

How to use the Your Phone feature on windows 10 to connect a computer to an Android phone

How to use the Your Phone feature on windows 10 to connect a computer to an Android phone. Your Phone is a feature that helps our Windows 10 connect to Android phones from which you can reply to messages and view photos on your phone.

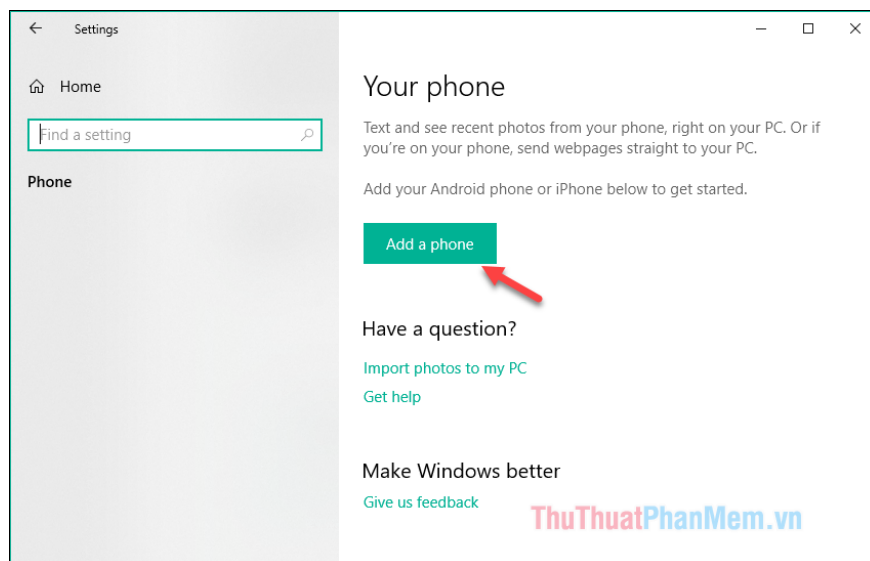

Microsoft recently released the Windows 10 October Update, which is a major update, codenamed 1809. The update helps improve the performance of windows, fix some bugs and upgrade some features. pretty good feature. In which, you have to mention the Your Phone feature, this is a feature that helps our Windows 10 connect to Android phones from which you can reply to messages and view photos on your phone right at your computer. yourself. In essence, this feature has appeared from previous updates, but it has not been finalized, in this update 1809, it has worked quite well with the feature to synchronize photos and messages. In this article of TipsMake.com let's experience this new feature.

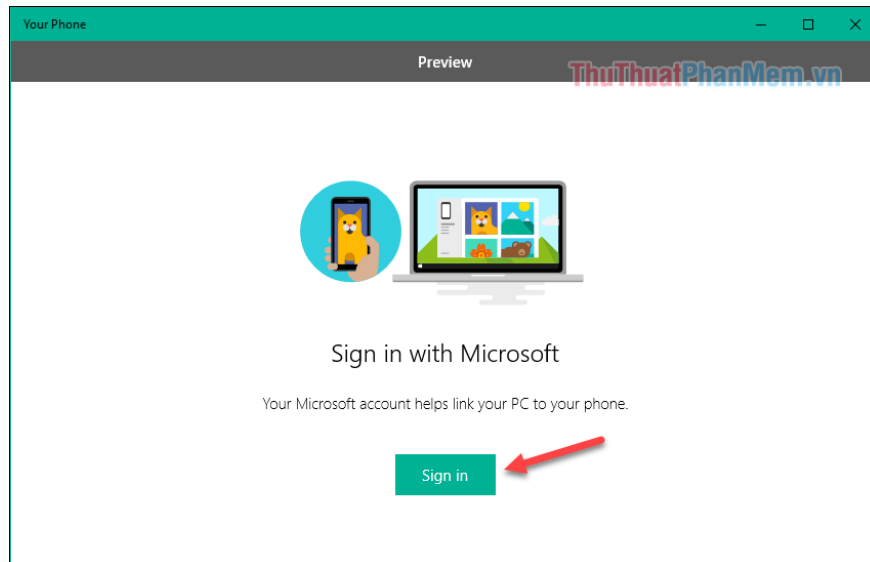

Step 1: We will activate the Your Phone feature on the computer by opening Settings and selecting the **Phone** item .

