

How to use the new Opera Neon web browser

Opera Software has launched a completely new Opera Neon web browser, with features that are completely different from those used by Chrome and Firefox users.

Developer Opera Software has just launched Opera Neon, promising this computer browser will bring a completely new experience to users. You won't see any shadow or image of Chrome, Firefox browsers on Opera Neon, it's a "makeover" and a different interface.

Built on a completely new technology, Opera Neon will bring users amazing effects and animations. Access speed on Opera Neon browser is always guaranteed, to meet all users' needs quickly. Join the Network Administrator to discover the new Opera Neon browser in the article below.

Install Opera Neon browser on the computer

First, download Opera Neon browser by following the link below:

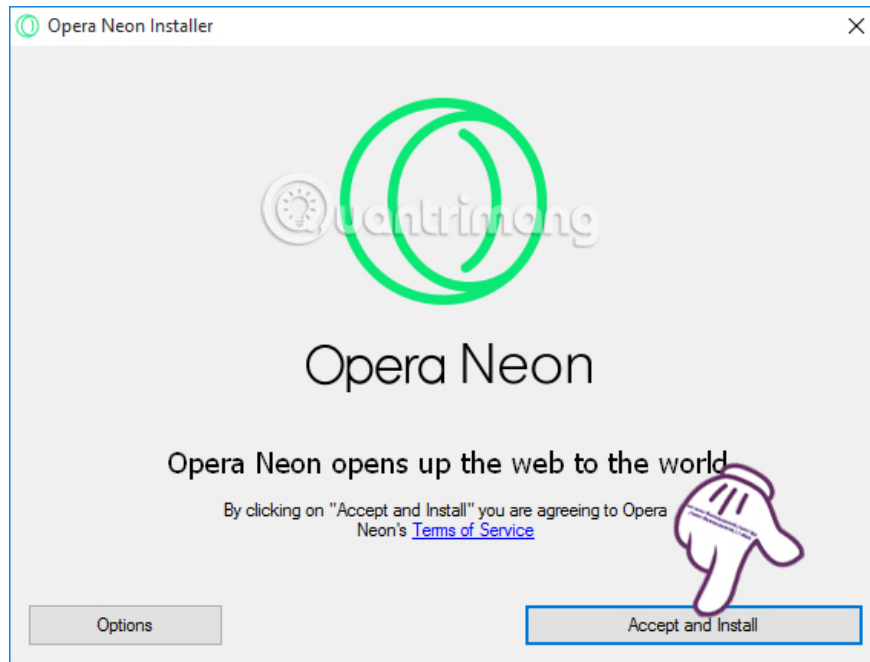

1. Download Opera Neon for free

Demo video, try Opera Neon browser:

Step 1:

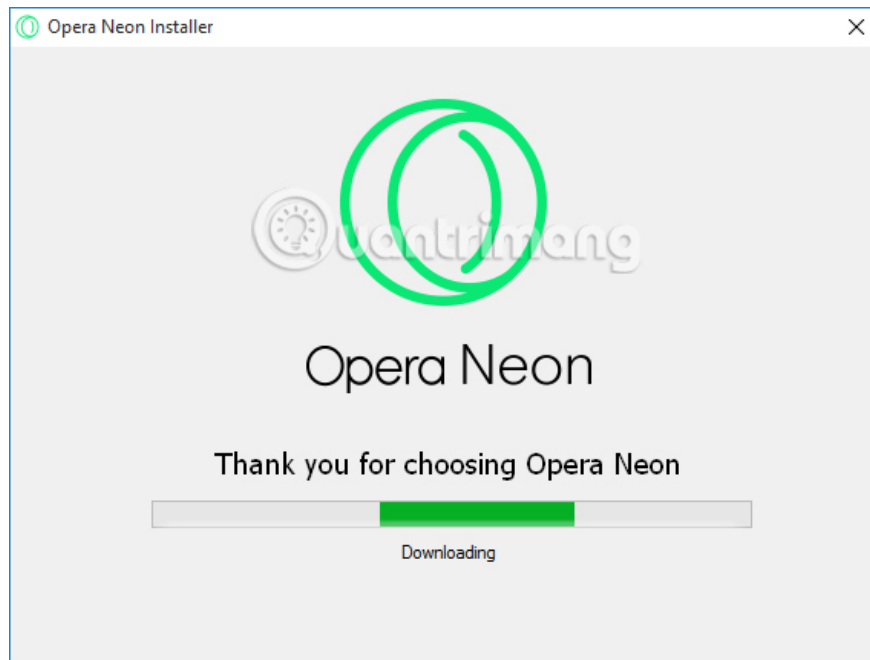

We proceed to download the Neon Opera file to the computer and proceed to extract it. Soon, you just need to click on the installation file inside the folder to proceed to install Opera Neon.

