

How to use the new Story feature on Facebook

Newly updated Facebook application adds Story feature, allowing users to create moments of taking photos or recording videos and then combine unique filters, then post to Story items or send to friends on the list.

A completely new feature has been updated on the Facebook application that is adding the Story item on the interface. Basically, this Story feature is similar to Snapchat and Instagram's Story. Accordingly, users will proceed to take video or take photos and then use the unique and funny effects, filters that Facebook provides to merge photos and videos. Finally, we can send those interesting images to friends and post them to our Story. And of course the content you post on Story will be canceled within 24 hours from posting. Together with the Network Administrator, learn how to take photos, record videos with the Story feature on Facebook application.

1. How to tell stories with Stories on Instagram

How to create moments using the Story Facebook feature

Note to users, to be able to use this feature you need to upgrade Facebook on iOS or Android to the latest version.

1. Download the Facebook app for Android
2. Download Facebook for iOS for free

Step 1:

After you have upgraded the new version to Facebook, open the application. Right at the home page interface we will see your News item. In addition, the Messenger icon will appear in the top right corner.

To start using the Story feature on Facebook, we click on **Direct** in the top left corner of the screen. Next, you will see the interface to introduce the new feature, click **OK**.

Kiến chui vào lọ đường thì nhanh tay lấy ngay chiếc đũa rồi "làm phép" để kiến biến mất "thần tốc"...