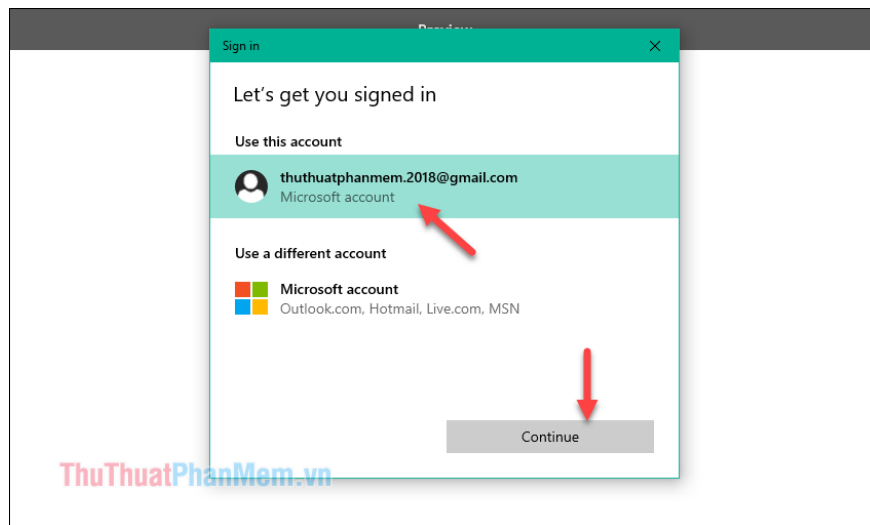

Step 2: In the new window, click the **Add a phone** button

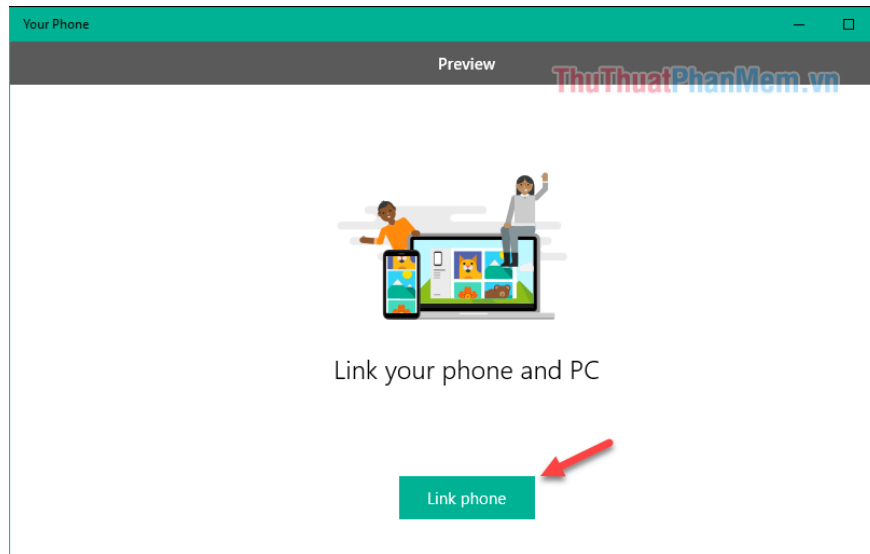

Step 3: Click the Sign in button to log in your Microsoft account

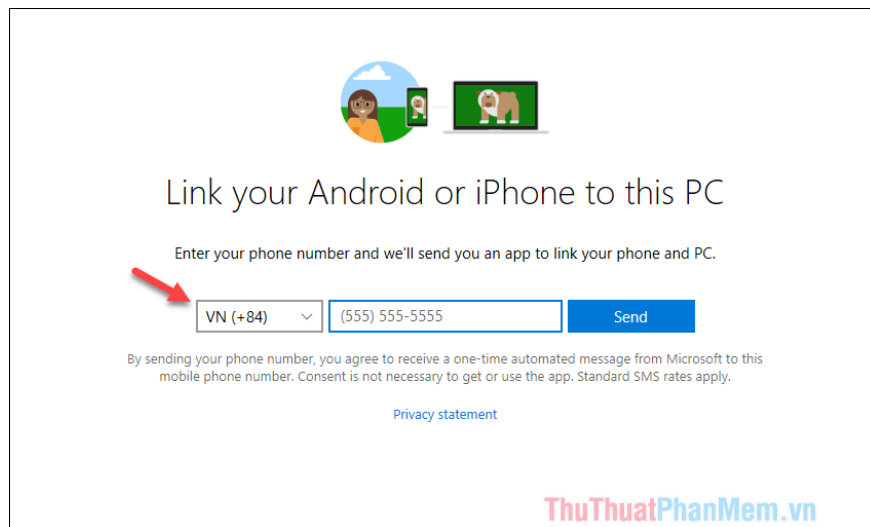

Step 4 : You select the Microsoft account already logged on the computer and click **Continue**

