

# How to use the mouse scroll bar to quickly open the folder?

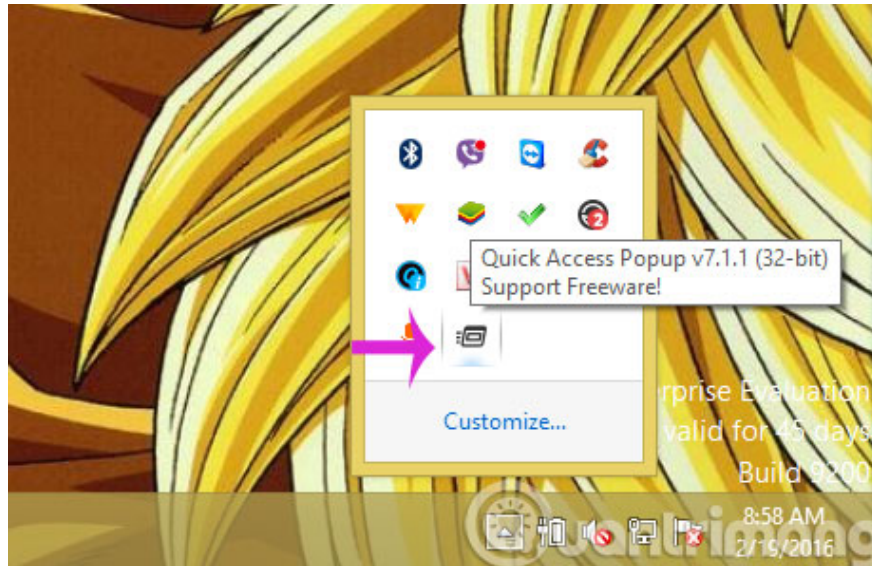

Usually, the mouse scroll bar is only used to move the position up and down when surfing the web. However, today, TipsMake.com will share with you a small trick using the scroll bar to quickly open the Windows folder. Please consult with us.

Usually, the mouse scroll bar is only used to move the position up and down when surfing the web. However, today, TipsMake.com will share with you a small trick using the scroll bar to quickly open the Windows folder. Please consult with us.

