

How to use Spotify's Jam feature to create playlists from many people

Jam Spotify is a newly updated feature on the application, supporting the creation of playlists from many people when we connect to each other via a WiFi network.

Jam Spotify is a newly updated feature on the application, supporting the creation of playlists from many people when we connect to each other via a WiFi network. With this Jam Spotify feature, songs recommended by many people are added to playlists, without having to add the extra task of searching for songs and adding them manually. Below are instructions for using the Jam Spotify feature.

What is the Jam Spotify feature?

The Jam feature on Spotify helps users create music playlists for family and friends, when everyone can participate and contribute to that playlist. Just connect your mobile phone to the Bluetooth speaker to play music.

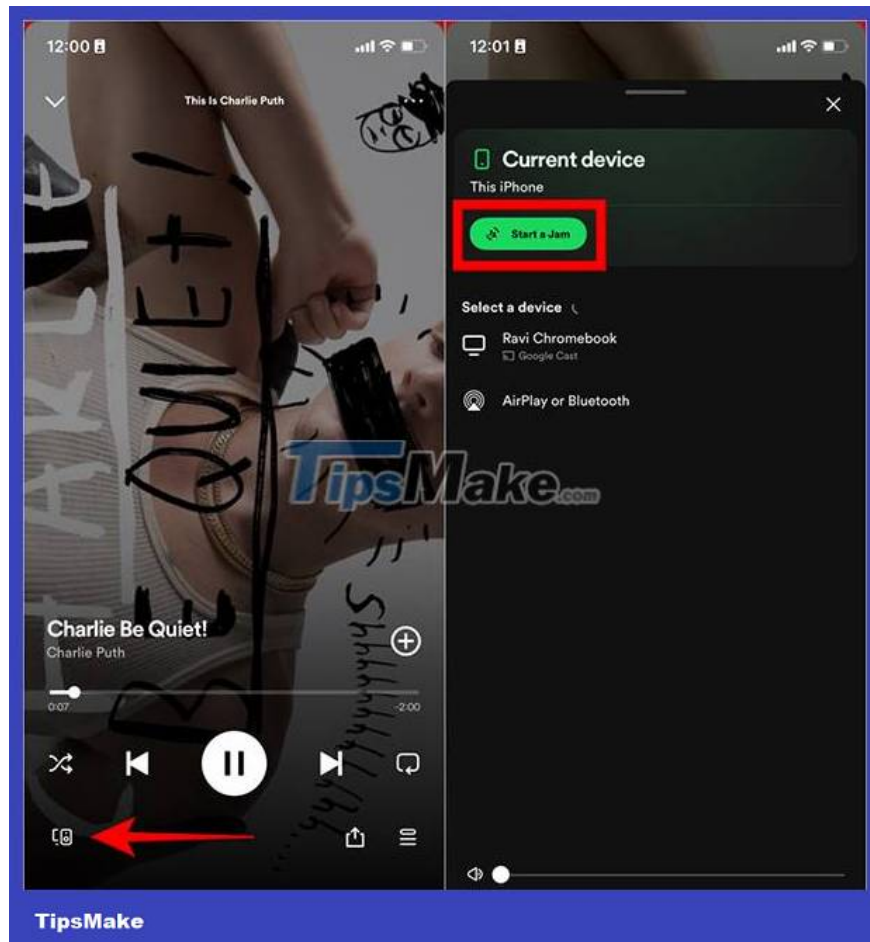

Everyone who participates in building that playlist can manipulate songs such as skipping songs, pausing, adding new songs to the queue. You can also see who added the song. To start a Jam session, the first creator must sign up for a Spotify Premium account and then send invitations to other Spotify users. Free Spotify accounts can also participate in Jam but require a shared WiFi connection.

Instructions for creating a Jam session on Spotify

Step 1:

At the song interface on Spotify, click on **the connection icon** in the bottom corner as shown and then select **Start a Jam** .

Spotify will now search for common WiFi devices to connect to. Note that connected devices need to have Bluetooth turned on.

Step 2:

Then we create a playlist on Spotify as usual or click on an existing playlist. Next **click Invite** to invite others to join.

This time displays the list of participants. At the Spotify account you want to remove from the Jam, click on **the 3-dot icon and select Remove from Jam** .

In addition, clicking Remove all participants will delete all members in that Jam session.

Step 4:

To add songs to the Jam session , just click on **the 3-dot icon and select Add to queue** .

Immediately after that the song is added to the music queue and whoever adds the song will display their Spotify profile photo as shown below.
