

How to use Symbol in Photoshop

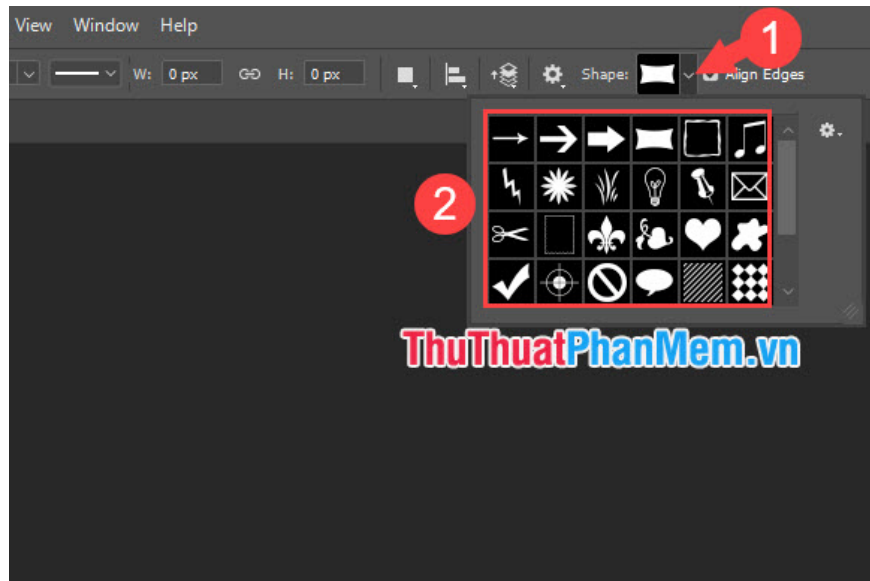

As software for designers, it is indispensable for beautiful symbolic models so that we can easily design basic models without having to search for vector symbols on the network. However, using symbols in Photoshop like?

1. Use symbols in Photoshop with Custom Shapes

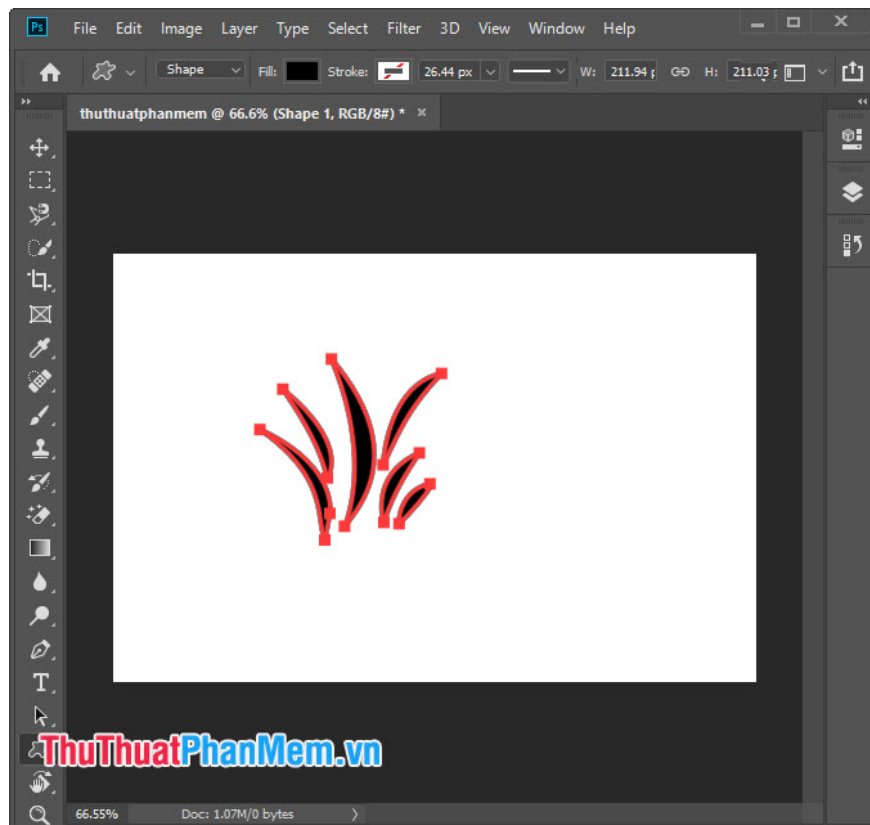

Step 1: Click on the Shape tool (1) => Custom Shape Tool (2) .