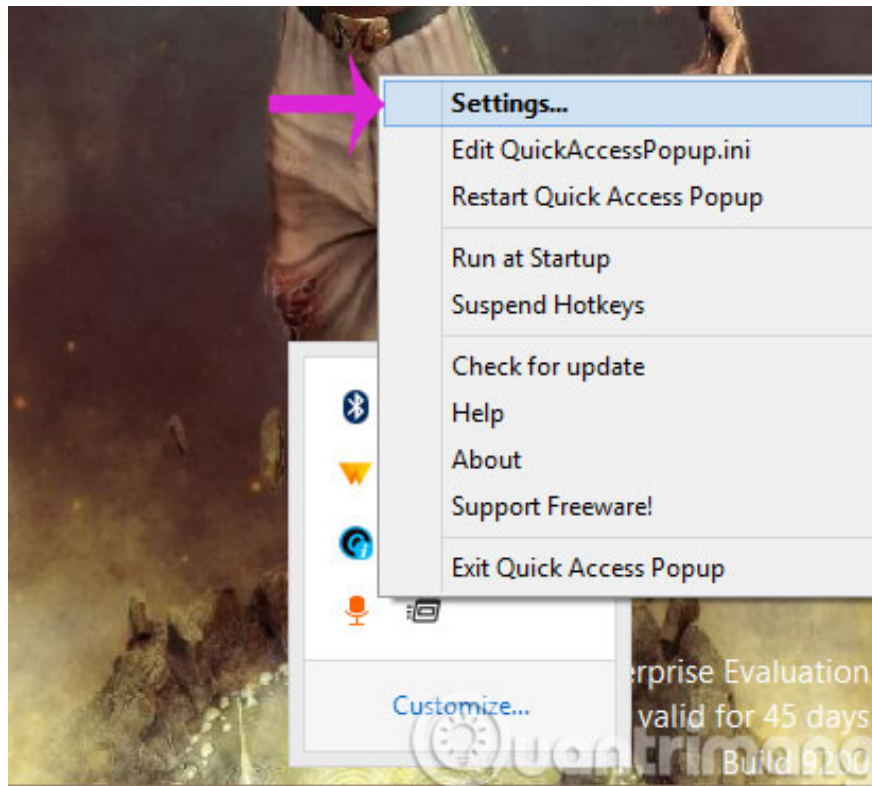

First, download the **Quick Access Popup** software. After downloading, unzip the package and launch the **EXE** file that matches the Windows configuration you are using.

