

How to use Surge Send secure file sharing

Surge Send is an online file sharing service, capable of securing files with PIN codes.

Instead of sending files via email or Facebook, the trend of using online file sending services is now increasing. These services will mostly support sending large files, as Gmail limits the amount of files that can be sent. In addition, some services include added file security features such as Surge Send.

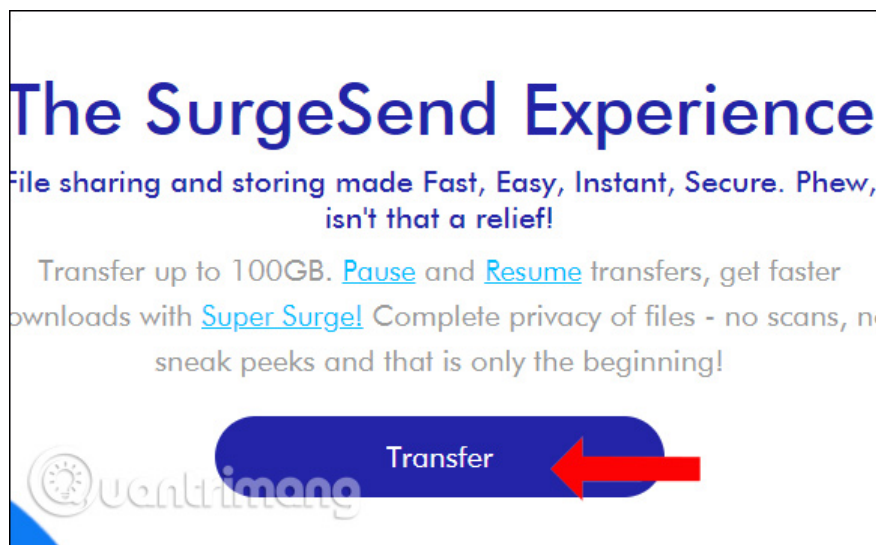

Surge Send supports sending files online up to 100GB. Users do not need to register for an account to use and are free. You will be given a public, or private, sharing mode with a secure PIN. The following article will show you how to use Surge Send file sharing online.

1. How to use TransferXL to share files online

3. How to send an email that exceeds the size limit?

Instructions for using Surge Send file sharing

Users click on the link below to access the Surge Send homepage. Click **the Transfer button** to use.

