

# How to use the Live Photo feature on iPhone

The article discusses useful ways to manipulate Live Photo such as turning on / off sound, editing photos, adding effects or creating still images. If this is what you are looking for, find out with me

Live Photo is a photo capture feature on Apple devices . It allows for the combination of stills, short movements and sound. The following article will guide you how to use Live Photo useful and often. Let's find out through offline.

## 1 . How to take a Live Photo

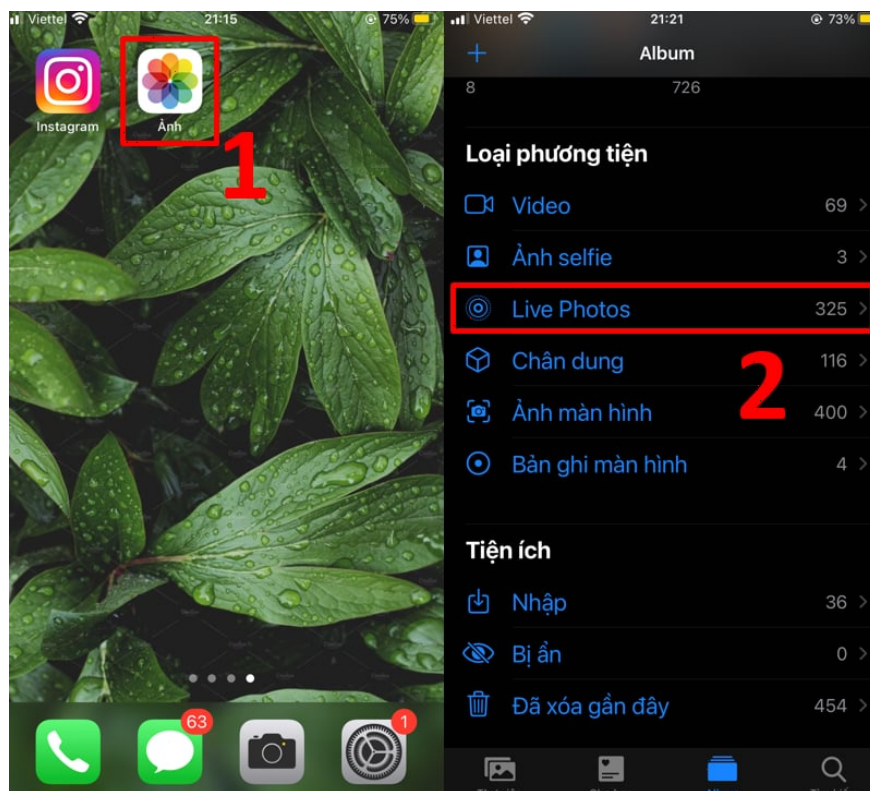

To take a photo using **Live Photo** mode , go to **Camera** app on your phone > Select **Live mode** as shown and press the capture button.