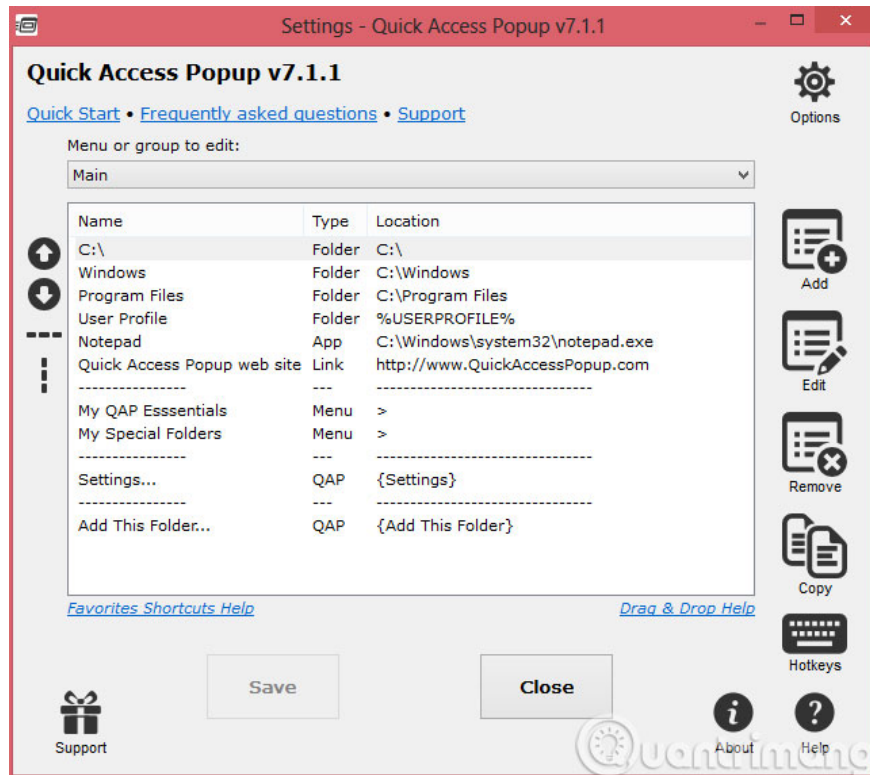

Then, the icon of **Quick Access Popup** will be under the **Taskbar**

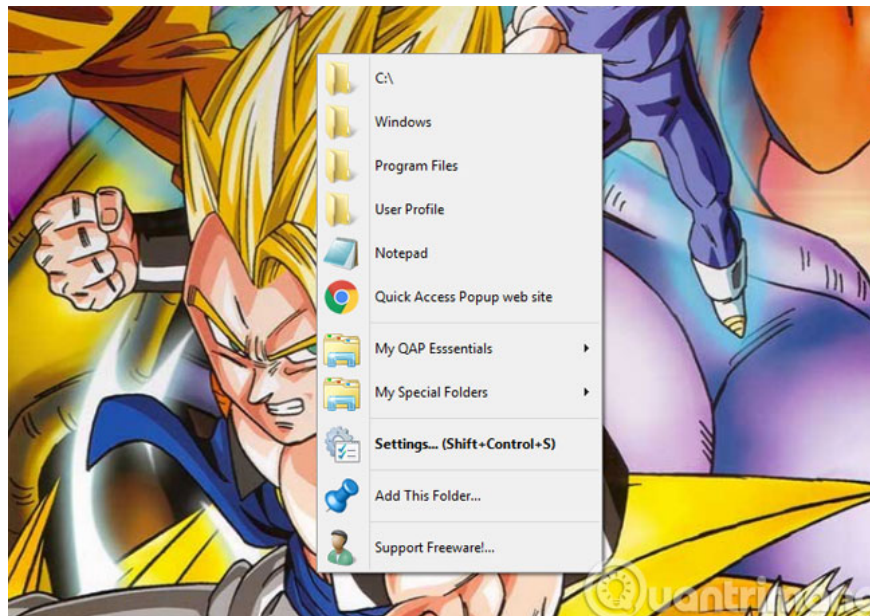

To edit the settings, right-click the icon and select **Settings**

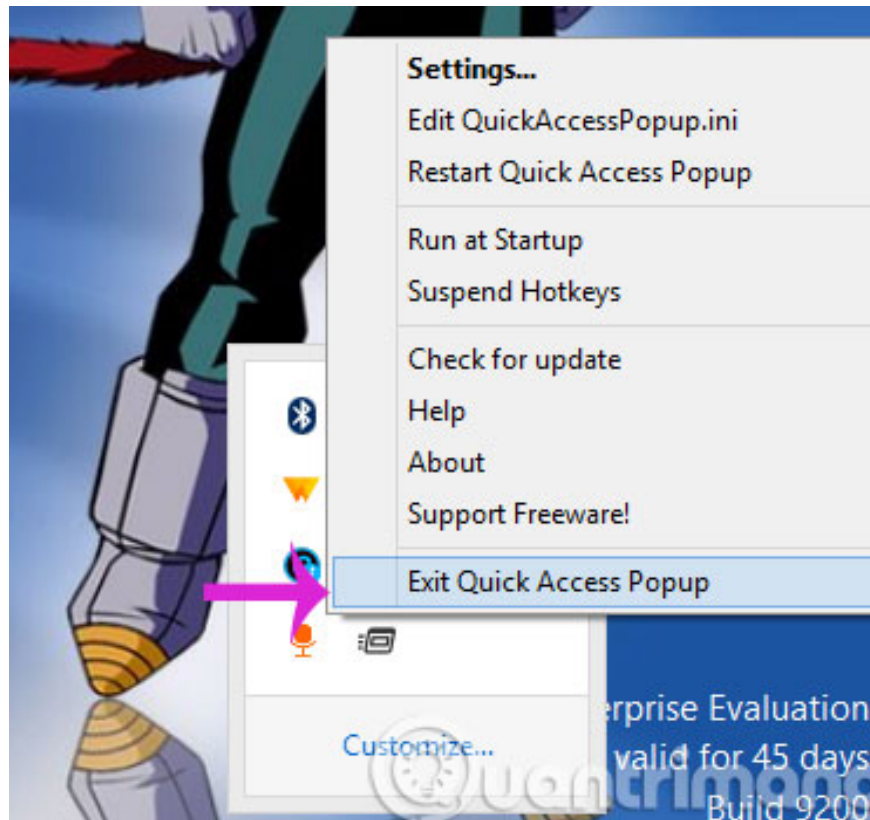

Here, you will have custom tools like **Add** (add folder), **Edit** (Edit folder), **Remove** (Delete folder), **Copy** (Copy folder), **Hotkeys** (Shortcuts)

After the custom is done, go out to the Desktop screen and click the mouse scroll bar to start opening the folder you want

When you don't want to use this feature anymore, right-click the icon and select **Exit Quick Access Popup** . Very convenient, isn't it?

1. Add Copy to folder and Move to folder in the right-click menu
2. Surf the web more effectively with the mouse wheel
3. The basic steps of fixing cursor cursors flutter in Windows
