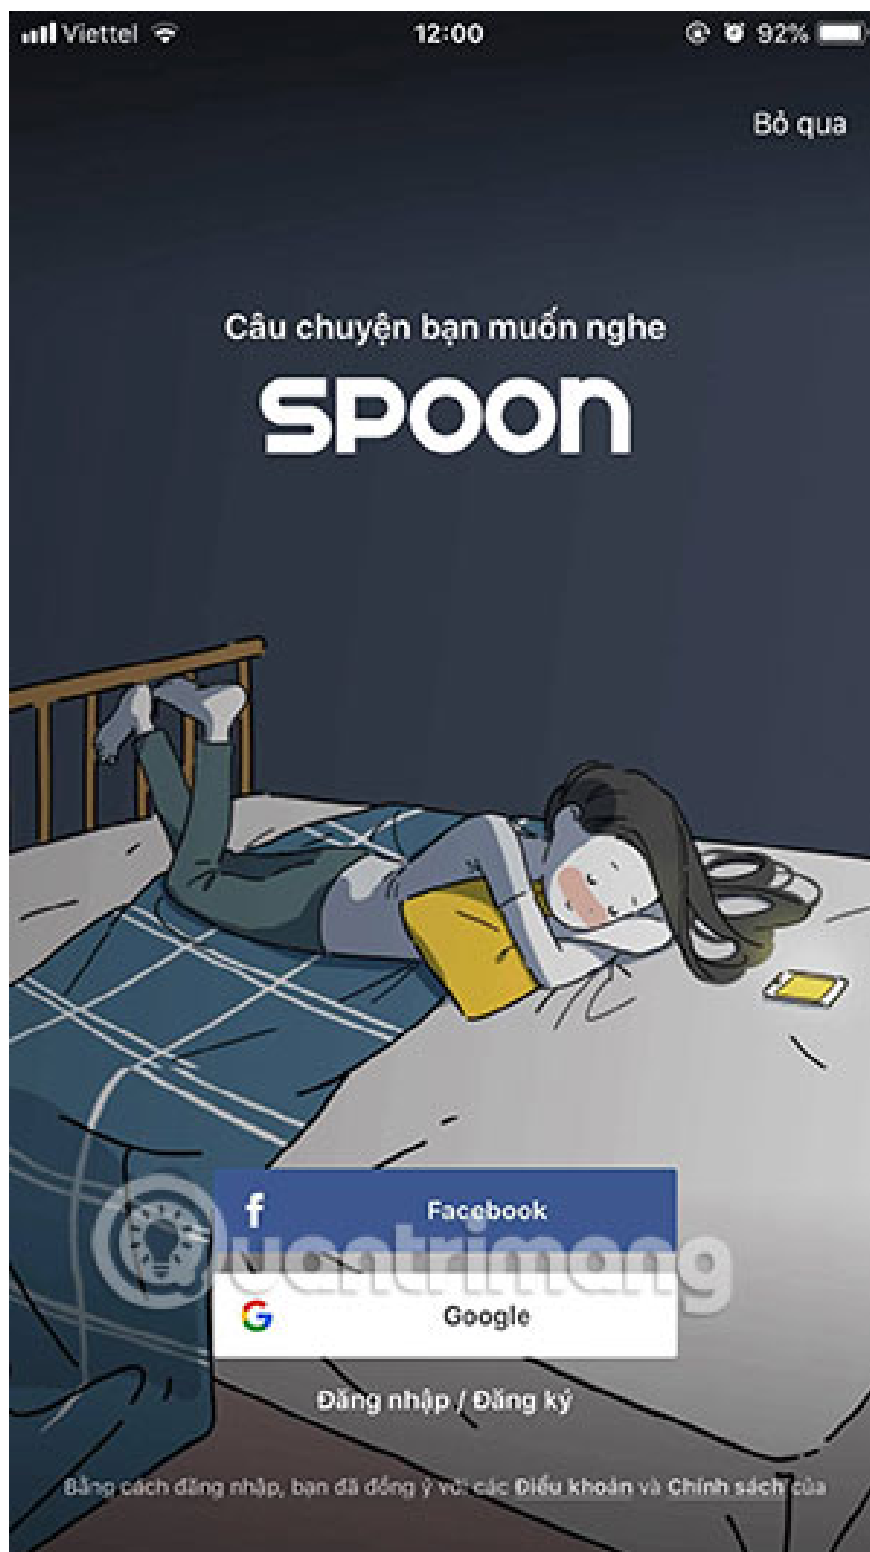

In this article, you will learn how to use the basic Spoon social networking application

Our current social networking application has a lot, most of them are the same and if there are other, there are only a few separate small points of that application. Spoon is not like that, this is a personal radio social network application where people can livestream or listen to their own music covers and stories. To register and use Spoon social network, please refer to the instructions below.

1. How to use Messenger without Facebook
2. Instructions on how to create a chat group on Zalo

## Manual of social network Spoon

First, log into the social network with a Google or Facebook account, then you'll see each feature section in Spoon's main interface.

The Live section will be the main chat section between live people and friends when you enter the room, you will only hear a representative picture and the person's voice. If you want to chat, you can type in the content below.

Quantimang

The second item is Cast, which will show you the cover versions of Spoon users. Want to hear you just click on the cover songs.

The last item is Talk, which is an interesting feature because it will allow you to record your voice and send it to the voice chat room created by a user with an external theme.

In the chat room, if you want to hear the recording of someone in the list, just click on the name of the person, the recording will be played immediately afterwards. Short or long recording time will correspond to the black length of each line, while yellow is the heard part.