1. <https://www.surgesend.com/>

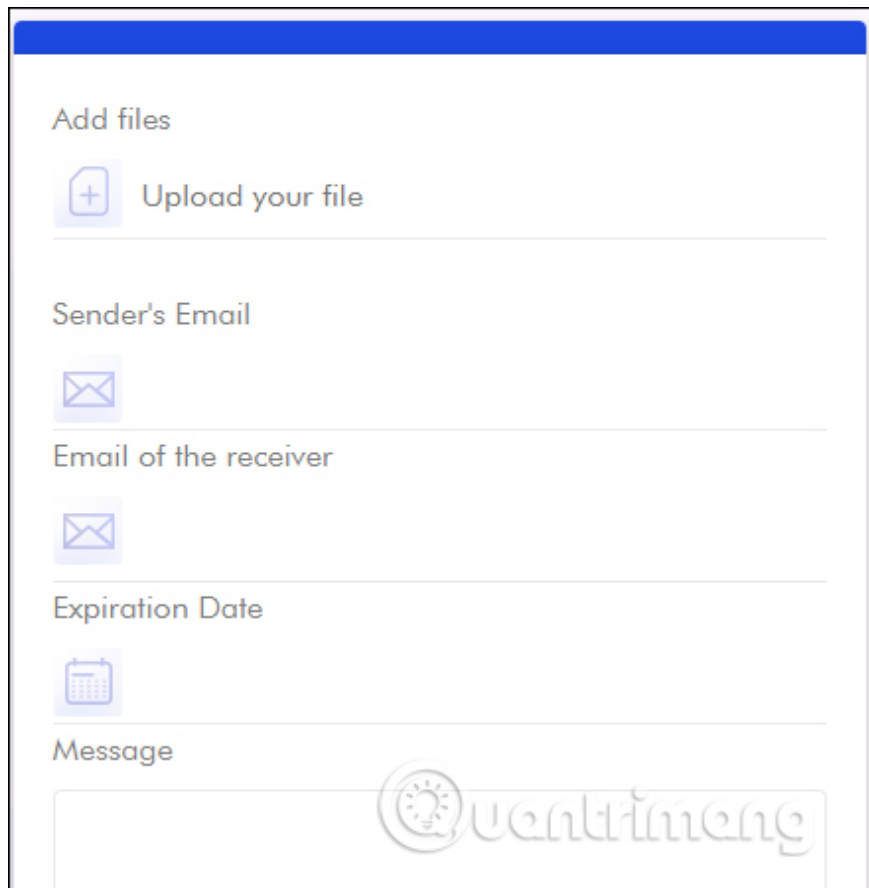

1. Share files publicly

Public file sharing mode, anyone can access your file when there is a download link.

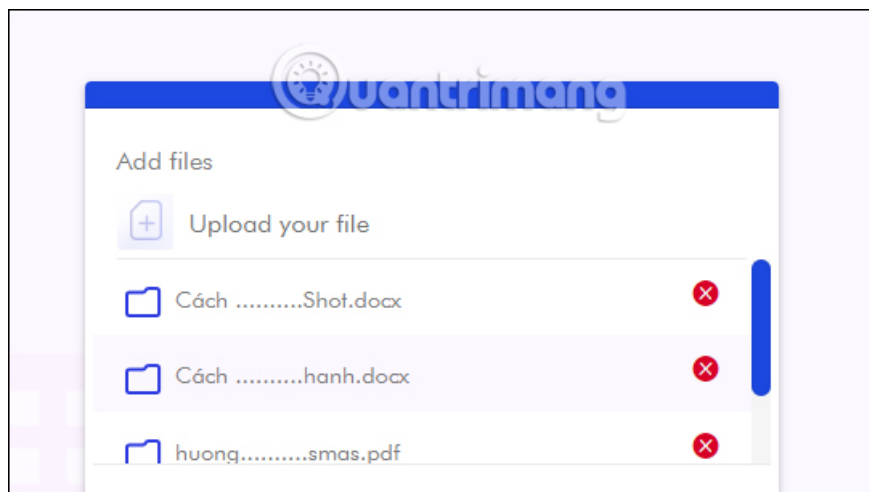

Step 1:

In this interface you will see the items to perform. First click **Upload your file** to select the file you want to share. The application supports selecting multiple files at once to share.

The screenshot shows a web interface for file sharing. At the top, there is a blue header bar. Below it, the text "Add files" is displayed. Underneath, there is a button with a plus sign icon and the text "Upload your file". Below this button, there are four input fields, each with an icon and a label: "Sender's Email" (with an envelope icon), "Email of the receiver" (with an envelope icon), "Expiration Date" (with a calendar icon), and "Message" (with a text area). A watermark logo for "Quantrimang" is visible in the bottom right corner of the interface.

The list of sent files will be displayed in the Upload your file section. If you want to cancel sending a file, click on the red X.