Step 2: Move to the Shape Tool menu at the top right (1) and select the Symbol shape (2) you want.

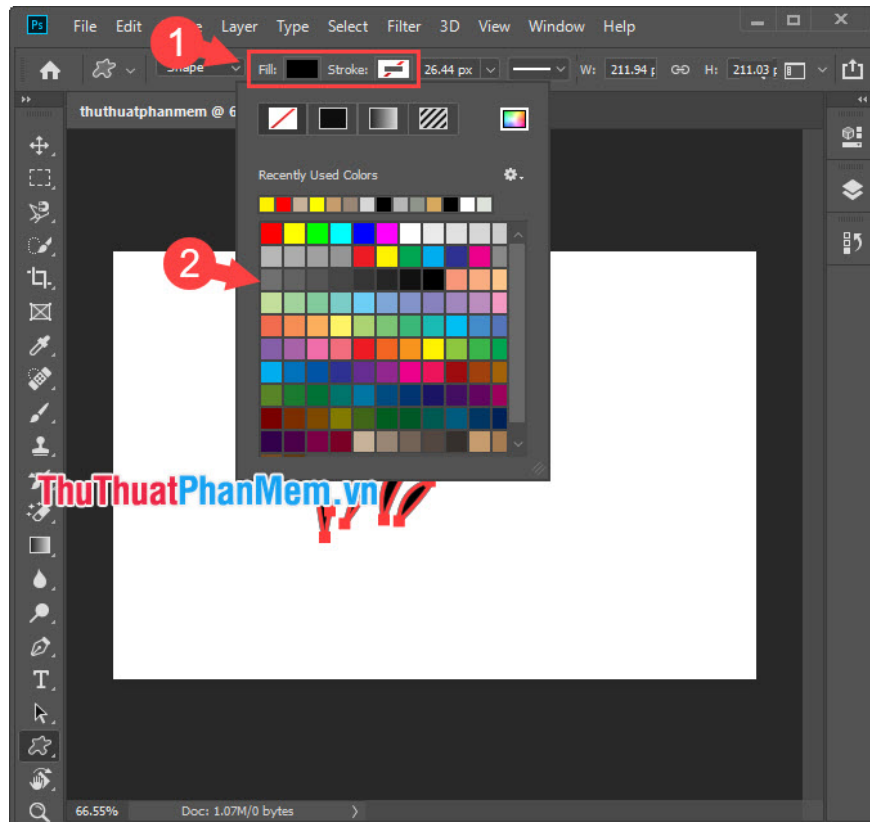

Step 3: You just need to left click and move the mouse to create the desired symbol pattern.

To change the color of a symbol, click the **Fill** (background color) or **Stroke** (the border color) (1) and select the color in the palette (2) .