In this interface, we will click the **Accept and Install** item of the Opera Neon Installer dialog box.

Step 2:

Wait a few minutes for **Opera Neon to download the necessary data to install the program** . Stay connected to the Internet to ensure the installation of Opera Neon is taking place quickly.

Step 3:

Once completed, the Opera Neon browser will automatically run on the computer. Or we can click on **the icon of the browser on the screen** . Compared to the old Opera browser, the Neon Opera has a very simple but extremely fancy icon.

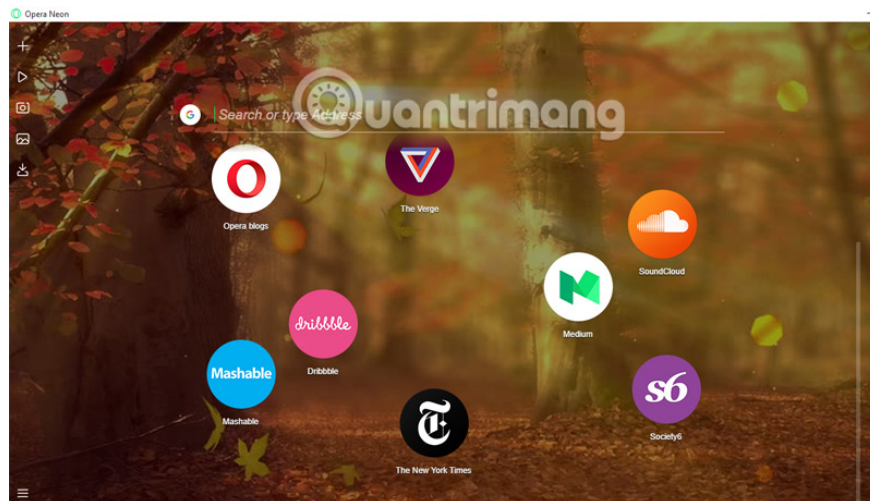

Step 4:

Soon we will see the Opera Neon browser appear on the computer. We can see Opera Neon using completely transparent interface backgrounds. And users will not need to install browser wallpaper like Chrome or Firefox.

Suggested website icons on interfaces like Facebook, YouTube, . are nicely designed when going in a circle style. And you can completely move, delete or change the location of those icons on the Opera Neon interface.

The left column will be the extension icons.

Step 5:

To search **for any website** to access, we just need to **enter the website address and press Enter** . When you enter the name of the website, we will see some of the most prominent topics of the website.

When you press Enter to access that page, we will see the website interface of the website is completely separate from the interface of Opera Neon. At the same time the icon of the page will appear in the vertical column to the right of the interface.

