You have been using **Windows 10** for a while and found that your computer is not working properly, reporting errors constantly, running slowly . or simply want to restore your system to its default state. head. So, the following way will help you reset Windows 10, restore the system to the initial state quickly.

1. 3 ways to change the default browser in Windows 10
2. Instructions for filming and taking game screen shots in Windows 10
3. Resize icons in Windows 10

How to reset Windows 10 to its original state

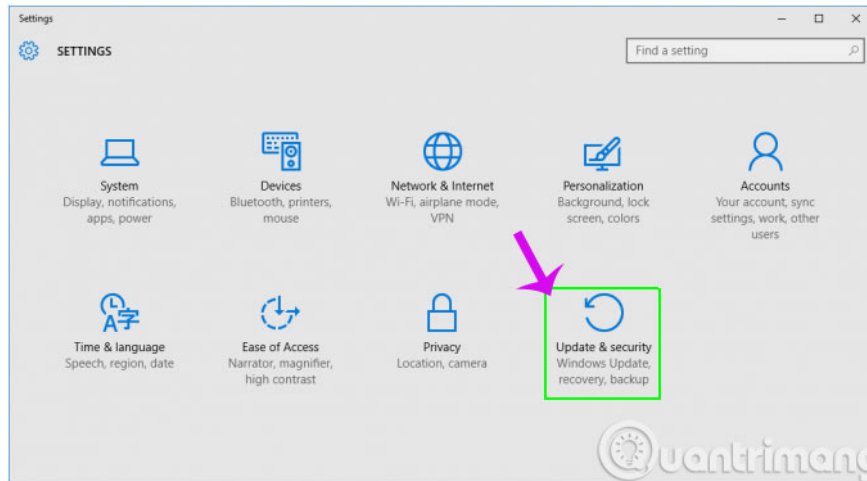

Step 1:

Go to the **Start** menu and select **Settings**:

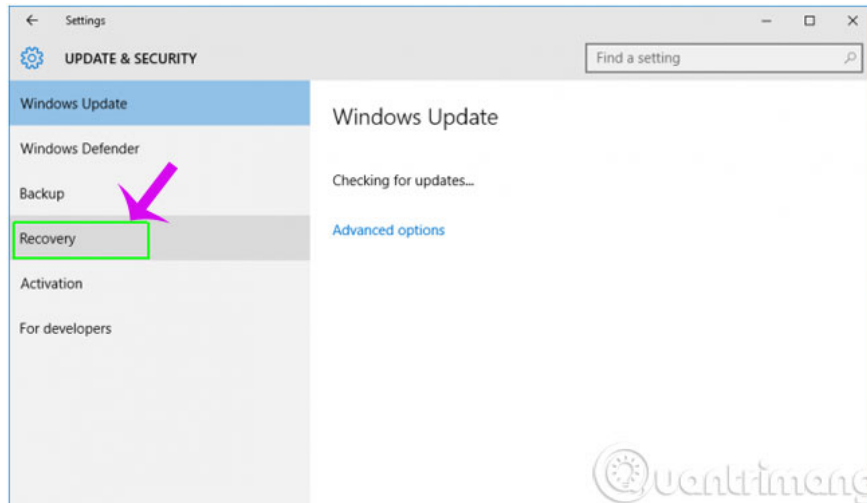

Step 2:

In the Settings application window displayed, click the **Update & security** item :