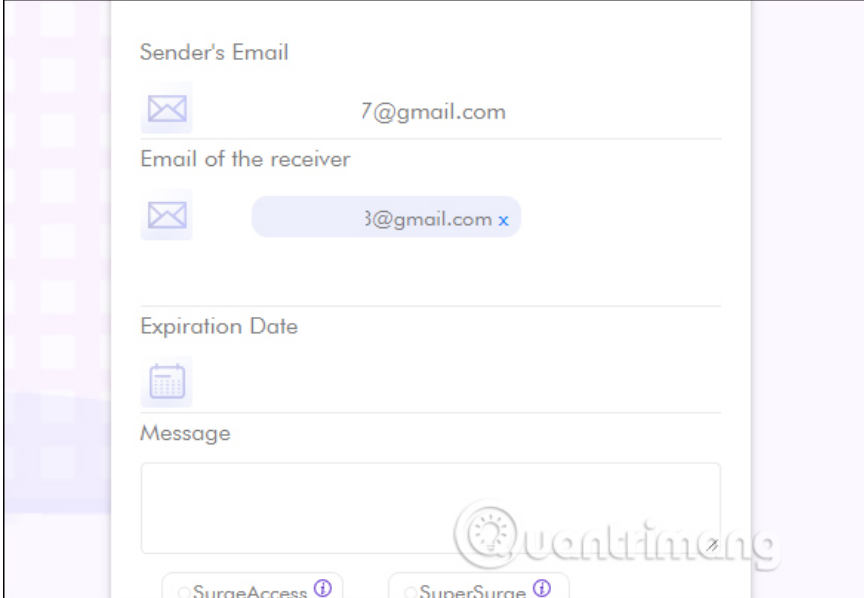

The screenshot shows the same web interface as above, but now the "Upload your file" section displays a list of three files. Each file entry consists of a folder icon, the file name, and a red X icon for cancellation. The files listed are: "CáchShot.docx", "Cáchhanh.docx", and "huong.....smas.pdf". A blue vertical bar is visible on the right side of the list, indicating it is scrollable. The "Quantrimang" watermark is also present.

Step 2:

Next at **Sender's Email** , enter the **sender's email** address. **Email of the receiver** to enter the recipient's email address. If you want to add recipients, press Enter.

The **Expiration Date** section will limit the time it takes to share and download the file. **Message** to enter the message content to the file recipient if desired.

The screenshot displays a form for file sharing with the following sections:

- Sender's Email:** A text input field containing "7@gmail.com" with an envelope icon to its left.
- Email of the receiver:** A text input field containing "3@gmail.com x" with an envelope icon to its left.
- Expiration Date:** A text input field with a calendar icon to its left.
- Message:** A large text area for entering a message.

At the bottom of the form, there are two buttons: "SurgeAccess" and "SuperSurge", both with information icons. A watermark "Quantimeng" is visible in the background of the form.

Step 3:

After completing, press **the SurgeAccess button** to choose to use the public sharing mode. Finally press **the Send button** to send the file.