Go to Camera and choose Live mode to take Live Photo

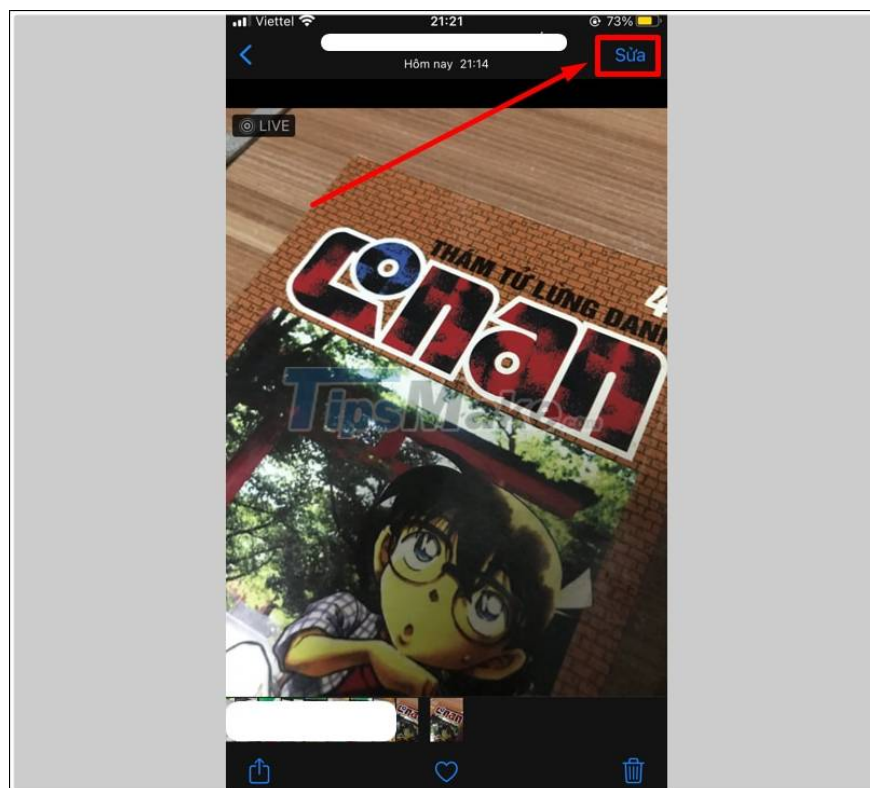

## 2 . Enable and disable Live Photo sound

**Step 1 :** Go to the **Photos** app > Select the **Live Photos** folder .

Go to Live Photos to turn on and off the sound

**Step 2 :** Select a photo taken with **Live mode** and choose **Edit** .

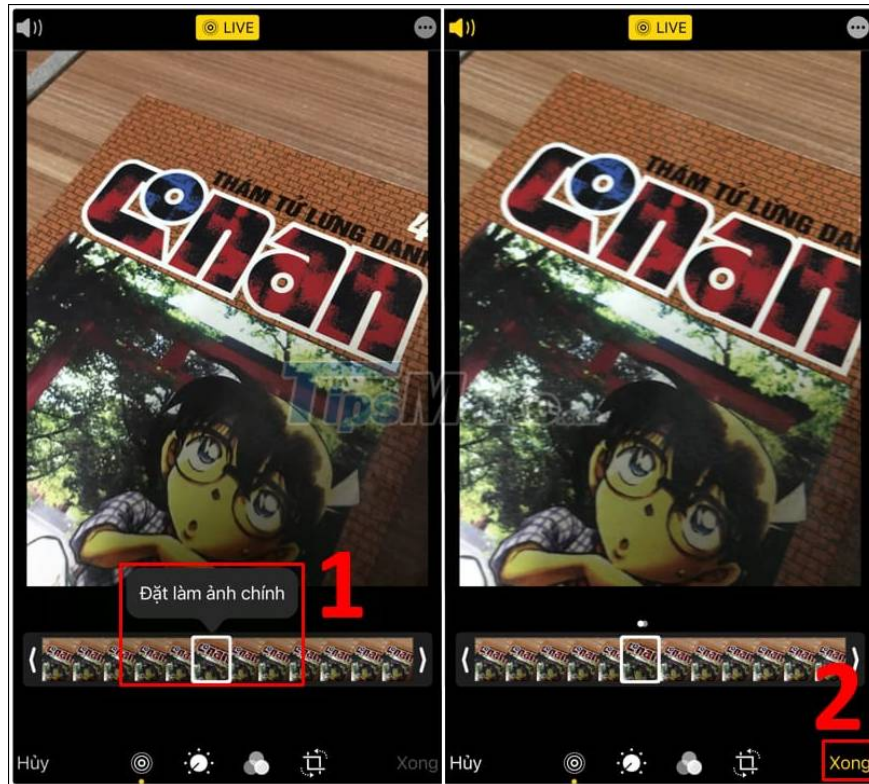

**Step 3 :** Select **Live mode** > Click the **speaker icon** to mute the sound ( **gray** )> Select **Done** .

If you want to turn on the sound, you can do the same as above so that the Speaker icon will turn **yellow again** .

### 3 . Place the main photo

In **Live mode** , move the white frame in the frame viewer and select **Set as main photo** > select **Done** .