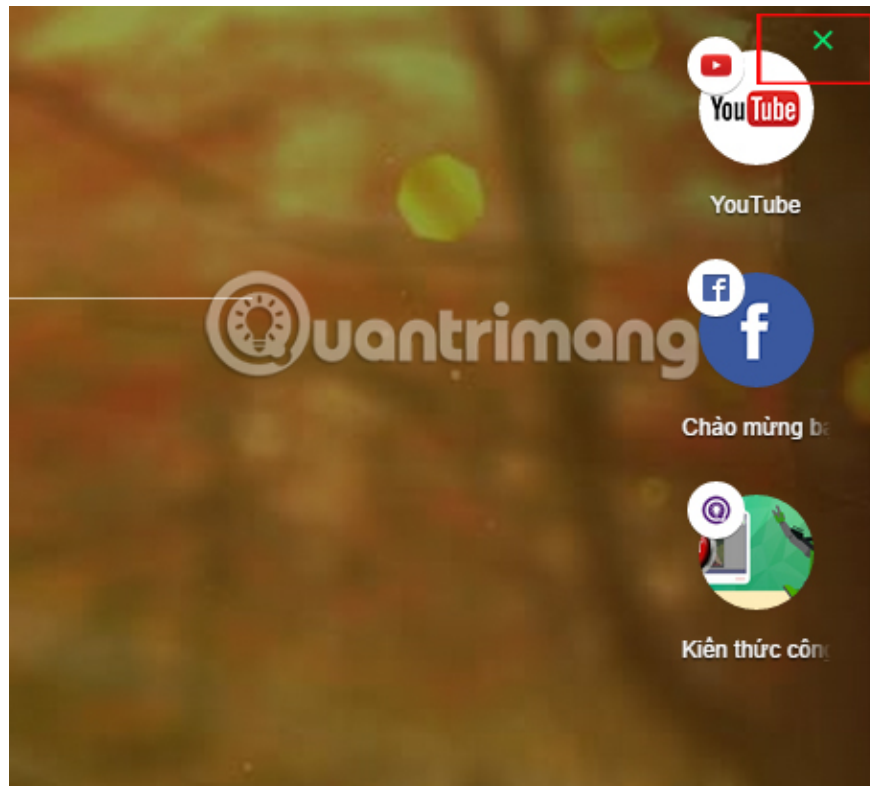

If we want to **return to the main Opera Neon interface** , just click **the horizontal icon** like the image.

Step 6:

Sorting the right access pages in the form of miniature circle icons will not confuse users. At the same time, we have quick access to those websites.

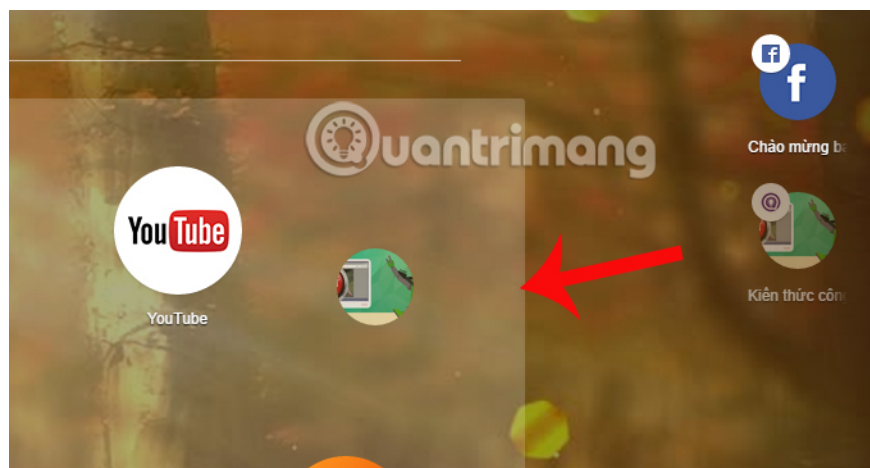

To **exit** , **turn off** that **website** , users just need to **click on the X icon** as shown below.

Step 7:

If you want to **add a certain website to the main interface of Opera Neon**, or you can understand that **bookmarking the site** as in Chrome browser, Firefox, just **move the circle icon** in the right column of the screen **to the end. website icons on Opera Neon** are done.

However, please delete the sites that do not need access to have space for important websites, or favorite.

Step 8:

The **icons in the left column will be utilities** for users. If you want to **take a photo of the website interface**, click on **the camera icon**.

The **Crop to Snap** area appears, which means that you just need **to hover over the image area on the interface you want to take a picture of** . Photos will be taken automatically.