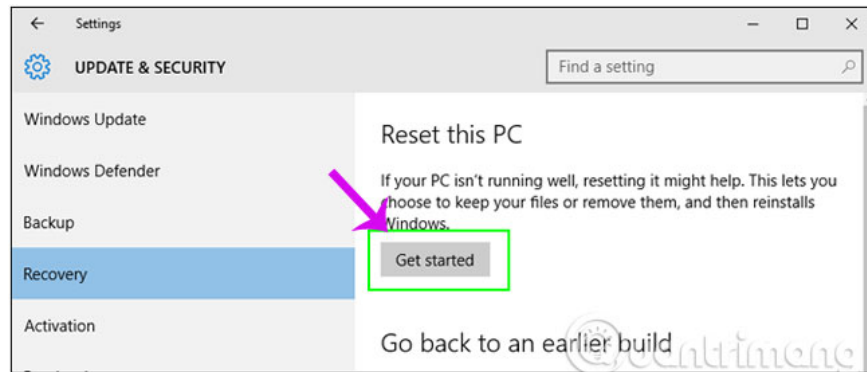

Step 3:

In the left column of the **Update & security section** , click on **Recovery**:

Step 4:

You click on **Get Started** in **Reset this PC**:

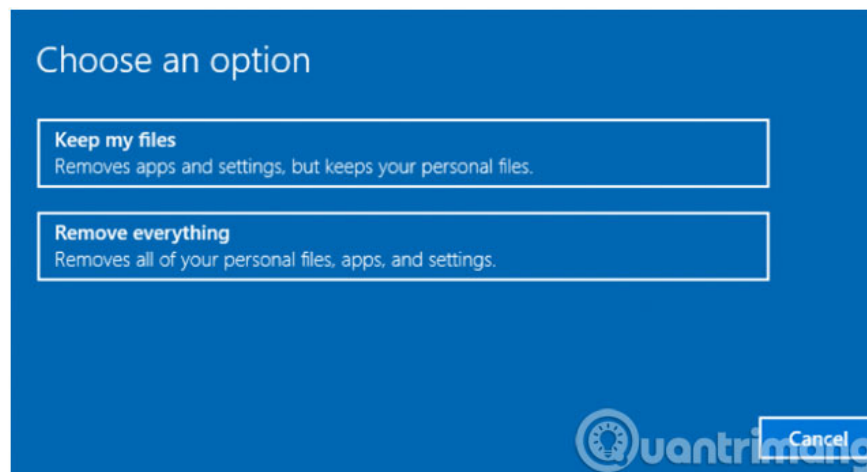

Step 5:

In the **Choose an option** dialog box displayed, you will have two options:

1. **Keep my files** : Delete the entire application, return to the original settings but keep the personal data
2. **Remove everything** : Delete all Windows installation drives to their original state or delete the entire device, including data on other hard drive partitions (*applicable in case of selling, exchanging and not using the machine again*).).

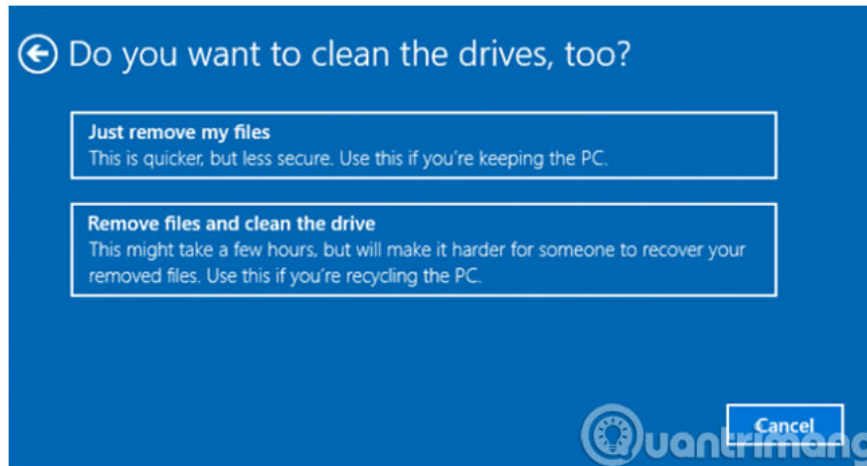

Depending on the need to use that you choose appropriately, no matter which option you choose, all your settings will be returned to the default and the applications will be removed.