Sender's Email

 '@gmail.com

Email of the receiver

 3@gmail.com x

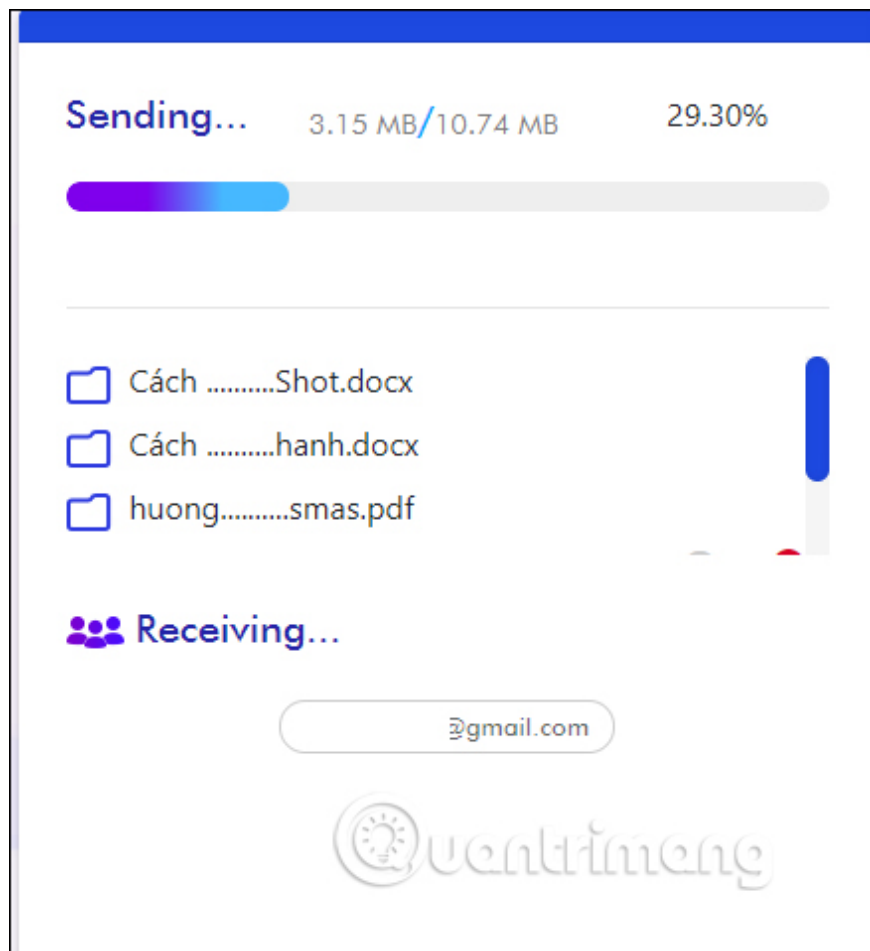

Expiration Date

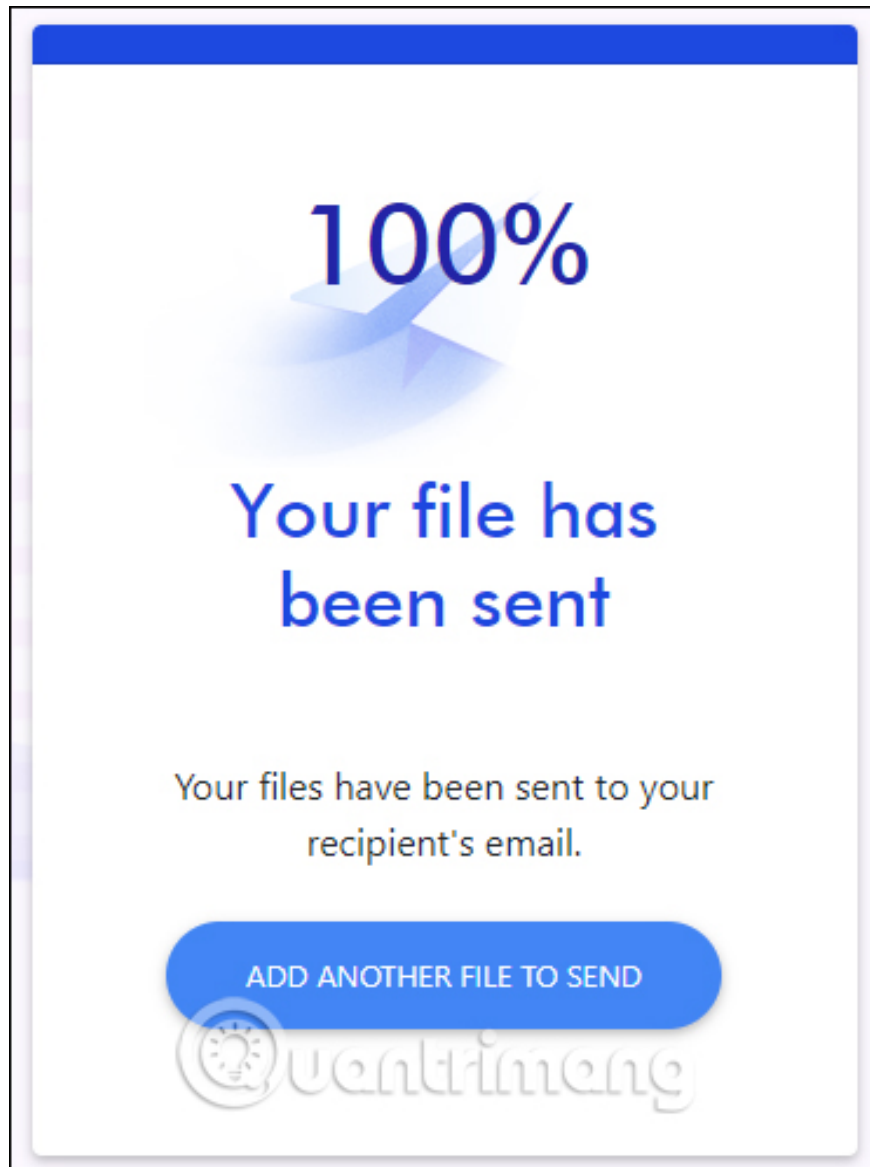

Message

SurgeAccess ⓘ SuperSurge ⓘ

The process of downloading and sending files will take place shortly thereafter. We will see the total file size, the percentage of files sent.