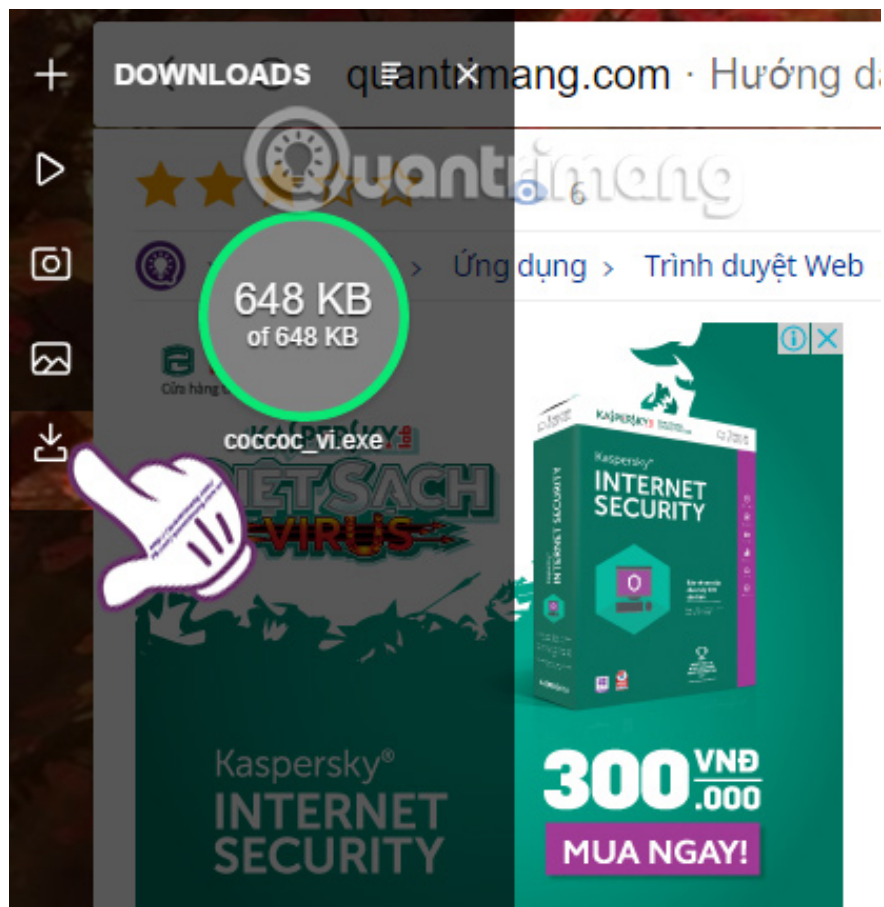

Want to **review the image** we just need to click on **the image icon** right below the Camera icon.

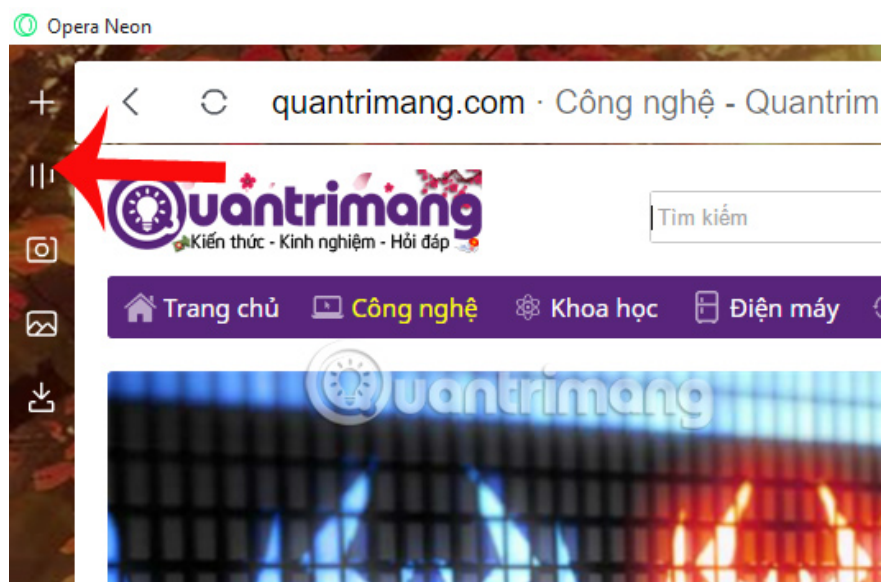

Step 9:

When we click on **the drop-down arrow icon** , the **list of all the links that are downloading or completed** will appear for the user to know.