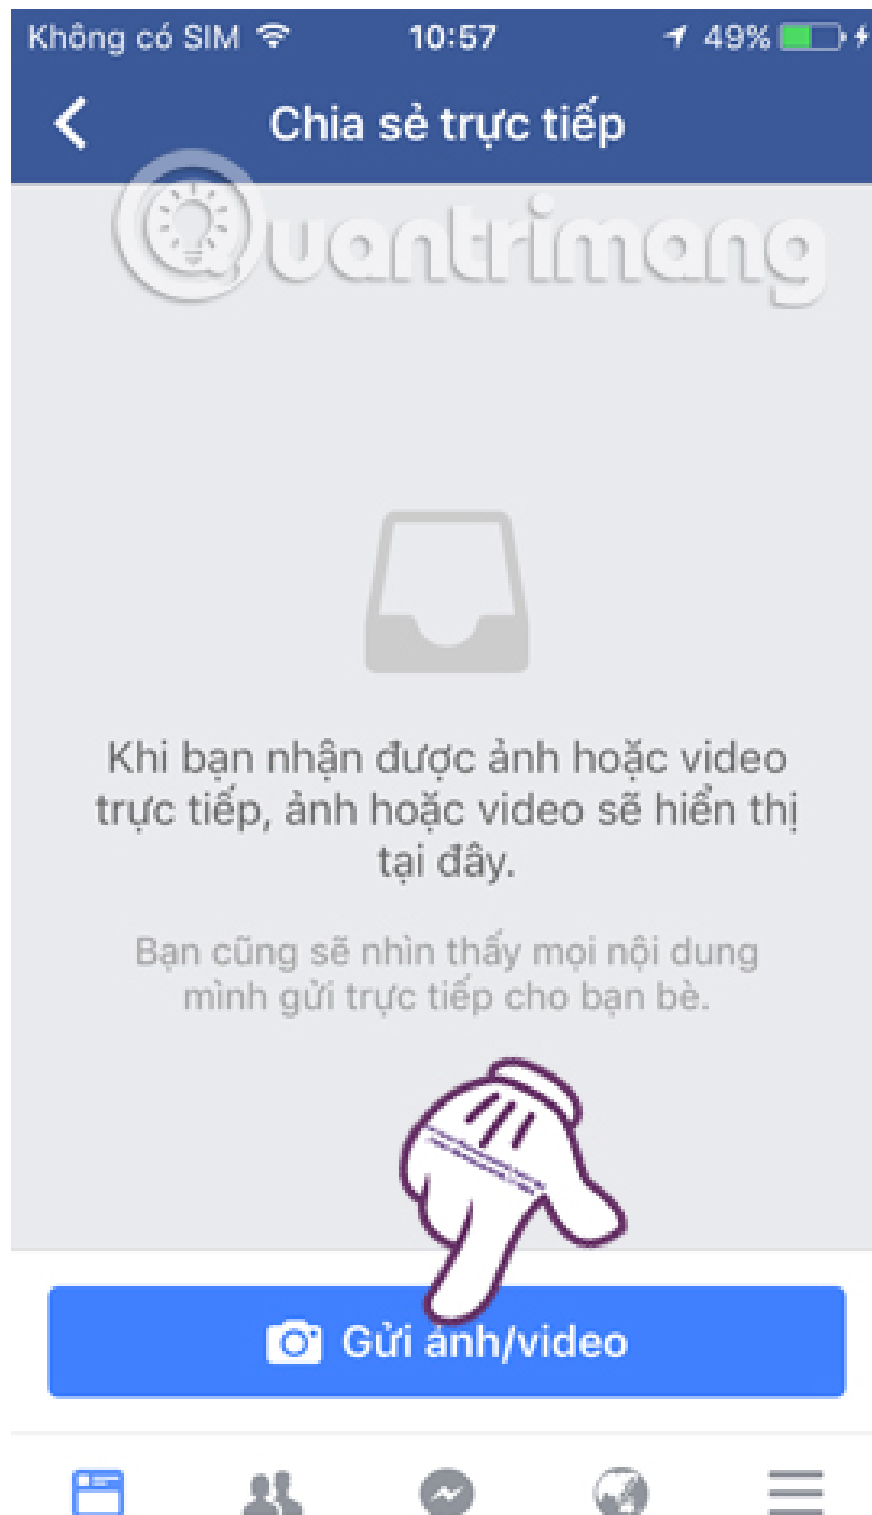

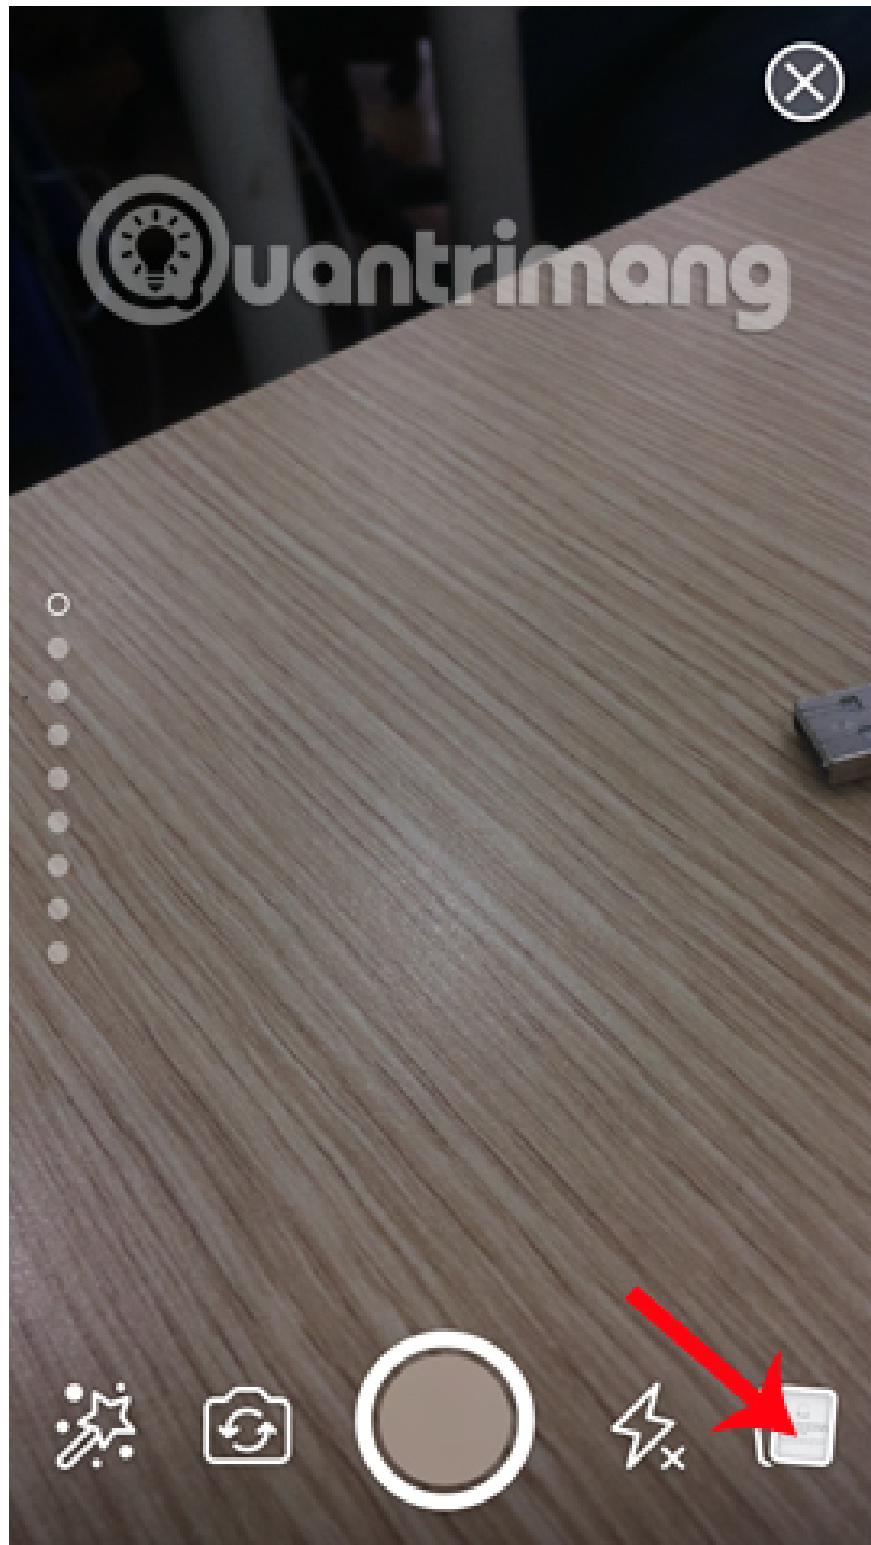

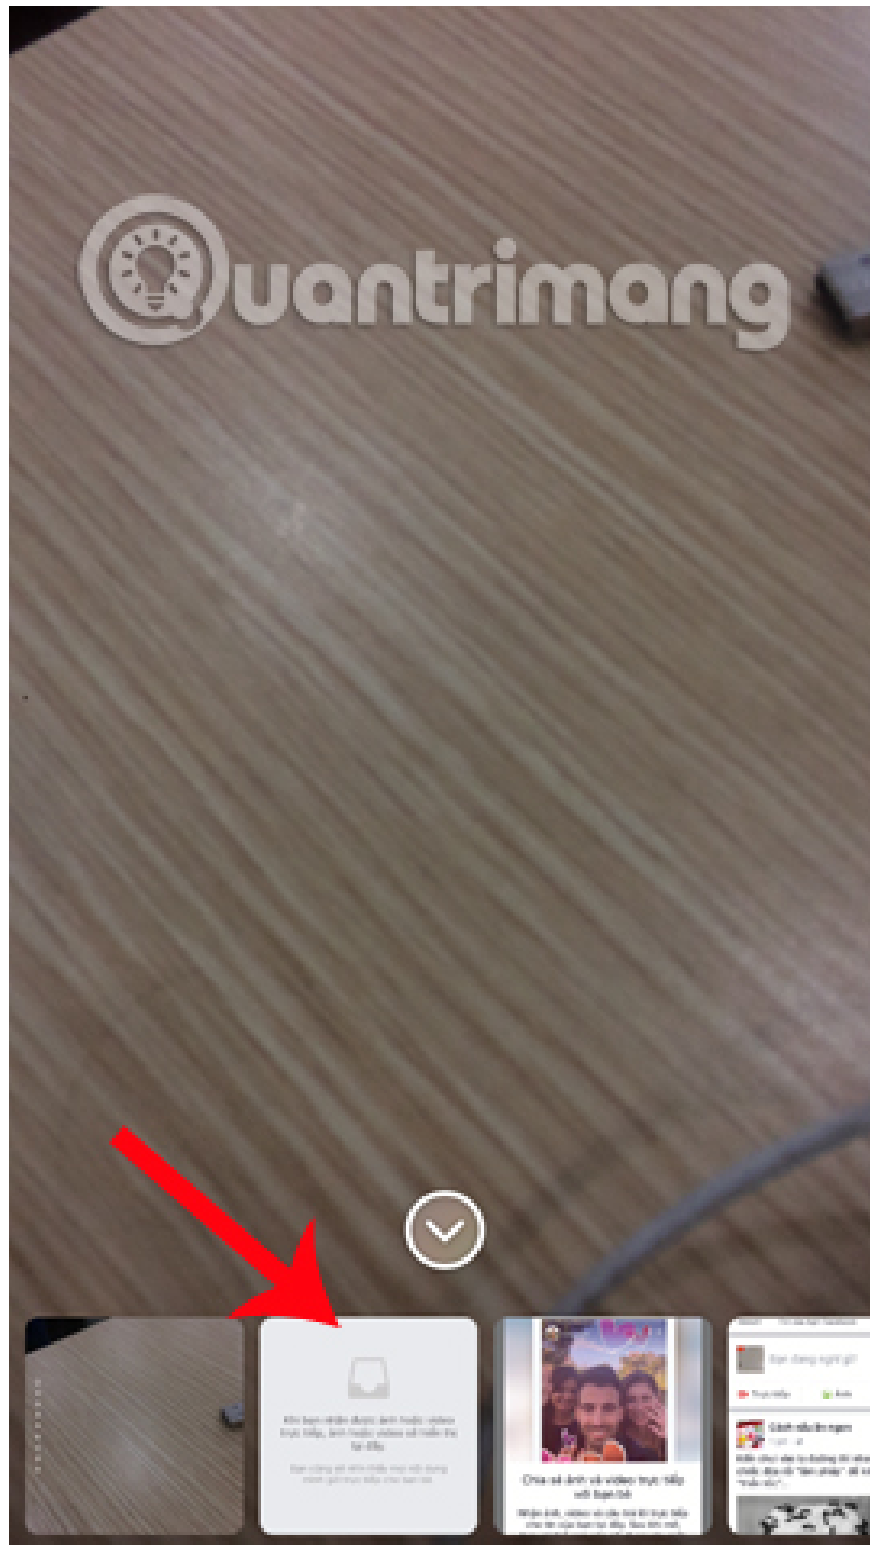

Step 2:

Next, the user will click on **Submit photo / video** item. Soon it will be the interface for taking photos and recording videos on Facebook. You click on the middle circle button to capture or hold the button to record the video.

We can change the front or rear camera at will. In case you want to use the available image, just press the photo icon in the bottom right corner of the interface.