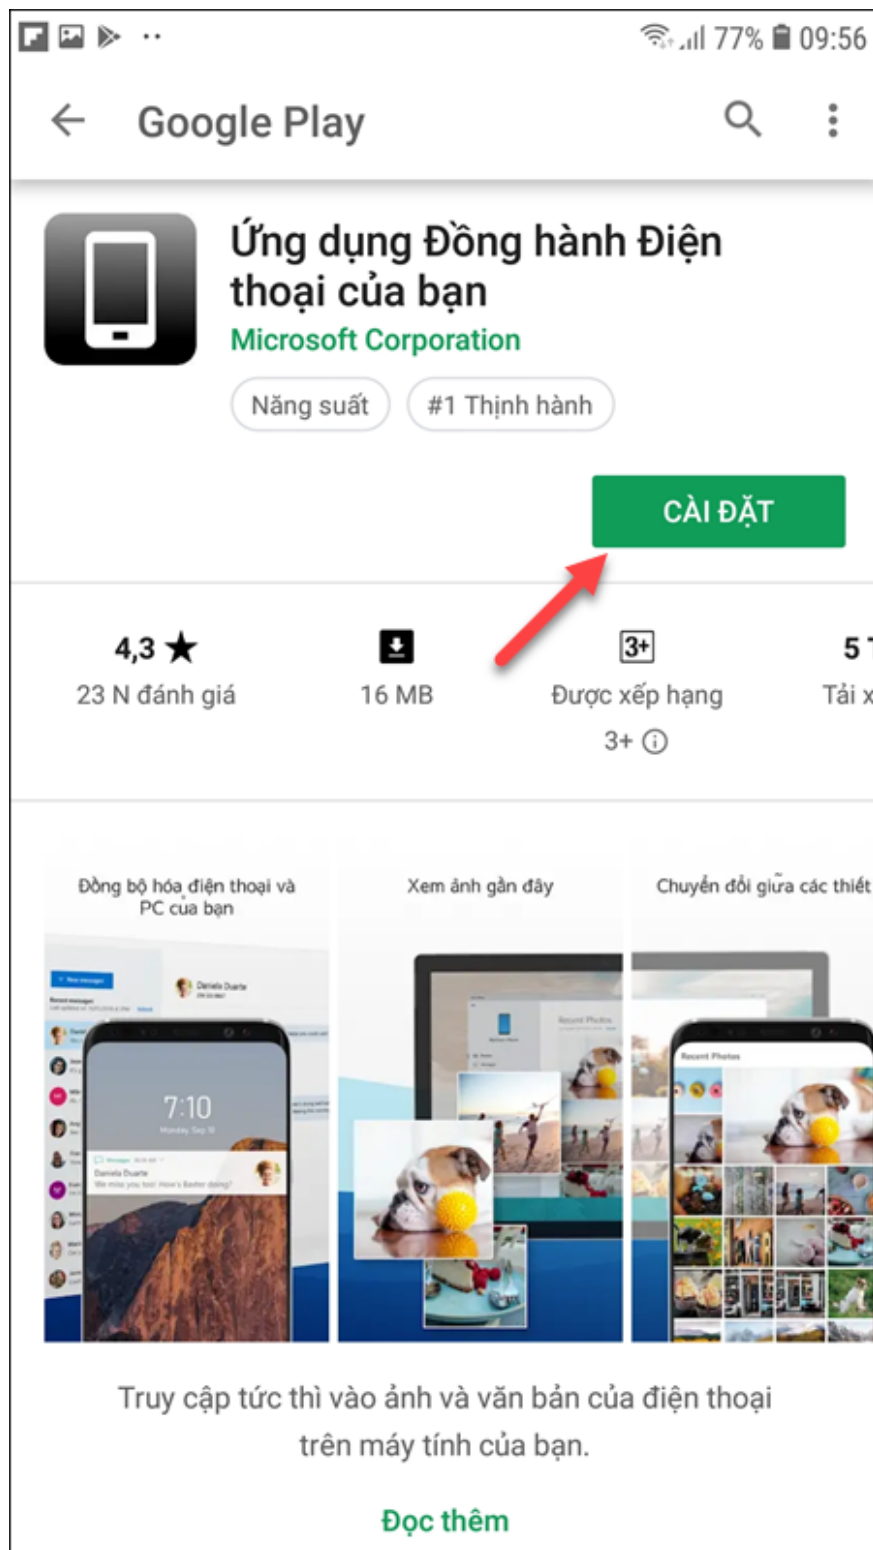

Step 5: Click on **Link phone**

Then select the area code of Vietnam (+84) and enter your phone number in the box and click Send