Step 6:

If the above option is **Remove everything** then you will have 2 next options:

1. **Just remove my files**: If you are still a computer user, just select **Just remove my files** to remove only your personal files.
2. **Remove files and clean the drive**: This option will delete all data so it will take longer, but it is definitely a good way if you want to sell, give, give, or donate because others can hardly recover the files. has been deleted through this option

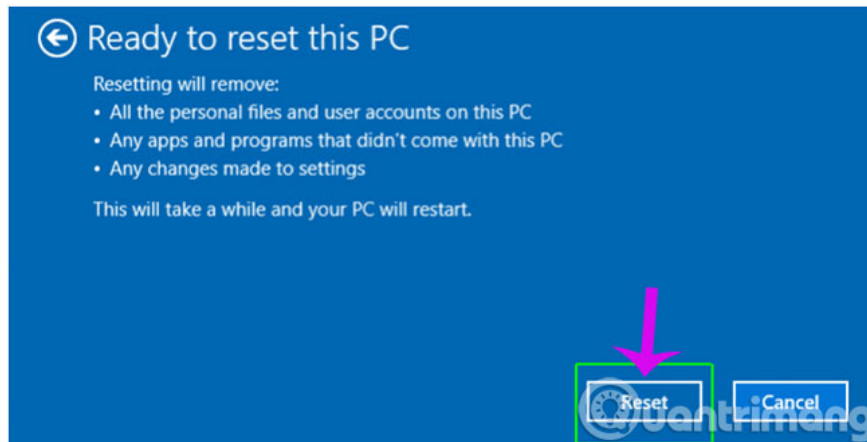

Step 7:

Click the **Next** button if Windows warns you that you will not be able to return to the previous version of the operating system.

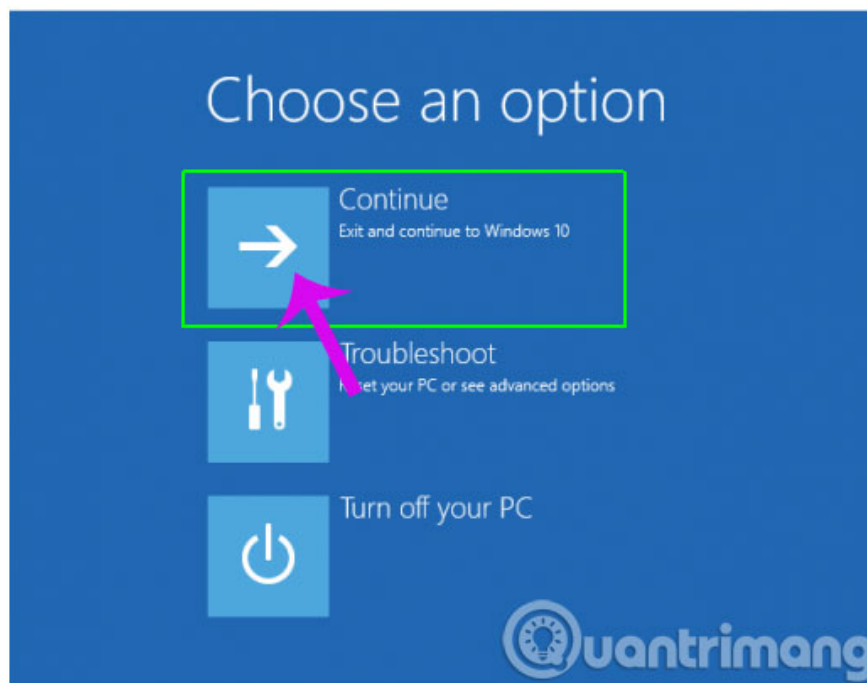

Step 8:

Press the **Reset** button again to confirm. Windows will restart and take a few minutes to reset the system.

Step 9:

In the **Choose an option** dialog box displayed, click **Continue**:

So, we have finished showing you how to reset your Windows 10 computer back to your current state.