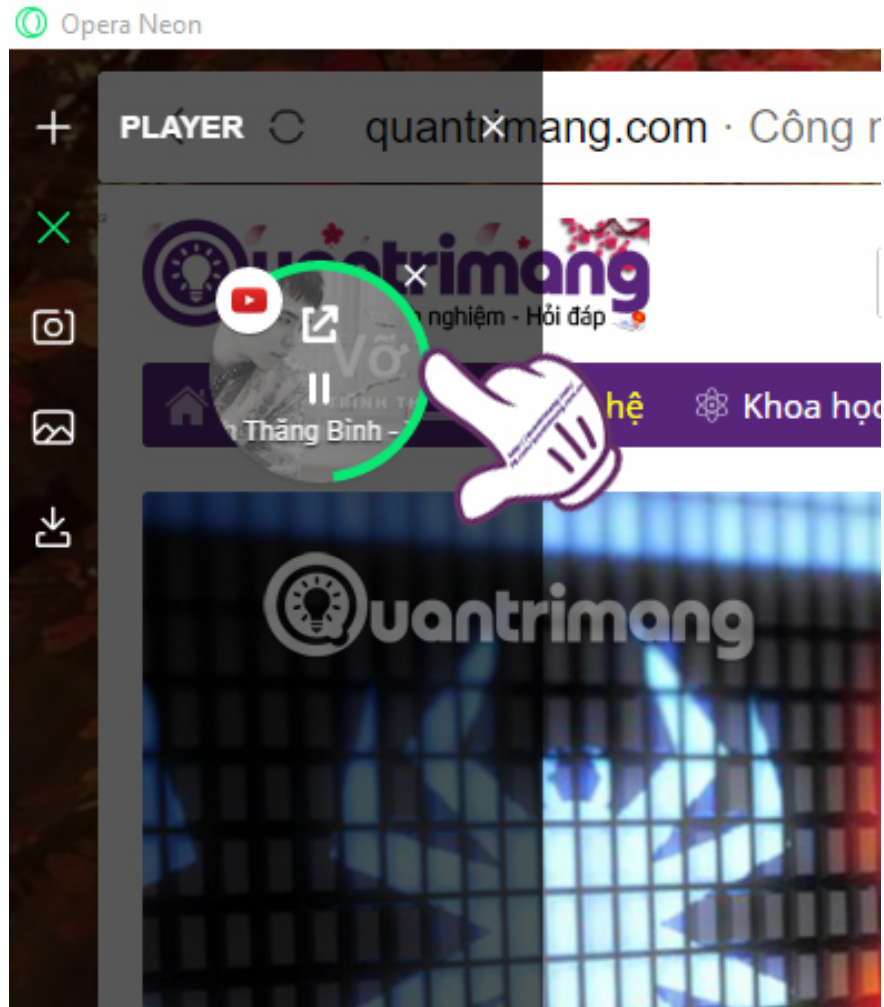

Step 10:

Also when we are listening to a song on YouTube, it is possible to hide the song and access another website to work, read the newspaper, play games or access Facebook if you want. To **stop playing music**, you first need to tap **the music player icon as shown**.

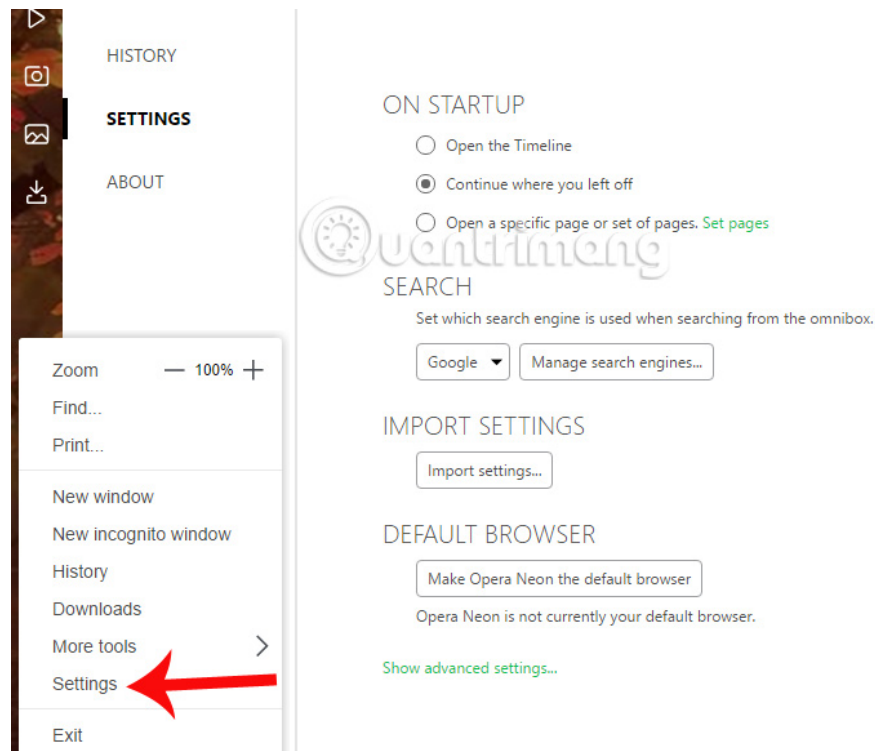

Then we can choose to stop or turn off the song.

Step 11:

If the user wants to change any settings for Opera Neon, at the main interface click on the 3 dashes icon and select Settings.

Above is how to use the latest Opera Neon browser. Overall, the Opera Neon interface is user-friendly and easy to use with unique effects. The arrangement of icons is also scientific, allowing users to quickly use any utility or feature. Discover new things in Opera Neon browser.