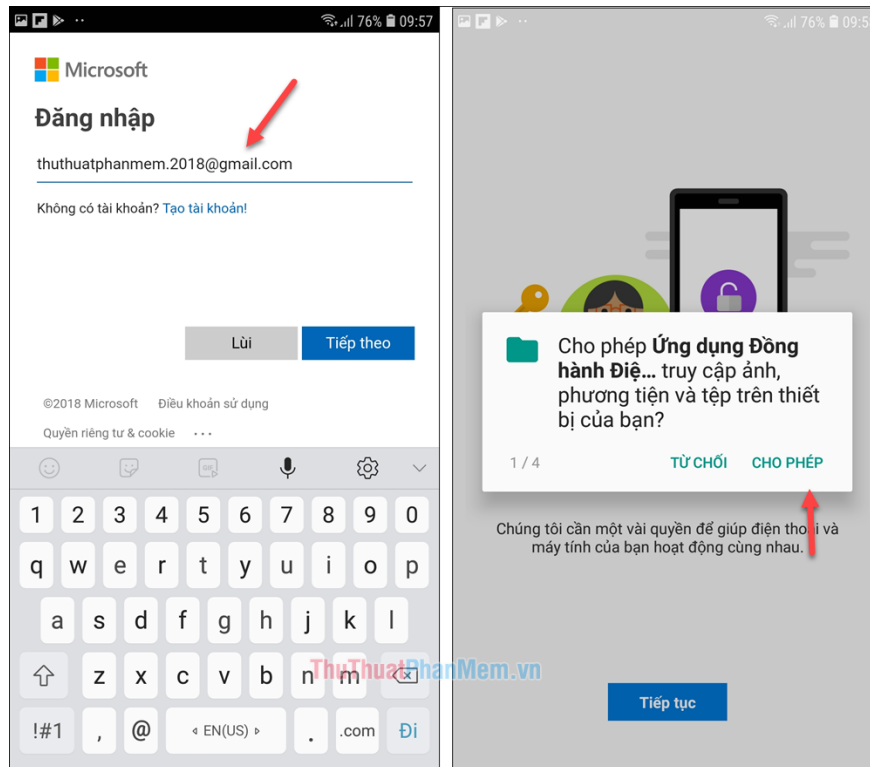

Step 6: Microsoft will send a message to your phone number with a link to CH Play app store to download an application that helps us connect to the computer as shown below:

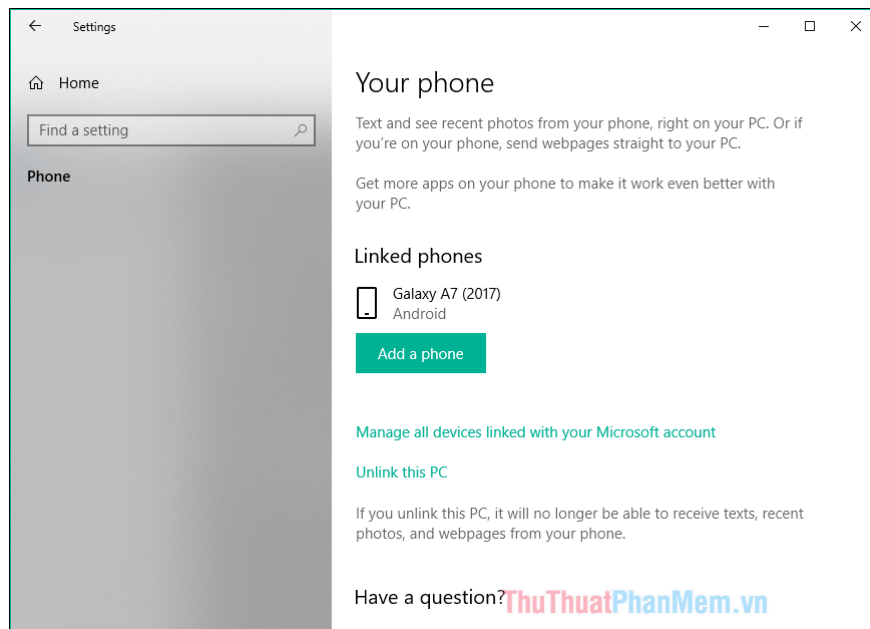

Step 7: After the installation is complete, open the application and log in to the Microsoft account that is logged on the computer. Please note that the login account on the computer and the phone must be the same account to be able to sync.