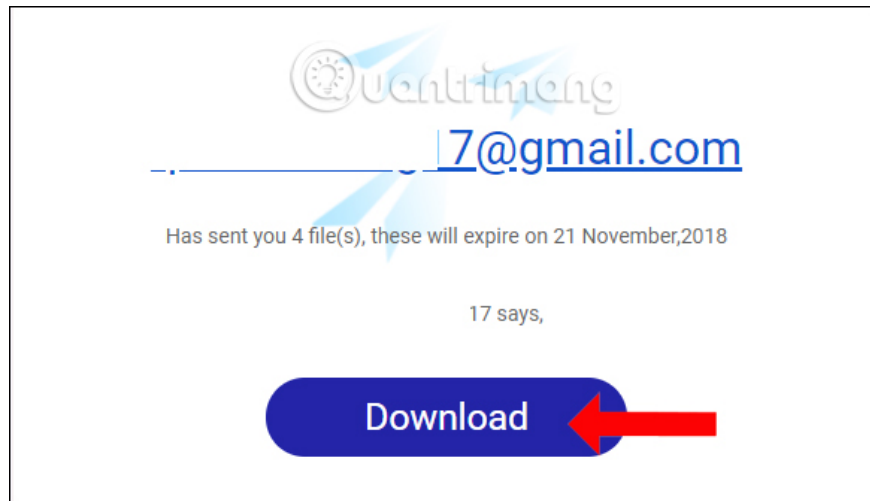

When the process of sending the file is successful, the file will be displayed. **Your file has been sent** as shown below.

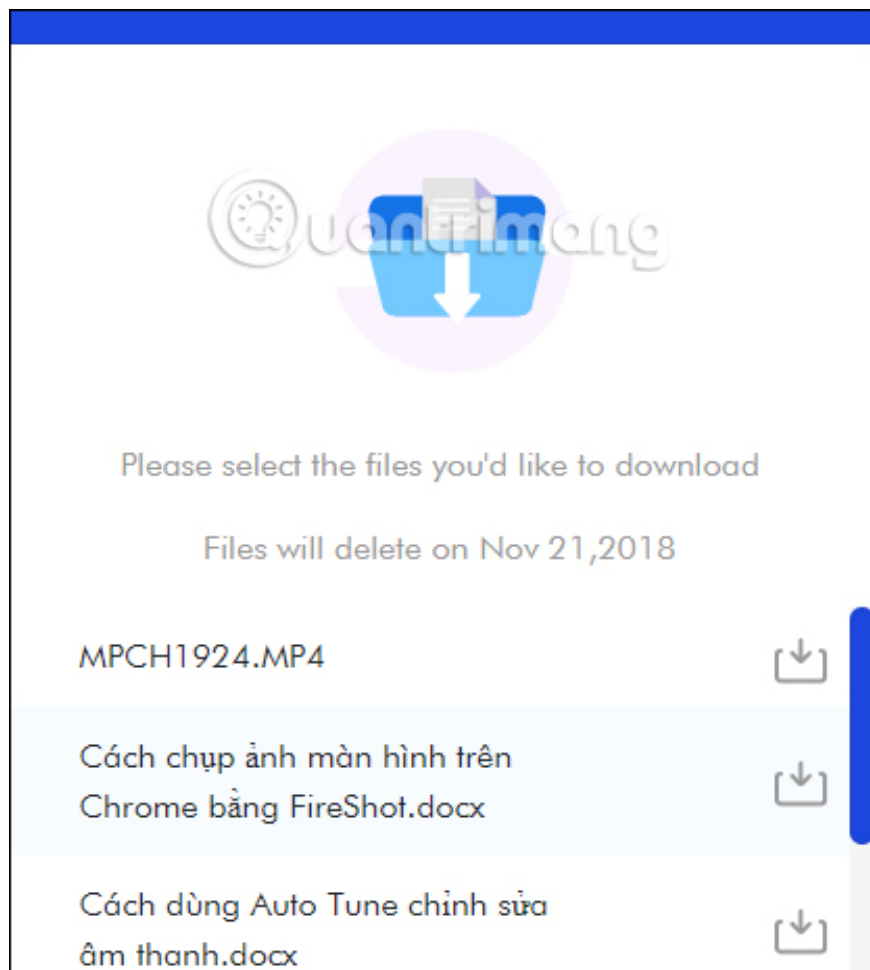

Step 4:

The recipient of the download file will receive the file download link in his email. Click **the Download button** to download the file.

Switching to the new interface the link recipient will see the time to finish downloading the file and the file list to download. Click **the download button** next to download the file to your computer.