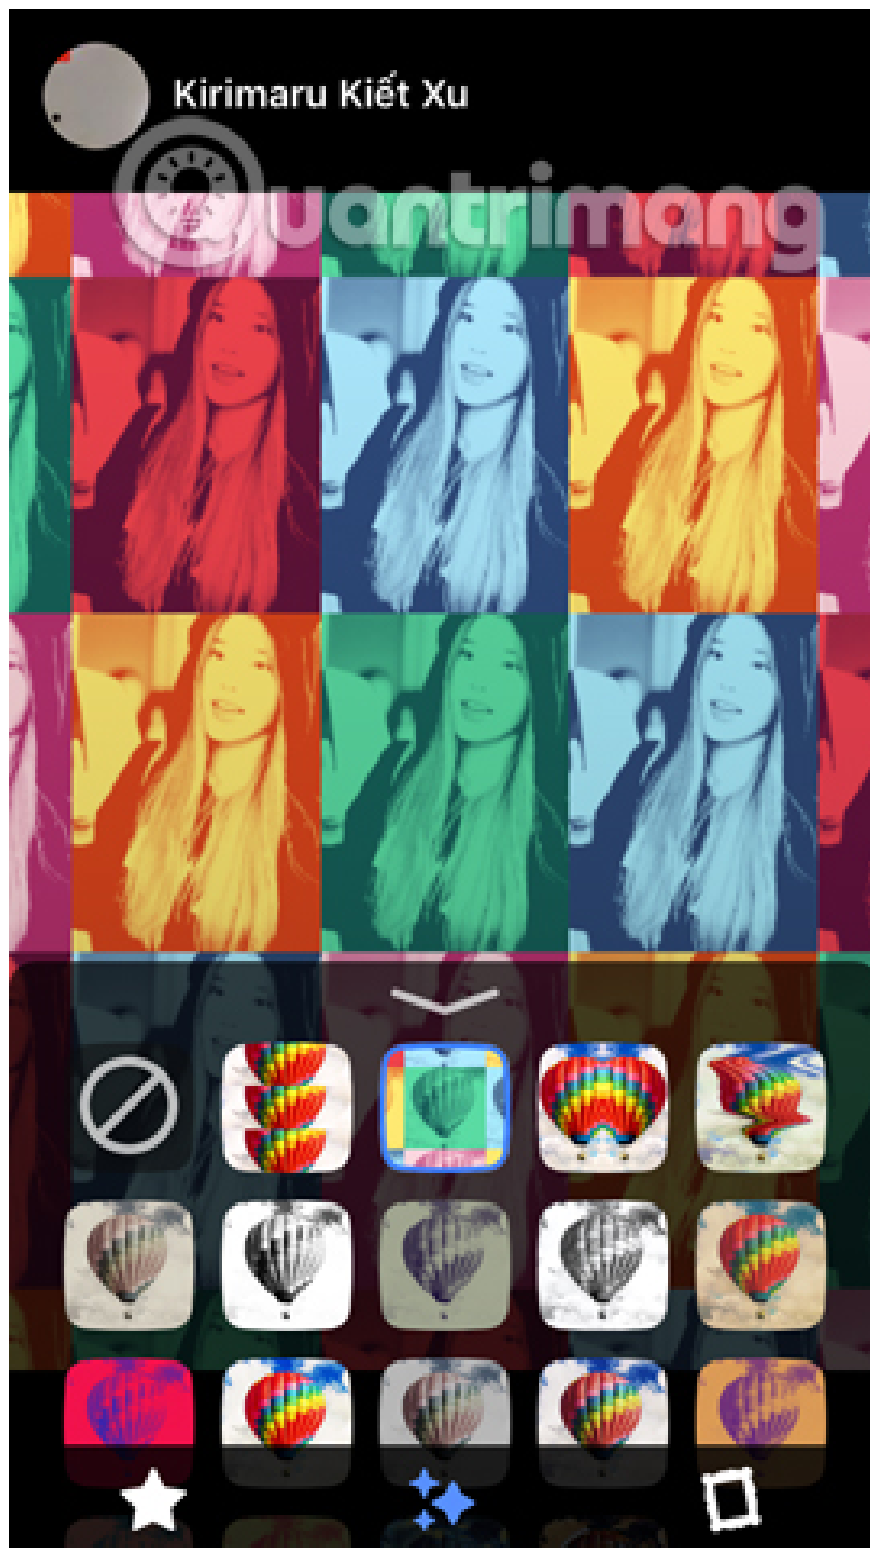

Step 3:

Next, users will click on **the star icon** to use filters for images. You can try different types of filters to apply to images and videos.

Note to users , to have more filter topics, you should select the filter first then take photos and record videos. If taking photos and recording videos first, the filter will have quite a few topics.

In addition, we can also add some other effects like adding text to images, adding strokes to images. If you want to delete the effect, press the arrow icon. Click **Done** to save those effects.

Step 4:

Once you have satisfied your picture, click on the arrow icon in the middle. We will have 3 choices: Post to Facebook, Post in news and send to friends. Just select the option you want. Then click **the arrow icon** below to proceed.

Now go back to the Facebook home interface and click on the item **Your News** will see that image and video appear.

Is that an interesting feature ?! You can freely "take a selfie" right on Facebook, along with the effects, unique and fancy filter topics. The next thing is to show off your achievements to your friends. Try giving me many different types of filters in Story section on Facebook application.