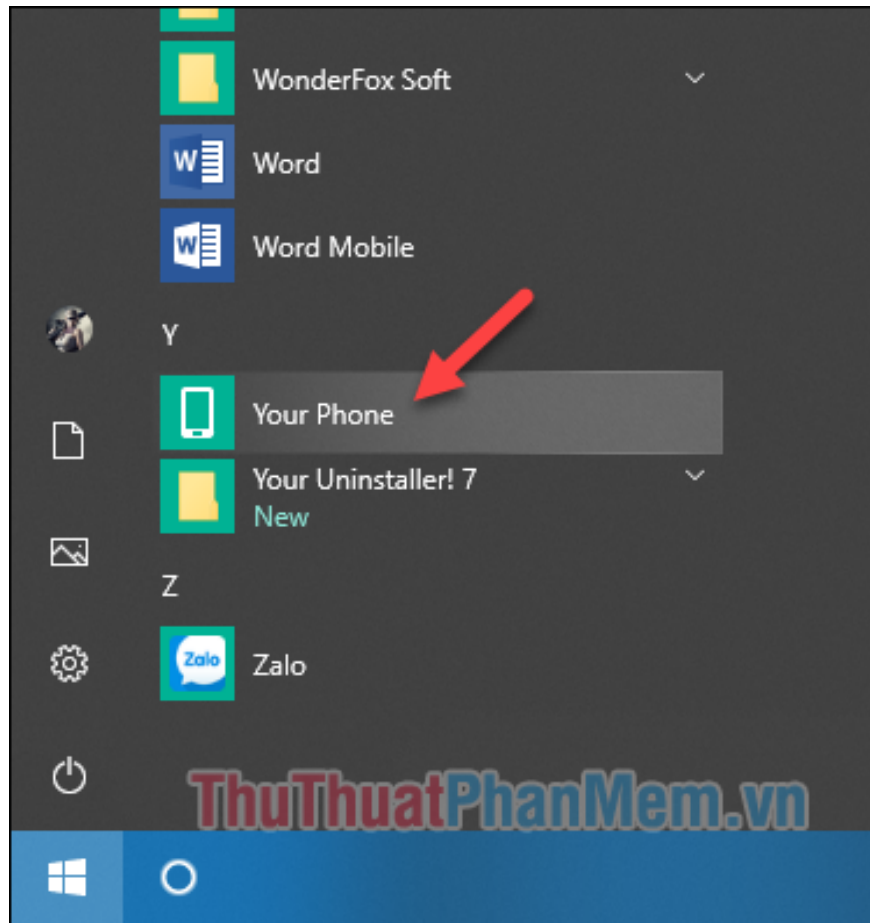

After logging in, the software will require some access to your photos and messages.

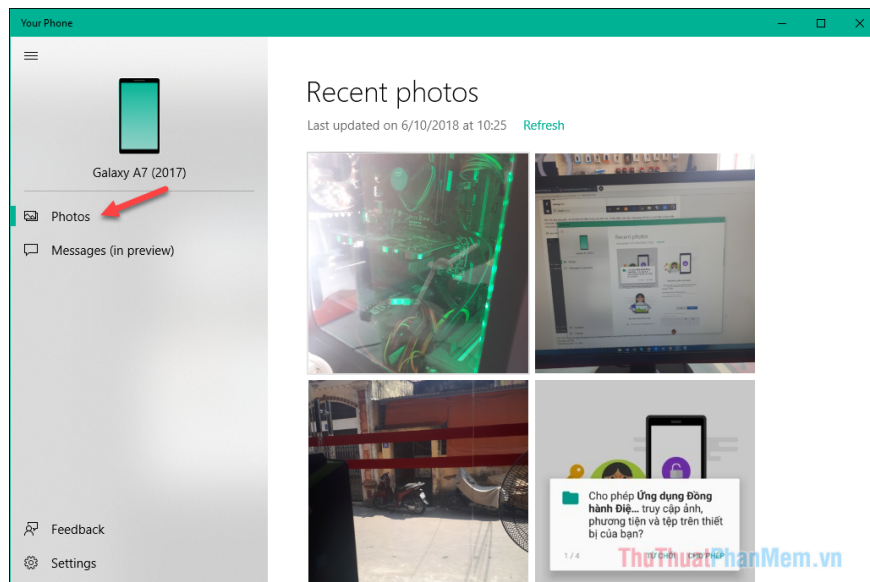

Step 8 : Log in finished in the settings section you will see your phone is connected.