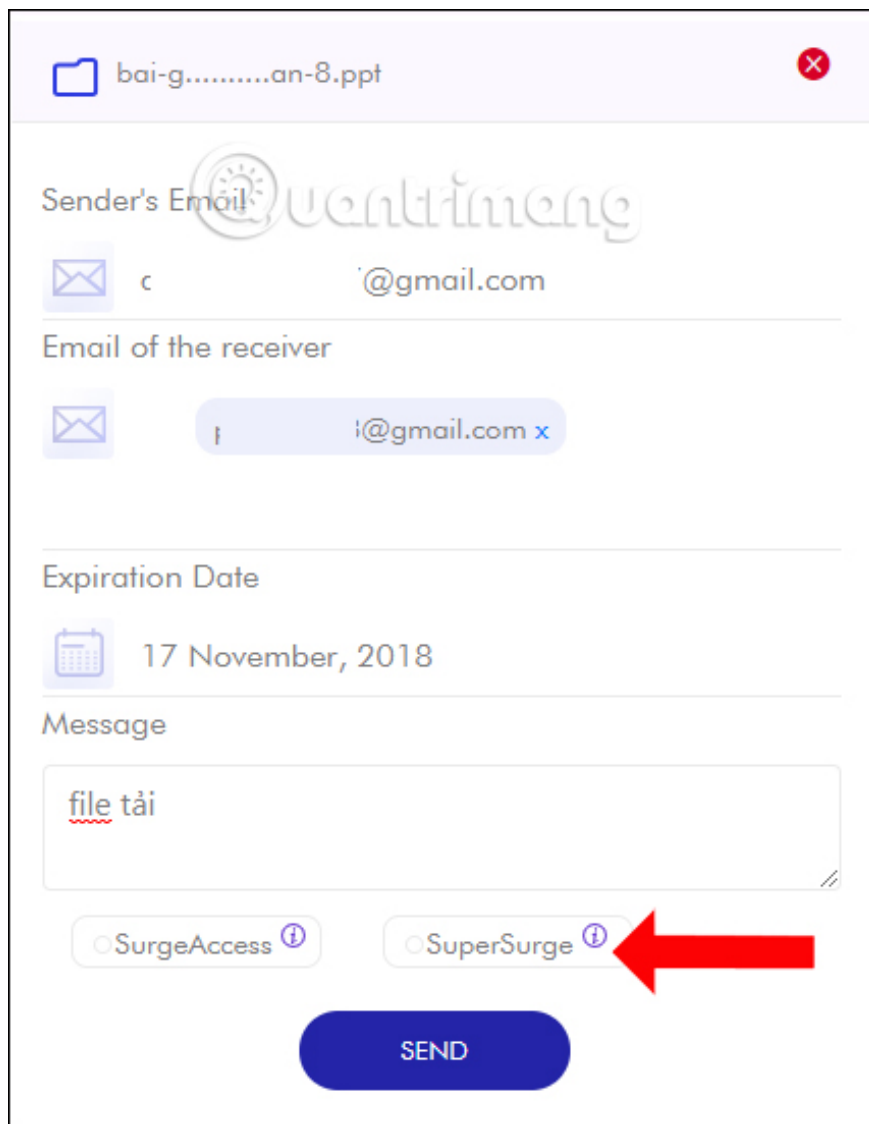

2. Share file security mode

The recipient of the link will be asked to enter a PIN to download the file. With PIN code, it will limit the unauthorized opening of other files.

Step 1:

We also fill in the information in the interface as part 1. Then select **SuperSurge** and press **the Send button** .