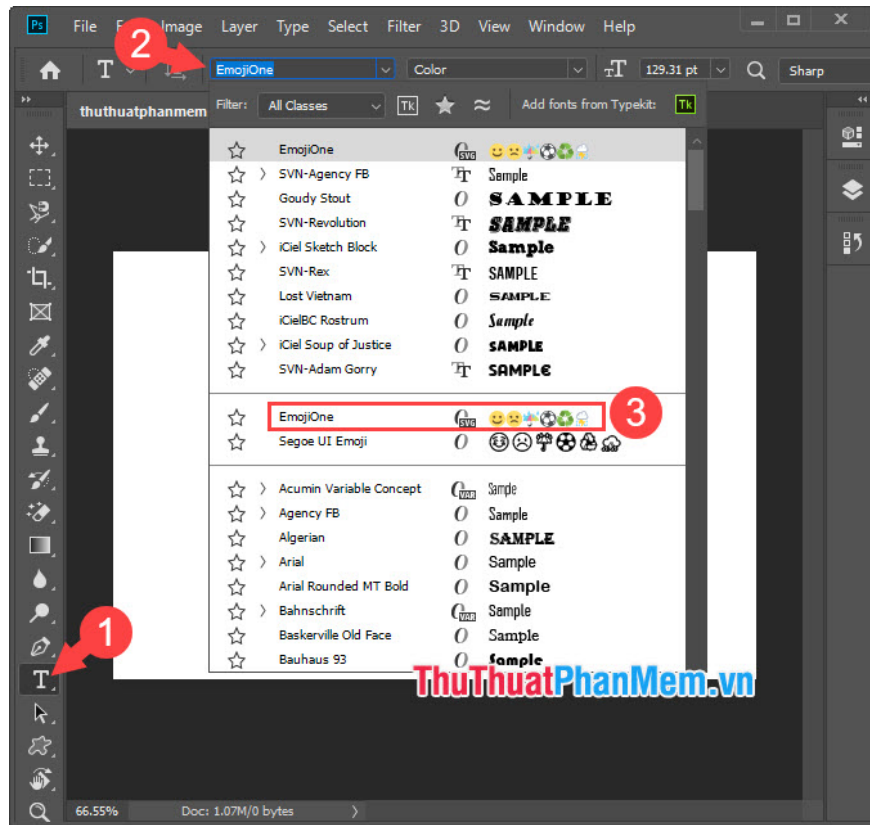

Note: Color icons with red cross symbols in red are colorless. The two black and gray boxes are the gradient and the last diagonal is pattern.

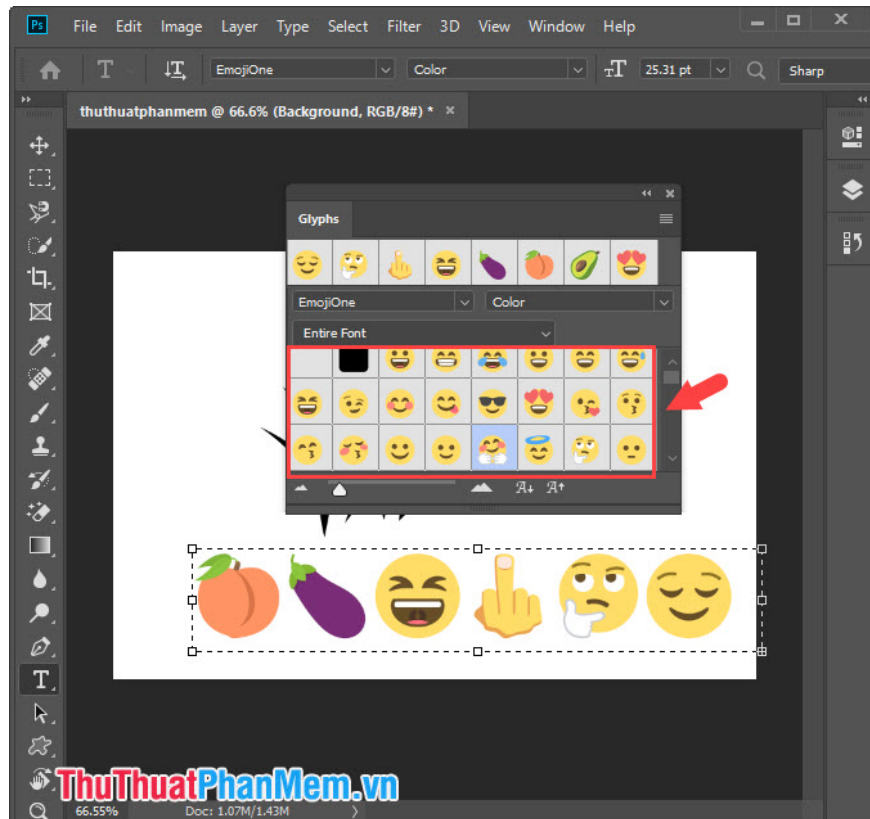

2. Using symbol, emoticon in Photoshop with Font

This is the fastest and simplest way, supports a lot of different vivid icons.

Step 1: Click on the **Type tool (1)** => **Font (2)** => **EmojiOne (3)** .

Step 2: Select the emoji template you like in the **Glyphs** panel and double click the emoji that you like. The emoji will then automatically be inserted into your text.

With the way to use Symbol in Photoshop, readers can create their own stylish personal photos. Good luck!