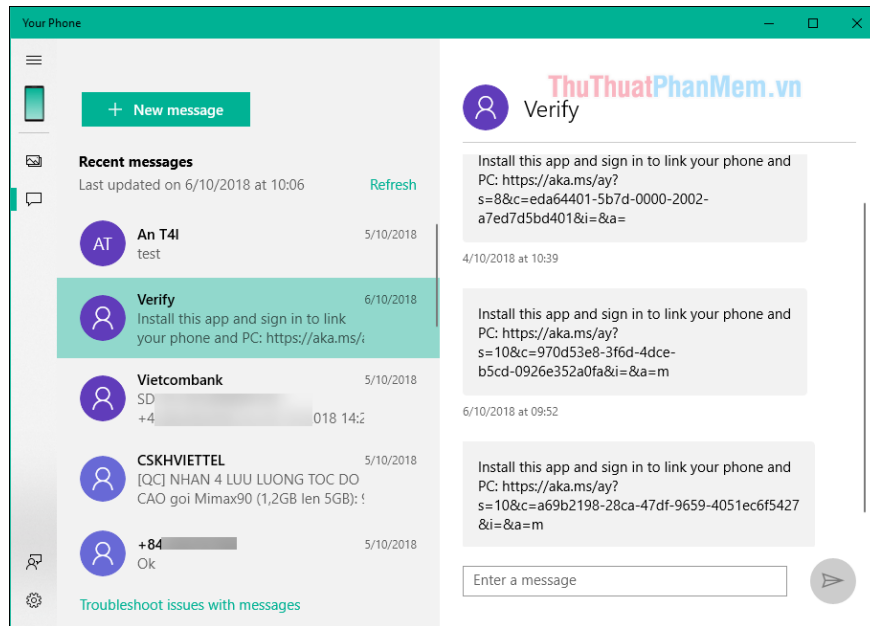

Step 9 : Open Your Phone app in the start menu:

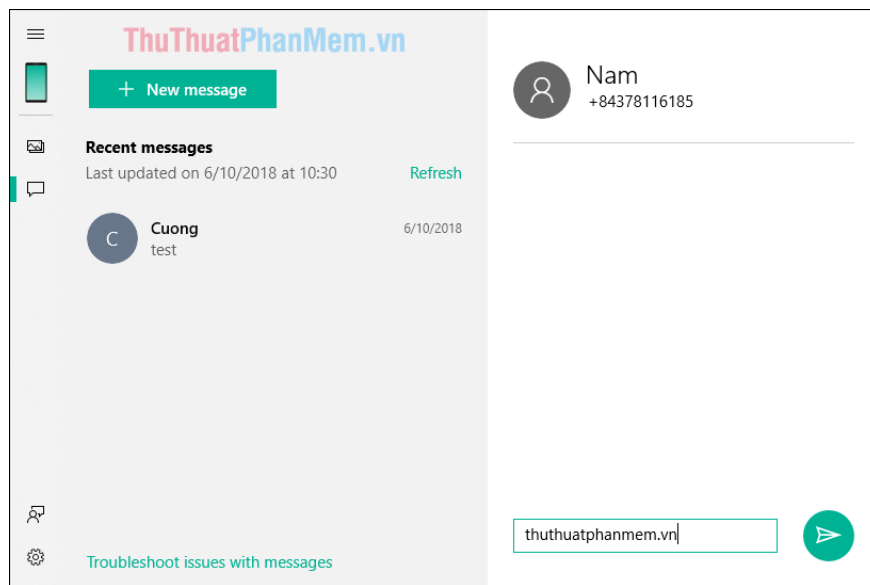

Step 10: When you open the Your Phone app, you will see that the phone is connected and we can see the pictures in the library on our phone.

Similarly, in the message section, people can see all their messages:

Not only see the message, you can reply to the message or send a new message to others easily:

Although there are only 2 features that are viewing images and messages on the phone, but Your Phone app also gives us a fairly new and handy experience. Microsoft is still developing Your Phone, so there may be new features added in the future. Wish you have a good experience.