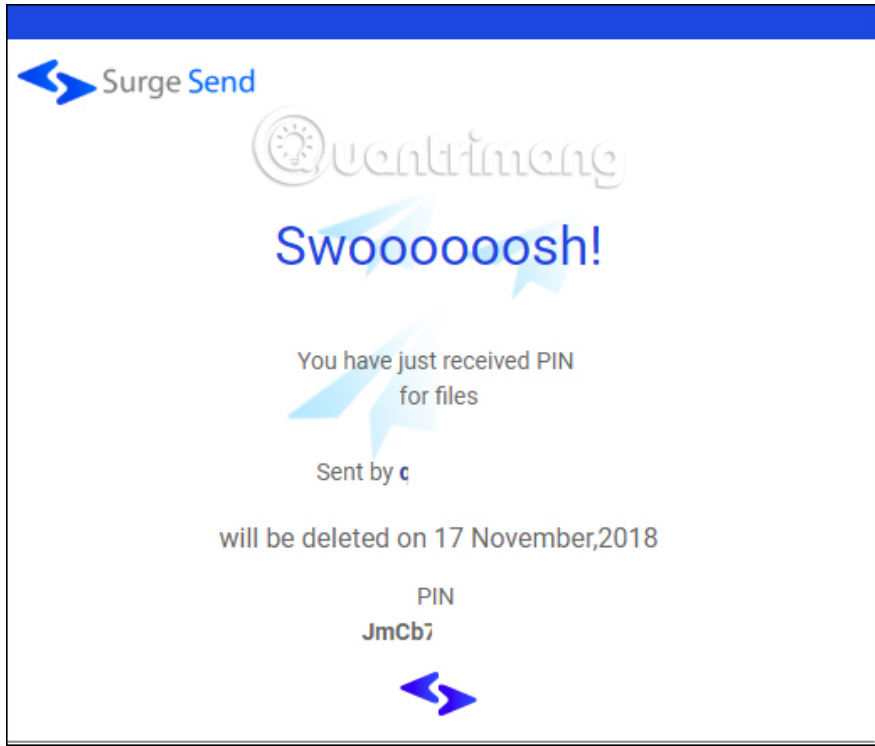

The screenshot shows a web interface for sharing a file named "bai-g.....an-8.ppt". The interface includes the following fields and options:

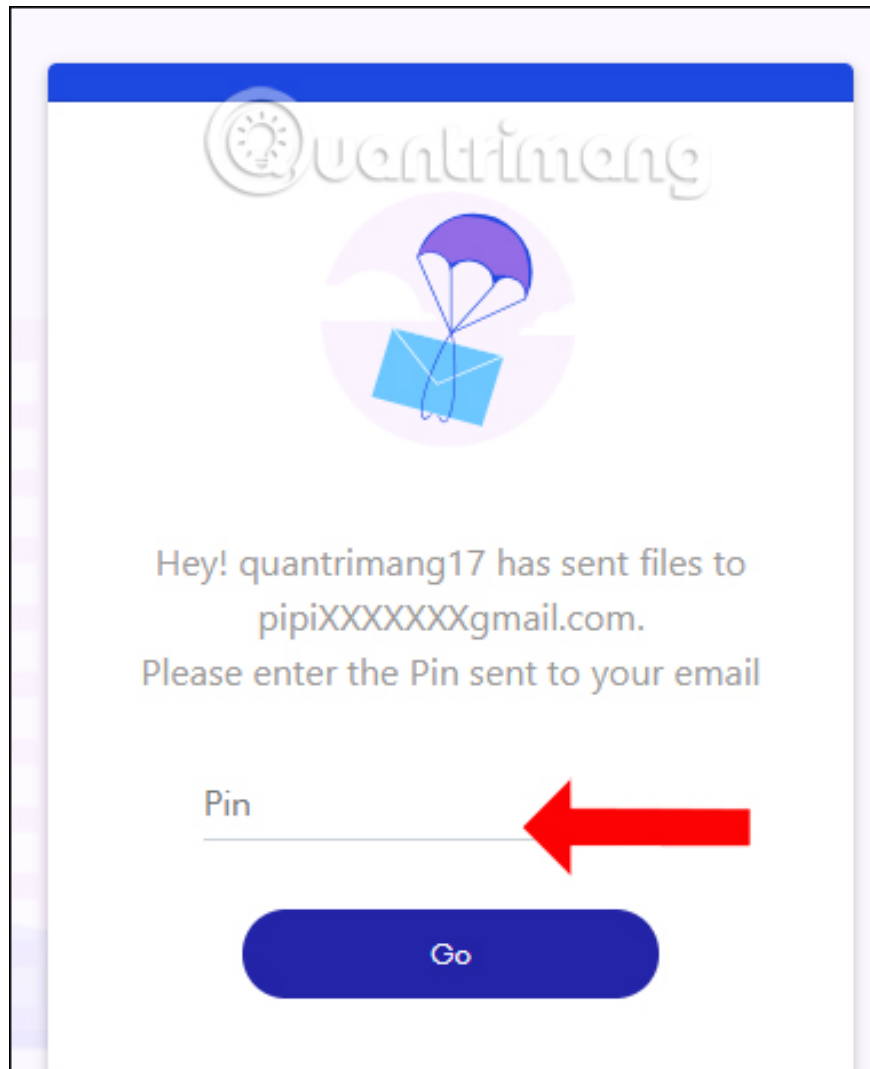

- Sender's Email:** A text input field containing "c @gmail.com".
- Email of the receiver:** A text input field containing "i @gmail.com x".
- Expiration Date:** A date picker set to "17 November, 2018".
- Message:** A text area containing the text "file tải".
- Service Selection:** Two radio buttons are present: "SurgeAccess" and "SuperSurge". A red arrow points to the "SuperSurge" option, indicating it is the selected service.
- SEND Button:** A prominent blue button at the bottom of the form.

Step 2:

The file submission process will take place shortly thereafter. The file recipient also accesses the email address and sees the Surge Send service sending **the PIN** to download the file.

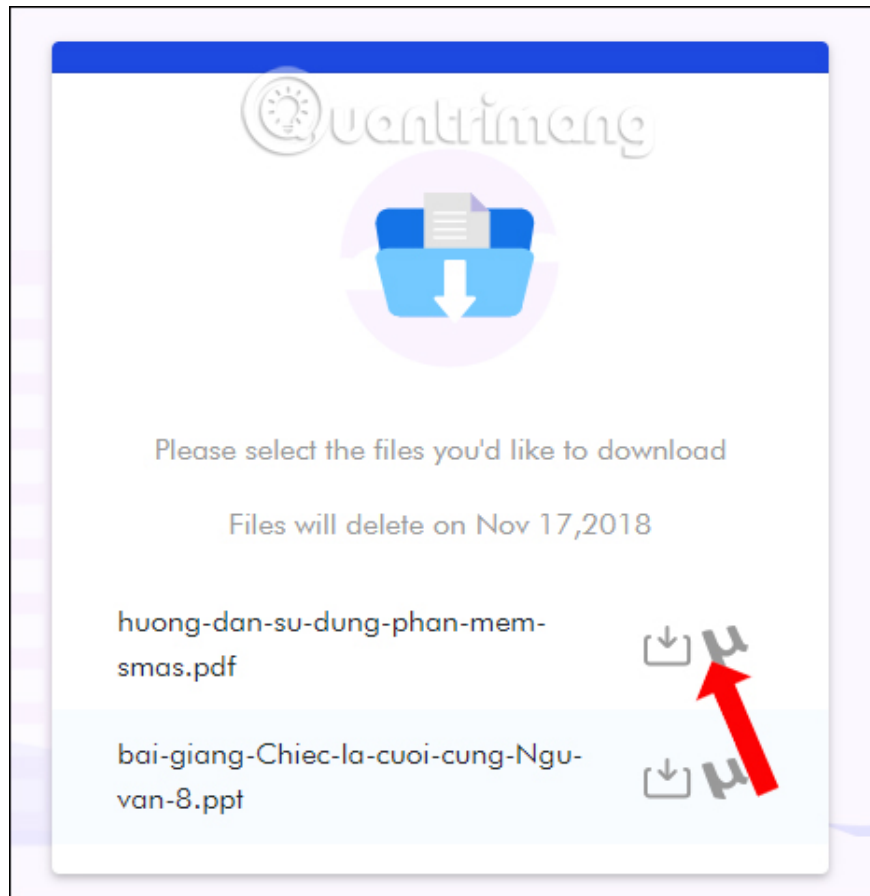

Also click the Download button or click the download file link. In the Surge Send interface, **enter the PIN code** that the service sends and press the Go button.

Step 3:

Finally the link recipient just needs to click on the download icon to download. In addition, the Surge Send service also supports downloading files with torrent format using the torrent download software on the computer.

Surge Send supports sending files online with 2 ways to send them publicly or send securely with PIN. The shared link recipient will receive the download link and PIN code sent by Surge Send. The process of sending files is very fast and simple, just enter the email address of the sender and the receiver to finish.