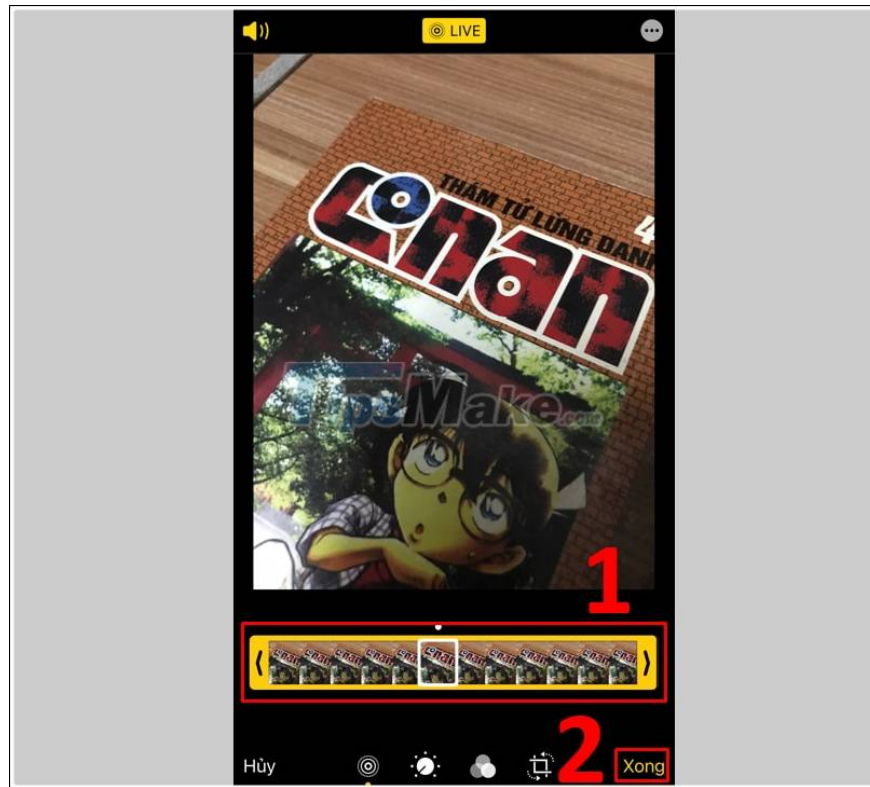

#### 4 . Create still images

Click **the Live button** at the top of the screen to turn off the Live feature> Select **Done** to make the Live Photo a still image.

## 5 . Crop Live Photo

You **shorten** either end of the frame viewer retaining the desired image> Select **Done** .

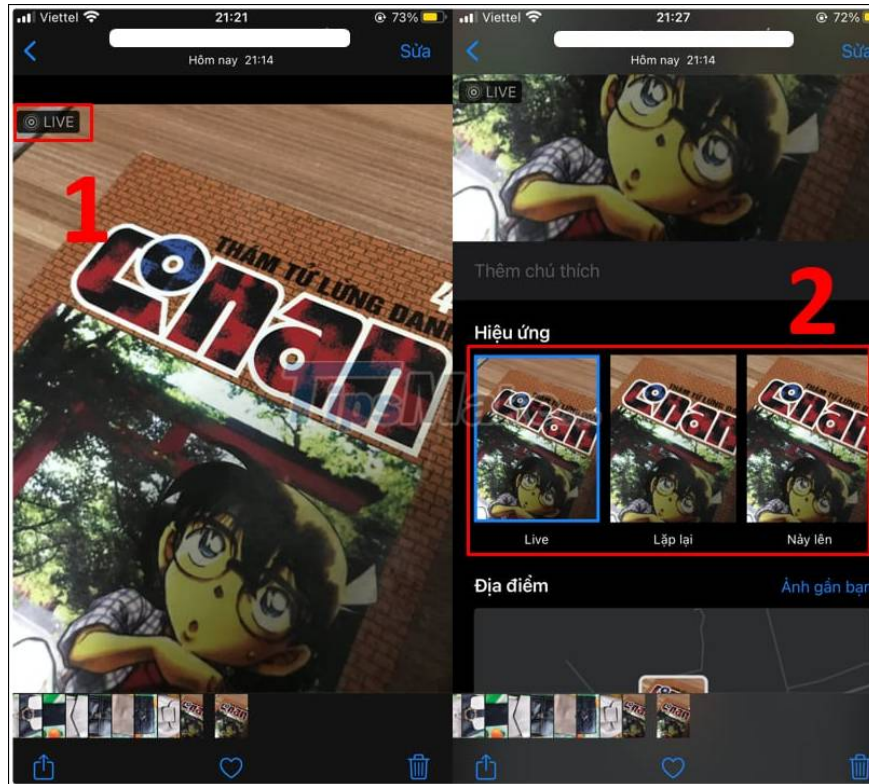

## 6 . Add effects to Live Photo

You can select the picture **mode Live Photo** and **swipe up on** > Select the **effects** desired.

Apple offers **3** effect **options** as follows:

- **Repeat** : Repeat the action in a continuous loop video.
- **Bounce** : Rewind the action back and forth.
- **Long Exposure** : Exposure Simulation similar effect by blurring motion.

Hopefully with the above instructions, you can easily perform the same operations with Live Photo. Thank you for watching and see you in the following articles.
